In the nine houses which we have built on the Boulevard des Capucines, nearly all the apartments are let; fifty-three out of fifty-six are occupied; the shops alone are unproductive, which is owing to the close neighbourhood of the unfinished constructions of the opera; but as soon as that edifice shall be completed, which will probably be this year, the whole quarter will assume a new physiognomy, and the shops will then acquire the value which is assured by their situation on so central a point.

To resume, in these nine houses the tenements let produce 1,078,000f; the approximate rent of those still unoccupied is not more than 154,000f.

On the Boulevard Malesherbes, the three houses between the Madelaine and the church of St Augustin are almost entirely let; there is only one apartment vacant, and out of fourteen shops, four only are unoccupied.

The letting of the other houses above the church is less advanced: they are, it is true, of more recent construction; however, out of sixty-four apartments, forty-six are let.

The total rent of the tenements let on the Boulevard Malesherbes is 440,750f: and of those still to let, the total may be estimated at 258.550f.

In the Rue de Marignan we have let to the amount of 348,250f; and have still to let for only 72,600f.

In the Quartier Monceau, the two houses we have built in

Digitized by Google

the Avenue Wagram have been but very recently finished. They are expected to produce a revenue of 42,000f.

On the Boulevard Prince Eugene, the tenements let produce 800,000f; those still unoccupied are estimated at about 1,200,000f.

This result must must be considered as satisfactory when it is remembered that these buildings were only definitively finished in the course of 1864, and that several buildings by our neighbours are not yet terminated.

The embarrassments arising from works of this nature necessarily prevents the flow of the population towards new quarters; but, by the active circulation which now animates this boulevard, it is easy to see that it will become one of the principal arteries of Paris. Already wholesale traders are becoming sensible of its advantages, and are installing considerable establishments there.

At Marseilles, the houses producing rent are as follows :—

	f. c.	f.
1. 11 houses, Rue Imperial, representing a capital of	3,539,398 88	
And of which the revenue is estimated at		306,670
2. 64 houses, Quai de la Joliette and d'Arenc, costing	8,240,062 55	
And expected to produce		726,000
3. 10 houses at the Catalans, costing	200,513 0	
And expected to produce		26,000
	11,979,974 43	1,059,130

The total outlay is therefore, 11,979,794f 43c, estimated to produce a revenue of 1,059,130f, 8.84 per cent.

The houses in the Rue Imperial could not be finished till the last months of 1864. As for those of La Joliette, they will not be much sought after till the works of the Rue Imperial shall be completed.

The rent of the tenements already let, however, now amounts to the sum of 277,000f.

The houses still in course of erection figure in our inventory of December last for 13,269,684f 14c, representing the sum expended up to that date.

The further outlay required for completely finishing these houses will be about 12,630,000f, which will raise the total cost to about 26 millions.

The following are the details of these buildings :—

At Paris.

Four back buildings are erected, Boulevard Malesherbes, to utilise the whole of the ground, of which only the front towards the boulevard had been built upon. The total expense will be 1,000,000f; the revenue may be estimated at 95,000f.

At Marseilles, the buildings commenced are all in the Rue Imperial. They comprise 66 houses standing on 18,452 square metres of ground. The total outlay will be 25,000,000f; the revenue may be estimated at 110f per metre, which for the 18,452 metres built on, will make 2,029,720f, being at the rate of 8·12 per cent. on the cost.

These buildings are not all in the same state of forwardness; in some, the inside fittings are in progress, whilst the walls of others have scarcely reached the height of the ground floor. The former will be ready for occupation this year, the latter not till the first months of 1866.

Thus the houses finished and already productive, represent a capital of 123,012,535f 62c; those now building, and which will be successively completed, the last, at the latest, during the coming year, will represent a capital of 26,000,000f; in all, 149,012,535f 62c; the total produce of which will not amount to less than 8·20 per cent. equal to 12,190,000f.

These houses therefore constitute from this time a certain basis of income which will daily increase, and is destined to further improvement by lapse of time.

To resume, all our great constructions in Paris are terminated; we have got through that first stage during which the expenditure is heavy and the receipts null or of small account; we now enter, on the other hand, on that in which the houses occupied bring in fixed and certain revenues, exempt from all the risks to which those of other industries are exposed. We have at last reached the period when the houses represent an investment than which none are safer or more desirable, or tends more to increase the capital employed.

At Marseilles, our buildings, less advanced than in Paris, will be nearly all completed in the current year, and we shall have no occasion to undertake others to finish the new quarters; the sale of building ground assures us the co-operation of builders whose activity and intelligence guarantee that they will complete our work.

Sales of ground form the only eventual element of our enterprises.

There is not the least uncertainty as to their having a favourable issue, for ground purchased at reasonable prices and situated in improving quarters constantly increases in value; but the realisation more or less early of the results expected depends on a multitude of circumstances. Our ground in Paris, on the Boulevard Malesherbes, in the Quartier Monceau, and on the Boulevard du Prince Eugene, cannot fail to become more valuable as those quarters, still quite new, shall be built on and inhabited; those of La Joliette at Marseilles, isolated from the centre of the town, have already greatly profited by the extensive works we have accomplished.

The last-mentioned ground will become much more valuable when the Rue Imperial, which connects it with the old port and the Cannebière, shall be cleared of scaffolding, and when, presenting its double row of handsome houses, it shall have caused a current of movement and life between the old town and the new.

The increased value which this ground will acquire is, we repeat, absolutely certain.

All our efforts must tend to promote their realisation as soon as possible; for this end we bring all the resources of our society into play; our action ought chiefly to be directed towards Marseilles, for there we possess the largest extent of ground.

In the first place, as we have already said, the important building operations undertaken by us have had the effect of encouraging individual enterprise to imitate our example, and to take part in a work which has been so energetically commenced.

We moreover grant great facilities to all builders presenting satisfactory guarantees of solvability.

We even advance them capital in certain cases, and help them to find the complement of the resources which may be necessary for them.

These facilities impose no risk on our Company, for we have to do only with contractors of undoubted solvability, and we obtain from them mortgage securities in addition to those on the ground ceded.

These general indications were necessary to enable you to rightly appreciate the progress and importance of our operations.

On the 31st December last we possessed the following superficies :—

At Paris.	Area.	Cost Price.
In the Quartier Monceau	54,322 sq. m.	61... 4,914,944f 81c.
Boulevard Malesherbes	17,237 —	16... 4,018,930 53
Boulevard des Capucines	1,484 —	... 1,200,000 0
Boulevard du Prince Eugene, and on other points	36,890 —	65... 2,988,746 99
	109,934 sq. m.	42...13,122,622f 33c.
At Marseilles.		
At La Joliette	226,547 sq. m.	07...19,052,688f 35c.
In the Rue Imperiale	19,626 —	0... 4,841,365 0
At the Catalans	150,000 —	0... 5,700,707 82
	396,173 sq. m.	07...29,594,761f 17c.

Making in all 506,107 square metres 49 hundredths, costing 42,717,383f 50c, without counting interest.

The total superficies now presents at Marseilles a decrease of 113,876 square metres as compared with the quantity we possessed on the 31st December, 1863.

15,993 square metres have been employed for our own buildings.

67,083 square metres have been the object of various combinations with other persons in order to determine them to erect buildings on the ground.

The profit on these last operations, realised under the conditions already stated, may be estimated at the sum of 10,861,658f 52c, of which the part imputable to the Rue Imperial, after deducting the interest lost, 8,004,024f 65c, and that imputable to the ground at La Joliette is only 2,857,633f 87c.

This profit, though due in a great measure to the facilities of all kinds granted to the builders of our choice, nevertheless shows the increased value which has already accrued to this ground, and the still greater which it will acquire in a town like Marseilles, destined to become, after the cutting of the Suez Canal, the first commercial port of Europe.

This cutting is already effected. The Suez Canal is open through its whole length; boats, of a very small draught it is true, can now cross the isthmus and pass from one sea to the other. This great problem is therefore solved.

The work which remains to be executed consists only in deepening and widening the canal so as to admit the largest vessels. This is merely an operation of dredging, requiring no works of art, and can be entirely completed in three years. When the work shall be accomplished, when the Mediterranean, connected by this channel with the seas of India and China, shall again become, as in ancient times, the great centre of universal trade and commercial enterprise, Marseilles cannot fail to acquire an importance of which the port of Liverpool can scarcely give an idea.

This perspective, therefore, is not so very distant, every day brings it nearer; already English merchants, foreseeing the future of Marseilles, are beginning to found establishments in that city, and, what more especially interests us, English capital eagerly engages in land speculation at Marseilles.

This movement of English capital promises a fine future for our ground at the Catalans, which covers an area of 150,000 square metres, and where the construction of a new port has become inevitable at an early date.

The last portion of our assets consists of mortgages, resulting from the sales we have successively effected, and of other securities.

Digitized by Google

The following is a summary of them :—

	f.	c.
Divers purchasers	39,226,965	98
Divers debtors	3,577,434	14
Negotiable securities in hand	1,678,776	94
First establishment to pay off	763,546	48
Shares to be issued	3,333,000	0
	48,579,723	54

Of all these securities, the first, consisting of mortgages, present the most substantial guarantees, and their proceeds will commence, from this very year, to contribute in a large proportion to the lightening of our burdens. The repayment of the greater part of these claims is, indeed, to be effected by annual instalments, but that mode of reimbursement suits our society, which itself refunds its loans by annual payments.

The produce of these yearly instalments, which represent about 6·40 per cent. of the capital of the credits, will add every year to the revenue of those of our estates which are or shall have been in a state to produce returns.

The other values are either redeemable by our revenues, or easily realisable, like the shares or bonds which we still have on hand.

To resume, the principal parts of our assets may be ranged in two groups :—

The first, which comprises the houses built or in course of erection, and the mortgage credits representing, at cost price, a capital of 180,518,511f 20c, the produce of which may be estimated in two or three years' time at 7.45 per cent., or a revenue of nearly 14,000,000f, which, when realised, would suffice to pay the interest of all our loans and give our shares a dividend of 8 per cent.

The second, consisting of ground, the cost price of which, without any charge for interest, is 42,717,383f 50c, and which presents, at the most moderate valuation, an increased value of at least 30,000,000f,—an increased value of which, according to the natural order of events, the realisation cannot be long delayed.

As to our liabilities, they are as follows :—

	f.	c.
Capital	80,000,000	0
Bonds	35,550,292	57
Credit Foncier	41,099,661	3
Owing on buildings, ground, and current accounts	65,191,437	75
Statutory reserve and sinking fund	125,119	97
	221,966,511	32

The Credit Mobilier has continued to lend us its good offices with a liberality for which we feel bound here heartily to express our gratitude.

We shall liberate ourselves towards it by means of the bonds which we shall continue to issue.

The amount of those created during the last year has only been 6,054,690f.

These securities begin to attract the serious attention of capitalists; they have given rise latterly to a regular movement of investment.

To use more largely resources of this nature we wait till the revenue returned by our houses shall present the most indisputable guarantees; at present the loans of our society stand on a level with the best established loans, since they offer for security large and certain revenues derived from house property situated in the best conditions, besides the other eventualities of profit arising from the resale of our ground; lastly, since the payment of the interest of our social capital, which is eighty millions, cannot be made till after paying the interest of all our loans.

You have seen, in fact, that our assets, on the 31st December last were composed of the following elements :—House property yielding rent, 123,012,535f 62c; outlay on buildings in progress, 13,269,684f 74c; land entered at cost price only, without counting interest, and likely to produce, after the increased values already shown, a profit of about thirty millions, 42,717,383f 50c; credits with privilege of sale, 39,226,965f 98c; sundry securities, 9,352,757f 56c; in all, 227,579,327f 40c. These assets are only charged with two mortgages given on a part of our estates, viz. :—To the Credit Foncier, for its loan of 41,099,661f 3c; to the holders of bonds of the Old Company of the Ports of Marseilles, 9,770,000f.

We are consequently in a position truly to assert that our bonds present guarantees equal at least, if not superior, to those of the best mortgage investments.

But before proceeding to give the analysis of the account of profit and loss for the year, it is our duty to say a few words about the law suits which certain shareholders of the Ports of Marseilles brought against our society.

Public opinion did not mistake the character of these law suits, but these attacks received such publicity, so many facts were asserted contrary to truth, and such strange comments made, that it is impossible for us to omit publicly establishing here a situation already well known to you, and which a systematic spirit of disgraceful speculation could alone have attempted to misrepresent.

In 1862, at the time when the President of the Council of the Compagnie Immobilière was treating with the city of Marseilles for the purchase of the ground of the Rue Imperial, the financial condition of the Company of the Ports of Marseilles was most precarious. That company was destitute of resources and of credit, all its works were suspended, and its shares, both at Paris and Marseilles, stood at the nominal rate of from 400f to 435f, that is to say, they were from 14 to 20 per cent. below par.

These shares had previously fallen as low as 292f 50c.

The affair of the Ports of Marseilles remaining isolated was and could not long remain in great embarrassment. In fact, it will suffice to glance at a map of Marseilles, to see that all the ground composing the assets of that company was beyond the bounds of commercial movement, that they were only connected with the old port, the central point, by a long circuit and by quays exposed in summer to the heat of a tropical sun, and swept in winter by a wind which often rendered them impassable.

For this ground to be made productive, it was indispensable to connect it directly with the town, from which it was separated by a mountain, on which were the poorest and most healthy quarter of the old town.

The Emperor, when passing through Marseilles in 1860, decreed the opening of the Rue Imperial, a street which, while letting air and light into that portion of the old town, would require the hill to be lowered and bring the site of the ports into easy and direct communication with the trading and manufacturing part of the town.

If the Company of the Ports had possessed credit, it might have found in the execution of the Imperial decision, which was dated 10th November, 1860, the opportunity of retrieving its situation, and giving a fresh impulse to its works.

No other party had a greater interest in the measure prescribed by the Imperial decree, no other could turn it to so much advantage.

In fact, besides the profit presented by the resale of the ground which the city of Marseilles offered to cede, on both sides of the Rue Imperial, on conditions which must be considered as an encouragement to the making of that great street, the Company of the Ports was able by the same operations to give a real value to the whole of its possessions.

But its resources were so far exhausted, its credit sunk so low, that it was powerless to raise even the smallest loan. How could it, in such a predicament, compete for the purchase of the ground in the Rue Imperial, the opening of which was nevertheless its sole chance of safety?

The Credit Foncier had, in 1861, refused it a loan of 5 millions, after having caused an inquiry to be made into the situation of that company, by its own chief of the division of finance, who decided against the loan in a well argued report, which contains the following passage :—

"The Society of the Ports of Marseilles is evidently in a very critical state, and if it does not promptly succeed in procuring, some way or other, the capital it so urgently needs, it will be in danger of foundering, in spite of the land it possesses."

The situation of the Company was such that it was compelled to abdicate in favour of a clever contractor, to whom it left, for ten years, the absolute power of letting or selling the estates, and to whom it ceded half the surplus value of its shares after their reimbursement at par.

It was not till two years after the signature of the Imperial decree that M. Emile Pereire, till then a stranger to the affairs of Marseilles, yielding to pressing solicitations, decided on purchasing the ground in the Rue Imperial.

The council of the Ports of Marseilles then sought our President and made proposals for an amalgamation.

The council of that Company was then very sensible of its inability to retrieve its affairs, and wanted to place its interests under the protection of a society whose credit was well established.

The Societe Immobiliere was, in fact, in an excellent position : it possessed most valuable estates in Paris; its shares gave an income of 10 per cent.

The purchase, by its president, of the ground in the Rue Imperial, at Marseilles, further augmented its elements of prosperity.

That ground had been purchased by Emile Pereire in his own personal name, the Societe Immobiliere being at that time unable, owing to the terms of its statutes, to extend its operations beyond Paris; but M. Emile Pereire, faithful to all his antecedents, had determined to transfer to the Societe Immobiliere the exclusive enjoyment of the advantages attending that purchase, which he transferred to it purely and simply on the same conditions as he had obtained it, as soon as the society should be in a position to accept it by the extension of its statutory faculties.

What is still more, in order to have no preoccupation of personal interest, to mark still more completely the position he meant to take in the projected amalgamation in which he was to figure by name in the statutes in the new Society as contributing the ground of the Rue Imperial, M. Emile Pereire had declared that he would not retain for himself any of the 36,000 shares which he had a right to take at the par of 500f, and notwithstanding the premium of 200f, which those shares then enjoyed, he had beforehand completely relinquished them to the societies of credit in the administration of which he was concerned.

M. Pereire even declined to retain a profit of two millions produced, before the fusion, apart from the purchase of the ground,

A SUPPLEMENT, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 29th of October,* 1864, *will be published by the* ECONOMIST *on the 27th instant.*

The INVESTOR'S MANUAL *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE PRESENT DISORDER OF THE FINANCES OF INDIA AND THEIR TRUE REMEDY.

In the autumn of 1862, when Sir Charles Trevelyan was sent to India, after consideration and reluctantly we ventured to object to the appointment. Putting aside the publication of the Madras despatches and his controversy with Mr Wilson, we said: "Sir C. Trevelyan has many eminent qualities—"great industry—great acuteness—an ardent though ill regu-"lated public spirit, but he was never a safe man: he never "had a sound or simple judgment." We alleged that he had been called "an incalculable person,—that no one could "predict what he would do next, how far he would fall "from his legitimate orbit, whose territory he would invade "or trespass upon." It is evident that those unfavourable anticipations have been more than confirmed by the event. Sir Charles Trevelyan's final and most original Budget was so "incalculable," that Sir C. Wood said he hardly knew how to believe it, so much was it the reverse of all he expected; it was so ill-judged that the productive part, the taxes imposed and the loan announced already have by superior authority been retracted and withdrawn; that the great tax remitted must probably be reimposed. Even more, this Budget was a most curious "invasion "of the territory" of his successor. Mr Massey arrived just in time to hear Sir C. Trevelyan announce his singular measure. The new Finance Minister landed to hear his best supplemental tax repealed; inferior taxes,—psuedo-taxes, we may call them, for they will not exist,—substituted in its place; a policy proposed of continuous loans. By his last act Sir C. Trevelyan made a Budget, heaping on him every difficulty, and such as no other man *could* have made. This conclusion appears to justify the objection we raised to the original appointment, if any facts whatever could justify them. We feared much, but we hardly feared this.

The withdrawal of the export duties by the Secretary of State spares us, happily, much of our work. It would now be "slaying the slain" if we went through in full detail all the objections and arguments which we had amassed on this subject. But there is much in the present state of Indian finance which signally requires careful attention, and this cannot be wholly disentangled from the unfortunate, though abortive, expedient which Sir Charles Trevelyan permitted himself to suggest.

The first question in all such cases is, What are the facts? What is the present state of things? It is as follows:—By the accounts appended to this article, it will be seen that on the 30th April, 1864, the last day on which we have positively real accounts from Calcutta—accounts involving no conjectural item—there was a small surplus, a surplus of 78,347*l* in Indian finance. But, according to the best anticipation, this satisfactory state of things is now wholly changed; its contrary is introduced. By the Budget estimate for the year ending 30th April, 1865, which is based on eight months of experience and four months of conjecture, there is a deficit:—

	£
The expenditure is	46,628,249
The revenue.....	46,284,106
Deficit	344,143

This time last year, Sir Charles anticipated a "*secure*" surplus of 823,288*l*. But the expenditure has increased, the *net* opium revenue has much diminished, and the Budget estimate about which Sir Charles was so confident has proved to be altogether in error. It would not seem that in such a position when expenditure has, from causes which we will explain, increased and is likely to increase, it was desirable to take off efficient taxes. To take off taxes in the face of a deficit is not a natural proceeding; it may perhaps be right, but it requires a careful justification. Sir Charles, however, removes the income tax, which in 1864-5 produced 1,236,490*l*. Of this, 785,350*l* falls on the year 1865-6, and 551,140*l* on the year following. After so doing, he makes an estimate for the year 1855-6 as follows:—

	£
The expenditure is	47,186,930
The revenue.....	46,488,760
Deficit	698,170

—a very unsatisfactory statement, especially as the further loss of half a million is impending by the abolition of the income tax.

To compensate for this great deficit, Sir Charles proposes—

	£
Export duties amounting to	390,000
A loan of	1,200,000

both of which have now been disallowed by Sir Charles Wood.

Digitized by Google

There is no insuperable objection to export duties. If it does happen that any country possesses a singular facility of producing any article—a facility so peculiar in an article so desirable, that a tax on exports will still leave it superior to all its rivals, and will not diminish the consumption of the article exported, an export duty is not only justifiable, but if money is wanted most expedient. The foreigner will, in such case, really pay the extra price—the *tribute* price of the article which he so much wants, which he *must* have, and which no other country can afford him on comparable terms. But the mere statement of these conditions shows how rarely export duties can be beneficial, or can be advisable. Almost always they restrict the consumption of the article exported, and so lessen the trade and diminish the wealth of the nation which imposes the tax. The object of trade is to get your imports cheap. Exports are profitable, but they are profitable because they bring *back* something. They are the currency with which you buy, and if you tax your currency, most likely you diminish your purchases. You wont get so much; the national supply of the aggregate luxuries and comforts of life will be diminished. Of all duties the most dangerous is an export duty. You *advance* it; you pay it as it goes away, and it is very uncertain if you will ever get it back again. An import duty is, in a simple state of society at least, paid *at first* by the foreigner who brings his goods here, who comes to sell. The primary incidence is on the foreigner, and he takes the chance of throwing the secondary incidence upon the native. But in the case of an export duty, the certain primary incidence is on the native exporter, it is only the contingent secondary incidence which can be shifted to the foreigner.

In the principal articles taxed by Sir Charles Trevelyan, there is no likelihood of their being so shifted; there is every reason to believe that they would be heavy weights on Indian industry—that they would diminish the comforts of Indians by cramping the currency in which they buy.

Sir Charles Trevelyan subjected jute, wool, tea, and coffee, to 3 per cent. export duty. Jute is, among all these, perhaps the article in which India has the greatest natural advantage, but it is also the article which is in a state least fit to bear an export duty. Since the cotton famine its export from India has increased thus :—

Export of Jute from British India.

	£
1860-61	409,283
1861-62	571,736
1862-63	811,108
1863-64	1,598,084

But the trade of textile fabrics is again undergoing a catastrophe. The American war is at an end. Before long the price of cotton will tend to assume its normal limits; before long we shall know what is the cheapest rate at which it can be produced. Jute, wool, and other such materials, will now be subjected to a competition from which, until lately, they have been exempt. The worst possible moment for imposing an export duty is that in which a natural advantage is much diminishing, and in which a new and probably superior foreign competitor is regaining a precedence he has lately been deprived of. At any rate, while a trade is in transition, export duties are anomalous.—Tea and coffee, again, as Mr Beadon remarked in the Council Chamber at Calcutta, are young and struggling industries in India. It is absurd to say that they have any such advantage, any new and developed favour of nature as would justify a special tax upon them. Sugar is the last subject which we should have dreamed of taxing, for the East Indian sugar-industry has long been rather in a condition of mournful complaining than of remarkable and reducible profitableness. Besides, all export duties are exposed to the great objection which besets the high import duties we now impose at Calcutta. They are taxes on European, on English industry and capital. The only possible—the only conceivable advantage which we derive from an Anglo-Indian Empire is our trade. We are burdening that trade already by import duties which are, in fact, protecting duties on native India manufacture; and Sir Charles further proposes to tax the *exports* which our capital and enterprise at considerable risk, and at the cost of expatriation, send from India.

Sir Charles Trevelyan fancies (if we understand) that he does this in the interest of the natives. But if he does so, he is their worst enemy. As we should have suspected beforehand, meaning to be a warm and sincere friend, he does them great and irreparable harm. The only means by which we can really help India—the only solvent which we can really apply to the arrested and unimproved semi-civilisation which has existed there during so many ages—is commerce; and commerce means capital, and capital means English capital. What, then, is the result of these suggested loans? Only this, that, for a supposed idea of benefiting the natives, you hinder and burden the only agency by which they can be effectually improved.

The loan is even more objectionable. It was put forth as specially demanded by public works. But there is no particular outlay in public works now which there has not been for three years past.

	£
1863-64	5,375,523
1864-65	5,685,817
1865-66	5,888,640

It is impossible to say that slight additions to a public works charge such as these justify a public loan—or excuse the postponement of a burden to posterity.

And even if the outlay were of much greater magnitude there would be irrefragable cogency in the argument which Sir John Lawrence addressed to the Imperial Legislature at Calcutta. "His opinion," he said, "was that the only "true economy was to live within one's income. When a "Government, like a man, once became prodigal, not only did "its sense of economy become relaxed, but habits of extravagance became its second nature, accompanied, as was "always the case, by feelings of anxiety and constraint. Now, "if there was any country in the world in which the Government should be light and free, and be like a strong man, "unshackled and ready for the race set before it, it was here "in India. Here we were a few governing many; we did not "know what a day or an hour might bring forth. Without "any fault of ours, we were unable to say what might next "happen. Surely, in such a case it was of the utmost importance that we should not incur debt, so that when the "time came, we should have greater ease in borrowing money "and less discomfort in bearing the amount of an additional "debt. But even admitting that there was force in the argument that we should make future generations bear the "burden of some portion of the expenditure necessary on "military works, ought we not to remember to what extent "we had already involved our successors by what had happened during the last seven or eight years? The Indian "debt was little more than sixty millions when the mutiny "broke out, now it was more than ninety millions. Here "we had added upwards of thirty millions to our burden. "Surely that was enough for future generations. Then it "must be borne in mind that, in incurring this expenditure "for military works, you could not recoup yourself; nay, it "involved a constant future expenditure of at least eight per "cent. on the capital sunk to provide for wear and tear. "Having very little money to spend in that way, we must "arrange for an annual expenditure of 1,000,000*l* for the "maintenance and repair of the works in question." Nothing is to be added to this refutation of Sir C. Trevelyan by Sir John Lawrence, of the Finance Minister by the Viceroy, whose Minister he is. Now that we know how sound are the opinions entertained by the supreme authorities, we are puzzled to think why a subordinate has been allowed to make all this confusion.

But the question—the critical question—returns. Leaving Sir Charles Trevelyan aside, what is it that is the *matter* with Indian finance? Why is there a deficit in it? Why, after having once been placed in a satisfactory position, does it again obtrude itself on the attention of the world?

The answer is, that India is in a state of transition—to express the matter familiarly, from having been an "*out*-of-"the-way uncommercial country it has become an *in*-the-way "commercial country," and the first consequence is a great rise of prices, and the second consequence an inevitable augmentation of the expenditure of Government. A great agency has been at work. The abstract political economists say, and justly say, that the *efficiency* of Indian industry has been increased. They mean this: every nation has the power of producing some commodities or it could not keep itself alive; but most

Digitized by Google

nations have but little power of producing articles desired by people in other nations. while a smaller number of other remarkable nations have a great natural facility. from some cause or other of climate, soil, or inherent character, of producing things usually coveted by the mass of mankind far away from their own homes. The people of Nova Zembla have. in this language. an inefficient industry, because they produce little which other people want; the people of China and those of England have, on the other hand, an efficient industry. because the Chinese, from the natural adaptation of their country to tea and silk, and the English, from industrial skill and habits, have a great power of producing what other people most want. A nation which easily produces desirable things is an *efficient* nation; a nation which does so with difficulty is an inefficient one.

Three great causes have within a very few years begun to change India from the second class into the first—to make it a very *efficient* country, while it used to be a very inefficient one. The first of these were the English railways: we have spent 50,000,000*l* in making Indian labour go further than it used to do; next came the Russian war, which gave an enormous stimulus to the cultivation of Indian seeds; last the American war, which has given an enormously augmented value to Indian cotton. The combined effect of the three causes was this:—The Indian ryot found his seed and cotton enormously raised in value, he found that the rest of the world wanted them much more than heretofore, and at the same time the new railways gave him unthought of means of sending these products to the place where they were most wished for. The machinery of conveyance was indefinitely accelerated just when the desirability of the products conveyed was incalculably enhanced.

The first effect of such an increased power of producing desirable productions—for this is what an increase in the efficiency of industry really means—is a considerable rise of prices; labour and commodities both rise in value. Formerly, India was like a small parish in the North of Scotland, now it is like a parish near London. Formerly it could not sell most of its products at all, and those it could sell it had to sell very cheap. Now it can sell all of its things, and some of them at very good rates. The market of the world has been opened to it, and the result is a necessary rise in the saleable value of all its commodities.

Labour used to be very cheap in India, but it is becoming less cheap. Sir John Lawrence tells us that the great rise has, as was beforehand likely, has occurred almost exclusively near the railways and in other places having exceptionally advantageous instruments of communication and traffic. The new cause produces the greatest sudden effects where it acts most intensely, but gradually those effects will be propagated through the whole country, the prices of commodities and the value of labour will be raised, if not to a European, at least to a semi-European standard; and the old state of India, where "man's life was cheap," and most products of his work of trifling value, will entirely pass away.

This rise in the prices of India is often mixed up and confounded with the effect of the discovery of gold in Australia on the prices of countries in general. And the two agencies are connected thus far;—the quantity of the precious metals required by the augmentation in the efficiency of labour in a semi-civilised country like India has been more easily obtained by—could hardly have been obtained without—the unusual supply which Australia and California afforded. But the peculiar cause affecting India is, nevertheless, distinct and separable from the general cause affecting all countries. The whole world is liable to an increase of prices consequent on the more economical production and more extensive supply of new gold. But India has besides a special cause, producing a *local* change of value. The increase in her power of producing what the world desires has actually raised the price of all her more accessible regions, while it is still a question and a controversy whether the diffused agency, the production of new gold, has had any effect on the general prices of the world at large.

Such an economical condition has and must have grave effects on its financial condition. You cannot govern a dear country as cheaply as you can govern a cheap country. The cost of the services of administration and Government augments as the price of all other services augments. Especially in India, where the country is governed by foreigners, is the cost of living an imperative item in the cost of men. Lord Macaulay said, "Men will not be banished to the torrid zone for nothing," and they will want more if they are banished to a dear country than if they were banished to a cheap one. They go there to save; their idea, their aim, their solace is to come *home* and have competence and comfort. But if prices rise, saving becomes difficult, and salaries must rise, or fewer and worse men will go thither.

Another cause is just now at work to increase in India the cost of Government—the necessity of providing suitable houses and suitable comforts for the European army. When we governed India by a native army it was cheap and dangerous; now that we govern by an English army it is cheap and dear—dear not only in pay, but in the accessories and accommodation which experience shows to be necessary for the health and comfort of masses of English soldiers in a foreign climate. We are getting to comprehend that the worst economy is to squander *lives*, but it is not less true that economising lives means spending *money*; and that the consistent adoption of our new and sounder policy, though abundantly beneficial to the nation, has the necessary bad accompaniment of augmenting the expenditure of Government.

How, then, is this expenditure to be met? We have got, *and it is well we should distinctly know our position*, into a new region of financial difficulty. When Mr Wilson went to India the difficulty was the vast military expenditure consequent on the mutiny. Except as to the augumented cost of the comforts and necessaries of the new European army, the effects of the sepoy mutiny have attained their end and worked themselves out. The bad effect of adversity on finance is over; we now suffer from the malady of prosperity.

We cannot, at the end of this long article, indicate so fully as we had intended what financial measures it is the duty of the Indian Government to adopt. Sir Charles Trevelyan's remedies, his income tax, and his loan have been disallowed; but the disease remains. We cannot doubt that the reimposition of the income tax, or some equivalent, should be and must be part of the new scheme. We are giving India wealth, and we should tax that wealth. We should not impose burdens on the trade by which we are regenerating and awakening India; but we should tax the wealth which that trade produces. The native comfort, ease, and opulence which English rules creates, maintains, and improves, ought to defray the cost of that rule. It is childish to create wealth, and yet be poor; to enable others to amass riches, and yet to refrain from compelling them to contribute their just share to the expense of their accumulation.

THE DEBATE ON THE BOROUGH FRANCHISE.

THE adjourned debate in the House of Commons on Monday night on Mr Baines' Bill for the lowering of the borough franchise was not only the best debate of this Session; it was the best that has taken place for many Sessions; it was probably the best that has ever been heard on the Reform Question since the great days of 1832. It was remarkable for many things: it was remarkable for the earnestness with which nearly every one who spoke addressed himself to the real matter in hand; it was remarkable for the far greater closeness of reasoning and grasp of the subject shown for the first time by the opponents of the measure when compared with its supporters; it was remarkable for the outspoken candour with which the Conservative Liberals expounded the difficulties of the question, and the sort of half perplexity and half feebleness with which the more advanced Liberals evaded or ignored them; it was remarkable for a sort of change in the position of the two parties—the opponents of a reduction of the franchise assuming the aggressive, and its advocates being driven to a defensive and almost apologetic tone; it was remarkable for the curious infelicity with which Sir George Grey, the only Ministerial speaker, while declining to pledge himself to any distinct measure or indeed to any action on the subject at all, contrived deliberately and elaborately to commit the Government to the one only doctrine which all thinking Reformers are now beginning to regard as an essential error—viz., that *extension* of the suffrage is to be sought by the indiscriminate *lowering* of its pecuniary limit; and it was remarkable, finally and especially, by a certain indescribable physiognomy and tone pervading the whole House, and almost as perceptible on one side as on the other, which expressed unmistakeably to all observers that, as regards the main aspect of the Reform Question, Parliament at length knew its own mind, and had resolutely and finally taken up its ground. All this was the more striking, because occurring on the eve of a dissolution, and when unusual doubt and obscurity hang over the future course of political events and the future organisation of parties. Much that was said and implied otherwise than by words would have sounded like insolence and cynicism in the first days of a new Parliament:—it was earnestness and courage full of meaning in the last days of an expiring one. The attitude, too, and the *tone* of the two sections of the Liberal party were in marked contrast. Mr Horsman, for instance, knew exactly what he meant, and said it certainly in no measured language:—Mr Baines, as clearly, did not know what he meant; or if he did, did not care or did not dare to say it.

Several points were made clear in the course of this memorable debate. The *first* was that a 6*l* franchise, *naked*, by itself, and without context or correction, will never be allowed to pass. The opponents of it, before conscious of their superiority in strength, became then conscious of their superiority in argument. It was true the majority against it was only 74 in a House of 500 members—though that is a large adverse balance; but that majority was given by a House in which the Liberal party has an unquestioned preponderance, and under a Government every member of which (who voted at all) voted for the Bill, and which declared its adoption of the *principle* of the measure. Moreover, it was pretty notorious that of the 214 who voted for the second reading, not more than 50 probably wished or intended that the Bill should pass. Many voted for it in order to stand by their party and their official leaders; many more because they were pledged to their constituents to do so; most of all, because they were honestly of opinion that there ought to be an extension of the suffrage in the direction of the working classes, and because this Bill was held to be an expression of that opinion, though perhaps a clumsy and imperfect expression. Liberal members, by supporting Mr Baines, for the most part only wished to say: "We are still true-hearted Reformers, and are bent "upon the admission of the non-electors, in some fashion and "to some extent."

The *second* point was that, as a rule, members are not much afraid to go back to their constituents with the odour of what it is the habit to deem an unpopular vote and unpopular opinions fresh upon them. The truth is, they do not think they are unpopular, and they are beginning to feel confident that they can make a good defence for them, even if they should at first be found so. Members of the Conservative party evidently believe, and we have no doubt they are right, that they will gain rather than lose at the forthcoming elections from having abandoned all shuffling and coquetting and pretending, and taken up a decided and avowed position. Moderate and worldly Liberals have begun to discover or to suspect that the present constituencies are not inclined to be swamped by new admissions, and that though disposed to profess the old tenets of their party, they are not disposed to suicide or martyrdom in their behalf. Thoughtful and conscientious Reformers believe that among their constituents will be found a large section as thoughtful and conscientious as themselves, and who, like themselves, have awakened to the fact that a real and serviceable improvement of the Representation must be sought for in a measure very different from, and far better considered than, Mr Baines' crude proposal. Nay, even advanced Reformers of the more democratic stamp are conscious that even in the most populous boroughs there are two parties among their supporters, and that if they go too far in the democratic direction, they may lose numbers of those whom they most value and most wish to keep. It is not to be denied or disguised that the sentiments of Liberals in the provinces as well as in the metropolis on this subject have changed and grown during the last few years: even Mr Forster, while urging every man to show his true colours, admitted, with the honesty and courage which he has carried with him in his regrettable step towards more extreme opinions, that if all did so, he and his friends might find themselves in a minority which it would require years of toil and training to convert into a majority.

The *third* and most important point was this,—which we briefly intimated in our article last week:—it was made clear to the advanced Reformers, the Radicals of Mr Bright's and Mr Baines' stamp, that they must change their tactics. It was made abundantly evident that a naked, general, unqualified 6*l* or 5*l* borough franchise will never be allowed to pass, and ought not to pass. Mr Horsman exposed the utter discrepancy between the premises and the conclusions of all such measures with a force and lucidity which left their advocates

Digitized by Google

absolutely without reply. He showed that all such Bills were urged upon the House because the working classes ought to be satisfied,—and that such Bills would not satisfy them and were repudiated by them;—because the *élite* of the working classes were intelligent enough and honest enough to be entitled to the franchise,—and no attempt was made to prove that such Bills would admit this qualified *élite* and yet keep out the unqualified and uneducated masses. He showed that Mr Baines' measure and all similar measures had one common and incurable radical defect;—*you could not speak out about them;* you could not pass them by means of the same arguments by which you defend them; you could not plead for them in St Stephen's by the same arguments with which you plead for them at Leeds; to make them go down in the House of Commons you must represent them as settling and final—to make them go down at the hustings you must represent them as mere instalments and facilitating steps,—steps to something better, more extensive, and more logical.

In fine, the House in this debate appeared to us to say, strongly and conclusively, what the ECONOMIST has said humbly but perseveringly for years, to the advocates for Parliamentary Reform: 'Your *pleas* are for extending the suffrage to the best educated, most competent, and most worthy of the working classes—and those pleas are valid and unanswerable. Your *schemes* are for extending the suffrage to a chance portion of the working classes whom you make no attempt to show are either educated, competent, or worthy. Your *pleas* are for giving the operatives a fair share of the representation—and those pleas we advocate, echo, and endorse. Your *measures* (actual or inchoate, immediate or entailed) are for giving the operatives an unfair and preponderating share. Now we are, and have always been, in favour of admitting the working classes to the franchise. We are not so much willing to concede this as anxious to confer it. We *want* the working classes in the electoral lists: we *want* the impression of their influence on the House of Commons. It will be the completer for their ingredient; it will be the stronger for their allegiance; it will be the wiser and perhaps juster for an infusion of their sentiments. But we do not want it, and England would never permit it, to reflect preponderatingly their ideas, to think with their intelligence, to be guided by their wishes, to adopt their tone. We can listen to no measure, we will read for a second time no Bill, which would render such a result probable, or even possible. You yourselves do not wish for such a result, or will not avow that you do; and you must not be suffered to bring it about indirectly, or to risk it blindly. Set your wits to work: you see the problem to be solved: believe, as we do, that it admits of a solution. Bring in a measure of which the premises shall not be at variance with the conclusion—of which the enactments shall provide for the wants and remedy the grievances alleged in the preamble;—cease to take refuge in lazy Bills of mere arithmetic, which any one who knows the multiplication table can frame as well as you; contrive some plan for distinguishing those of the operatives whom every one wishes to admit from those whom nearly every one wishes to exclude; show us how we can enable the stamp of the working class to be felt in the House of Commons in common with that of all other classes, but not to their exclusion or depression; employ your arithmetical ingenuity to discover, not how to enthrone mere numbers, but how to neutralise their undue influence;—in a word, construct and propose an Act which shall do what we are all anxious to have done, and yet shall secure us against what we are all determined never shall be done,—and Parliament will pass such Act by acclamation, will call it by your name, will be unspeakably grateful to you for it, will canonise and possibly even *ministerialise* you as a recompense.'

GENERAL SHERMAN'S PROPOSED PEACE.

IT is one curious indication how little England has understood the United States that for four years we have had prophecies of a coming event about as impossible as any conceivable revolution in the political condition of the world Only at the close of these four years has the reasonableness of the English expectation been tested and found to be absolutely unreasonableness. Prophecies that the political constitution of the United States was likely to be subverted by a successful General have been promulgated freely in England ever since the appointment of General M'Clellan to the command of the Northern army; the characters of all his sucessors have been canvassed in relation to the chance that they, if successful, might achieve the same feat; and when at last General Sherman's great successes were known, and the notion that his march through Georgia was the retreat of a beaten General, exploded, the accounts of his restless and fiery character were read with more than biographical interest, with a sort of presentiment that the political crisis was near. If like prophecies did not hover round General Grant—General Sherman's superior in command, and probably also in military genius,—it was because the simplicity and unambitiousness of his character seemed to be assumed everywhere in the United States. Events passed on without in any degree confirming the fantastic English notion that the people of the United States would be prepared to accept a successful soldier for their dictator, till at length a moment came apparently expressly intended to favour a bold soldier's ambition, if such a one could ever have a chance at all. The most popular President since the time of Washington had been assassinated; his successor was under a cloud through the unfortunate indiscretion attending his inauguration; and General Sherman, the military idol, as it was supposed, of the Northern people, found himself in a position to clear the whole territory of the South-East of the Chattahoochee, of the remaining armies of the Confederacy,—and, as he thought, to gratify the North and conciliate the South by the same bold step. The conciliation of the South, however, involved an act which, in the first place, entirely exceeded his powers as a General, and in the second, would have defeated nearly every end for which the North has waged this long and bloody war. It involved a complete recognition of the absolute State rights of the South, contemplated the surrender of the arms of General Johnston's and the other Southern armies, *not* to to the authorities of the United States, but to the civil authorities of the various rebellious States,—guaranteed to the South all its former property, as recognised by the Constitution,—including of course the slaves,—set at naught the legislation of Congress and the proclamation of Mr Lincoln, as well as pre-judging the question of amnesty to Mr Davis and the leading Southern statesmen who planned the rebellion. So monstrous an attempt of a soldier to to dictate to the civil authorities of his country seems scarcely credible, unless General Sherman had the vanity to think that his own great successes might have won for his actions a prestige and a popularity with which a new and not very widely-respected President could not venture to compete. If so, the only Northern American who probably ever committed in his own mind the blunder of so many Englishmen seems to have been General Sherman. At all events, the result was almost ludicrously contrary to the expectations formed here of the issue of any misunderstanding between the civil and military power. General Sherman's armistice with General Johnston was peremptorily terminated. General Grant was sent to North Carolina to supersede him. Sherman was ordered to resume the offensive, and within another two days the same surrender had been made without political terms of any kind to the Northern commander, which had been offered to Sherman on terms so fatal to the authority of the Union in the rebellious States. And so far was the great military commander from even asserting himself in opposition to the will of his Government, that he was overruled as easily as any of his subordinate officers would have been overruled by his own order in the field; nor did any one at the North even conceive the possibility of military risk in thus superseding a favourite General. The country with one voice denounced General Sherman's conditions as pernicious in substance, as well as proceeding from an arrogant assumption of power in him. There was not visible in the North—we do not say any *fear* of a collision—so much as any fancy that a collision might ensue. There is absolutely so little material for the building up of any despotism in the Free States, that the least popular of civil magistrates is obeyed without even a hesitation, though he put himself in conflict with the most popular General under his authority. It is not that the people resist the temptation to make a military despot, it is that they do not even understand it. The people of the Free States have shown themselves not at all averse to proceedings essentially arbitrary, if taken by the highest authority in the State for the purpose of vindicating their own constitution. But that they have never even considered the possibility of handing over any power reserved to them by the constitution to any man, however heroic, is sufficiently proved by the absolute

Digitized by Google

unanimity of opinion against General Sherman's apparent usurpation of responsibility.

And we may congratulate the United States not merely on the universal unpopularity of any military encroachment, however tentative, on the civil power, but also on the good sense which rendered it evident at once to the Cabinet and people that General Sherman's terms would have been fatal to all the purposes of the war. The war has has been a fearful price to pay even for the great end which we all now hope to see accomplished, the annihilation of slavery and the construction of a durable system of freedom at the South. The most superficial glance at General Sherman's offered terms betray at once the extraordinary and criminal blunder he had made in giving back to the South the absolute right to build up again the very same system of society from which this gigantic civil war had sprung. In recognising the Confederate Government, and awaiting the sanction of Mr Jefferson Davis to the terms accepted by General Johnston, General Sherman practically discarded the notion that this war had been a rebellion, and attributed a certain legitimacy to the Civil, no less than to the Military Government, with which he was dealing. That this should in itself offend the Northern people we do not wonder, but it is not with this admission that we, at least, have any fault to find. The extraordinary character of the blunder consisted in the acknowledgement of the *present* Southern States Governments,—Governments which have been the life and soul of the rebellion,—as the legitimate authorities to whom the arms should be surrendered, and by whom the pacification should be carried out. Nay, General Sherman actually proposed to guarantee the people and inhabitants of all the rebellious States, in the name of the Northern Executive, "their political rights and "franchises, as well as their rights of person and property, as "defined by the Constitution of the United States and of the "States respectively." In other words, he proposed that the new organising power requisite to weld together the societies of North and South should be guaranteed to the very men so deeply imbued with hostility to the North and the love of slavery, that they have organised and conducted this rebellion. It would not have been more absurd to take the opinion of Mr Seward's assassin as to the best steps for his restoration to health.

The truth is that unless this disastrous war initiates a revolution, and a great revolution, at the South, it will have failed of *all* its effect; and neither the Union, for which the North have fought so bravely, can be preserved—nor the Slavery, for the extinction of which we all hope, be destroyed. A social revolution must follow the war, or the war is naught. And the precise effect of General Sherman's proposal would have been to entrust the guidance of this social revolution absolutely and implicitly to the very same institutions, conducted by the very same men, which had given birth to secession in the interests of an extended Slavery. The war has lasted four years,—the reconstruction will last probably a much longer time; but a more insane conception could scarcely be imagined than that of asking the conspirators against the Union to superintend the restoration of the Union —the passionate advocates of Slavery to preside over the extinction of Slavery.

THE VISIT OF THE EMPEROR OF THE FRENCH TO ALGERIA.

The Emperor Napoleon is trying very hard to solve the problem which is still puzzling us in India, to govern a great Asiatic community without maintaining among them an irresistible European force. With his usual acumen he sees clearly where the true point lies, perceives that if he could but secure willing obedience from the population, attract the loyalty, so to speak, of any powerful tribe, Algeria might become a valuable dependency. The importance of the possession is, we think, a little underrated in this country. The ownership of a very wide tract of culturable soil, a tract as large as Great Britain, and capable under certain conditions of great productiveness, situated within easy reach of the mother country, and under tolerable climatic conditions, may hereafter prove very important to France. It is true that country is not as yet overpeopled, and also true that Frenchmen make very indifferent colonists, but no one can predict how long those conditions will last. Very slight changes—the abolition, for example, of the conscription—might materially affect the population of France, and it is quite within the range of possibility that Algeria may one day become rather an addition to than a dependency of the Empire. It is already almost as near to her as Marseilles is to Paris, and steam navigation may yet improve till it is for all practical purposes as near as Ireland to Great Britain. If we owned an empty Ireland a few hundred miles further in the Atlantic, we should be very reluctant indeed to part with it, and Frenchmen may be excused if they do not like the idea of giving up so many possibilities as are involved in the possession of Algeria. At present, indeed, the dependency costs a great deal too much. The native population is so brave, so hostile, and so aided by geographical circumstances, that to protect the civilised districts it is necessary to garrison them with a very large army, indeed equal to the British army in India. The expense of this arrangement is excessive, makes Algeria cost France more than all the colonies of Great Britain cost her; but if the Arabs accept their rulers, or if only one great tribe accepts them, then the expense may be brought within endurable limits. It is the Indian problem over again. At this moment the North-West provinces, Oude and the Punjab, cost more than they are worth, and but that we own one province, Bengal, in which thirty millions of people acquiesce in our rule and require comparatively no garrison, Indian charges would form an item in the table of British expenditure. Yet if we could heartily trust any one Indian race, say the Sikhs, trust them for example as we can the European settlers, the cost of the North-West would almost disappear, and India would show a surplus of six or eight millions sterling. The Emperor sees this point clearly, and has for some time past endeavoured to think out some plan for securing it.

Napoleon's first idea, it is said, and said in a way which gives the rumour some force, was to place the tribes of the interior under a native Emir, to create artificially the system of dependent States which we found and have of late tried to preserve in India. Such an Emir would govern much more cheaply than a French bureau, would be much more willingly obeyed, and would, if faithful, secure to France all the results which for the present she requires from her conquest. He might moreover be a man so convinced of the power of France as to be faithful, and it would in any case be cheaper to reconquer him once in every generation than to maintain the present garrison. The great Algerian officers, however, did not like the idea, and the Emperor, who is persistent but not wilful and never in a hurry, laid it aside, resolving apparently to try whether his personal presence might not conciliate the tribes. He was already favourably known to them, having in the first place guaranteed them some lands which they considered in danger, and in the second having put down most effectually a formidable insurrection. A ruler who will give largely and strike hard is the ruler for Eastern imaginations, and the Emperor resolved to follow up the impression. On the 3rd inst, he landed in Algiers in all the state which Frenchmen as well as Orientals know how to organise, and three days afterwards issued a proclamation to the native tribes. In this very singular paper he adopts that semi-didactic semi-pious style so frequent in Oriental manifestoes, quotes the Koran with references to chapter and verse, which, though they read oddly in French, will in Arabic perhaps not seem so strange, and gravely argues with the men of the Desert that it is their duty to acquiesce in his rule. They have fought very bravely, but God has given him the victory; their own Book says God gives power to whom he will, and they are by their own creed bound to admit that whatever God directs must be well directed. He points out that the conquest of the Gauls by the Romans ended in raising the Gauls into a great people—a curious version of history, the Frank conquest being ignored—and promises that their material interests shall be thoroughly cared for. We fear the effect of the proclamation will be less than the Emperor anticipates. The Arab, like every other Asiatic, hates the Western governors, not only because they are of a different creed, but because they are Westerns, because they want him to accept a civilisation which is as repulsive to his ideas and habits as the European costume would be, because, in fact, they are not only infidels, but in his judgment vulgar, pushing, trouble-giving people. To prove to an Arab that fate has decided against him, is like telling a sick man that we must all die; he acknowledges it fully, but he takes medicines to ward off death none the less zealously for the acknowledgment. The Arabs will, we fear, contend until contention is hopeless, and when convinced of its hopelessness, will either

Digitized by Google

move into the interior, as the "Moors," the old dominant class who served the Deys did, or will lose their self-respect, and slink about a vicious degraded race, as the Arabs of the coast cities now do. That, however, is speculation, and for the hour it is probable that the Arabs will accept the proclamation with a sense that it is intended to be conciliatory, and gain from it the courage to press their more immediate grievances upon the attention of the great Frank ruler. The Emperor really wishes to conciliate them, and he is one of the few Frenchmen who has caught the idea of what all subject-races everywhere ask, in Poland no less than in Bengal and on the Atlas, namely, to be let alone, so far as the dominant State can afford to do it. The bureaux Arabes may be better than the old Cadis, but the people would greatly prefer the old unjust judges. A French officer may be a civilised being, but Arabs are more at home with a deputy Emir; the taxation of France may be lighter than that of the Deys, but it is most wearisomely inevitable. An Asiatic would rather be plundered of a pound now and then after a fair fight than pay sixpence every year at a fixed hour on a previously settled day. It is quite possible that the Emperor, foiled in his project of an Arab Viceroyalty, may, nevertheless, restrain greatly the action of his subordinates, and leave the tribes, when their tribute is paid, more and more independent in their internal affairs. If he does, he will greatly diminish the burden of Algeria; and, in any case, a country which rules India must watch with keen interest the spectacle of an able man clothed with absolute power trying to solve among two millions of Asiatics, the problems which perplex herself in dealing with two hundred millions.

Agriculture.

OUR GRASS LANDS.

Despite egregious errors which have of late been promulgated in reference to the conversion of existing arable lands into permanent grass, and a sort of superstitious regard for old turf entertained amongst landowners, there can be no doubt that our permanent grass lands are of great agricultural importance, and that they are not generally made the most of. In a mixed farm, the greater part of the manure is commonly applied to the arable portions of the land, though made up to a large extent of the produce of the grass land itself. A paper on "The Management of Grass Land" was lately read by Professor Coleman, at the London Farmers' Club, which contained several matters well worthy of notice. He stated his object to be to show "that grass land is very grateful for liberal treatment," that pasture land requires cultivation and attention as much as arable land, and that "pasture cultivation is as a rule far behind arable management." He also proposed to show that grass land will give a good return for outlay. The subject was treated under four heads. First,—By considering whether it is desirable materially to increase the proportion of grass land? Secondly,—How best to produce a pasture? Thirdly,—The improvement of worn-out pastures; and lastly, as to irrigation by water and sewage.

As to increasing the area of grass land, because stock is high and grain low in price, as has been often recommended of late, Mr Coleman mentions that a Lincolnshire farmer who was told he ought to lay all his land down to grass, soon proved to his would-be adviser that Lincolnshire is growing more beef, mutton, and wool than would be possible if such advice were followed. Strong land, in a moist climate, may offer instances where some arable land might be usefully laid down to grass; but even on the strongest land, no quantity of stock can be wintered, and so the most is made of the grass land, without the aid of arable cultivation.

Then, to lay down land to pasture is an expensive and a slow process. A celebrated Shorthorn breeder, whose farm consists of two-thirds grass, says, that if he had double his actual amount of arable land, he could winter a greatly increased stock. "As it was, he gave his neighbours 2*l* per acre for barley-straw, and carted it, and could not get enough, and that it was utterly ridiculous to talk of laying down more land to grass." And the conclusion to which Mr Coleman comes is, that grass land cannot be worked to advantage without at least an equal quantity, and more often two-thirds of arable land to gorw fodder and litter. There are exceptions in cases of rich grazing lands and lands liable to be flooded.

Then a pasture can only be produced by the use of first-rate seed, only to be obtained by paying a full price. The seed should consist of a proper mixture of grasses, the particulars of which, as given in the paper, are too long for our limits, and when first laid down, must be well manured, sown with a certain proportion of rape, then fed the first year with sheep folded off, and not allowed to get too bare. The second year the grass is mown early, and afterwards fed with horses, cattle, and sheep,—a method of depasturing always best for grass land, and thenceforth it will become established as old grass. Land thus treated on Mr Howard's estate at Greystoke, Cumberland, and which had been previously reduced by bad management to about 3s 6d per acre, was re-let after three years at 25s per acre. If grass seed be sown with a crop of corn, then the safest plan is not to graze the pasture at all the first autumn, but merely to consolidate the surface with heavy rolling. Sometimes the grass shows a feebleness in the third year, and in such cases a few new seeds should be harrowed in, and a dressing of farm-yard manure. As the rule, cattle are better stock than sheep for all newly laid down pastures.

The improvement of worn-out and neglected pastures, constituting the third head under which Mr Coleman treated the subject, will have most general interest and application. Farmers seldom care to lay down arable land to permanent grass, or to break up old pastures in order to re-lay them; but there are few who may not wish to restore some worn-out meadow or pasture land. The first step is to drain where draining is required. Of course no draining is necessary on open subsoils. Even where necessary, draining alone will not renovate grass land. Draining must be followed by manure, otherwise the removal of the water may actually diminish the grass by destroying the coarser herbage, at all events for a time. But liberal treatment, and occasionally a few better grasses sown, will soon satisfy the occupier of the benefit of drainage. Artificial manures can seldom be relied on for grass lands; the safest manure in which the farmer can invest his money is that made by well-fed stock. Well harrowing and plentiful rolling have wonderful effect in improving grass land. A firm and level surface is essential to a large crop of well-conditioned grass. Then weeds should be steadily destroyed in spring and autumn. The account given by Mr Coleman of the improvement of Braydon Manor Farm is highly instructive. We knew Braydon, in North Wiltshire, nearly forty years ago, and a more hopeless tract of heavy, infertile clay could not be found. Braydon forest was then a flat area of nearly 20,000 acres, without roads, wet, undrained, and commonly believed to be undrainable. The Great Western Railway touches this tract between Purton and Minety stations; its appearance is still by no means inviting. The fields were small, the fences high and irregular, and the herbage looked blue and starved. Rents varied from 7s to 15s per acre. Having described this tract in some such terms as we have used, the Professor says:—"Such was the condition of the Manor Farm, a tract of 300 acres, purchased by Mr E. Ruck, at Lady-day 1862, for 4,000*l*, being exactly 13*l* 6s 8d per acre. In the following May I walked over the land, and, as it was a very wet time, had a good opportunity of judging of its value unimproved. It was principally in grass, the fields small, and surrounded by wide straggling fences, the ditches half-filled with soil and accumulations of vegetable matter, and the soil so saturated with moisture that it was difficult to struggle through the mud. Nothing, not even Talpa's Farm, could present a more dreary and desolate appearance, and it was certainly a bold undertaking to embark capital in reclaiming such apparently poor stuff. Mr Ruck divided the arable and pasture land into equal portions, keeping the latter near the homestead; the former, originally in sixteen fields, was laid out in four enclosures of equal size, and this, as well as a great part of the grass land, was thoroughly drained three feet deep and eight feet apart, by the mole-plough, driven by steam, which has so far answered extremely well. Mr Ruck estimates the cost at only ten shillings per acre: I prefer doubling the amount, as more nearly approaching the contract price for such work. Mr Ruck, who has been a very successful steam-cultivator, had the original 12-horse engine fitted with a windlass, suitable to draw the draining-plough, and thus made a capital job. Deep ditches have been dug, into which each drain empties, four or five pipes being placed in the mouths, to keep the outlets open. The draining has made the surface firm and sound. In April, 1862, 2 cwt of superphosphate of lime and 1¼ cwt of guano was applied with the water-drill, diluted with 600 gallons of water per acre; the cost of this dressing was 26s. Sheep were fed on the grass, eating cake and corn at 10d per head per week, and the return was 17d per head weekly. In April, 1863, the same dressing was repeated, and sheep feeding with corn was commenced as before. The grass grew so rapidly, and became so rank, that the sheep were removed, and after being shut up the land was mown, and 25 cwt of hay per acre was secured. In the autumn a compost, consisting of soil from new ditches and old banks, mixed with lime, gas-lime, and a portion of manure, was applied. In the last year the same artificials were used, the whole mown a fair crop, and when I visited the farm last autumn, compost similar to that alluded to was being carted out and spread on the land. None but those who knew the Manor Farm in its original condition can appreciate the improvement that has taken place. Instead of the poor, watery grasses, we now find a rich carpet of quite good grasses and clover, and the cattle and sheep look healthy and thriving. At the time of my visit the stock numbered 133 head of young cattle, principally yearlings; 13 horses, for breeding; and 240 sheep. The cattle had 2 lbs a day of cake and corn, and the sheep ¾lb. Beans, peas, barley, wheat, and palm-nut meal were mixed up, and for every 4 lbs of such meal 2 lbs of oilcake is used. On this grass, where sheep are hardly known, Mr Ruck has wintered shearlings with corn. These improvements, with proper buildings and roads, have doubled the value of the land, and proved a good investment." This indicates the best mode of renovating pastures. Sheep and cattle eating oilcake, combining

Digitized by Google

treading and fertilising manure, are, in fact, the cheapest means of improving grass land. Once put into good heart, meadows may be easily maintained in high condition by an occasional dressing, and careful harrowing and rolling.

Improvement by irrigation and sewage is so special a subject, and is only applicable in particular localities, that we shall not further advert to it here.

In a discussion which followed the reading of this paper, old prejudices and some special facts in relation to grass land were disclosed. Thus, Mr Thomas asserted that grass land "might be overdrained," and that certain lands, such as some in Leicestershire, had such an aptitude for producing grass, that without any such care in sowing as had been recommended by Mr Coleman, they soon became good pastures.

Mr Wilson had found land not considered to be fit for grazing more profitable when well laid down to grass and grazed than when under the plough.

Mr Congreve (Warwickshire), vindicated the occupiers of grazing land from an assumed charge of mismanaging their pastures; but no such charge was in fact made, for it is well known that the grazing pastures of the Midland Counties are at this time extremely well managed.

Mr Nockolds agreed that it was much easier to renovate old pastures than to make new; and Mr Bradshaw confirmed the statement, that the feeding sheep with swedes and cake on old pastures was the best mode of improving them.

Foreign Correspondence

[FROM OUR OWN CORRESPONDENT.]

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 11th inst. The return for the previous week is added:—

DEBTOR.	May 11, 1865. f c		May 4, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0

	1,325,291,982 74	.....	1,324,538,625 38

The Bank of France return, though favourable in a purely banking point of view, is unfavourable to commerce. It shows that the coin and bullion are 8,995,000f more than last week, and that there are 460,693,000f thereof to meet 817,660,000f of notes, and 168,200,000f of deposits; but that the amount of discounts is only 523,400,000f, and is 18,000,000f less than in the week preceding.

On Monday and Tuesday there was a marked advance on all quotations on the Bourse, and speculators flattered themselves that the great bankers had at last taken the market in hand, in order to prepare it for the Italian and Paris loans about to be issued, and that the Credit Mobilier was also manœuvring for an advance in order to be able to present a favourable balance sheet to its shareholders in the annual meeting on Monday. But yesterday there was a violent relapse, and to-day there has been much discouragement. The hopes of a new outburst of speculation, so often disappointed, have, therefore, been baffled once more, The following are the quotations:—

	May 4. f c		May 11. f c

The question of cheques, which has long occupied the attention of the commercial world, has been submitted to the Corps Legislatif, but has not, up to the moment at which I write, received a solution. With that mania for regulating the minutest details of all matters which distinguishes French legislators—a mania based on the assumption that the public is incapable of defending it own interests, or doing anything for itself—the Bill on cheques presented to the Chamber, not only gave a definition of what a cheque must be and how it must be signed and dated, but laid down rigorous rules, for the presentation of it within a given time, for the transmission of it by endorsement, for the protecting of it in the event of its not being paid on demand, for the punishment of the drawer when due provision is not made for the payment of it, &c. The definition of the cheque is that "it is *a writing* in the form of a mandate to pay, serving the drawer to withdraw for his own advantage or that of a third party, the whole or part of funds inscribed to his credit by the party drawn on, and disposable." The lawyers in the Chamber pointed out that this would in practice present various technical difficulties of considerable gravity; and numerous objections to the other enactments were urged both on legal and commercial grounds. On the whole, it appears that the measure, so far from encouraging the use of cheques, which is its professed object, will deter people from employing them. An able economist, M. Cochut, writing in the *Temps*, says that it would have been far better not to have prepared a Bill on the matter at all. In truth, none was necessary, except, perhaps, to free cheques from stamp duty, or, if thought desirable to tax them, to impose on them a small fixed charge. When His Excellency M. Fould resolved on trying to develop the cheque system in France, he, knowing that a cheque is the simplest thing in the world, never dreamt, I imagine, that it would lead to the production of a mischievous and vexatious law. He must regard with little complacency the meddling law-makers and pretentious economists of the Council of State and the Corps Legislatif, who have spoiled one of the best measures for serving the public that had been conceived by a Minister for a long time.

You may remember that, though some months back the Minister of Finance rejected the project for raising a large loan for executing public works of all kinds all over France—it was proposed to call it the Loan of Peace—he consented to accord, in addition to the ordinary provision of the budget, a certain sum to be disbursed in really useful works, not in a lump, but in a series of years. In execution of this engagement the Minister has caused a Bill to be presented to the Corps Legislatif, proposing that 360,000,000f. (14,400,000*l*) shall be employed in such works in six years dating from 1866, at the rate of 60,000,000f a year:—the ways and means to consist, first, in anticipated surpluses to ordinary budgets, and next in the sale of forests to the amount of 100,000,000f. To this sale of forests objections will probably be made; nevertheless, as the Minister entertains insuperable objections to the raising of a loan, it is not easy to find any other resource.

The Emperor's visit to Algeria is likely to be of commercial importance; His Majesty having stated to the Mayor of Algiers that "he had the satisfaction of announcing that a powerful company proposes to do great things which have been commenced." The company referred to is believed to be the Societe Generale, which has already taken under its patronnge a company for working certain iron mines in Algeria, and one for establishing steamers to carry goods between the colony and France. By directing capital to Algeria the Emperor will undoubtedly render great service to that possession; but it is much to be wished that he would accompany it by the substitution of civil for military domination, and by the grant of the most complete liberty to colonists. It is the tyranny of the sword, and the vexatious regulations imposed on settlers, which have hitherto prevented Algeria from being populous and prosperous.

A Bill, now before the Corps Legislatif, renders uniform the usages of different markets in France with regard to tare, tret, taxes, discounts, tolerances, &c. The reason for promoting the

Digitized by Google

Bill is that it is thought that uniformity in such matters will be as useful to commerce as it is in moneys and in weights and measures.

The ratifications of the treaty of commerce between France and Prussia, and the conventions relative to railways and railway property, were exchanged at Berlin on the 9th, and the Acts are to come into force on the 1st July. To the first mentioned treaty the Zollverein has adhered.

The Board of Directors of the Messageries Imperiales Company announces that it will propose a dividend of 55f for 1864. Of this sum, 20f have already been paid.

A meeting of the shareholders of the Societe Nouvelle des Forges et Chantiers de la Mediterranee has just been held. This Company was formed in 1856 for building and repairing ships and ship-engines, and its yards and works are at La Seyne, near Toulon, and at Menpenti at Marseilles. Its success has been very remarkable, especially considering that France was for a long time much behind England in the building of ships and in the construction of engines. In 1864, the Company, according to the report of the directors, delivered, in execution of orders, hulls and engines of the value of 19,000,000f, and it has now orders to the amount of 42,000,000f to execute. Among other things, the Company last year built six gunboats, each with engines of 50-horse power, for the French Government, and it completed them in the short space of sixty days. It also built for the Imperial navy a new transport of 160 horse-power, named La Vienne, and engines of 1,000-horse power for the plated frigate La Province. For the Suez Canal Company it constructed several dredging machines, and for private individuals four steamers for commerce. It has delivered two plated ships fitted with engines to the Italian Government; they are called La Maria Pia and San Martino. It has also built for and handed over to the Spanish Government, the large plated frigate Numancia, of 1,000 horse-power. She is to be sent to Peru, and will be the first large iron vessel that has gone from Europe to the Pacific. Her voyage will be regarded with great interest by nautical men of all countries. Finally, the company has just received orders from the Governments of Egypt, Turkey, and Brazil. The profits realised in 1864, the precise amount of which have not been published, were sufficient to allow a dividend of 100f per share to be declared. Of this sum, 30f were paid in November last, and the rest is now being paid.

In a recent extraordinary general meeting of the shareholders of the Societe Generale pour Favoriser le developpement du Commerce et de l'Industre en France, the directors, of whom the chairman is M. Schneider, presented a report, demanding authorisation to obtain from the Government a revision of the statutes as regards the obligation to make a second call of one-fourth of the nominal capital within the first year, as regards the engagement not to invest in companies, or otherwise employ more than one-fourth of the realised capital, and not to receive deposits exceeding one and a half times the realised capital and the reserve, and as regards sundry minor matters. The report stated, that for the confidence placed in the Societe, it has obtained such large deposits that it has no need to make a second call on the shareholders, and that it is manifestly more advantagous to permit the directors to make the call when the interests of the company require it, instead of fixing it arbitrarily for a certain period: and the report also showed that the other obligation impedes the operations of the company, and is consequently disadvantageous to the public. The meeting unanimously granted the authorisation demanded.

The report presented to the shareholders of the Eastern Railway, in their recent annual meeting, stated that the receipts in 1864, of the "old net-work," were 50,479,003f 33c, and the expenses 21,232,630f 26c, leaving a balance of 29,246,374f 7c. This balance was reduced to 26,911,536f 80c, by the deduction of 1,128,349f 6c for the reserve, and of a sum of 1,206,487f 21c which, according to the convention with the Government, had to be set apart for the "new net-work." To the 26,911,536f 80c, however, had to be added, the balance brought over from 1863, and the net profit of the short lines of Luxembourg and Bale, which, though out of France, belong to the Company; and these items made the total 26,965,443f 43c. From this there had to be taken various sums, for the interest and sinking fund of loans, for the sinking fund of shares and of what is called the domain, and for the execution of lines in the "new net-work;" so that in definitive there only remained for the shareholders 19,441,018f 2c. Of this sum 11,585,280f have been employed in payment of 20f per share, and it was determined to distribute 7,592,000f in the payment of a further sum of 13f; the balance remaining to be carried forward. That the revenue per share was 33f is owing to the energy with which M. Thouvenel, the chairman, and other directors defended the interests of the shareholders. If, indeed, they had not obtained from the Government a modification of the convention of 1859 relative to the new lines, the dividend would only have been 22f, and in coming years only about 17f. The probability now is that it will in future not fall below 33f. As to the "new net-work," the clear revenue from it, including the 1,206,187f from the old net-work above mentioned, was only 13,629,319f 49c, and consequently the Government will have to pay 17,044,831f 23c to make up the 4.65 per cent. guaranteed on the capital disbursed.

The report of the Company des Docks et Entrepots de Marseilles states that the net profits for 1864 were 1,022,552f, being sufficient to allow 25f per share to be paid, and 22,552f to be carried over. Of the 25f, half has already been paid, and the other half is in course of payment.

The Company of the Chemin de Fer et Docks de Saint Ouen has declared a dividend of 20f for 1864. Of it, 10f were paid in January, and the other 10f is to be paid in July.

In Belgium, as in France, there is an Immobiliere Compagnie; but in addition to buying and selling of houses and other real property, it makes loans on mortgage, and engages in financial operations. The directors have just presented a report on the business done by the Company from the 23rd July, 1863, the date of the formation, to the 31st December, 1864. The profits realised were sufficient to allow 5 per cent. to be distributed on the paid-up capital, leaving a small balance to be carried forward. The Company has purchased building ground in Brussels and the suburbs, and have sold portions of it at a considerable profit.

The Austrian Credit Mobilier has published its report for 1864. The profits realised were only 2,438,695 florins, so that 311,307 florins had to be taken from the reserve to enable 5 per cent. to be distributed to the shareholders as interest.

Messrs Arles Dufour and Co., of Lyons, in a circular dated the 5th, say that the news of the assassination of President Lincoln caused business, both in silk fabrics and silk, to be completely paralysed for several days, but that prices had been maintained with remarkable firmness, owing to fears being entertained of a bad crop. They say, however, that demands had become more active, and that if the pretensions of holders had not been very high considerable business would have been done. They state that the prospects of the crop are very unsatisfactory.

The market report is as follows:—

Flour.—Sales at *Paris* are difficult. Yesterday, quotations ranged from 44f to 49f the sack of 157 kilogs. Six weeks current month, 49f 25c; June demanded at 50f; July and August, sellers at 51f 75c. Type Paris, the 101 kilogs, 29f 25c.

Wheat.—At *Paris*, yesterday, choice white was 27f 50c the sack of 120 kilogs; choice red, 26f 50c to 27f; first, 26f; other sorts, 24f 50c to 25f.

Cotton.—The market at *Havre* was not much agitated in the week ending Friday. The sales were only 3,017 bales, and the arrivals were 11,541, of which 7,928 were from England. The closing quotations were 5f lower for Tinnevelly, Coconada, Kurrachee, Bengal and China; 10f higher for Jumel; other sorts unchanged. Low New Orleans was consequently 200f the 50 kilogs; good ordinary qualities in Broach, 135f; in Tinnevelly, 115f; Madras, 140f; China, 118f; Jumel, 200f. This week the market has not been animated, and yesterday American was 165f; Jumel, 202f 50c; Madras, 130f and 127f 50c; China, 112f 50c, 106f, and 105f; Japan, 120f; Tinnevelly, 115f.

Coffee.—Business at *Havre*, in the week ending Friday, was active, and prices rose. 5,400 Hayti Port-au-Prince, 81f to 84f the 50 kilogs in bond; 600 Cape, 85f to 87f; 34 Gonaives, 86f; 135 Saint Marc, 90f; 5,150 Rio not washed, disposable or in the port, 73f 50c to 80f; 1,405 Santos, 74f 50c to 75f; 400 La Guayra for delivery, 99f; some Gaudaloupe bonificur, 150f, duty paid. There was also a sale by auction, at which high prices were obtained. The arrivals exceeded 28,000 sacks. The stock in bond on the 1st of May was 5,387 tons. This week, Bahia, 73f to 77f 50c; Capitania, 81f; St Marc, 90f 50c; Rio, 75f, 70f, and 72f. At *Nantes*, last week, 1,294 sacks Port-au-Prince, 81f 50c; and some Guadaloupe bonificur at prices not stated. No sales this week. At *Bordeaux*, last week, 3,122 sacks Mysore at 234f the 100 kilogs, and 1,400 at prices not stated; some Guadaloupe, 290f; 200 sacks La Guayra grages, 204f and 206f; 630 non-grages, 194f. This week, Rio not washed, 81f 50c; La Guayra at prices not stated. At *Marseilles*, last week, 500 sacks Bahia in the port, 73f; 200 fardes Mocha tric, 120f. No sales this week.

Sugar.—At *Havre*, the sales, in the week ending Friday, were 650 casks French West India, disposable or in the port, 49f to 49f 50c the 50 kilogs, bonne quatrieme; 350, for delivery, same price; a small quantity ditto, 51f 50c to 52f 25c; 30 casks Havana, 31f, No. 12, in bond; 500 ditto, for delivery, 31f 50c; 470 Havana old, disposable, 30f, No. 12. The arrivals exceeded 1,800 casks French West India, and 26,600 Havana. This week, French West India usine, 60f to 64f 50c; bonne quatrieme, 52f 50c; for delivery, 49f 50c; Havana, by Spanish ship, 31f, and in the port, 31f 50c, and 31f 75c, No. 12; Reunion, bonne quatrieme, 52f; usine, 53f 75c to 62f 50c; Porto Rico, for delivery, 49f to 51f 50c. At *Nantes*, last week, some French West India usine, prices not stated; 150 casks Reunion, 53f 25c, bonne quatrieme; 364 casks Havana, for delivery, prices not stated; 14,000 casks Mauritius, ditto ditto. A sale of 5,110 casks Reunion, made previously, was mentioned, but the price was not communicated. This week, Reunion, 53f 50c, bonne quatrieme; also low quality, 48f. The article is held firmly. At *Bordeaux*, last week, 2,145 bales Reunion at established prices; 132 casks French West India, 48f 51c, bonne quartrieme; 26 ditto, 48f; some usine, 60f 50c and 61f 20c. This week, Martinique, 49f, bonne quatrieme. At *Marseilles*, last week, 120 casks French West India, 31f 50c, bonne quatrieme of Havre; 60 casks Porto Rico, by French ship, 30f ditto; 4,800 Havana, by Spanish ship, 31f, No. 12, and 600 at 30f 75c; 1,700 at prices not stated; 1,000 bales Reunion, 57f. This week, Havana, for re-export, 31f 50c and 31f, No. 12; Reunion, 52f, bonne quatrieme of Nantes; Pernambuco, by English ship, 27f, No. 10.

Indigo.—The sales at *Havre*, in the week ending Friday, were 3

Digitized by Google

chests Bengal, at 40c to 1f above the estimates; 11 Madras, 4f 70c to 4f 90c. No arrivals. This week, Bengal at a premium of 60c. At *Bordeaux* last week, 60 chests Bengal, 75 Kurpah, 20 Madras, and 10 serons Guatemala, at prices not stated. The arrivals were 2,500 chests Bengal. This week Madras, Kurpah, and Bengal, at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 810 La Plata ox, salted saladeros, 58f to 62f the 50 kilogs; 3,725 Rio Grande salted, 47f to 56f for ox, and 45f cow; 250 Pernambuco drysalted, 65f; 1,400 Bahia ditto, 60f; 200 New Orleans salted, 40f; 710 horse, salted, 42f. By auction, 367 Rio Grande salted ox. 45f to 46f 50c; 337 Mexico dry, 67f to 68f; 1,115 Calcutta cow, 698 Madras cow, 25f to 70f: some other lots of sound and damaged were also sold. The arrivals exceeded 33,000. This week, Martinique salted T.Q. 50f; Buenos Ayres dry light, 80f; Rio Grande dry, 75f.

WOOL.—At *Havre*, in the week ending Friday, the sales were 300 bales La Plata unwashed, 1f 30c to 2f 60c; 7 bales Rio Grande washed, 2f 70c to 3f. The arrivals exceeded 4,000 bales. This week, Buenos Ayres unwashed, 2f 10c, and lamb unwashed, 1f 45c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 25 casks New York a la marque, 52f the 50 kilogs, and 20 La Plata disposable, 51f. The arrivals were 535 casks. This week, La Plata, disposable and delivery, 50f 50c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 104f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 52f 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Lanquedoc, 16 deg., 72f; 3-6 beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

In reference to the state of the money market at Bombay, Messrs Clason and Co., writing on the 13th ult. state:—Our position has not improved during the fortnight, and there is an eager demand for money in the bazaar, where, at present, the average rate of interest is 3 per cent. per month. Our banks continue in possession of large capitals at disposal, but do not show any inclination to employ them except on the most undoubted securities, thereby restricting the credit of our port more and more. Thus, the cash balance of the Bank of Bombay amounts to three millions sterling, and the Directors have made a further reduction of 2 per cent. in the rates of discount. Since our last, no failures of any moment have taken place. A subject of great anxiety for the moment is our share market, which has collapsed to an alarming degree. Endeavours are being made to prolong the delivery term to November next, which measure might mitigate the impending evil. Our banks, who have refused for some time to make any advances at all upon shares, are re-commencing to negociate loans on the best of such securities to a small extent, and the existing tightness of the market is expected to relax ere long.

The President of the Liverpool Chamber of Commerce has received following letter from the Foreign Office respecting our commercial relations with Prussia and Austria:—

"Foreign Office, May 9, 1865.

"Sir,—I am directed by Lord Russell to acquaint you, for the information of the Chamber of Commerce over which you preside, that Her Majesty's Ambassador at Berlin, having addressed to the Prussian Government certain questions as to the position of Her Majesty's Government with regard to the new Zollverein tariff, has received in reply authoritative information to the following effect:—

"1. Great Britain will be admitted to all the benefits of the new tariff of the Zollverein States on the 1st of July next, whether the treaty between Great Britain and the Zollverein be concluded or not at that date.

"2. The tariff of the Zollverein States, which will come into force on the 1st of July next, will embrace all the reductions contemplated by the Franco-German treaty of 1862, including those of 1866.

"In communicating the above information the Prussian Minister for Foreign Affairs requested that the attention of Her Majesty's Government might be called to the two following points, although he added that the events to which they related were not likely to happen:—

"1. Should the treaty recently concluded between Austria and the Zollverein not come into effect their relations will continue to be regulated by the treaty of 1853, which grants certain preferential rights to Austria until the 1st of January, 1866; and in that case England, in common with other Powers, would not be admitted to those rights until the last-named date. Should the treaty be accepted and ratified at Berlin and Vienna, Great Britain will be admitted to all the exemptions and deductions of duty accorded by it to Austria from the 1st of July, 1865.

"2. In case the commercial and political relations of the Zollverein should not be entirely regulated with all foreign States before the 1st of July next, England and the other States which are freely admitted to the benefits of the new tariff might incur the obligation of exhibiting certificates of origin on goods imported into the Zollverein.—I am, Sir, your most obedient humble servant, "A. H. LAYARD."

The annual account of the public income and expenditure has been issued. The income for the financial year ending March 31, 1865, consisted of 42,130,000*l* from Customs and Excise, 20,780,000*l* from stamps and taxes, 4,100,000*l* Post-office, 310,000*l* Crown lands, and 2,993,436*l* miscellaneous (including 872,750*l* received from India for British troops serving there); making a total gross income of 70,313,436*l*. The expenditure comprised 26,369,398*l* for interest of the debt, 14,382,672*l* for the army, 10,898,253*l* for the navy, 9,160,140*l* for civil service, to which must be added 870,673*l* for the Post-office packet service, and 174,599*l* for the second moiety of the Scheldt toll redemption money; 4,606,471*l* for cost of collection of the revenue (including the Post-office establishment) brings the expenditure up to 66,462,206*l*, leaving a surplus of 3,851,233*l*. In addition to this expenditure, the sum of 620,000*l* was laid out upon fortifications, the amount being raised by the sale of Government annuities terminable in 1885.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 10th day of May, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,608,825	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,958,825
		Silver Bullion	...
	28,608,825		28,608,825

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,984,441
Rest	3,201,554	Other Securities	20,063,537
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,349 114	Notes	7,374,950
		Gold and Silver Coin	903,277
Other Deposits	13,760 032		
Seven Day and other Bills	467,505		
	39,331,205		39,331,205

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,701.380	Securities	31,149,978
Public Deposits	7,349,114	Coin and Bullion	14,862,102
Private Deposits	13,760,032		
	42,810,526		46,012,080

Dated the 11th May 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,201,554*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£370,631
An INCREASE of Public Deposits of	636,649
A DECREASE of Other Deposits of	299,248
No change in Government Securities.	
A DECREASE of Other Securities of	206,370
An INCREASE of Bullion of	182,128
An INCREASE of Rest of	8,988
An INCREASE of Reserve of	551,653

The Bank return of this week affords no evidence of anything beyond a fair employment for money. The decrease in private deposits is nearly balanced by that in private securities; and the addition of 636,649*l* to the Government deposits, gives on balance an increase in the reserve amounting to 551,653*l*. There is an increase of 182,128*l* in the stock of coin and bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20 947,475	21,618,780	21,252 916	21,478,987	21,701,380
Public deposits	2.733,9 8	6,804,683	6 735.137	7,299,494	7,349,114

In the corresponding week of 1855, the French Minister of Foreign Affairs had resigned office. In Parliament, Mr Layard in the House of Commons, and Lord Ellenborough in the House of Lords, had brought in motions expressing a want of confidence in the Government. The funds had risen on the publication of despatches from Lord Raglan announcing two repulses of the Russians.

In 1862, King Victor Emanuel had entered the city of Naples. The outline of Mr Laing's financial statement had been received by telegram from India, where its publication had caused a rise in Government securities.

In 1863, money was easy in the London market. Stocks and securities generally were firm. The rate of discount at the Bank of France had been reduced from 4 to 3½ per cent.

In 1864, The raising of the blockade had caused a Minis-

Digitized by Google

terial crisis at Copenhagen. The decision of the London Conference relative to the truce between the German and Danish belligerents had received the Royal sanction, and a cessation of hostilities for one month had been agreed upon by Denmark and the Allies. The Austrians had been defeated by the Danes in a naval engagement off Heligoland. A Royal decree had been issued suspending the Prussian navigation dues for six months. In America, the Federal army under General Banks had suffered a severe defeat at Sabine Cross-roads. Twenty-three millions of the new Austrian loan had been taken by the Anglo-Austrian Bank, and Messrs Baring Brothers, and Woodianer and Sina, at 77-10. The Bank of France had raised its rate to 7 per cent., and that of Italy to 8 per cent. The increased value of money had led to depression in the prices of English Government stocks.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 238,593*l*; in 1862, a deficiency of 3,699,421*l*; in 1863, a deficiency of 5,225,169*l*; and in 1864, a deficiency of 8,455,783*l*. In 1865, the deficiency is 6,308,505*l*.

Discount and Money Market.—The general commercial demand for money has been moderately active; and as the usual payments to Government account at this period of the year serve to sustain the firmness of the market, there are no transactions under the Bank rate. Bullion operations are exceptional, as no continental demand exists, and arrivals are taken to the Bank.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	4½ per cent.
3 months	4½ per cent.
4 months	4½ 5 per cent.
6 months—Bank bills	5¼ ½ per cent.
6 months—Trade ditto	5½ 6 per cent.

There is not much inquiry for money in the Stock Exchange, but the rate for short loans on Government securities is from 3 to 3½ per cent.

The following are the rates allowed by the joint stock banks and discount houses on deposits :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*.

Bullion.—No transactions have taken place to-day at the Bank.

The following are the current rates of discount on the chief continental bourses :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4½ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2¾
St Petersburg	6	5½

The changes in the Bank of France return are as follow :—

Increase.	£
Cash in hand	360,000
Advances	320,000
Notes	224,000
Treasury balance	24,000
Decrease.	
Commercial bills	720,000
Current accounts	168,000

English Government Stocks.—The settlement of the monthly account, which took place on the 10th inst., has not produced any alteration in the state of the market. The general feeling of uncertainty as to the results of the re-establishment of peace in America greatly serves to paralyse speculation in the stocks, and the proximate dissolution of Parliament also tends to interfere with the advance which, under other circumstances, might be looked for, considering the promising appearance of the crops, and the low price of Consols. The closing quotation this evening is 89⅜ to 89½ ex div. for June account, and 90½ to 90⅝ for money. New 3 per Cent. Reduced, 88½ to 88⅝. India 5 per Cent. stock, 106½ to 106¾.

Exchequer bills remain quiet, at 3s to 6s prem., and India bonds, 14s to 19s prem.

Foreign Stocks.—The markets have been very dull. There is a marked indisposition on the part of the public to occupy themselves with foreign stocks, and in many instances the prices have declined, simply in consequence of the indisposition of dealers to take the very moderate supply which, at an inconvenient moment, was offered. To-day rather less disposition has been shown to press sales, and a reaction from the extreme quotations is noted. There is, however, little general business. The closing prices of stocks dealt in to-day are subjoined :—7 per Cent. Danubian loan, 82 to 84. 7 per Cent. Egyptian, 92½ to 93. 5 per Cent. Greek, 20½ to 21; ditto Coupons, 7½ to 8½. Italian scrip, 4¾ to 4¼ dis. 3 per Cent. Mexican, 26⅜ to 26⅝. 5 per Cent. Moorish, 96¾. 5 per Cent. Russian, 91¼; ditto, 1850, 88¾; ditto, 1862, 90⅛. 3 per Cent. Spanish, 47¾; ditto, Deferred, 40; ditto, Certificates, 15¼ to 15¾. 6 per Cent. Turkish, 1854, 90 to 90⅜; ditto, 1858, 70½ to 70¾; ditto, 1862, 72¾ to 73¼; ditto, 1863, 69⅓. 6 per Cent. Venezuela, 1862, 38¼. 5 per Cent. Italian, 1861, 64¾ to 65¼.

French Three per Cents. rentes close at 67.65 for money and for the account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

Railways and Other Shares.—A fall in the value of nearly all the railway stocks has, this week, disturbed the tone of the market which had been previously well sustained. Holders appear, however, disposed to trust the future; and, to-day, the amounts of stock offering have been on a reduced scale. Blackwall Railway stock is firmer, the passing of the bill by which the arrangement with the Great Eastern Railway is confirmed having caused the appearance of buyers. The quotation of Caledonian Railway stock shows a decline of 1 per cent. as compared with the prices of last Friday, Great Eastern also 1 per cent., Great Northern ½ per cent., and the "A" stock 1 per cent. Great Western is ¾ per cent. lower, at 73 to 73½; and Lancashire and Yorkshire ½ per cent. lower. London, Chatham, and Dover has declined 1 per cent. London and Blackwall is 1½ per cent. higher, at 89 to 90. London and North-Western steady, and London and South-Western is quoted at ½ per cent. decline. Metropolitan Railway stock is firmer this evening, but the price shows a decline of 2 per cent. from that of last Friday. Midland Railway stock is ½ per cent. lower.

Indian railway stocks remain dull.

The market in the shares of the financial companies shows an improvement this evening. Prices had been heavily depressed by the sales made during the week, but the tendency is again favourable, especially in the shares of the Credit Mobilier and Foncier which close at 3¼ to 3½. The shares of the General Credit Company are also rather firmer, and International Financial have risen to 1 to 1⅛.

In miscellaneous shares, business is almost entirely confined to those of the newly-formed undertakings to which it is sought to attract the public by a high-quoted premium. In

Digitized by Google

several instances the price at which bargains are effected is only the result of an artificial scarcity created in the course of the contest carried on between those interested in the floating of a new company and those who seek to take advantage of the ruse to which recourse is had. In consequence of the dealings by which this result is attained, the premium in such cases can only be said to indicate the price which an incautious seller must pay for an article difficult to procure, and is not likely to convey any idea of the estimated merits of the undertaking to which the shares relate.

Bonds of various amounts are offered by the Credit Mobilier and Foncier of England, with interest coupons payable quarterly attached. Securities of this nature have proved attractive abroad to those who prefer a fixed income to the uncertain returns of a trading company, and there is no reason why, when protected by adequate security, such as an ample reserve fund or other defined sources of guarantee, they should not become equally popular in this country.

The amount of Government bills on India for which tenders will be received at the Bank of England on Wednesday next, is 300,000*l*.

The committee of the Stock Exchange have appointed Friday, the 12th May instant, a special settling day in the shares of the Anglo-Egyptian Navigation Company, which are to be officially marked.

The committee have also appointed Wednesday, the 17th inst., a special settling day in the shares of the Registered Land Company (Limited), which, however, are not to be marked in the official list at present.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

RAILWAY DIVIDENDS.—A dividend of 13f 50c for 1864 is announced as payable on Antwerp and Rotterdam Railway shares on the 1st June.

A payment of 6s per share (being over and above the 4 per cent. interest guaranteed by the Danish Government) will be payable on Zealand Railway shares on the 15th inst., by Messrs C. J. Hambro and Son.

FOREIGN EXCHANGES.—The tendency is upwards, bills on the continent being rather more abundant.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Our market has been exceedingly quiet during the past week, and there has not been the slightest demand for bar gold for export. Further amounts of sovereigns have arrived, and the Bank has received since our last circular of the 4th inst., 288,000*l* in bars and coin; on the other hand, 220,000*l* in sovereigns were withdrawn from that establishment for shipment to Brazils by the La Plata, and this sum, with the exception of 1,000*l* sent by the Delta to Alexandria, forms the only export. The Messageries steamers have brought 90,000*l* in sovereigns during the week.

Silver.—The steamer to Bombay, sailing to-morrow, does not take any silver. Our market has been very inactive, and prices have slightly declined. We quote fine bars as 5s 0⅝d per oz. standard. The La Plata has taken 8,400*l* to the Brazils.

Mexican dollars remain as last quoted, 4s 11½d per oz. This description of coin is taken entirely for the continental markets, there not being the slightest demand for China.

Exchange on India for drafts by the banks at 60 days' sight is firmer, and rates may now be quoted 1s 10½d to 1s 11d, and for demand 1s 11¼d to 1s 11½d.

India Government loan notes are rather lower, and may be quoted 108 to 110 for 5½ per cents, 101 to 103 for 5 per Cents, and 89 to 91 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11½d per oz std, last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d to 76s 3d per oz, last price. Silver—Bar silver, 5s 0⅝d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d per oz std, last price; Mexican dollars, 4s 11½d per oz, nearest; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A meeting of the creditors of Messrs James Marshall and Sons, cotton spinners, of Stockport, was held at Manchester, on the 5th instant, when the total liabilities were stated at 280,000*l*, and the assets at 200,000*l*. An offer of a composition of 12s 6d in the pound was submitted for consideration.

A meeting of the creditors of Messrs Charles Joyce and Co., in the the Egyptian trade, who failed on the 8th ult., is convened for the 16th instant.

Vice-Chancellor Wood proposes, on the 29th inst., to make a call of 2*l* per share on the contributories of the English and Irish Church and University Assurance Society.

At a meeting, yesterday, of the creditors of Messrs Marshall and Sons, of Stockport, a composition of 12s 6d in the £ was accepted.

The failure of Messrs Hankey Brothers, of Liverpool, is this evening reported. The amount of the liabilities has not transpired.

PUBLIC COMPANIES.—At the meeting of the Financial Corporation, held on Tuesday last, the resolution passed at a previous meeting, in favour of an amalgamation with the Oriental Commercial Bank, was confirmed.

At the first ordinary general meeting of the Financial Association of India and China (Limited), held at Bombay, on the 8th April, the net profits were stated at 60,000*l*. The directors' report was adopted, and a dividend at the rate of 20 per cent. per annum declared.

The report of the South African Mortgage and Investment Company (Limited), to be presented at the meeting on the 30th instant, has been issued. The directors recommend a dividend for the year at the rate of 7 per cent. per annum.

At the annual meeting of the Universal Life Assurance Society, held on Wednesday last, it was stated that the new policies for the year had yielded an additional income of 10,843*l*. A reduction of 50 per cent. was declared for the current year on all participating premiums.

The first ordinary meeting of the Telegraph Construction and Maintenance Company (Limited) was held on the 10th instant, when a dividend of 10 per cent. per annum was declared, and 43,325*l* 0s 8d carried forward to next year's profit and loss account.

At the first ordinary general meeting of Hewett and Company (Limited), held on Wednesday last, a dividend of 10 per cent. per annum was declared, and the balance, amounting to 1,985*l* 2s 8d, carried forward to the insurance and reserve fund.

At the meeting of the British Prudential Assurance Company, held on the 5th inst., the directors' report for the year ended Dec. 31 showed an increase in the Company's operations to the amount of 41,212*l*. The total gross income was 92,417*l* 12s 1d; and the surplus fund was stated at 77,178*l*. The usual interest on the shares, at the rate of 5 per cent., is payable to-day.

The annual meeting of the Trust and Agency Company of Australasia took place on Monday last, when the directors' report was adopted, and a dividend and bonus equal to 20 per cent. per annum declared.

At an extraordinary meeting of the London and Brazilian Bank, held on Thursday last, the proposal for an amalgamation with the Bank of Messrs Mauá and Co. was unanimously agreed to.

At a meeting of the National Provincial Bank of England, held on Thursday, the directors' report was adopted. The net profits for the year 1864 were stated at 303,800*l*, and a

Digitized by Google

total distribution for that period of 28 per cent. free of income-tax was declared.

The meeting of the Otago and Southland Investment Company took place on the 11th inst., when a dividend was declared for the half-year at the rate of 6 per cent. per annum.

The directors of the Royal Sardinian Railway Company have issued their report, to be submitted at the extraordinary general meeting on the 15th inst. It is proposed that 600,000*l* be raised by the creation of 60,000 "nominative preference shares," of 10*l* each, that all existing arrears on calls be paid up, and that a further call of 1*l* be paid on the existing 20*l* shares, so that 10*l* a share shall be paid upon them.

The prospectus has been issued this afternoon of the Peruvian Railways Company (Limited), with a total capital of 3,340,000*l*, one-half of which, viz., 1,670,000*l*, divided into 66,800 shares of 25*l* each, will be issued in the first instance. The Peruvian Government have conceded a guarantee of 7 per cent. per annum on the whole capital, and arrangements have been made which secure the additional advantage of a redemption fund, by means of which the shares of the Company will be periodically drawn, after the expiration of twenty years from the completion of the lines, and paid off at a premium of 100 per cent. In addition to this guarantee by the Government of Peru, whose 4½ per cent. stock is a favourite security in the London and the continental markets, a special charge has been created on the guano imported into Europe from the Peruvian possessions.

On Saturday, the 29th ult., the business of the Royal Assurance Company was transferred to the new building just erected for them in St Clement's lane, Lombard street.

The Petroleum Company of Western Virginia, U. S. (Limited) has provisionally purchased some considerable districts in which petroleum of a quality superior to that of Pennsylvania is believed to exist. In conformity with the American system, profits will be divided every three months; petroleum being an article of very ready sale. The petroleum companies now existing in America appear, according to the facts stated, to yield from 4 to 20 per cent. per month.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these ratios with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about the same price in Paris and London.

LONDON EXCHANGES ON INDIA, &c.

April 26.

Melbourne	1 p c dis		⅛ p c dis

Bills with documents attached against indents and consignments for India vary according to amounts, and the security which they offer.

The Commercial Times.

Post Office Announcements.—Information has been received from the Italian Post Office that the mail packets on the line between Ancona and Alexandria, which leave Ancona on the 5th, 12th, 20th, and 28th of each month, will no longer call at Corfu on the outward and homeward voyages. In future, therefore, correspondence for the Ionian Islands, via Italy, will be forwarded only by the packets of the line between Ancona and Naples, which will continue to leave the former port every Friday night. Letters, &c., for the Ionian Islands, to reach Ancona, in time for the packet on Friday, must, as heretofore, be posted in or reach London not later than Wednesday morning, in time for the day mail to France.

Information has been received from the French Post Office that the French mail packet on the line from Marseilles to Malta, via Italy, has been withdrawn. Correspondence for Malta can, therefore, no longer be sent by French mail packet, via Marseilles; and mails for Italy, which have hitherto been forwarded by French packet twice a week, will, in future, be sent only once, viz., by a packet leaving Marseilles every Thursday morning at 10 o'clock. This packet will call at Leghorn, Civita Vecchia, Naples, and Messina, and letters, &c., intended to be forwarded by it must be posted in or reach London not later than the evening of every Tuesday, in time for the night mail to France.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

A small supply of English wheat was on sale at Mark lane, to-day, and the trade for all qualities ruled firm, at fully late rates, but with a tendency to improvement as regarded good and fine samples. Foreign wheat changed hands to a very moderate extent; nevertheless, prices ruled firm. Barley, beans, and peas were in short supply, and fully supported previous quotations. Oats, of which there was a large arrival, were somewhat lower in price. The flour trade was firm, at very full prices. This week's imports amount to 3,930 quarters of wheat; 2,460 barley; 41,710 oats; and 820 sacks of flour.

At Liverpool, this morning, wheat, flour, and maize were in moderate request. Previous quotations, however, were well supported. The wheat trade at Wakefield was steady, at full prices.

On Monday, the Liverpool cotton market opened with a good demand, which was well maintained on Tuesday, the sales of the two days amounting to 35,000 bales, at advancing rates. On Wednesday, however, the news per Belgian, caused a quieter feeling to prevail, and since prices have declined heavily.

A telegram from Bombay, by the Indo-Persian line, states that Dhollera cotton on the 5th inst. was quoted at 250 rupees per candy.

A heavy fall took place in the value of cotton at Bombay during the fortnight ending April 18. Dhollera sold as low as 235 rupees per candy. "The total transactions," write Messrs Nicol and Co., "amount to about 24,000 bales, nearly two-thirds of which are on native account. From all quarters the supplies of new cotton (excepting native Compta) are now rapidly pouring in, and unless the heavy shipments customary at this season quickly commence, we shall doubtless have a plethora of cotton during the rains." The following tables of prices and exports are from the circular of the above-mentioned firm:—

CURRENT PRICES of COTTON at BOMBAY, April 13.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 0⅛d. Freight 2⅞s. per lb

Grand total	266,806½	278,329½

Arising in some measure from the fact that several forced sales had taken place, the decline in the value of cotton goods at Bombay, during the month ending April 13, was considerable. The total amount of business transacted was very moderate. The following prices of grey shirtings are from Messrs Rennie, Scovell, and Co.'s circular:—

No	Inches.		lbs	oz	s	d
13	39	14 by 11	6	0	8	6
18½	39	14 14	7	0	10	10½

49	44 to 45	16 16	9	8	16	0
57	50	16 17	10	6	18	4½

Speaking generally, the Mincing lane markets, this week, have ruled quiet. Tea and rice, however, have commanded a fair amount of attention, resulting in moderately extensive transactions, at full prices. Coffee has not been freely offered for sale at the public auctions, and has changed hands at quite previous rates. Sugar has sold heavily, and prices have slightly declined. In other articles, sales have progressed slowly at about previous quotations. Our latest advices from China state that the export of tea to Great Britain had reached 11,250,000 lbs.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to April 30, 1864 and 1865, with STOCK on hand on May 1, 1864 and 1865.

Totals	34,628	64,417

The public sales of colonial wool are now in progress. They were commenced yesterday, with a full average attendance both of home and foreign buyers. The arrivals are unusually large, viz., 168,724 bales, comprising 22,092 bales from Sydney; 78,879 Victoria; 26,341 Adelaide; 4,458 Tasmania; 13,619 New Zealand; 2,429 Swan River; and 20,906 bales from the Cape of Good Hope. As compared with the close of last sales, Port Philip wool shows a decline of 1d to 1½d; greasy Adelaide, ½d to 1d; New Zealand, 1d; and greasy Cape, ½d to 1d per lb. Cape fleeces and Sydney wools have fairly supported previous quotations.

The silk trade is firm, and the quotations have an upward tendency. The following table, from Messrs Durant and Co.'s circular, shows the state of the London warehouses on the 1st inst.:—

STATE of the SILK WAREHOUSES.

Hemp continues inactive, at 28*l* to 30*l* for clean Russia. Flax, however, is firm, at fully late rates.

The quarterly public sales of East India indigo were commenced on Monday last. The quantity declared was 8,152 chests in the A catalogue and 775 in the B—total, 8,927 chests, of which 907 were not printed or withdrawn, leaving the quantity to be brought forward 8,320 chests, consisting of 3,279 chests Bengal, Tirhoot, &c., 667 Oude and Plant Oude, 1,246 Kurpah, 1,902 Madras, 19 Bimlipatam, 108 Manila, 225 Moolran Figs, and 574 sundries, including B catalogue. The biddings for all good and fine qualities have ruled active, at an advance in prices from last sales varying from 2d to 4d per lb. In low sorts, very little change has taken place. Of the quantity which has up to this evening passed the hammer, viz., 7,899 chests, 4,058 chests have been withdrawn and 933 bought in, leaving 2,908 chests sold.

Messrs Moran and Co. state that the export of indigo from Calcutta from Nov. 1, 1864, to April 5, 1865, amounted to 25,069 chests, 16,469 chests being to Great Britain, 5,446 to France, and 298 chests to America, the remainder to foreign Europe and the Gulfs.

The metal, oil, and tallow trades have been decidedly quiet, and, in some instances, prices have slightly declined.

There was a decided improvement in the state of trade at New York during the week ending April 29. In nearly all articles an increased amount of business was transacted on higher terms. In cotton, the dealings were of considerable extent, and at enhanced rates, whilst cotton goods changed hands freely, and in large quantities, on higher terms. With the exception of breadstuffs, the export demand for which was trifling, other departments of trade exhibited more firmness than for several previous weeks, and the tendency of prices was in a favourable direction. The export of petroleum from all ports in the United States, from Jan. 1 to April 22, amounted to 3,282,441 gallons, against 6,566,831 gallons last year, and 13,735,000 gallons in 1863. As regards the state of the money market, very little improvement was noticed: 60 to 90 days' paper was quoted at 6 to 7; and 3 to 4 months' ditto, 7 to 8 per cent. The premium on gold, on the 29th ult., was 46¼ per cent. The shipments of specie, from Jan. 1 to April 22, were 1,247,500*l*, against 2,983,700*l* last year; 3,271,100*l* in 1863; 2,351,700*l* in 1862; 470,000*l* in 1861; 1,079,970*l* in 1860, and 2,504,400*l* in 1859. The stock of bullion in the banks on the 22nd ult., was 3,824,460*l*; and the balance in the Sub-Treasury, 6,393,600*l*.

THE COTTON TRADE.

LIVERPOOL—MAY 12.

The cotton market on Friday and Saturday was very heavy, at declining prices, but on Monday the political advices from New York and the great advance in that market, as well as the reported destruction of cotton in the Southern States, caused great activity, and prices fully recovered from the decline previously submitted to. A large business resulted, followed on Tuesday by very extensive purchases, at a further considerable advance, particularly in long staple. On Wednesday later news from America of the surrender of General Johnston's army produced a quieter feeling and less business has since been done, at lower and irregular rates. Sea Island has been in good request at last week's prices. American continues in good demand by the trade as well as exporters, and after advancing in the early part of the week ½d per lb, closed in some instances rather below last week's rates. Brazil declined full ½d during Friday and Saturday, and after a large business on Monday and Tuesday, at an advance of fully 1d per lb, closed very heavy and irregular, at about last week's quotations. Egyptian has been in very extensive demand, and after fluctuating considerably from day to day, closed yesterday ½d to ⅝d below last Friday's quotations. Smyrna is quoted ½d below last week in some descriptions. In East India a considerable amount of business has been transacted; the demand has been freely met, and the quotations of last circular are (with few exceptions) barely supported. China and Japan are freely offered without change from last week's quotations.

The only transactions reported to arrive during the week have been in Maceio, fair average quality, ships named, at sea, on Tuesday 14d, and yesterday 13d per lb.

The sales of the week amount to 71,040 bales, including 12,133 on speculation, and 21,580 declared for export, leaving 37,330 bales to the trade. The sales to-day amount to about 7,000 bales.

LONDON—MAY 12.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened heavily, but on the arrival of the Europia, on Monday, reporting great destruction of cotton in the South, and a considerable rise in prices in New York, there was a sudden rebound and a large business was done at ¼d to ½d advance; but the news received on Wednesday, of Johnstone's surrender and the virtual termination of the war, caused a reaction; the advance obtained has been entirely lost and the market closes flatly, Madras being ¼d to ½d and Bengal ¼d lower than last week; other descriptions are unchanged.

NEW YORK—APRIL 29.

The cotton trade during the week just concluded has shown considerable activity, and prices have improved to some extent. The total sales amounted to 15,300 bales. The arrivals, however, are of very moderate extent, viz., 1,970 bales, chiefly from New Orleans and by railroad. The following are the rates current:—

MARKETS IN THE MANUFACTURING DISTRICTS

The demand for goods in the manufacturing districts, this week, has been far from active. The markets, however, have presented a very firm appearance, and, in some instances, prices have improved. In iron, a fair business has been transacted; but the trade for coals has ruled quiet.

MANCHESTER, May, 11.—In the beginning of the week, this market, which had been quietening, was greatly excited by American news, which were understood to indicate hard measures on the part of the American Government, leading to the great destruction and loss of the stock of cotton. A very general inquiry was experienced for two days, and business was continued as well as the exhausted stock, pre-engaged positions, and advanced requirements of producers would allow. But the American news of Wednesday wrought as suddenly another great change, the market at once relapsing into dullness and inactivity on the announcement of General Johnston's surrender, and the consequent pacification of a large tract of territory. Prices are occasionally the turn weaker, but probably, on the whole, not very different from those of last week. The relief committees in various neighbourhoods are ceasing their operations, a step by no means too early, as the operatives begin to feel themselves scarce and wanted, and to be urgent for a rise of wages.

BRADFORD.—There is a considerable disposition to buy wool, and the tendency in price rather upward than otherwise. Without any very marked changed a steady improvement is going on in the yarn trade. Pieces—Manufacturers are booking a fair amount of fancy orders from the home merchants for next autumn. The new styles are unusually attractive and promise well for a good fall trade.

LEEDS.—Purchases of autumn goods are made cautiously, but some fair orders are in the hands of manufacturers for exportation. Prices both of wools and cloths keep firm.

NOTTINGHAM.—The demand for lace yarns is firm, and the extreme rates of last week are maintained. The demand for hosiery yarns is steady, and prices are quite as high as last week.

ROCHDALE.—Trade in Yorkshire goods is still most meagre, but manufacturers refuse to abate their prices. The sales of wool are entirely of a retail character, and though the new clip will shortly be introduced, prices are firm.

LEICESTER.—There is more doing in the hosiery trade. Business generally is active, plain and fancy goods being in request. The wool market is firm.

SHEFFIELD.—In many branches the home markets are yielding nearly average orders for the season.

WOLVERHAMPTON.—The orders for finished iron are large. All the leading houses are in full operation.

BIRMINGHAM.—The trade of this town continues dull. The orders coming in on account of the country trade are moderate, and in no department is there any approach to animation.

CARDIFF.—The coal trade is slack. The iron trade continues good, and rails readily fetch 7*l* to 7*l* 10s, and bars, 6*l* 15s.

NEWCASTLE.—There has been no great change in the manufacturing trade of this district. The iron market has been somewhat quiet, exhibiting a slightly downward tendency. The London coal trade has been very bad for sailing vessels, in consequence of large contracts now being carried by screw-colliers.

Digitized by Google

NEWPORT.—Home contracts for railway iron have been secured by several of the local firms. Quotations are firmly maintained, the market showing rather an improving tendency. In tin plates the late advance has not been lost.

DUNDEE.—Our flax market has been very firm, and prices continue to have an upward tendency. Jute continues without change; the improvement in the demand for fine qualities has scarcely been maintained, and common sorts continue dull. There is rather more demand for some descriptions of linens.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 29.—The flour trade has ruled heavy, and prices have given way. The following are the quotations:—Flour—State, superfine brands, $6.90 to $7.10; State, extra brands, $7.25 to $7 40; State, choice brands, $7.45 to $7.75; Ohio, common brands, $8 to $8.15; Ohio, fancy brands, $8.20 to $8.25; Ohio, good and choice extra brands, $8.30 to $9.60; Michigan, Indiana, Wisconsin, &c., $7 to $8; Genesee, extra brands, $7.90 to $9.75; Missouri, $7.90 to $11.75; Canada, common, $7.50 to $7.85; Canada, good to choice extra, $7.90 to $9.90 per barrel. Wheat and corn have sold slowly at about previous rates. The export demand for all articles is very trifling.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land carriage have been very moderate. The show of samples has, therefore, been somewhat limited, but in excellent condition. Both red and white qualities have moved off steadily, and previous rates have been well supported. The supply of foreign wheat has not increased. Good and fine parcels have changed hands steadily, at full quotations. Otherwise, the demand has been very inactive, at late rates. Grinding barley has met a dull inquiry, at barely stationary prices; but malting and distilling sorts have been tolerably firm. We have no change to note in the value of malt. The trade, however, has ruled very inactive. The demand for oats has fallen off; nevertheless, the quotations have been supported. The few beans and peas on sale have been readily disposed of at very full prices. The flour trade may be considered steady. The various local markets have been but moderately supplied with wheat, for which the demand has been inactive, at the late improvement in value. All spring corn has sold at late rates.

The continental markets have been steady for wheat, at full quotations, although the orders on hand for shipment to England are comparatively small. Barley and all other articles have continued firm. The latest advices from New York are to the effect that both wheat and flour were very dull. The supplies on offer were extensive, and the shipments to the United Kingdom trifling.

The Scotch markets have been very scantily supplied with wheat, and all kinds have sold slowly, at previous rates. Other kinds of produce have sold steadily.

In Ireland, the wheat trade has continued tolerably firm, and there has been a good business doing in barley and oats, partly on English account, at full quotations.

The supply of English wheat on sale at Mark lane, to-day, was small. For all qualities the trade ruled firm, and late rates were fully supported. Foreign wheat, the supply of which on sale was very moderate, changed hands at quite previous rates. Barley, beans, and peas were firm, at full currencies. Oats, owing to the increased importation, were somewhat easier in price; but for flour there was a steady demand, at fully late rates.

Mr George Dornbusch reports that trade in cargoes of grain afloat has ruled active. Wheat has sold at prices 1s to 2s per quarter above the late lowest point, and all other articles have changed hands at fully late rates. The arrivals at ports of call since Friday last have numbered 40, 18 cargoes of which consist of wheat, 7 maize, 6 barley, and 6 cotton seed.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—This market is inactive, with occasional sales at 6d per cwt under last week's rates. Rather heavy landings have occurred. The deliveries continue large, being 5,560 tons last week, and the present stock of 79,900 tons is now only 14,400 tons above that in 1864. There is an increase in the total deliveries over last season's amounting to 26,000 tons. About 1,644 casks West India had sold in three days, and the various public sales have gone flatly. The Netherland Trading Company's sale of Java sugar on the 23rd inst. will contain 72,200 baskets.

Mauritius.—2,760 bags, offered by auction, were partly disposed of at the following quotations: low to fine brown, 25s to 31s; grainy and crystallised, 33s to 36s 6d; grainy white, 11s 8d duty, 41s 6d per cwt.

Bengal.—1,330 bags part sold: white Benares, 33s to 36s per cwt. Gurpatta date chiefly taken in.

Madras.—2,267 bags native chiefly met with buyers at about the previous value: brown, 25s to 26s 6d; low yellow bought in at 27s 6d per cwt.

Natal.—1,657 bags sold steadily at 25s to 33s per cwt.

Foreign.—872 casks Porto Rico, in the public sales, were chiefly taken in at high prices: a few lots low to good yellow sold at 32s to 35s. 2,240 bags Pernambuco part sold at 28s 6d to 29s for soft brown. Two floating cargoes of Porto Rico have sold, for the United Kingdom, at 33s 3d. One of Cuba muscovado at 22s per cwt.

Refined.—Sales of moderate extent have been made in dry goods at barely previous rates.

RUM is steady, but few sales of interest have been made.

COCOA.—Of 531 bags Trinidad brought to auction yesterday, a considerable portion sold at about previous rates, from 68s to 88s; fine, 100s 6d to 107s 6d. 154 bags Grenada were bought in at high prices. 248 bags St Lucia sold on lower terms, from 45s 6d to 50s per cwt.

TEA.—This market is steady, although entirely devoid of speculative animation. Good to fine grades of congou are still in moderate request. Public sales will commence on the 16th inst.

COFFEE.—Small supplies have been offered. The recent arrivals from Colombo will afford a better assortment of plantation. A few lots by auction this week realised former rates. Native is quiet. 344 casks and barrels 1,230 bags offered at public sale were chiefly taken in, a few lots selling at 66s 6d to 70s according to quality. Some small parcels of Jamaica sold at 72s to 93s. 50 bales common long berry Mocha sold at 90s to 91s. 475 bags African, at 62s to 64s per cwt. 403 bags East India were taken in at higher prices. The home deliveries have fallen off by nearly 1,100 tons in rather over four months.

RICE.—The public sales have comprised 8,840 bags Bassein and 4,720 bags Rangoon, which chiefly sold at and afterwards:—the former at 9s 3d to 10s 3d: the latter at 8s 6d to 9s. A limited business is reported privately in white Bengal, at 12s to 13s 3d; and some soft grain at 9s 7½d to 10s per cwt.

SAGO FLOUR.—150 packages by auction partly sold at 14s 6d per cwt.

SAGO.—1,109 boxes sold steadily: bold grain, 22s 6d; medium, 20s to 20s 6d; small, 19s to 20s 6d.

SPICES.—Black pepper has sold upon rather easier terms this week. Of 4,450 bags offered by auction, a considerable portion sold: Penang West Coast, 3d to 3⅛d; Singapore, 3¼d to 3⅜d. 451 bags white Singapore chiefly sold at 6d to 6¼d. 413 bags pimento sold at extreme rates, from 2⅜d to 2½d per lb. 193 bags African ginger sold at 40s to 40s 6d. The sound portion of 456 bags Bengal, at 24s 6d, one lot, 25s; 242 barrels Jamaica at 61s to 116s. 845 cases cassia lignea were mostly sold: coarse and mixed, 82s 6d to 84s; good taken in at 86s to 87s per cwt.

SALTPETRE.—A limited business has been done this week. Refraction 6½ to 3½, 26s 6d to 27s 6d per cwt. Some low Bombay sold at 10s per cwt, without allowance for refraction.

IMPORTS and DELIVERIES of SALTPETRE to May 6, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....tons	2000	5860	8700	6530
Deliveries	4230	4690	5290	6940
Stocks	5180	8330	7230	2730

Delivered last week 201 tons.

COCHINEAL.—There is a good demand for Teneriffe at 1d advance, and other kinds have gone off at steady prices. 606 bags brought to auction about half sold: Teneriffe grain, silvers, 3s to 3s 3d; blacks, 3s to 3s 5d; Honduras silvers, 3s to 3s 5d; blacks, 3s 2d to 4s 4d; Mexican silvers, 2s 10d to 3s; blacks, 3s to 3s 4d per lb.

OTHER DRYSALTERY GOODS do not present any material change this week.

METALS.—The markets are generally quiet. Scotch pig has fluctuated in value, mixed Nos. closing at 53s 9d cash. Manufactured iron keeps firm in price. There has been less pressure to sell foreign tin, and 95*l* paid for Straits to arrive, 93*l* to 94*l* cash on the spot. Spelter has been in active demand, with several sales at 21*l* to 21*l* 15s per ton, according to conditions.

JUTE.—7,200 bales, rather more than half found buyers at about last week's rates, from 10*l* 5s to 21*l* 10s per ton for low to fine. Several parcels have sold to arrive.

MANILLA HEMP is in good demand, with few sellers, unless at some further advance.

OILS.—Sperm continues to be held at 95*l* per tun, with buyers at about 2*l* less. Olive remains dull. Cocoa-nut steady. Good Ceylon, 40s to 40s 6d; Cochin, 43s to 43s 6d. Linseed sells slowly, at 31s 9d to 32s. Fine palm has been firm, commanding 36s 6d. Rape queit: foreign refined on the spot, 43s 6d to 44s; brown, 41s 6d to 42s per cwt.

TALLOW.—The market was quiet until the middle of this week, when rather a better demand prevailed for foreign. 1st sort Peterburg Y.C., on the spot, or for early deliveries, 40s 3d to 40s 6d; October to December, 41s 6d to 41s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, May 8, 1865.

	1862. casks.	1863. casks.	1864. casks.	1865. casks.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes firmly, at rather better prices for refining qualities. 1,542 casks West India have sold, making 3,186 casks for the week. 4,550 bags Mauritius by auction were disposed of at fully previous quotations. 1,092 bags Bengal; low brown at 25s 6d. 321 bags native Madras; brown to low yellow, 26s to 28s. 345 casks Honduras, 29s to 34s 6d per cwt. Two floating cargoes sold; one Havana, No. 14, at 27s 1½d for a near port. One of Cuba, at 22s 9d, for the United Kingdom.

COFFEE.—50 casks 1,714 barrels and bags Jamaica chiefly sold at 58s to 72s. 888 bags sea-damaged Rio, at 55s to 58s per cwt.

SHELLAC quotations are again rather lower.

SAFFLOWER.—201 bales Bengal sold at rather lower rates, from 5*l* to 7*l* 10s per cwt.

OIL.—By auction 287 casks Cocoa-nut went as follows; Cochin, 45s to 43s 3d; Ceylon, 39s 9d to 40s 3d.

TALLOW.—Town reduced to 41s 6d. By auction 236 casks Australian partly sold at 39s to 39s 3d per cwt for good beef.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been quiet this week, no material alteration to note as respects prices. In Dutch crushed higher prices have been paid for forward delivery.

GREEN FRUIT.—Market bare of oranges, and tends to advance the price. Some parcels Valencia, Terceira, and Palermo, sold by Keeling and Hunt, went at an improvement of 2s to 3s per package. Lemons of good quality in request. New Para nuts have arrived in London and Liverpool, and meet with a ready sale. Barcelona nuts in moderate demand. French walnuts dull.

DRY FRUIT.—A dull market for currants, with lower prices for medium fruit. Raisins steady at the late advance.

SEEDS.—The state of the weather tends to advance the prices of most descriptions of seed; heavy rains late in the season are not calculated to advance their growth.

ENGLISH WOOL.—Rather more doing.

HEMP.—The market is firm both on the spot or to arrive, and but few sellers for forward delivery.

TOBACCO.—Our market still continues in a very inanimate state. Sales have been quite of a retail character.

TIMBER.—The wood market is steady, prices having been reduced gradually to a point from which partial recovery may be expected as the stock diminishes. This has been for sometime past in American pine and spruce deal, and begins to apply to Baltic deals. Fir timber is now quoted as low as the expected import prices will be, when fresh stock comes forward. Of Canadian pine timber, oak, and other hardwoods, the stocks are larger and the consumption smaller than usual, hence losing prices on all last year's importation. Of teake and shipbuilding timber the stock exceed the demand, and the prices are lower.

LEATHER.—The leather market remains unaltered since the report of last week. The demand continues to about the same extent as during the previous month, and prices are in general the same. At Leadenhall there is a fair supply. The articles most wanted are prime crop hides, 40 lbs and 50 lbs, light English butts of best quality, light common dressing hides, light calf skins, and good kips.

METALS.—We have little change to note in metals. Copper continues to move off slowly. Iron is firm, and in steady request. Tin has been rather quieter, with only very slight variations in prices. Lead is totally neglected. Spelter has improved in value, the transactions reported are large, but confined to a small circle. Tin plates continue in better dtmand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	0
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, MAY 11.—To-day's market was well supplied with beasts, and the condition of the stock was, on the whole, good. The beef trade ruled quiet, at about Monday's currency. Prime Scots and crosses realised 4s 8d to 4s 10d per 8 lbs. Sheep, the supply of which on sale was moderate, moved off slowly, at late rates. The top figure was 6s per 8 lbs. The market was but moderately supplied with lambs. Good and fine qualities sold readily, at full prices; otherwise, the lamb trade was quiet. There was a fair demand for calves, at late rates. The pork trade was quiet, on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	to 3	8	Prime Southdown sheep	5	8	to 6	0
Second quality ditto	3	10	4	2	Large coarse calves	4	2	4	8
Prime large oxen	4	4	4	6	Prime small ditto	4	10	5	2
Prime Scots, &c.	4	8	4	10	Large hogs	3	6	4	4
Coarse and inferior sheep	3	10	4	6	Small porkers	4	6	4	10

Prime small ditto	4	4	4	6	Large pork	3	6	4	6
Veal	4	0	5	0	Small pork	4	8	5	0

Lambs, 6s 4d to 7s 8d.

HOP MARKET.

FRSDAY, May 12.—The supply of Enhlish hops on sale is very moderate. Most qualities are in steady request, at fully late rates. In foreign hops, about an average business is doing, at full currencies:—Mid. and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 130s; Older hops, 30s to 90s per cwt.

POTATO MARKETS.

FRIDAY, May 12.—Moderate supplies of potatoes are on sale, the trade being slow, at about stationary prices:—Yorkshire Regents, 90s to 120; ditto Flukes, 130s to 150s; ditto Rogents, 90s to 120s; ditto Rocks, 85s to 10s; foreign, 60s to 80s per ton.

COAL MARKET.

FRIDAY, May 12.—Wallsend Haswell, 18s; Hetton, 18s; Hartlepool, 17s 6d; East Hartlepool, 17s 6d; Braddyll's Hetton. 16s 6d; Cassop, 17s: Harton, 15s 6d; Hetton Lyons, 15s 6d; Heugh Hall, 16s 9d; Russell's Hetton, 16s 3d; South Kelloe, 16s 9d; Tunstall, 15s 6d; Lambert's West Ha-tley, 16s 3d; West Hartley, 16s 6d; Holywell Main, 17s; Walker Primrose, 13s 3d per ton. Ships at market, 41; sold, 19; gas contracts, &c., 22—41; ships at sea, 40.

HAY MARKETS.

THURSDAY, May 11.—The trade for hay and straw is dull, with a downward tendency in prices.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Meadow hay	90 to 105	95 to 110	90 to 105
Clover	110 to 126	110 to 130	110 to 126
Straw	28 to 33	30 to 36	28 to 32

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 12.—A fair amount of business has been done since the close of our public sales, at prices slightly in advance of those obtained at auction; altogether there are symptoms of improvement in the de-

Digitized by Google

mand for wool generally, and the opinion that we have seen the lowest point appears to be gaining ground.

CORN.

(From our own Correspondent.)

Friday, May 12.—The market fully attended. Wheat in rather better demand, at Tuesday's rates. Flour slow. Indian corn a turn dearer: Galatz, 29s 3d to 29s 6d. Beans steady. Oats and oatmeal quiet.

The Gazette.

Tuesday, May 9.

BANKRUPTCY ANNULLED.

M. Thomas, Swansea, grocer.

BANKRUPTS.

W. Armitage, Bridge street, Kilburn—H. Bradley, Charlotte street, Fitzroy square, house agent—H. Brownrigg, Lime street, City, merchant—J. N. Champion, Baring street, New North road, house decorator—J. S. Clay, Bartholomew road, Kentish town, lithographic artist—D. Colgrove, Tottenham road, De Beauvoir town, tailor—W. Gilmour, Aylesbury, surgeon—D. Hallihan, Dunstan's place and Brook street, Ratcliffe, greengrocer—R. Harris, Essex road, Islington, tailor—H. EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 29th of April, on 11,841 miles, to 664,612*l*, and for the corresponding week of last year, on 11,490 miles, to 621,964*l*, showing an increase of 351 miles, and of 42,648*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,374 miles, to 540,823*l*, and for the corresponding week of 1864, on 8,097 miles, to 504,887*l*, showing an increase of 277 miles, and of 35,936*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 8.—In the share market to-day both the actual transactions and the variations from Saturday's closing quotations were few and generally unimportant, but American securities and miscellaneous shares show a firm tendency. Of English railways, Blackwall and Metropolitan District (ordinary) improved ½ each; Brighton receded ½, and Great Eastern and Great Western ¼ each. In colonial, Scinde declined ½. In foreign, Dutch-Rhenish recovered ½, Northern of France advanced 1, and Paris and Orleans ½; Paris and Mediterranean declined ½, and West Flanders ⅛. In American, Erie shares (paid up) advanced 5¼, Illinois Central shares 1¾, United States (5-20) 1¼, and Atlantic and Great Western (of all descriptions) 1 each. In British mines, Chiverton, East Carn Brea, and East Gunnislake improved ¼ each, and Wheal Buller further 12½; East Grenville relapsed ¼, and South Caradon declined 5, and East Caradon ¼. In foreign mines, Don Pedro North del Rey improved ⅛, and St John del Rey a further 1.

TUESDAY, May 9.—In the share market to-day dulness very generally prevailed, and the English and Indian railways and miscellaneous shares were inclined to flatness, but the banks remained firm. Of the English lines, South Devon advanced 1, and Blackwall a further ½; Metropolitan receded 1½, ditto (new) and ditto (extension) ½ each, Manchester, Sheffield, &c., 1, Caledonian, Great Northern (A stock), and Chatham ½ each, and Lancashire and Yorkshire and North-Western ¼ each. In colonial, Delhi (stock) and Punjaub declined ½ each, and East Indian (J extension) ¼. In foreign, Paris and Mediterranean recovered ½, Great Luxembourg improved ⅛, and Dutch-Rhenish relapsed ⅛. In American, Atlantic, and Great Western (of all descriptions) further advanced 1 each, United States (5-20) and Illinois Central (shares) relapsed ¼ each, and Virginia (6 per cent.) declined 1. In British mines, Great Wheal Vor improved ½, South Condurrow ¼, and Chiverton a further ½; and Clifford Amalgamated and East Lovell receded ½ each. In foreign mines, St John del Rey further advanced 2.

WEDNESDAY, May 10.—In the share market to-day English railways and banks closed with a downward tendency, but the other descriptions were not materially altered in tone. Of the English lines, Great Western declined ¼, Great Eastern (of both descriptions), South-Western, Midland, South-Eastern, and Great Northern ½ each, ditto (A stock) and Metropolitan a further 1 each, ditto (Extension) a further ⅛, Caledonian a further ½, and North-Western a further ¼. In colonial, Great Western of Canada (shares) and ditto (new) receded ⅛ and ¼ respectively. In foreign, Southern of France improved 1, and Paris and Mediterranean a further ½, and Great Luxembourg relapsed ⅛. In American, United States (5-20) recovered ½, Erie shares (paid up) improved ½, Illinois Central (shares) further declined ¼. In British mines, East Caradon receded ¼. In foreign mines, Vallanzasca Gold advanced ⅛, and United Mexican declined ¼.

THURSDAY, May 11.—In the share-market to-day the transactions were very few, and there was little average change in the closing quotations. Colonial and miscellaneous shares, however, showed a firm tendency, and American were rather depressed. In English railways, Great Northern recovered ½, and South-Eastern ¼; and Chatham declined ½; Lancashire and Yorkshire ¼, Great Western (Newport) 1, and ditto (original) a further ¼. In colonial, Great Western of Canada (new shares) recovered ½; and ditto (5½ per cent. bonds) advanced 2, and Scinde and Punjaub ½ each. In foreign, Dutch Rhenish improved ¼; and Southern of France receded ½, Antwerp and Rotterdam ⅛, and Great Luxembourg a further ¼. In American, United States' 5-20's and Erie shares (paid up) relapsed ½ each, and Illinois Central shares further declined ¾. In British mines, Wheal Buller advanced 5.

FRIDAY, May 12.—The railway market was inactive to-day. The only movement in the principal stocks was a rise of ¼ per cent. in Metropolitan. Canadian lines were flat, and Indian inactive.

The imports of bullion into the United Kingdom during the week ending May 10, were:—Gold, 173,566*l*; silver, 34,947*l*. The exports were:—Gold, 268,587*l*; silver, 165,873*l*.

STARCH MANUFACTURERS TO
H. R. H. THE PRINCESS OF WALES.
GLENFIELD STARCH,
Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.
WOTHERSPOON and CO., Glasgow and London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.
*** No connection with any one of the same name.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

COUGHS, ASTHMA, AND Incipient Consumption are effectually cured by KEATING'S COUGH LOZENGES, which are daily recommended by the Faculty—testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy, and convenient remedy for Cough and all Disorders of the Lungs, Chest, and Throat.—Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 11s each, by T. KEATING, Chemist, 79 St Paul's Churchyard, London. Sold retail by all Druggists, &c.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.
NEW PATENT.
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly London.

THE RECENT ROBBERIES FROM IRON SAFES.
GEORGE PRICE CALLS attention to his TREBLE and QUADRUPLE PATENT FIRE-RESISTING (212°) and BURGLAR-PROOF SAFES now making on his improved principle to resist every kind of violence, as well as drills, gunpowder, and picklocks. These unrivalled Safes are made of half-inch boiler plate, with one-inch solid case-hardened doors. New illustrated Price-lists are now ready, and may be had post free, from the sole Patentee and Manufacturer, George Price, Cleveland Safe and Lock Works, Wolverhampton; 18 Blackfriars street, Manchester; and Wade lane, Leeds.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whisky

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

HOLLOWAY'S PILLS.—Indigestion.—How much thought has been bestowed and what ponderous volumes written upon this plague of every household, which is safely and certainly dispersed by a course of this purifying, soothing, and tonic medicine without fear of relapse. It acts directly on the stomach, bowels, and liver; more indirectly, though not less effectively, on the brain, nerves, vessels, and glands, and so commands order throughout the entire system that harmony dwells between each organ and its functions. Dyspepsia can now no longer be the burden of the public, since Holloway's Pills are fully competent to subdue the most chronic and distressing cases of impaired digestion and to restore the miserable sufferer to health, strength, and cheerfulness. Sold at Professor Holloway's Establishment, 244 Strand, and by all medicine vendors throughout the civilised world.

MORE CURES OF CONSUMPTION, Coughs, Asthma, and Diseases of the Chest and Lungs, by Dr LOCOCK'S PULMONIC WAFERS.—Extract of a letter from Mr C. Ward, stationer, &c., Market place, Heckmondwike, Yorkshire: "The cures of consumption, asthma, and other diseases of the chest and lungs, are regularly occurring. One person in Liversedge, a village adjoining this town, named James Richardson, who has been an asthmatical man for nearly twenty years, declares that they are worth £1 a box (using his own words). He feels quite a new man through this truly valuable medicine." These Wafers give instant relief of asthma, consumption, coughs, colds, and all disorders of the breath and lungs. To singers and public speakers they are invaluable; they have a pleasant taste. Price, 1s 1½d, 2s 9d, 4s 6d, and 11s per box. Sold by all Druggists.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

LAMBERT BROTHERS,
WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

RHEUMATISM, CHILBLAINS, &c. —COLES'S ALGA MARINA has stood the severe test of many years' public experience, and has thereby acquired a celebrity which is unrivalled and daily increasing as a remedy for Rheumatism and Rheumatic Gout, Glandular Affections, and Chilblains, Contractions and Weakness of the Limbs and Joints, Neuralgic and other Pains, Spinal Curvature, &c. The numerous testimonials to its good effects in all that class of diseases for which the sea-side is recommended may be obtained with the Pamphlet for three postage stamps, of Mr KEATING; amongst them will be found the certificate of a Physician in Her Majesty's service, that it is the most efficacious remedy for Chilblains he has ever met with in his experience. The public should guard against spurious imitations by asking for COLES'S ALGA MARINA, and being careful to observe that his signature appears upon the label which encircles each bottle. Every packet also contains the pamphlet, without which none is genuine.—Sold in bottles, 2s 9d, 4s 6d, and 11s each, by T. KEATING, 79 St Paul's Churchyard, London, and by all Chemists.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.
CAUTION—"In Chancery."
CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Gricor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receip of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

SKIN DISEASES AND THEIR REMEDIES.
By ROBERT J. JORDAN, M.D
Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood, causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.

"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—MEDICAL TIMES AND GAZETTE, August 4th, 1860.

To be had direct from the Author, 27 George street, Hanover square, London, W.

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Smiley, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

ATLANTIC AND GREAT WESTERN RAILWAY OF NEW YORK, PENNSYLVANIA, AND OHIO.

Mr Thomas W. Kennard, the Engineer in Chief, having arrived in England, a meeting of the holders of bonds, debentures, and shares of the Company, will be held at the London Tavern on Monday, the 15th instant, at one o'clock precisely, to receive a report from Mr Kennard on the completion of the main line, and as to the general position and prospects of the undertaking.—

S. MORTON PETO,
Chairman of the London Board of Directors.

Westminster chambers, Victoria street,
Westminster, May 6, 1865.

CHICHESTER AND MIDHURST RAILWAY and EXTENSION to HASLEMERE.

Incorporated by Act of Parliament as the Chichester and Midhurst Railway Company.

Capital, £370,000, in 37,000 shares of £10 each.

First issue, 10,000 shares.

£1 to be paid on application for shares, and £2 upon allotment.

By the Act of Incorporation the liability of each shareholder is limited to the amount of his shares.

Future calls not to exceed £2 per share, nor to be made at intervals of less than three months.

Interest during construction is guaranteed at 7 per cent. per annum upon all shares fully paid up, and at 6 per cent. per annum upon those paid in successive calls.

DIRECTORS.

William Francis Dobson, Esq., Bearsted House, near Maidstone, Kent, Chairman.
George Henty, Esq., J.P., Northlands, Chichester.
George Battcock, Esq., 4 Carlton street, Regent street.

SOLICITORS.

Messrs W. and H. P. Sharp, 92 Gresham house, Old Broad street, London.

ENGINEER.

Edward Woods, Esq., 3 Storey's gate, Great George street, Westminster.

BANKERS.

The Provincial Banking Corporation (Limited), 25 Poultry, London, and Portsea and Gosport Branches.
The London and County Bank, Chichester, Midhurst, and other Branches.

BROKERS.

Messrs Robins, Barber, and Dalley, 29 Threadneedle street, E.C.

AUDITORS.

James Johnstone, Esq. (Messrs Johnstone, Cooper, Wintle, and Evans), 3 Coleman street buildings, E.C.
James Hutt, Esq., Westminster chambers, Victoria street, Westminster.

SECRETARY—Mr John Widdcombe.

Offices—3 Bridge street, Westminster.

ABRIDGED PROSPECTUS.

The Chichester and Midhurst Railway and its proposed Extension to Haslemere have been projected to establish the much-needed railway communication between the city of Chichester and the important towns of Midhurst and Haslemere, and between those places and the several intermediate villages. The proposed line will commence by a junction with the London, Brighton, and South Coast Railway at the west end of Chichester, and will form junctions at Midhurst with the lines of the Mid-Sussex and Midhurst Junction and South-Western Companies, and with the Portsmouth direct line at Haslemere.

The works have been let to, and already commenced by, responsible contractors, who have entered into a contract to complete the line within two years from the date of commencement, based upon the estimate of the engineer, and arrangements have been made with them for the payment of interest during the construction of the works until the line is opened for public traffic, at the rate of £6 per cent. per annum on the share capital paid up by instalments, and of £7 per cent. per annum on all shares applied for and allotted as fully paid-up shares.

The above-mentioned interest will be retained by the Directors, and be payable at the Company's bankers half-yearly in April and October in each year, the first payment being made in October, 1865.

The Company obtained in the session of 1864 powers to make the line from Chichester to Midhurst, and are applying in the present session of Parliament for an Act to enable them to extend it to Haslemere, and effect a junction there with the direct Portsmouth line of the South-Western Railway Company; thereby establishing a valuable and important line of communication between the direct Portsmouth line and Chichester, and bringing the important market towns of Guildford, Midhurst, and Chichester, into immediate connection. It will also be the shortest and most direct route from London to Chichester.

Prospectuses, with Forms of Applications for Shares, and any further information, may be obtained from the Bankers, Brokers, the Solicitors, 92 Gresham house, London; Thomas Green, Esq., Solicitor, Chichester; Edwin Albery, Esq., Solicitor, Midhurst; or at the Offices of the Company, 3 Bridge street, Westminster; but no application will be entertained unless a deposit of £1 per share on the number applied for has been duly paid to the Company's Bankers; and in the event of no allotment being made to the applicant, the deposit will be promptly returned in full; and should a smaller number of shares be allotted to any applicant, the balance of deposit will be placed against the sum payable on allotment.

CHICHESTER AND MIDHURST RAILWAY.

EXTENSION TO HASLEMERE.

The opposition against this extension line to Haslemere, by the London and South-Western and the Brighton Railway Companies has been withdrawn. The Bill, having passed the Commons, will now pass through the House of Lords unopposed.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned. W. E. JOHNSON, Secretary.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par, what is equivalent to interest at the rate of from Six to over Seven per cent. per annum according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Grange alley, Cornhill, E.C.

BANKERS.

The Union Bank of London,
Messrs Smith, Payne, and Smiths.

SOLICITORS—Messrs Freshfields and Newman.

SECRETARY—C. T. C. Grant, Esq.

Debentures of this bank, are issued in bonds to bearer of £20, £100, £500, and £1,000 each, redeemable at par within 30 years, by half-yearly drawings. Interest, £5 per cent. per annum, payable half-yearly. The price of issue is £87 for every £100.

These debentures are secured by the whole of the bank's invested funds (which must always be equal to the total debentures current), and by the additional guarantee of the uncalled capital of £1,600,000 represented by a proprietary of upwards of 1,500 shareholders.

The above price of issue gives to the subscriber 5¾ per cent. interest on the amount invested, and a cash bonus of £14 1s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which averaging the period of drawing—yields a return of 6½ per cent.

The bonds being to bearer (coupons for interest payable, 1st January and 1st July, attached), transfers pass from hand to hand without endorsement, and are free from any further stamp duty.

Applications to be made at the Offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

THE INVESTMENT AND FINANCE AGENCY.

Established for the purpose of effecting purchases and sales on commission in every description of public securities, and for affording the necessary precautionary information for the safe investment of capital, &c., &c.

A record is kept of the status and prospects of the various public companies and foreign stocks; and as this Agency scrupulously declines speculative transactions upon its own account, the public have, first, the security of being protected by unbiassed information, based upon twenty-seven years' experience in the stock and share markets; and, secondly, the guarantee that any business which this Agency undertakes will be completed with the strictest fidelity.

During the past year 1864, no less than ten new foreign loans, constituting an aggregate capital of £22,271,000, and 282 new joint stock companies with an authorised capital of £155,887,500, were introduced upon the London market.

Never were there times which inculcated more forcibly than the present the necessity of experience and caution prior to the investment of capital, or when reliable services, such as this Agency specially renders, were more requisite.

The Finance Department includes the Agency of public companies, loans, deposits, &c., and advances are negotiated on public securities having a market value.

An important feature of this Agency is, that the same uniform system of strict attention is paid to transactions of small, as well as large amounts,—the object being, to increase its facilities for carrying out its operations to the greatest possible advantage by embracing the business of every description of investors.

Cheques to be drawn to the order of Mr Charles Peters, Secretary, and crossed The Agra and Masterman's Bank.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition.

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

NOTICE.

THE LONDON ENGINEERING AND IRON SHIP-BUILDING COMPANY (Limited).

Notice is hereby given, that the first ordinary General Meeting of the Shareholders of this Company will be held at the offices of the said Company at their works, situate at the Isle of Dogs, Poplar, in the county of Middlesex, on Monday, the 22nd day of May inst., at 12 o'clock precisely, for the purpose of receiving and adopting the Directors' report and accounts, the election of auditors, the declaration of a dividend, and the general business of the Company.—By order,

WM. COOPER, Secretary.

THE PETROLEUM COMPANY OF WESTERN VIRGINIA, U.S. (Limited.)

Incorporated under the Companies Act, 1862.

Capital £200,000, in 20,000 Shares of £10. First issue, 10,000 Shares. £1 payable on application, and £4 on allotment. No call to exceed £2, or to be made at intervals of less than three months.

SECRETARY—Courtenay Clarke, Esq.

Offices—9 Great Winchester street, Old Broad street.

PROSPECTUS.

The large returns upon capital invested in Petroleum lands in America have induced the formation of the present Company, that English capitalists may participate in the great advantages to be derived from these lucrative investments. The most competent judges affirm that the oil resources of West Virginia are far superior to those of Pennsylvania; the oil, being lubricating, and of greater specific gravity, is more valuable for commercial and manufacturing purposes. The Directors, bearing in mind the fact that it is more desirable to purchase property where oil is known to exist, and sink their own wells, rather than to purchase land upon which the existing wells may be partially exhausted, have entered into a provisional contract to purchase 300 acres in fee simple, together with the leases for fifteen years, at a royalty of one-fifth of the oil, of 540 acres, situate in the counties of Calhoun, Putnam, Ritchie, for the sum of £51,000. The lands thus secured are in the heart of the Petroleum district of Western Virginia, are surrounded by oil wells, and all exhibit the best surface indications. Bubbling oil springs abound on them. They are also well situated as regards transit.

In consequence of the ready sale which is found for the oil at the well's mouth, the Directors propose to partially adopt the American system of declaring dividends; and, therefore, after the wells are sunk, they have taken power by the articles of association to divide the profits every three months.

Oil is almost invariably struck in this region at depths varying from 150 to 250 feet. The rock being comparatively easy of excavation, wells are sunk at less than half the cost of the oil wells in Pennsylvania.

The Directors propose to commence operations by sinking fifteen wells; and assuming that ten only out of the fifteen strike oil, and taking this Company's interest at the low average of 15 barrels per day for each well, the yield will be 150 barrels per day, which at the selling price, on the spot, of 10 dollars per barrel, will be 1,500 dollars; or, deducting for exchange one-third, 1,000 dollars sterling, say £200 per day, or £6 000 per month. If we deduct from this 25 per cent. for labour, wear and tear of machinery, management, &c., it leaves a margin of £54,000 per annum, or about 78 per cent. per annum on £70,000, which is the amount intended to be called up at present.

That the Directors have not indulged in exaggerated statements may be seen by the fact that many wells in the United States are now yielding from 500 to 1,500 barrels of oil per day; and it will be seen, by "Hillyer's Petroleum Recorder," that there are at present in America 542 companies for working Petroleum, with a nominal capital of 251,355,000 dollars, and that many of them are paying dividends of from 4 to 20 per cent. per month upon the capital subscribed.

The Directors have secured the services of Mr John Horton, of Birmingham, as Managing Director in America. The experience of Mr Horton, extending over four years in this and other districts, renders this appointment very valuable to the Company.

All preliminary expenses incidental to forming the Company are guaranteed to be defrayed for £2,000.

The Company will from time to time acquire other lands or leases as they may be advantageously offered to them.

Prospectuses and forms of application can be obtained at the Bankers, Brokers, Solicitors, and Offices of the Company, where the articles of association can be seen. Should no allotment be made, the deposits will be returned in full. Should a less number of shares be allotted than applied for, the deposits will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

THE PETROLEUM COMPANY OF WESTERN VIRGINIA, U.S. (Limited).

Notice is hereby given, that the SHARE LIST of this Company will be CLOSED on THURSDAY NEXT, the 18th instant, for London, and on Friday next, the 19th instant, for country applications.—By order,

COURTENAY CLARKE, Secretary.

Offices, 9 Great Winchester street, E.C., May 13, 1865.

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present.—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryamjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ramchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,982,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,530	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 8,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premium on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,61,750 rs 4a 10p, and the Directors propose to apply them as follows:—

Rs	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (in all 10,00,000 rs.)
5,54,656-4-10	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Hormusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdoonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Maneckjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq., and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

TRUST AND AGENCY COMPANY of AUSTRALASIA (Limited).

At the Fourth Annual General Meeting of shareholders, held at the Offices of the Company, 31 St Swithin's lane, in the City of London, on Monday, the 8th day of May, 1865.

ANDREW BONAR, Esq., in the chair:

The advertisement convening the meeting having been read, and the Directors' report and statement of accounts (which had been some days in the hands of the shareholders) taken as read, the following resolutions were moved and carried unanimously:—

"That the report now presented, together with the balance sheet and revenue accounts, be approved and adopted.

"That a dividend for the half-year ending December 31, 1864, of 1s per share be now declared, together with a bonus of 2s per share on the shares of 1st and 2nd issues, and 1s per share on the shares of 3rd issue (emitted in June last), making, with the ad interim dividend paid in November on 1st and 2nd issues, a total distribution for the year 1864 at the rate of 20 per cent. per annum on the capital called up."

The retiring directors and auditors having been re-elected, a cordial vote of thanks to the colonial officers, the directors and general manager, for their able administration of the affairs of the Company, concluded the proceedings.

(Signed) JAMES HORA, General Manager.
31 St Swithin's lane, E.C., May 8, 1865.

The Company, as agents, effect investments in first registered mortgages in Australia and New Zealand, to pay investors 7 per cent. per annum, the interest being guaranteed and paid half-yearly by the Company.

The Company also issue Five per Cent. Debentures for loans for three or four years. The debentures, besides being secured by the paid-up capital and property under mortgage to the Company, have in addition the uncalled proprietary capital sufficient alone to liquidate in full the whole of the debentures that may be issued; and further, in order that the debenture-holders should be most amply protected, it is expressly provided by the Company's constitution that the Directors may borrow only to the extent of the uncalled subscribed share capital.

Full particulars on application to the undersigned.—
By order, JAMES HORA, General Manager.

Exhibition of Fine Arts, Church street, Liverpool.

This Company has been formed to purchase, carry on, and extend the business of Messrs Moore, McQueen, and Company, the well-known print, chromo, and lithographic publishers.

The firm, as at present constituted, succeeded to the wholesale publishing and print-selling business, founded by E. Gambart and Co., to whom Mr Moore acted as manager for more than 15 years.

The very numerous works of high art of the most finished excellence, that have emanated from this well-known house in its various branches, have long established its reputation on the firmest basis, both in England and throughout the continents of Europe and America.

The stock in trade comprises many of the most valuable water-colour drawings and oil paintings of modern times, which of themselves constitute the Fine Arts Exhibition now being held at Liverpool; while the copyrights in the possession of the firm include a vast number of the choicest productions of the Modern Schools of Art.

The purchase money for the leases of the premises, the goodwill, and entire stock in trade, has been based upon the catalogue and balance-sheet prepared for the Directors by Messrs Sandell and Torriano, the Accountants, and has been fixed at 25,000*l* in cash, in payments extending over twelve months, and £35,000 in debentures of the Company, redeemable at three, four, and five years' interval.

The business will be taken over by the Company, as from the 31st of March, 1865. The accounts made up to this date by Messrs Sandell and Torriano, show a net profit for the last three years and nine months trading of upwards of £8,000 per annum.

In the interests of the shareholders, the Directors have thought it desirable to stipulate for the exclusive services, during a minimum period of five years, of Messrs Moore and McQueen: in whose long experience and high character the Directors have the best guarantee for the efficient management of the affairs of the Company.

The late proprietors have guaranteed for a term of five years a minimum dividend of 10 per cent. per annum; and have further consented to a proportionate reduction of the purchase money, should the net profits not realise 12½ per cent. on the amount of the paid-up capital during that time.

No promotion money has been or will be paid, and the preliminary expenses will be strictly limited to the actual disbursements.

In the event of no allotment being made, the deposits will be returned in full. Should a less number of shares be allotted than are applied for, the deposits will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of applications for shares may be had of the Bankers, the Brokers, the Secretary; at the Offices, St Michael's House, Cornhill, E.C.; and on the Company's premises, 25 Berners street, Oxford street; and 10 Fenchurch street, E.C. The articles of association, and the agreement with the vendors, may be inspected at the Solicitor's, and at 25 Berners street, where also the balance sheet and catalogues may be seen.

MOORE, McQUEEN, AND COMPANY (Limited).

FORM OF APPLICATION FOR SHARES.

To be retained by the Bankers.

No.——

To the Directors of Moore, McQueen, and Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being deposit of 10s per share on Shares in the above Company, I hereby reques. that you wil allot me that number; and I agree to accept such shares, or any less number you may allot me, and I agree to pay the deposit on allotment, and the calls as made, and to sign the articles of association of the Company when required; and I authorise you to insert my name on the Register of Members for the number of shares allotted to me.

Usual Signature .....
Name in full .....
Residence .....
Profession .....
Date .....

MOORE, McQUEEN, AND COMPANY (Limited).

Notice is hereby given, that the SHARE LIST of this company will be CLOSED on TUESDAY next, the 16th inst., for town, and WEDNESDAY next, the 17th inst., for country applications.—By order,

T. R. EAMES, Secretary pro tem.

St Michael's House, Cornhill, May 10, 1865.

H. J. AND D. NICOLL, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 50 Bold street, Liverpool; and 10 Mosley street, Manchester.

NEW FASHIONS FOR GENTLEMEN, Overcoats, Morning Coats, Trousers, and Vests.

BOYS' NEGLIGE AND OTHER SUITS, Knickerbockers, &c.

LADIES' RIDING HABITS, Jackets, Overcoats, Cloaks, &c.

NAVY, MILITARY, DEPUTY-LIEUTENANTS' OUTFITS and COURT DRESSES completed on the shortest notice: the embroidery and appointments kept ready, and may be inspected. Court Dresses may also be had for a levee, &c.

SERVANTS' LIVERIES, &c.—Current list of prices, with particulars for self-measurement, sent on application. The prices are for cash payments. In each department garments are kept ready for immediate use.

H. J. AND D. NICOLL'S GUINEA TWEED WATERPROOF COATS, for gentlemen, and Guinea Cloaks, for ladies, are patronised by travellers all over the world.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

E. DENT AND CO., WATCH, CLOCK, and CHRONOMETER MAKER to Her Majesty, H.R.H. the Prince of Wales, and H.I.M. the Emperor of Russia, and Maker of the Great Clock for the Houses of Parliament.

61 Strand, W.C., and 34 and 35 Royal Exchange, E.C.

GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

BRITISH AND IRISH MAGNETIC TELEGRAPH COMPANY (Limited).

The Directors are prepared to receive applications for Loans of Money, for periods of 3, 5, or 7 years, to replace debentures falling due.—Application to be made to the Secretary, E. B. Bright, 2 Exchange buildings, Liverpool.

JAMES B. BRENCHLEY, 78 OLD Broad street, London, E.C. (Member of the Mining Exchange), effects SALES and PURCHASES in MINING, RAILWAY, FINANCIAL, and EVERY DESCRIPTION of MARKETABLE STOCK, at close prices.

BANKERS—London and Westminster.

ACCOUNTANT.—AN Accountant in a provincial town, whose practice consists chiefly in the periodical examination of the books of private firms and public companies, requires a clerk thoroughly competent to conduct such business in the absence of a principal.—Address, by letter giving age, references, and salary expected, 375, Journal office, Birmingham.

WANTED BY AN OLD Established Mercantile House, a Gentleman thoroughly understanding the China and Japan import trades, who has resided out there and is willing to return.—Apply by letter, with full particulars of former employment and salary expected, which communication will be considered strictly confidential, to M., Messrs Lawrence, Markby, and Co., 6 Lincoln's inn fields.

WANTED, BY AN OLD Established Mercantile Firm in Bombay, a Gentleman with a good business knowledge and experience, and an able correspondent. He must besides have a thorough knowledge of piece goods. One having already filled a similar situation in India will be preferred. Salary liberal.—Apply by letter, with references, to M. N. O., care of Mr George Street, Advertising offices, 30 Cornhill, E.C., London.

PARTNERSHIPS.—AN ENGINEER established 40 years, and doing a very profitable Manufacturing Business, is desirous of meeting with a Gentleman to purchase a Half Share for £7,000. Also, £1,500 is wanted for a moiety of another Manufacturing Business. Both are sound undertakings, and a special knowledge of the business is not necessary in either case.—Address J. Reed, Esq., Solicitor, West Dulwich.

ESTABLISHED 1845.

THOMAS FORSHAW, Purchasing Agent and Packer, 5 Marsden street, Manchester.

Of all sorts of Manchester, Scotch and Yorkshire goods—of Steam Engines—Water Wheels—Bullock Gear—Mill Gear—Cotton Gins—Corn Mills—and Cotton Seed.

Patterns collected free, and references sent on application

HUMIDIC COPYING BOOK (Patent) does not require damping, produces instantaneously copies of letters, invoices, &c, when written with copying ink, and avoids the trouble of wetting every leaf as hitherto. Price, style, and size, as the old style of letter copying book.—NISSEN and PARKER (sole proprietors), Stationers, 43 Mark lane, London.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

A SUPPLEMENT, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 29th of October,* 1864, *will be published by the* ECONOMIST *on the 27th instant.*

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THE rise in the Bank rate from 4 to 4½ per cent. a short time since, the expediency of which was in some quarters doubted, has now been sanctioned by experience. The market rate has followed the Bank rate: a small general rise in the terms for discount has been maintained. In the middle of a quarter, and in times of ease and abundance, the Bank has no despotic control over the money market. The determining force is the open market. The bill-brokers and joint stock banks who *pay* for their money, *must* have bills, and if they cannot get them at the Bank rate, they must charge less than the Bank rate. At all times in the end, and in such times as these very rapidly, a rise in the Bank rate not justified by the circumstances of the market, will end in the loss of the Bank business.

It may be said that the charge of the bill-broker is almost always a little less than the charge of the Bank, and that therefore this argument is not sound. If the Bank rate is 4½, the brokers' rate, it may be argued, will be 4⅜, just as when the Bank rate was 4, the brokers' rate was 3⅞. There is no doubt that generally, and as a rule, persons of good credit, who take pains, can get their bills discounted at somewhat less than the Bank minimum. It is a rule with very many exceptions, but still, on the whole, it may be called a rule. But it is not true that whatever the Bank chooses to charge, the bill-brokers will always charge a very little less. They would soon charge considerably less. There are a great number of holders of bills who have no keen immediate necessity, who can wait very well for a short time, who can use other resources, or go for a moderate interval without the money altogether. Their bills are what we may call the *extra* bills of the market, and if they are withheld even for a few days, the resources of the bill-brokers accumulate in their hands, and they bid lower and lower till the *extra* bills come back again. In other markets, it is the buyer who least needs to buy, and the seller who most wishes to sell, that determines the minimum price, and so it is in the money market also.

In times of apprehension, it is true, the Bank has unusual power. These *extra* bills are not withheld when it is at all believed or fancied that money will get much dearer, and in these periods it is quite true that what is called the *prestige* of the Bank, or as it would be better to say the accepted value of its policy as an *indication of the future*, has immense efficacy. But in such times as the present the notion of its despotism is entirely imaginary, and if the market rate follow the Bank rate in any change, we may be sure the Bank has acted rightly.

The test is a simple one. Is the Bank losing its business? Do the usual amount of bills go there, or do they not go there? In the present case the answer is plain. The private securities were:—

	£
26 April	19,057,968
3 May	20,274,907
10 May	20,068,537
17 May	20,027,201

The rate was raised on the 4th of May, and therefore this account shows that it has not been attended with a substantial diminution of the business of the Bank. In quiet times like these, the amount of the private securities is the item of the Bank account to which public attention should be most directed. Small changes in the bullion are of little value, as there is a good stock now and it is likely to be unaltered; changes too in the active circulation and the reserve of notes occur almost from accidental circumstances. But the private securities test the pressure on the Bank for accommodation, and are an index, not always accurate, but the best we have of the supply and demand for bullion within the country.

As to the future no minute prediction can be hazarded. The extreme delicacy of the market is obvious to every one. Owing to the large investment of our capital in commerce and loans, a small new cause produces an unusually large new effect. There is, however, no reason to expect much change at present. There is a "better feeling" abroad, and that is all which can be said. The improvement is not great, but it is sensible, and as it has come gradually, and after so long a depression, it is more likely to be genuine and trustworthy. The permanent causes likely to raise the average rate of interest which we have often before pointed out remain what they were, but their operation is at present controlled and modified by special circumstances.

THE AMENDMENTS MADE IN THE UNION CHARGEABILITY BILL.

THE debate of Thursday on Mr Villiers' Union Chargeability Bill was one of unusual importance, and ended in a somewhat unexpected way. On the previous Thursday it seemed as if the Bill, which has received the approval of almost every disinterested politician, and of the vast majority of the country, was in some danger. A number of gentlemen, not usually very prominent in the House, but very influential whenever a measure is proposed which is believed to affect "land," had arrived at a notion that Union rating would benefit the boroughs at the expense of the rural districts. They recognised of course the value of a town as a market for the commodities produced in the parishes round it, but did not like to see those parishes which they own pay for the poor of that town which they do not own. Like humbler people, in fact, they want all the advantages of the market without any of its inconveniences, want to buy cheap and sell dear, and they fought for their somewhat selfish view very hard indeed. They even showed a disposition to use the forms of the House for purposes of obstruction, and it was not until the borough members began to cluster up pretty thickly, and letters began to arrive from tenant-farmers distinctly favourable to the Bill, that they allowed the division to be taken. It was taken, however, on Monday night, when the House, by the immense majority of 173, affirmed the principle of the measure, and the Opposition resolved to change their tactics. Led by Mr Henley, one of the most adroit of Parliamentary tacticians, they proposed an amendment which carried the principle of the measure to such an extreme conclusion that the House of Lords, if not the House of Commons, would at some stage or other have been certain to throw out the Bill. The amendments were intended to abolish the Acts authorising removals, that is in fact to repeal the whole law of settlement which ever since the time of Elizabeth has been the foundation of Poor-law administration. The effect of that revolutionary proposal would have been that every person sleeping in a parish for one night would on the following day have been chargeable to that parish. Gangs of wandering labourers, for example, might enter any town where they could get accommodation for the express purpose of living on the rates of that town—might, for example, work in Surrey for nine months of the year, and for the remaining three fling themselves upon over-burdened Southwark. Indeed, it would in the suburban districts of great cities actually pay the farmers to contract with their labourers to do this. Moreover, every parish which felt itself hardly pressed, would have an irresistible temptation to export all the poor they could, all lunatics and infirm persons more especially, into the great cities, while the tide of Irish emigration which already overflows our Western ports would have doubled in volume. It would really be not only possible, but probable, that the poor rate of Liverpool should rise to ten or twelve shillings in the pound, a result which Lord Derby would certainly have thought himself justified in preventing even at the expense of throwing out an otherwise beneficial Bill. The metropolitan case would have been almost worse, the destitute from all parts of the world swarming up to a place where the chances would have been so numerous, and where food and lodging were nevertheless so certain. Had the motion been accepted, the great cities would have been, as the astute mover ought to have known, in an uproar, but, fortunately, beating Mr Villiers in tact is not very easy work, particularly when so thoroughly on the alert as he has been about this Bill. In a severely cutting speech he affirmed that the motion had a secret purpose, and expressed his intention of accepting another put on the paper by Mr Kekewich, reducing the term of residence from three years to one. The House, which by this time was fairly awake to the bearings of the question, supported the Minister Mr Henley's amendment was rejected by 184 to 110, and Mr Kekewich's accepted without a division. The result of Mr Henley's device was therefore that an immense improvement in the law, an improvement so great that Mr. Villiers would have been half afraid to propose it, was carried through an unanimous House of Commons as a clause in this important measure.

The reduction of the term of residence removes one of the worst evils of the Poor Law without introducing those which would follow the total abolition of settlement. The delay of one year is quite sufficient to prevent parishes from foisting their poor upon the cities, because they can be sent back again, and the exporters must pay the cost, and to prevent large bodies of men from throwing themselves upon distant rates during a temporary failure of work. But it is not sufficient to prevent the honest labourer from going where his work is most required, and therefore best remunerated. Three years seems a long time to the uneducated, and the fear of intermediately losing his settlement, kept many a man from wandering afield in search of the employment not to be obtained at home. One year is, however, a visible term; a labourer will trust his own health for one year, and the working population is therefore practically set free, and that free circulation of labour, which is as important as the free circulation of capital, is established. The farmers will be among the first to feel the benefit of the change; for while the Irishman who means to beg receives no encouragement from the new law, the Irishman who means to work will be strongly tempted to try whether he cannot obtain in some thinly populated parish the wages he now seeks only in America. There are districts of England and Wales, and there will be more, which internal immigration would benefit almost as much as a new supply of capital. The labourer, already emancipated by the Union Chargeability Bill from the bond which tied him to his parish, is freed by this clause from the ligatures which bound him to his county. He is as free as the navvy who habitually goes where he pleases without thinking of the Poor Law. Whatever the Bill may suffer in the Lords, we sincerely trust this clause will be retained.

THE BANK NOTES ISSUE BILL.

THE "Bank Notes Issue Bill," which a short time since was believed to be quite safe, is now in a position of considerable danger. The number of opinions, interests, and prejudices which beset the subject of the currency, make it very difficult to carry upon it any measure however small. After the full discussion we have before given to this Bill, it is not necessary that we should write upon it now at great length. We only wish to point out how the unexpected difficulty has occurred, and what are likely to be it consequences.

It was, after some previous variations of form, and after a long discussion with the issuing bankers, fixed by Mr Gladstone that the banks conforming to the Bill should receive the advantages conferred by it for 15 years upon payment of 1*l* per cent. on the amount of their authorised circulation. During and after the 14th year the Executive Government was empowered to give a year's notice that the issues of such banks were to determine, but it was expressly explained that such notice, if given, and such liability to notice, should not prejudice the question of a renewed lease to the conforming banks on such terms as should be, fifteen years hence, thought fit. At the end of the fifteen years the question was to be re-opened and reconsidered; but what the result of that consideration should be was neither prejudiced nor settled. Practically, if the Bill had passed in this form, the conforming banks would have gone on paying the tax now imposed for 15 years, and would before the expiration of that term have themselves stirred, either by a Parliamentary Committee, or by an application to the Executive Government, to get a new lease on the best terms they could obtain.

In the House of Commons, at the suggestion of Mr Hankey, supported by Mr Goschen, the main clause of the Bill was altered. The Executive Government was not only empowered, but *compelled* to give the notice to determine the issues in question; and by the clause as it came out of the House, if the conforming banks should move 13 or 14 years for a renewal of their lease, they would be told:—"No, that was all settled in "1864. It was then decided that notice *must* be given you "to determine your issues; it is of no use quoting the phrases "of this statesman or that statesman; here is the compulsory "clause in the Bill, and the concession of a new lease, or the "further continuance of your issues, is in flat contradiction "to it."

Against these alterations of the House of Commons the issuing bankers protested, and Mr Gladstone agreed that the word "may" should be substituted for the word "shall," but required the notice to terminate at the end of fifteen years, to be given on or *before* the 1st Jan. 1879, instead of on or *after* that day. And he inserted in the preamble of the Bill words stating that it was desirable to fix a period at which the rights given by the Bill should determine, but that such

Digitized by Google

notice, if given, should not be taken to prejudge the question whether a new lease of such rights should or should not be granted. The change of after to "before" made it practically certain that the notice would be given unless some fresh arrangement was come to, but the words in the preamble made it clear that such notice, even if given, should not prejudge the concession of a new term, and practically in the year 1878 it would have been the business of the conforming banks to bestir themselves to see whether or not they could obtain a new lease.

To these terms a majority of the meeting of the issuing bankers. including several of the banks of largest authorised circulation, agreed, but a dissentient minority has receded and threatens to throw out the Bill. The minority is principally composed of bankers in Yorkshire, who have always disliked the Bill from the commencement, and who only agreed to the former arrangement with Mr Gladstone as a concession and to preserve for future use a unanimity among the issuing bankers.

The question, therefore, is narrowed down to a very small one, in which only those whose interests are affected will at all care. But there is one point which should be carefully borne in mind by all concerned. The country circulation is now in a state by confession "anomalous." The peculiar privileges of certain country banks to issue unsecured, untaxed notes, when the Bank of England issues are both secured and taxed, and when no other country banks can issue notes at all, is absurd. *It cannot last as it is.* We suggested one mode of dealing with it some weeks since, and others may be suggested also. But one thing may be taken as *certain.* No political economist—no one who possesses the confidence of the public on such subjects—defends or is likely to defend the actual state of affairs. That exact state of affairs suits no argument and squares with no theory. But it is to be feared that many issuing bankers do not perceive this. They hope they shall always be what they now are, and, therefore, they resist the present Bill, though its terms are moderate, though submission to it is optional, though it removes grievances which others feel, and confers advantages which others wish for.

LORD ELCHO AND DR TEMPLE ON REFORM.

THE debate on which we commented last week marked a great step in the progress of the Reform question. It made clear almost for the first time to the general public what was the problem to be solved; it was a statement of the *desideranda* on the subject; at once a sort of advertisement for a scheme to provide a way out of the dilemma which was at length distinctly recognised, and an announcement that till such a way out was found Parliament would not pass any fragmentary measure. Lord Elcho has since given notice of another step in advance, in the shape of a motion for a Royal Commission to provide us with further information as to facts bearing on the question. From the terms of his notice it is plain that he is desirous to ascertain whether, and to what extent, the 10*l* limit of the franchise does really exclude those of the working classes whom most Liberals would acknowledge to be worthy, and would be anxious to admit; and how far the rise which has taken place in the rate of wages and in the rents of houses since 1832 has acted as a virtual lowering of the suffrage. We hope the Commission will be issued, for we are satisfied that it may throw considerable light upon the subject and materially add to our means of forming a sound judgment in reference to it. That wages have risen largely during the last thirty years there can be no doubt;—the average advance is calculated by many as high as 25 per cent.; and that the value, and therefore of course the rent, of house property has also risen, is perhaps as indisputable, though we have as yet no measure of the improvement. It may turn out, if the inquiry be instituted,—we do not say it will, or that we have any strong opinion on the matter, but it is possible,—that the man who in 1832 only earned enough to command an 8*l* house, and was therefore excluded from the franchise, now earns enough to command a 10*l* house, and may therefore be an elector if he please. It may turn out that the cottage he formerly occupied has risen in annual value from 8*l* to 10*l*, and thus brought him within the pale of the Constitution without any effort or volition on his part. It may be that the general style of operatives' dwellings in the large boroughs has been greatly improved—indeed we are assured that this is the case,—so that the constituencies have been insensibly enlarged by the most wholesome of all processes. It may turn out, again, that it is by no means the most highly-paid labourers and artisans who live in the most highly-rented houses, and that thousands of them might have the franchise now and easily, if they had the least desire for it. It may be, also, and we fear will often be the case, that the most highly-paid artisans, whom even the present franchise—whom certainly an 8*l* franchise—would admit in great numbers, are not the men whom even Mr Forster would wish so to endow, and are not the men to whom Mr Baines' glowing statistics in any way apply;—such, for example, as the iron-workers about Walsall, Willenhall, Bilston, and analogous districts, who earn wages which might make them capitalists if they were educated, frugal and sober, but who are far from being the ideal of a working-man-elector;—such again as numbers of the colliers of South Wales, who might make 40s and 50s a week, and certainly pay 5s out of it for rent, if they did not insist on being drunk or idle for three days out of six, while refusing to allow other colliers to take their place. It might turn out, finally, that a 6*l* franchise in a great many boroughs, so far from giving us the *élite* of the working classes, would only augment the numbers of the lowest trading classes who are already the pest and disgrace of the constituency, while in many others it would confer the suffrage on five men whom everybody would wish to exclude for one man whom everybody would wish to enfranchise. We might, in a word, discover, and discover so plainly as to convince all parties, that *no* rental and *no* rating figure would select for us those special sections, those qualified individuals, and those reasonable numbers, whom we seek to admit within the electoral body; and that the solution of the problem must be sought in a wholly different direction.

Dr Temple's two letters show a very distinct perception of the problem to be solved, but we cannot say that they give us much aid towards its solution. His suggestions seem to us somewhat crude, and his notions and feelings as to party action and position somewhat fluctuating. He sees that the error of the Radicals is that they "will give no other aid than "that of proposing what they call moderate measures; but "their one idea of moderation is to devour their prey a little "at a time." He sees with equal clearness that the Liberal party deserves the discredit which has come upon them, not so much for their conduct and their change of opinion, as for their attempt to disguise that change. He admits that in the debate all the weight of argument was against Mr Baines' Bill. Yet he declares that "it is discreditable that the Bill should "not have been carried,"—the Bill against which the whole weight of argument preponderated; the Bill, their dislike to which the Liberals are blamed, not for entertaining, but for disguising; the Bill which was moderate only in the sense of "devouring the prey a little at a time." We think, on the contrary, that the rejection of Mr Baines' Bill was the most creditable step the House of Commons has taken in reference to Reform for many a year; because it was rejected on the ground that it did not do what it was recommended as doing,—it met no difficulty, it satisfied no party, it closed no controversy.

Dr Temple's scheme, as we read it, proposes to leave the existing members to be returned by the existing constituencies, but to have the new members (whom he would provide either by disfranchising the small boroughs or by largely increasing the numbers of the House of Commons) elected by suffrage so low as to include the bulk of the people;—that the West Riding, for example, should have four members, of whom two should be elected by the ten-pounders and the other two by all householders including the ten-pounders,—or that West Surrey should have two members elected by the freeholders and one elected by all occupiers, whether freeholders or not. The idea is not without ingenuity, but it would never have originated in the mind of a practical politician, nor has it, we think, much chance of finding favour with any political party. The English Constitution is full of anomalies which are tolerated because they are venerable; but the introduction of a new anomaly, and an anomaly so great as that of two members sitting side by side for the same county or the same borough, yet elected by two different constituencies, would hardly be sanctioned.

Dr Temple adopts, apparently without consideration as to its equity or wisdom, the common Radical scheme of disfranchishing all the small boroughs simply because they are small. He does not make any plea for this, but seems to take

Digitized by Google

it for granted as a measure which, in argument, no one would object to. But wherein lies the justice of the plan? Why should 50,000 citizens have special representatives simply because they live in *one* town, and have no representatives, or fewer, simply because they live in *five* towns? Where is the wisdom of thus rewarding and endowing condensation and gregariousness? The class of people who live in small towns and in large ones are different; the habit of mind prevalent among the two are different;—why should the one class send members and the other not?—or why should the latter have specific reprepresentatives, and the former be merged in the county electoral body, which they don't resemble? It would be very difficult to give satisfactory answers to these questions. All towns of 25,000 inhabitants and upwards have, we believe, members. Only a few of those under 10,000 or 6,000 inhabitants have members. Probably the aggregate number of citizens living in small towns is greater than the aggregate number of those living in large ones. Yet Dr Temple would disfranchise all the former, forgetting not only that they are very numerous, but that they are often a very distinctive class. He echoes the old commonplace, that it is monstrous that Honiton with 3,300 inhabitants should return as many members as Huddersfield with 33,000, and Harwich with 5,000 as many as Leicester with 70,000. But he gives no consideration to the old reply, that there are twenty unrepresented Honitons and ten unrepresented Harwiches, but not a single Huddersfield or Leicester without its members. All these matters require careful weighing;—and if Dr Temple's letters to the *Times* are valuable as stirring up the question in a new fashion, they are yet far more valuable as showing how much stirring up it still needs before the country will be in a condition really to act upon it sagaciously, equitably, and conclusively.

THE AUSTRIAN TARIFF.

Austria was one of the first of European countries to follow in the steps of England's free-trade commercial policy, though we must admit that she followed slowly and afar off. After our great change of system in 1846, the Austrian statesmen took heart to modify their then almost absolutely *prohibitive* system, and in 1853 they introduced changes which, though they left protection the leading idea, and monopoly the principal source, of the Austrian (indirect) revenue, still rendered legitimate trade with the rest of the world *possible*, and raised by Customs duties something like a million and a half sterling. Since that first step in the right direction there has been a great pause. The beginning had been made, but little indeed had been thereby done except just to admit the light of true ideas. Austria was still governed on the absurd principle of supposing that a nation is more prosperous which never avails itself, unless it is obliged, of external help in producing the commodities which its people want; and which regards it as a duty, if any external help is needed at all, to prefer the aid of its immediate relations, so to say, to that of the people who may happen to be able to give them most of what they want at the least cost. We may say that since the reform of 1853, the general conception of the Austrian protective system has been this:—to rely for rather more than *half* of its indirect taxation on Government monopolies, tobacco, salt, and *lotteries;* next, with regard to commodities not absorbed by the Government, to give a great advantage to Austrian producers over foreign producers; lastly, while giving this advantage to Austrian producers over foreign producers, to distinguish between wholly foreign producers and only partially foreign producers to the advantage of the latter, by remitting a portion of the protective duty in favour of the German Zollverein. If, instead of looking at the matter from the point of view of producers, we describe the same system from the point of view of the consumers—that is the nation,—the system presents a different appearance. First, with regard to the monopolies, it extracts from the people not only the cost of production together with the Government tax, but the enormous cost of protecting a large monopoly against smuggling, and the further needless cost inevitable in all official productive establishments where the motive of private gain operates to increase the costliness of the method of production instead of to diminish it. The public pay therefore for monopolies like salt and tobacco,—first the natural cost, next the amount netted by the Government, thirdly the wages of all the men needful to protect the frontier,—lastly the price of the waste involved in all manufactories where the losses are not borne by the persons responsible for the loss. As regards the expense of protecting the frontier, some notion of its enormous magnitude may be gained from a statement which Baron von Hock made in his recent speech in proposing the amended tariff. To prevent smuggling, he says, on the frontiers where the heaviest protective duties are charged,—or rather to do as much in the way of preventing smuggling as is actually effected, for smuggling is a great trade in Austria,—thirty men are required for each German mile, say five English miles. That is the people have to pay six men to watch each English mile of frontier on the foreign frontier (Turkish, &c.), and half the number for each mile of frontier even on the German side where the duties are less heavy. In other words, the Austrian people have to pay a large *army* of revenue officers out of the price of their commodities, in addition to the probably not very much larger army they pay to defend their territory. Of course the greater portion of this cost is due to the absolute monopolies; for we believe large quantities of tobacco are sent over the frontier every year into Turkey, and then smuggled back again and sold secretly to the people without paying duty to the Government in spite of this army of revenue officers.

But next with regard to the protective duties which are not prohibitive. Of course every advantage given to Austrian producers over foreign producers is a special disadvantage with which Austrian consumers—that is the nation—are loaded. Thus the common English worsteds at present pay a duty equivalent to about 37½ per cent. on their value in order to get into Austria at all. If they do get in, therefore, the Austrian people pay more than a third more than they need for such goods in order that a very small class among them (known as producers) may net that third of the value on similar goods produced in Austria. Even to these producers the gain can be in a great measure only apparent. The arbitrary increase of price of course diminishes—indefinitely—the desire to buy and the power to pay, and so they have a greater profit on a very small number of transactions, instead of a smaller profit on a very great number—far the most enriching process in the end. With regard to the differential duties in favour of German foreigners, the effect is of course to put into the pocket of the favoured German foreigner the whole difference between the duty exacted from him and the duty exacted from other foreigners. The Austrian consumer will usually get his goods no cheaper from the Zollverein than from England, but the German exporters from the Zollverein will pocket the difference between the tax on them and on the English exporter. In other words, this distinction produces no good at all to the Austrian people, is a loss to Austrian revenue, and a gain only to a diminutive class of Prussian or Bavarian or other Zollverein manufacturers, who have no more claim on the Austrian Government than the same number of Chinese.

Such has been the revenue system hitherto in Austria, and we may say of it, that it has produced its natural effects,—infinitesimal profit to the Government and heavy loss to the people. In England, as Mr Gladstone told us the other day, the yield of the revenue increases here at the rate of 1,700,000*l* a year without any change in the taxation. Of course this increase is not all, though chiefly, in the indirect taxation, but let us see how it stands with Austria if we compare the year 1857, three years after the revision of the commercial system there, with 1864. The amount stands in round numbers thus:—

Austrian Indirect Taxation.

	1857. Florins.		1864. Florins.
Excise	36,000,000	.....	59,100,000
Customs	17,700,000	.....	15,700,000
Salt monopoly	31,700,000	.....	41,800,000
Tobacco	47,800,000	.....	61,900,000
Stamps	19,600,000	.....	17,200,000
Taxes	19,500,000	.....	25,000,000
Lotteries	9,900,000	.....	18,200,000
Post Office	10,800,000	.....	13,600,000
Miscellaneous	2,700,000	.....	3,900,000
Total	195,700,000	.....	256,400,000

Of course as we do not know the changes in the taxation meanwhile, this gives no means of forming an estimate such as Mr Gladstone's. But what we can comment on is the ex-

Digitized by Google

traordinary fact that while our Customs duties are the one uniformly elastic element in our taxation,—so that a great financier once paradoxically said, that whatever amount of Customs duties you remitted, the Customs revenue would always remain pretty nearly the same,—in seven years Austria has *lost* way in Customs duties, instead of gaining, and almost in Customs duties alone. While the monopolies yield more than they did, and the *lotteries* yield double, and even the Excise nearly half as much again, the most elastic of all branches of revenue in countries where commercial legislation is wise, has actually fallen off and does not yield much above a million and a half sterling a year. The United Kingdom with a population of 30 millions gets 23,000,000*l* by Customs duties. Austria with a population of 35 millions gets about as many shillings as we get pounds. Yet the one system bestows great wealth on the people as well as on the Government, and the other impoverishes the people as well as the Government. To illustrate this last point. It has been calculated that Austrian producers and importations supplied to every inhabitant of the empire in 1863 one pound and one-tenth of cotton fabrics; while Switzerland, which has no natural advantage over Austria and much natural disadvantage, by help of her free commercial system supplied to each inhabitant five pounds of cotton clothing, and the product of the Swiss looms was cheap enough to compete with the English. The same is true of almost all other manufactures in different degrees. That is, the Austrian system empties the Exchequer in *order* to impoverish the people. Nor is it from any want of manufacturing ingenuity or industry that Austria fails so remarkably. The Brünn cloth, exhibited here in 1851 and 1862, was so good and so cheap that our makers of cloth do not expect to sell any Yorkshire cloth to Austria, even if there were no import duty on it at all. The *reason* why the Austrian people are kept poor and the Government kept poor at the same time, is not any want of Austrian ingenuity and energy, but in the system of commercial policy to which Austria has till lately clung. We have not yet spoken of the improvements—for they are real improvements, though not nearly so radical as we could wish,—which the new tariff to take effect in July will introduce. We must return to the subject in another article.

AUSTRIAN CUSTOMS REVENUE.

With reference to the remarks made by us on the 6th of May inst., when publishing the returns of the Austrian Custom House for 1864-5, it has been pointed out to us from an authentic quarter at Vienna that we inadvertently fell into error by assuming that the entire cost of the contraband service, or "finance guard," was properly and actually a deduction from the gross Customs revenue. The annual expense of the finance guard is represented to be 700,000*l*. But it is pointed out that as in Austria the articles of salt and tobacco are Government monopolies, by far the larger part of the duties of the finance guard are devoted to the protection of these monopolies against invasion. Excise duties are also very numerous in Austria, and the finance guard is largely employed by that department.

The following figures are given as the present returns, viz.:—

	£
Excise revenue ..	5,700,000
Salt monopoly	3,500,000
Tobacco ditto	3,200,000
	12,400,000
Customs revenue	1,380,000
	13,780,000

An expense of 700,000*l* per annum would be, say 5 per cent. on this amount; and hence it would appear that the Customs revenue, after providing for its share of the finance guard, would leave about 1,310,000*l*. What other expenses there may be which are fairly chargeable in diminution of this result we do not accurately know. But under the most favourable construction, it would still be a lamentable spectacle to see an Empire with the infinite resources of Austria raising only, say 1¼ million sterling by Customs duties and no less than 12¼ millions sterling by Excise and Monopoly duties, which must inevitably harass and impede the progress of national wealth.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 18th inst. The return for the previous week is added :—

DEBTOR.	May 18, 1865. f c		May 11, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0

Hotel and property of the bank and branches	8,500,265 0	.....	8,489,265 0
Expenses of management	1,464,186 99	.....	1,439,942 63
Sundries	9,497,814 23	.....	8,260,413 68
	1,323,833,787 24	.....	1,325,291,982 74

An augmentation of 15,350,000f in the stock of coin and bullion and a decline of 27,882,000f in the discounts are the principal features in to-day's Bank return. They prove that commerce continues wofully inactive. In the circulation of notes there is a decline of 9,622,000f, and in deposits an increase of 10,277,000f.

The Bourse, in addition to the preceding causes of depression, is now painfully affected by the last news from America, which seems to betoken unpleasant events in Mexico. The new Mexican loan has declined on the price of issue 6f 25c, and in the old loan the quotation of to-day is, it will be seen, much below that of last week. The fall in the South Austrian and Lombard railways is owing principally to a new issue of debentures having been resolved on; but that fall will probably be only temporary. The Credit Mobilier has suffered more from the prevailing discouragement than might have been expected. The following are the quotations :—

	May 11. f c		May 18. f c
Four-and-a-Half	95 50	.....	96 0

The proposition of the Minister of Finance to sell 100,000,000f worth of forests to provide part of the funds required for the execution of extra public works in the six years following 1866 encounters considerable opposition. But the opponents are in a delusion on the matter. They imagine that the possession of forests and other real property by the State is necessary as a guarantee of the solvency of the State. They do not see that the real guarantee lies in the general wealth of the nation;—that the purses of the people are, as Queen Elizabeth said, the true treasury of

Digitized by Google

the Government. They imagine that the forests should be kept in order to provide for a pressing want in a grave emergency;—they do not see that if such a want should arise on such an occasion, the value of the forests would be so depreciated that the Government could not think of selling, and that the distrust and hoarding would be so great that no one would think of buying. They overlook the fact that the revenue of the greater part of forests is only 2 per cent.; of the very best only 3; and of a considerable quantity nothing at all; but that if they were sold the Government would get first of all the purchase money, next the stamp duties on deeds to be executed, lastly, in the shape of taxes on the land broken up for cultivation, and on the increased prosperity of the numerous families who would profit thereby, a larger revenue than the forests bring. In fact, the retention of the forests is about as unwise as it would be to fill vaults with the precious metals and keep them idle for years. Even as a resource for the navy, which is one of the reasons assigned for the retention, the forests are virtually useless, since teak and other Asiatic woods are now found to be better than oak. After all, however, it is not intended to sell *all* the forests, but only a very small portion of them;—about 100,000 hectares out of more than 1,200,000. The present moment is favourable to a sale, as peasants, from recent abundant harvests, have now considerable sums on hand. And as the French peasant has a perfect passion for the possession of land, there is nothing which would be so effective in inducing him to give up his hoard as the offer of patches of forest at a moderate price. Thus, in addition to the direct advantage of a sale, the indirect advantage of bringing into circulation a large quantity of coin now abstracted from it would be attained; and this would exercise a favourable influence on the monetary crisis from which France has been suffering.

The report of the committee of the Corps Legislatif on the Budget has been issued to-day; it fills a blue book of several hundred pages, and, without its annexes, not fewer than forty-seven columns of close print in the *Moniteur*. One stands literally aghast at such a mass of repulsive type. And it is of no earthly use. The Budget was prepared with the greatest care by the Minister of Finance, assisted by the able and experienced men at the head of the different branches of his department; it was afterwards closely examined and reported on by the Council of State. To have it examined anew in the minutest detail by a committee of the Corps Legislatif, and have a report of monstrous length written about it, is manifestly absurd. And now that all this has been done, it is to be debated chapter by chapter in the Legislature. Thus the French literally spend as many months over their Budget as the English do days over theirs. French Ministers of Finance must be endowed with extraordinary power of endurance to tolerate all this control. In England no Chancellor of the Exchequer would submit to it.

A Bill has this day been presented to the Corps Legislatif for authorising the City of Paris to raise a loan of 250,000,000f.

Respecting the Mexican loan of 1864 different statements are made both on the Bourse and in the newspapers. I have reason for believing that nothing has yet been definitively settled, but that in all probability the advantages accorded to the new loan will be extended to it,—that is, it will have a lottery, with large prizes, and an investment of a certain sum will be made at compound interest, so as to secure, after a given number of years, the integral payment of the sum advanced, in addition to the payment of 500f on each bond by annual drawings. This plan of guaranteeing loans, of which the author is, as your readers know, M. Sapia, Directeur General du Mouvement des Fonds in the Ministry of Finance, has obtained great favour, not only from the public, but from practical financiers, and it will probably be applied to all borrowing countries which, like Mexico, do not stand in the first or the second category of credit.

The new Italian loan of 425,000,000f (17,000,000*l*) has been issued at last. Of it, 160,000,000f have been retained for public subscription in Italy; the rest has been taken by bankers. Messrs de Rothschild have accepted a considerable portion, but the precise figure is not stated. They have, I understand, no intention of offering any part to be subscribed by the public. At Turin the the subscription to the 160,000,000f commenced yesterday, and is to be continued to Saturday. The price is 66. A deposit of one-tenth of the subscription is to be made on subscribing; the other nine-tenths are to be paid at intervals from the 15th June next to the 1st October, 1866.

The annual meeting of the shareholders of the South of Austria, Lombard and Central Italy railways was held the day before yesterday. Baron James de Rothschild presided. The report stated that the total length of the lines conceded to the company is 3,062 kilometres (1,914 miles), of which 2,645 are worked, the rest in course of execution. The gross receipts of the working last year were 68,549,215f, and the net produce 39,871,096f 83c. This sum joined to one taken from the reserve previously made, is sufficient to allow 40f per share to be distributed. Of this, 20f were paid in December, and the rest is now being paid. The report gave a detailed account of the convention between the company and the Italian Government for the purchase by the former of the State railways. The lines taken are 841 kilometres in length; the price is 200,000,000f payable in four years without interest; the Government guarantees a gross revenue of 28,000,000f, and undertakes to make up any deficiency. The disbursement of the Company of 26,500,000f for completing the lines and making additions to them will have to be made; but it is compensated by the non-payment of interest on the 200,000,000f. In order to pay the Italian Government, the Directors proposed a first issue of 400,000 bonds at 245f, bearing 15f interest, and to be paid off at 500f by annual drawings, the subscription to be reserved in preference to shareholders. This was unanimously adopted. The subscription commenced yesterday, and is to be kept open to the 26th. At Paris, London, and Frankfort, Messrs de Rothschild have taken charge of it.

The shareholders of the Credit Mobilier met on Monday, under the presidency of M. Isaac Pereire. The report on the operations of 1864, which is drawn up with great skill, has excited, if possible, more attention than those of preceding years. It began by frankly admitting that the year was not a favourable one, and the reason it assigned was the precarious situation of the money market, and the constant dearness of money; but it said that the Credit Mobilier ought not to be judged from the results of one year, but from those of a series of years, and that there was from its foundation an average revenue of 15½ per cent. on the capital. It further said that though the Credit Mobilier suffers from monetary crises, it profits largely by a return of prosperity; and it declared that from the prudence and activity it displayed, the establishment is in a position to take advantage of such a return. The report then referred to the issue by the Credit Mobilier of the Mexican loan; it deplored the depreciation which has taken place in that loan, and said that the Mobilier lost seriously through it. After mentioning that the Credit Mobilier succeeded in placing for the Ottoman Bank 50,000,000f that remained of a preceding Turkish loan, the report passed in review the different companies which the Credit Mobilier patronised, and it gave a favourable account of them, with the exception of the Societe Neerlandaise de Commerce et d'Industrie, the managing director of which, after making imprudent investments, has taken to flight. In speaking of the Immobiliere Compagnie, the report announced that an English company has treated for the purchase of a considerable quantity (228,000 metres) of its building ground at Marseilles; the terms are not stated, but it is intimated that they were very advantageous. The profits of the Credit Mobilier for 1864, including the balance from 1863, were 7,868,207f; and after deducting 10 per cent. for the directors, and 3,000,000f paid to the shareholders at the rate of 25f per share for interest, they were sufficient to allow a dividend of 25f to be declared, and a balance of 1,534,874f to be carried forward. Considering that 1864 was a bad year for financial operations, this result cannot be considered unsatisfactory. In 1863 and 1862 the revenue per share was 125f; in 1861 and 1860, 50f.

The treaties of Commerce and Navigation, and treaties relative to railway communications and to literary and artistic property, which were concluded between France and the Zollverein on the 2nd August, 1862, having, as stated in last letter, been ratified, were on Saturday promulgated by the Imperial Government. The reason why they were not promulgated sooner was that they were concluded in the first instance with Prussia, and that there was great difficulty in getting the adhesion of the different States of the Zollverein to them. The commercial treaty reduces the Zollverein tariff on many French productions; and establishes on imports from the Zollverein into France the same duties as on those from England, Italy, and Belgium. It abolishes export duties altogether except in both countries for rags and old ropes; and for them France maintains the duties of 12f per 100 kilogs for the former, 4f for the latter. On alcohols and alcholic varnishes imported into France from the Zollverein, a consumption duty is to be paid in addition to the import duty, so as to make them pay the same as similar productions in France.

The stipulations relative to certificates of origin of merchandise, the mode of fixing the value of goods taxed *ad valorem*, and other matters of detail, are the same as in the English treaty. The navigation treaty places as far as possible the vessels of each State in the ports of the other on the same footing as national vessels, and enacts that merchandise exported or imported by them shall also be treated in the same way. Each treaty contains a "most favoured nation" clause, and each is to last twelve years. The literary and railway conventions contain nothing of special interest to English readers; the former is to continue for twelve years, and the latter can be terminated at any time on giving six months' notice.

Imperial decrees issued this morning declare the stipulations of the above treaty of commerce applicable to England, Belgium, Italy, Sweden, and Norway; allow Zolverein tissues to be imported through the same ports and custom houses as English and Belgian; say that Zolverein ships coming from British possessions in Europe shall be treated like French, English, Italian, and Belgian vessels from the same places; and impose on Zollverein productions imported in foreign ships a surcharge of 25c per 100 kilogs, when such productions are free Customs duties or pay less than 3f the 100 kilogs; and to the surcharges fixed by the law of the 28th April, 1816, when they are liable to duty exceeding 3f the 100 kilogs.

Complaints having been made at Havre that the returns of the stock of cotton published by brokers are incorrect, the Chamber of

Digitized by Google

Commerce has issued a communication which says that the brokers take all the pains they can to be exact, but that it is impossible to be perfectly so unless all holders of cotton, whether in public or private stores, will afford facilities for enabling their stocks to be recorded from time to time. The Chamber accordingly appeals to merchants and shipowners to afford such facilities in the interest of commerec.

A Bill has been presented to the Spanish Cortes for suppressing the extra Customs duties imposed by a law of 1841 on goods imported by land, so as to make them equal to those on goods imported by sea in foreign ships; also authorising Government to reduce the duties on ship-building materials. A *ce n'est que le premier pas qui coute*, it is to be hoped that the Spanish Government will follow up those reforms by others far more comprehensive; and as it has solicited the French Government to accord reductions of duties to certain articles of Spanish production, the probability is that it is prepared to do so. It is chiefly to the Southern of France and the Northern of Spain railway companies that the public is indebted to the first part of the reforms; they having represented that the high duties were not only injurious to the traffic, but practically rendered the railways useless, in so far as referred to the carrying of goods, inasmuch as they made the goods very dear.

The market report is as follows :—

FLOUR.—At *Paris*, purchases continue to be limited, but prices are firm. Yesterday, choice was 49f to 49f 50c the sack of 157 kilogs; and other sorts, from 44f to 48f. Six marks were, current month, 49f 50c; June, 50f 25c; July and August, 51f 75c. Type Paris, the 101 kilogs, 29f 25c; June, 29f 75c.

WHEAT.—At *Paris*, yesterday, choice white was 27f 50c the sack of 120 kilogs; red, 26f 50c to 27f; good sorts, 25f; other sorts, 24f to 24f 50c.

COTTON.—In the week ending Friday, the market at *Havre* was generally speaking calm. The sales were 3,801 bales, and the arrivals 7,170. The stock was estimated at 62,420 bales. The closing quotations were 5f lower for United States, sawginned Dharwar, and for Madras, Bengal, and Kurrachee, 3f lower for Tinnevelly; other sorts unchanged. Low New Orleans was consequently 195f the 50 kilogs; good ordinary qualities in Broach, 135f; in Tinnevelly, 112f; Madras, 135f; China, 47f; Jumel, 200f. This week, the market has been calm, and yesterday, New Orleans was 200f; Tinnovelly, 107f 50c; Madras, 120f; Coconada, 115f Japan, 110f; China, 110f, 105f, and 100f

COFFEE.—The sales at *Havre*, in the week ending Friday, were 250 sacks Hayti St Marc, for delivery, 90f 50c the 50 kilogs in bond; 5,700 Rio, not washed, disposable or in the port, 73f to 85f 50c; 2,850 ditto, for delivery, 72f to 79f; 580 Bahia, for delivery, 73f to 77f 50c; 270 Cazengo, 86f. Some sales of damaged were made by auction. The arrivals exceeded 6,000 sacks. This week, Hayti, 82f in bond; Rio, 73f 50c to 90f; Rio Nunez, 87f 50c; Guadaloupe, 141f. At *Nantes*, last week, 1,094 sacks Port-au-Prince, 82f 25c the kilog in bond. This week, Reunion *pointue*, 140f, duty paid. At *Bordeaux*, last week, 300 sacks Mysore, 167f 50c the 50 kilogs; 290 La Guayra at established prices; 250 Rio, not washed, the greater part at 81f 50c; also, 1,195 Mysore, damaged, 108f. This week, Mysore, 117f 50c; La Guayra, grage, 103f. At *Marseilles*, last week, the only transaction was the sale of 2,000 casks damaged Rio at 55f 25c to 68f 25c. Nothing done this week.

SUGAR.—At *Havre*, in the week ending Friday, 800 casks French West India went at 49f to 50f the 50 kilogs, bonne quatrieme, duty paid; 400 ditto for delivery, 49f to 49f 50c; some usine, 53f 75c to 65f; 2,867 bales Reunion, 51f 50c to 52f, bonne quatrieme, duty paid; 2,250 casks Havana, disposable, 31f to 31f 75c in bond, No. 12; 500 for delivery, 31f 50c, same number; 308 by Spanish ship, 30f 50c; a quantity of Porto Rico for delivery, part at 49f, the rest at 51f 50c, bonne quatrieme; 300 Pernambuco for delivery, 29f, No. 12 in bond. The arrivals were about 10,000 casks and 3,500 sacks. This week, Havana No. 12, by foreign ship, 31f 25c in bond; and by French ship, 31f 75c; French West India, 49f 50c, bonne quatrieme; and usine on sample, 59f 25c. At *Nantes*, last week, prices advanced, but sales were not large :—800 sacks Reunion disposable; 200 for delivery, 53f 50c, bonne quatrieme; 250 low quality, 48f; 400 gros grain, 53f 50c; 3,620 sacks Mauritius by English ship, paid at London, 26s 9d, equal to 32f 70c, for No. 14½ floating conditions. At *Bordeaux*, last week, 118 casks French West India, 48f, bonne quatrieme; some usine at established prices; 770 bales Reunion, 53f. This week, French West India, 49f bonne quatrieme, usine, 61f; Reunion, indifferent quality, 45f. At *Marseilles*, last week, 800 casks Havana, disposable by Spanish ship, 31f 50c; 2,600, at 31f, same number; 1,000 at prices not stated; 600 sacks Pernambuco, 27f 50c No. 10; 400 casks Martinique, 32f, bonne quatrieme of Havre. This week, Pernambuco for delivery by English ship, 29f 50c, No. 10; Havana by Spanish ship in port, 30f 50c, No. 12; Cienfuegos ditto, 29f 25c, bonne quatrieme of Havre.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 19 chests Bengal, 55c to 75c above the estimates; 1 chest old at prices not stated. The arrivals were 19 serons from England. No sales this week. At *Bordeaux*, last week, 21 chests Kurpah and Madras, at established prices. This week, Bengal, Madras, and Kurpah at prices not stated.

HIDES.—The sales at *Havre*, in the week ending Friday, were 682 La Plata dry ox, light, 80f the 50 kilogs; 419 Buenos Ayres salted saladeros cow, 44f; 1,400 Montevideo mataderos cow, about 40f; 1,800 Rio Grand dry, 75f; 600 ditto salted, 51f 50c; 3,600 cow, at prices not stated; 350 Pernambuco, drysalted, 67f 50c; 1,500 ditto, salted, 45f 52c; Martinique salted, 60f, indifferent quality; 140 Buenos Ayres horse, salted, 42f; 2 bales La Plata kid, 13f. The arrivals were about 59,000. This week, Monte Video dry cow, 90f; ditto ox, salted, 62f 50c; Marangan, drysalted, 57f 75c and 59f; Buenos Ayres dry, 69f 50c and 74f; La Plata, dry horse, 8f 25c each; Calcutta calf, 100f.

WOOL.—At *Havre*, in the week ending Friday, 81 bales Buenos Ayres unwashed went at 1f 85c to 2f 35c the kilog; 1 bale lambskin ditto, unwashed, 1f 45c. The arrivals were about 2,500 bales. This week, Monte Video unwashed, 1f 90c to 2f 52½c; Buenos Ayres unwashed, 1f 40c to 2f 50c; ditto, lambskin unwashed, 2f 27½c to 2f 35c.

TALLOW.—At *Havre*, in the week ending Friday, 200 pipes La Plata, disposable and for delivery, 50f 50c and 50f. The arrivals were 903 casks. This week, La Plata in port, 50f, and for delivery, 50f 50c; old disposable, 49f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 103f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 54f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Lanquedoc, of 86 deg., 71f; 3-6 beetroot, first quality, 90 deg., 64f.

Transmitted to U. S. mint Philadelphia, for coinage			614,231	48

Digitized by Google

Subjoined is a statement of the sums to be paid for ocean postal subsidies during the current financial year, compared with those of the past year. The total is 841,867*l*, showing a reduction of 18,409*l*, which is attributable to the circumstance of the cessation of the Galway subsidy, being more than sufficient to cover some small additions in the West Indian, Pacific, and East Indian services :—

* A deduction of £37,554 from the contract payment of £172,914 was made last year for proportion to be paid by the colonies.

Messrs Sharp and Co., writing on the 1st ult., thus allude to the state of the bullion market at Hong Kong, during the fortnight ending as above :—Gold—The arrivals of the fortnight, including a round sum from Shanghai in transit, amount to $580,000. The exports, including those per Singapore on the 15th, and excludiug a considerable sum to leave to-morrow, are nearly $700,000. Silver—The amounts received are equal to $190,000, and those sent away, including a sum shipped per the last mail steamer, are $370,000. The market may be said to be quite bare of this bullion. Dollar Currency—There have come to hand $730,000, and the sum total sent away is $290,000. The value of clean Mexicans has improved in Shaghai, but very few transactions have been made in them here, and these at mere shroffage rates. Discounts and Mortgages—Mortgages, 9 ; loans on produce, 7 ; and discounts of first-class securities, 6 per cent. may be quoted as the ruling rates. Choice acceptances and bankers' drafts have been done at lower rates. Exchange still remains as last quoted. A good business was done early in the mail, but since the arrival of the English steamer, the news received has tended to check transactions. Exchange and Bullion —Closing Quotations—On London, 6 month's sight, 4s 6¾d ; on Calcutta, 3 days' sight, 216 rs ; on Bombay, 3 days' sight, 218 rs ; on Shanghai, demand, 71¼ tls ; on do., 15 days' sight, 72 tls ; on do., 30 days' sight, 72½ tls ; on Singapore, 3 days' sight, 1 per cent. prem. ; on Indian 5 per cent. Government securities, 216 rs. Bar silver, 17 dwts *B.*, 10½ per cent. prem. ; do., West Coast Valparaiso, 9½ per cent. prem. ; Sycee, 9½ per cent. prem. ; Mexicans, ¼ per cent. prem. ; gold leaf, $22.90 per tael ; gold bar, California, $22.90 per tael, equivalent 100 touch ; sovereigns, $4.50 each ; discount, 6½ per cent. ; Hong Kong and Shanghai Banking Company shares, 20 per cent. prem.

The imports of bullion into the United Kingdom, during the week ending May 17, were :—Gold, 113,327*l* ; silver, 189,713*l*. The exports during the same period, were :—Gold, 40,496*l* ; silver, 95,471*l*.

Private Deposits	13,489,291		
	42,919,290		46,132,555

Dated the 17th May 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,213 265*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£67,642
An INCREASE of Public Deposits of	311,863
A DECREASE of Other Deposits of	270,741
No change in Government Securities.	
A DECREASE of Other Securities of	41,336
An INCREASE of Bullion of	161,811
An INCREASE of Rest of	11,741
An INCREASE of Reserve of	88,686

Although the above changes are of no great importance, they are all in a favourable direction. The reserve and bullion both show an increase, while the other securities are slightly lower.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20 613,660	21,539,430	21 263,315	21,313,352	21,769 022

Average price of wheat	76s 1d	57s 11d	46s 9d	59s 3d	40s 11d
Exchange on Paris (shrt)	25 15 20	25 22½ 27½	25 20 27½	25 30 40	25 17½ 25
— Amsterdam ditto	11 18½ 19	11 15½ 16	11 15½ 16	11 17½ 18	11 17½ 18½
— Hamburg (3months)	13 8 8½	13 8 8½	13 7½ 8	13 9½ 9⅝	13 9½ 10

In the corresponding week of 1855, the negotiations for peace had been broken off. The Emperor Napoleon had appointed M. Walewski as his Minister of Foreign affairs, and M. de Persigny as his representative in London. The opening of the Universal Exhibition at Paris had imparted considerable activity to commerce. The money market was easy and well supplied.

In 1862, news from America had announced the capture of New Orleans. The payments on the recently contracted foreign loans had occasioned rather more stringency in the money market, where rates were approximating more nearly to the Bank minimum.

In 1863, appearances indicated an increasing demand for money. The attention of the public was greatly occupied with the numerous new companies actually launched and in

Digitized by Google

preparation for the market. The speculation in foreign stocks continued.

In 1864, the Danish squadron had arrived at Copenhagen. The Crown Prince of Prussia had been appointed to the command of the 2nd Army Corps. Austrian troops were being concentrated in Transylvania. The French squadron in the Mediterranean had received orders to hold itself in readiness to go to Tunis. In Algiers the insurgents had been defeated with heavy loss. In America, General Grant's campaign against Richmond had commenced, and General Meade's army had crossed the Rappahannock. A Federal attack on Dalton was anticipated. General Sherman's army had commenced moving from Chattanooga towards Georgia. The Bank of France had raised its rate from 7 to 8 per cent. The demand for discount was moderately active.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 224,384*l*; in 1862, a deficiency of 4,452,882*l*; in 1863, a deficiency of 6,252,766*l*; and in 1864, a deficiency of 8,011,027*l*. In 1865, the deficiency is 6,537,910*l*.

DISCOUNT AND MONEY MARKET.—There has been no increase in the demand for money this week, but the rates nevertheless remain firm, and are strengthened by the uneasiness caused by political appearances, together with reports of further large mercantile failures. Only in exceptional transactions business has been done under 4½ per cent., and the general belief is that no fresh decline can be looked for in the Bank rate at present. At the same time there is an ample supply of capital, as shown by the low terms obtainable on the Stock Exchange. Subjoined are the charges for discount at various dates :—

30 to 60 days	4⅛ per cent.
3 months	4¼ per cent.
4 months	4⅜ per cent
6 months—Bank bills	5¼ ¼ per cent.
6 months—Trade ditto	5½ 6 per cent.

On the Stock Exchange loans on Government securities were quoted this morning at 3 to 3½ per cent., but later in the day considerable amounts were offered at 2½ to 3.

Annexed are the rates of interest allowed on deposits :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l*

About 25,000 in bar gold was sent into the Bank to-day. There were no operations yesterday.

The Stock Exchange Committee have appointed Monday next, the 22nd inst., a special settling day in the shares of the Val-Sassam Mines Company (Limited) and the City of Moscow Gas Company (Limited). Both are to be marked in the official list. The Committee have also appointed Thursday, the 25th inst., a special settling day in the Consolidated Peruvian Five per Cent. Loan, which is to be marked as bonds, as scrip, with 45*l* paid, and as scrip, 45*l* paid, "future payments in bonds and cash."

The biddings for Government bills on India took place at the Bank of England on Wednesday last. The proportions allotted were—to Calcutta, 289,000*l*; and to Bombay, 55,000*l*. The minimum price was fixed at 1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. All tenders on Calcutta and Bombay at and above 1s 10¾d will receive in full. There were no tenders on Madras.

The return of the Bank of France for the week gives the following results :—

	£
INCREASE.	
Coin and bullion	613,000
Treasury balance	20,000
Current accounts	408,000
DECREASE.	
Bills discounted	760,000
Circulation	386,000

The following are the rates of discount in the chief cities of the Continent, showing no alteration :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3½
Vienna	5	5¼
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4¾ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2¾
St Petersburg	5½	5½

ENGLISH GOVERNMENT STOCKS.—The funds have again been prejudiced by a number of unfavourable political rumours, and have been declining throughout the week. To-day the tendency has been especially heavy. Consols for the account, which left off last Friday at 89⅜ to 89½, receded this afternoon to 88⅞ sellers, on a report that the threatening attitude of the United States towards the new Mexican Empire had induced the French Ministry to send an urgent request to the Emperor to return forthwith from Algeria. After regular hours, however, there was a partial recovery, and the ultimate quotation was 89 to 89⅛. For money, the last official price was 90⅛ to 90¼. Reduced and New Three per Cents. left off at 88⅛ to 88⅜. India Five per Cents. are a fraction lower, at 106¼ to 106½.

No movement of importance has taken place in Exchequer bills or India bonds, the respective prices being 2s to 5s premium, and 14s to 19s premium.

FOREIGN STOCKS.—The market for foreign securities has again been dull, and the changes that have taken place have been all unfavourable. Mexican exhibits the chief fluctuation, and has fallen to 24⅝ to 24⅞ on the fear of political complications with the United States. Most of the other Spanish American descriptions have also receded, especially New Granada and Peruvian, the former on the expectation of disturbances from the impending death of the President of the Republic, and the latter from the apparently unchecked progress of the revolution in part of the State. Spanish Passive and Certificates have been alternately buoyant and depressed according to the tenour of the various rumours circulated from day to day. Turkish Consolides have declined to 47¼ to 47½, it being generally understood that the new conversion scheme of Mr S. Laing has turned out a practical failure. Ottoman scrip has likewise fallen to 1¾ to 1¼ discount. The Confederate loan is now almost entirely neglected, and the nominal price is only 9 to 10, with very few transactions. United States Five-twenties are quoted 63½ to 64.

The closing quotation of French Three per Cents., on the Paris Bourse, this afternoon, was 67f 45c, showing a fractional decline compared with yesterday, but a fall of nearly a quarter per cent. on the week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The railway market has shown less depression than the other departments of business, although in some cases a decline has taken place, especially in North-Eastern descriptions and Great Western. On the other hand, Metropolitan has risen about 2 per cent., being last quoted this evening 136¾ to 137¼. Caledonian has also advanced. Business this week has been mainly confined to the fortnightly settlement, and compartively few speculative transactions have occurred.

In colonial stocks, there has been an improved demand for guaranteed East Indian lines. Canadian descriptions show a tendency to heaviness.

Digitized by Google

The foreign market has been inanimate and somewhat flat. Dutch-Rhenish, however, exceptionally improved.

The rumours of further mercantile failures both here and in the East have caused a general decline in joint stock bank shares, particularly of those establishments connected with India and China. Financial descriptions have likewise fallen, International closing at $\frac{3}{4}$ to $\frac{7}{8}$ prem.; General Credit, $1\frac{3}{8}$ to $1\frac{1}{2}$ prem.; and Credit Foncier and Mobilier, 3 to $3\frac{1}{8}$ prem. In the shares of new companies, Lion Brewery have advanced to $2\frac{7}{8}$ to 3 prem.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—The rates this week have again shown increased firmness.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—During the week we have to report the arrival of the undermentioned amounts:—39,500*l* per Tasmanian, from the West Indies; 21,000*l* per Persia, from New York; 57,500*l* per City of Washington, from New York; 7,800*l* per Bremen, from New York; 8,800*l* per Lady Jocelyn, from Calcutta. The only shipments have been 30,000*l* in sovereigns to Alexandria, and 1,280*l* to the West Indies. The continental demand has for the present ceased, and the Bank has received 47,000*l*, and further sums will be sent in. The Messageries steamers have brought 11,700*l* during the week. The vessels now on the way from Australia are:—The Red Rover, with 12,000*l*; Great Britain, 189,000*l*; True Briton, 45,000*l*; Norfolk, 23,000*l*; and the two first mentioned may be considered as due.

Silver.—The Tasmanian has brought about 135,000*l* from the West Indies, the Dore portion of which has been sold at 5s $0\frac{1}{8}$d per oz. standard. There being but little demand for fine bars for the Dutch markets, a slight reduction in price has been submitted to, and we quote the rate as 5s $0\frac{29}{32}$d per oz. standard.

Mexican Dollars.—The Floride has arrived at St Nazaire from Vera Cruz, with 200,000 dols. Our market is exceedingly quiet, and we think this quantity can scarcely be placed except at a reduction from the last quotations.

Exchange on India—owing to telegrams thence of an unsatisfactory character—has been very irregular. Banks' drafts at 60 days' sight may be quoted 1s $10\frac{1}{2}$d to 1s 11d, and commercial 1s 10d to 1s $10\frac{1}{2}$d. The council drafts sold yesterday went at lower prices, 1s $10\frac{3}{4}$d receiving in full. The bulk of the biddings, however, was at 1s 11d, the reduction in the limits to 1s $10\frac{1}{2}$d Calcutta and Madras, and 1s $10\frac{3}{4}$d Bombay, not having been anticipated.

India Government loan notes are without change, and may be quoted 108 to 110 for $5\frac{1}{2}$ per Cents., 101 to 103 for 5 per Cents., and 89 to 91 or 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s $10\frac{1}{2}$d per oz std. last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s $2\frac{3}{4}$d to 76s 3d per oz, last price. Silver—Bar silver, 5s $\frac{29}{32}$d per oz std, last price; ditto, containing 5 grs gold, 5s $0\frac{5}{8}$d per oz std. last price; Mexican dollars, 4s $11\frac{1}{2}$d per oz. nearest; 5-franc pieces, 4s $11\frac{1}{2}$d to 4s $11\frac{3}{4}$d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Poonah from Alexandria has brought 22,876*l* in specie.

The outgoing packet Syria, with the India and China mails, will take about 17,115*l*, chiefly gold for the Mauritius.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Creditors of the London, Hamburg, and Continental Exchange Bank (Limited) are required to send the particulars of their claims to Mr Frederick Whinney, one of the official liquidators, by the 14th June, the 28th of that month having been appointed by the Master of the Rolls for adjudicating upon them.

A meeting of the creditors of Messrs Charles Joyce and Co., in the Egyptian trade, who failed on the 8th ult., was held on Tuesday last. The total liabilities were stated at 1,340,000*l*, of which not more than 312,029*l* is uncovered, to meet which there are assets estimated at 121,093*l*. It was proposed to wind up the estate under the inspection of three creditors.

Letters from Alexandria speak in encouraging terms of the prospective liquidation of the estate of Messrs Wollheim and Co., the creditors there having passed resolutions testifying to the high character of the partners.

In the accounts from Sydney received by the last mail the suspension is announced of Messrs How, Thomson, and Co., stock and station agents, with liabilities of 90,000*l*, and estimated assets of 65,000*l*. Their losses on stations are put at 50,000*l*.

An adjourned meeting of the creditors of Messrs J. Marshall and Sons, spinners and shippers of manufactures, of Stockport, was held on the 12th inst., when a composition of 12s 6d in the pound, payable within six months, was unanimously accepted.

Several failures are reported at the Cape of Good Hope, owing to the fall in the price of colonial wool. The local journals estimate the total liabilities of the various firms at above 300,000*l*, but it is believed that this is an over-estimate.

PUBLIC COMPANIES.—The second annual meeting of the Hercules Fire and Life Insurance Company (Limited) was held on Monday last. The new premium income was stated at 8,094*l* 2s 4d, and the losses less than 20 per cent. A dividend of 5 per cent. per annum was declared.

The annual meeting of the Chartered Mercantile Bank of India, London, and China took place on Tuesday last. The net profits for the year were stated at 126,082*l*, which is increased to 201,913*l* by the addition of 75,831*l*, the undivided profit brought forward from the preceding year. 136,153*l* has been paid in two half-yearly dividends, together at the rate of 20 per cent., leaving 65,760*l* to be carried forward.

The general meeting of the proprietors of the Provincial Bank of Ireland was held on Thursday, when a dividend for the half-year, at the rate of 20 per cent. per annum, was declared.

At the meeting of the Bank of Queensland, held on Wednesday, a dividend of 12s per share, free of income tax, was declared, making a total distribution for the year 1864 of about $6\frac{3}{4}$ per cent.

At the meeting of the Bank of Hindustan, China, and Japan, this week, the net profits for the year, including 827*l* brought forward, were stated at 15,893*l*, but of this sum, 14,746*l* was paid as an interim dividend on the 20th August last. After some discussion the report was adopted.

The first report of the London and Venezuela Bank has been published, preparatory to the meeting on the 18th proximo. The profits are equal to more than 10 per cent. per annum on the capital paid up, although the rate of exchange has been considerably against the bank, and the expenses are necessarily on a scale adapted to the employment of a much larger capital. It is not proposed to declare a dividend, and the balance to be carried forward is 784*l* 8s 4d.

A new company called the Yorkshire Engine Company (Limited), with a capital of 200,000*l*, has been formed, and the capital subscribed privately through Messrs Chadwick, Adamson, and Co. The company have purchased twenty-two acres of land near Sheffield, and will be mainly employed in the construction of locomotive engines, with a capacity for extension, so as to produce from 300 to 400 engines per annum.

The North German Ship-building Company (Limited) is formed for the purpose of building vessels of all kinds and erecting dockyards in the port of Kiel. The capital of the Company is 1,500,000*l*, of which the first issue is 750,000*l* in 25,000 shares of 30*l* each. The company is to be protected by the Prussian Minister of Marine.

The Railway Credit Company, capital 2,000,000*l*, in 40,000 shares of 50*l* each (first issue, 20,000 shares, of which it is expected only 10*l* will be called up), has been formed to facilitate the purchase and construction of railways, and other public works, to enable contractors to carry on suitable works,

Digitized by Google

and to make advances on railway and other securities. The company will also axt as financial agents generally.

The Credit Foncier and Mobilier of England (Limited) are instructed to receive subscriptions for the A stock of the Metropolitan Extension Railways of the London, Chatham, and Dover Company. The amount to be issued is 1,212,000*l*. The following table, given in the prospectus, shows the position of this stock :—

The capital of the Metropolitan Extension Railways is constituted as follows :—

Debentures		£1,433,000
B stock, entitled to 6 per cent. preference		825,000
C stock, entitled to 6 per cent. preference after B		1,050,000
A stock (present issue)		2,425,000
For future issue as fully paid-up stock	Entitled to remainder of profits 1,212,000	
	up to 6 p ct. 1,213,000	
		5,733,000

Arrangements have been made with Sir Morton Peto for a guaranteed dividend of 6 per cent. A much larger dividend is anticipated from the wonderful augmentation of suburban traffic.

MISCELLANEOUS.—The following memoranda have been received in relation to the debts of Venezuela and Ecuador :—

VENEZUELA SIX PER CENT. LOAN, 1864.

The General Credit and Finance Company of London (Limited) are in receipt of advices from their agents, Messrs H. L. Boulton and Co., dated La Guayra, April 25, 1865, of duties collected as follows on account of the above loan :—

Per statement No.	12	from Cuidad Bolivar	$10,454 80
—	13	— —	824 0
—	37	from Puerto Cabello	7,287 61
—	38	— —	3,729 82
—	39	— —	15,532 97
—	26	from La Guayra	10,603 41
—	27	— —	8,713 2
			$57,145 63

DEBT OF ECUADOR.

The mail from Guayaquil has brought a remittance of 1,115*l* 14s 5d on account of the dividends of the debt of Ecuador.

New Granada Debt.—Messrs Baring Brothers and Co. have received by this mail, on account of New Granada dividends, a remittance of 487*l* 8s 9d from the Custom House of San José de Cucuta.

With reference to the Venezuelan Loan of 1862, Messrs. Baring Brothers and Co. have received a communication from General Guzman Blanco, dated Caracas, 24th April, of which the following is a translation :—

Messrs Baring Brothers and Co., London.—Gentlemen,—I learn from your favour of the 1st of April that the preliminary proposal mentioned to you in my communication of the 22d February, as the basis of an arrangement with the creditors, has been rejected by them. I hope, nevertheless, that such refusal will not close the way to any other negotiations that may be opened later, and which may conciliate the interests and necessities of the republic with the rights which may have been acquired by her creditors, who, in my opinion, will obtain more by kind and reasonable measures than by the use of violent and unreasonable means. In the meantime, as General Falcon, who is the constitutional President, is about to arrive in this city, and is to inaugurate his administration, I will give him an account of what has occurred, in order that, reconsidering the matter, he may determine what he thinks most right.—I am, &c., (Signed) A GUZMAN BLANCO.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

The Commercial Times.

LETTERS FOR CONSTANTINOPLE VIA VIENNA AND KUSTENDJIE.—Postal communication has been re-established between Vienna and Constantinople by way Tchernavoda and Kustendjie. Mails for conveyance by this route are despatched from Vienna twice a week, viz., on Mondays and Fridays; and letters from the United Kingdom intended to be forwarded by such mails will, in the ordinary course of post, be in time for the mail of Monday, if despatched from London via Ostend on the morning of the previous Saturday, and for the mail of Friday, if despatched from London on the morning of the previous Wednesday. Letters for Constantinople, which the senders may desire to forward by this route, must be specially addressed "via Kustendjie." The postage chargeable upon letters will be the same as via Trieste, viz., 11d for a letter not exceeding half an ounce in weight, when prepaid, and 1s 1d if sent unpaid.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the fineness of the weather, the state of the wheat trade at Mark lane, to-day, was decidedly quieter than on Monday. As regards prices, however, considerable firmness was observed, and the business done both in English and foreign produce was at the late advance in the currency. Barley was a dull inquiry, and the quotations had a drooping tendency. Oats—of which there was an abundant supply on the stands—met a slow sale, on rather easier terms. Beans and peas ruled firm, at full currencies. For flour, there was a fair demand, at late rates. This week's imports amount to 10,850 quarters of wheat; 14,440 of barley; 40,460 oats; and 40 sacks of flour.

At Liverpool, this morning, wheat was in fair demand, at full prices. Flour moved off slowly, at previous quotations. Maize was rather dearer. At Wakefield, the wheat trade was steady, at fully late rates.

There has again been a good and well-maintained demand for cotton at Liverpool this week, and which has been very freely met by holders. Prices may be quoted ¼d higher than last week. The sales of the week reach 88,040 bales, of which 9,210 bales have been taken on speculation, 32,010 bales declared for export, leaving 46,820 bales to the trade.

Telegraphic despatches from Bombay state that the export of cotton from April 29 to May 13 amounted to about 100,000 bales. Broach, laid down here, was quoted of 8.031d; and Dhollera, 8.949d per lb on the 15th of the present month.

The cotton trade at Madras, during the fortnight ending April 12, was very dull, and all qualities of produce gave way in price. Western produce was quoted at 6½d to 7d per lb. The stock of cotton was estimated at 15,000 bales. The following statement of exports is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from the PORT of MADRAS.

Total	5,038	15,395

A limited business was done in cotton at Calcutta from March 24 to April 7. Prices, however, advanced 1 rupee, the quotation being 15 to 19 rupees per factory maund.

As regards the state of the cotton trade at Shanghai for the fortnight ending March 25, a report says:—Since the arrival of the mail bringing intelligence of a heavy decline in Liverpool there has been no business done. Dealers at present quotations do not seem disposed to sell, it being now ascertained that there is a short crop, and a considerable native demand is also looked for; fair Shanghai is quoted at tls 15 per picul, with few sellers.

The sales and prices of cotton at Hong Kong, for the fortnight ending March 31, were as follows:—Shanghai, $20 to 22; Ningpo, $23 to $24 per picul; sales 3,200 bales: Japan, $26 to $27 per picul; no sales.

The supply of cotton on sale at Yokohama, from March 3 to March 17, was small, and the quality of the produce was very inferior. There was scarcely any business doing, and prices ruled quite nominal.

Advices from Alexandria are to May 13. At that date the cotton trade was very quiet at about stationary prices. Fair open-ginned cotton was quoted at 13d; fully fair ditto, 13¼d per lb, cost and freight. Fair open-ginned cotton sold as low as 12d at the commencement of the present month. The arrivals from April 13 to May 5 were 9,802, and the sales 5,059 bales. The annexed table of shipments is from the Egyptian Commercial and Trading Company's circular:—

EXPORTS of COTTON from ALEXANDRIA from Oct. 3 to May 2.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1859—1860.....	74,842	16,141	5,573	96,566
1860—1861.....	69,665	26,826	4,969	101,460

1863—1864.....	173,019	54,129	11,524	238,672
1864—1865.....	183,018	28,726	6,793	218,537

The arrival of cotton at New Orleans, from Sept. 1 to April 20, including the stock on and at the former date, amounted to 57,779 bales. The export during the same period was 47,939 bales, leaving the stock on hand on the 20th ult., 9,840 bales.

The following table shows the rates of freight for cotton to London and Liverpool at the leading ports at which that staple is exported, at the date of our last advices:—

	London.		Liverpool.	
	£ s d	£ s d	£ s d	£ s d
Bombay.....	2 0 0 to	0 0 0	1 10 0 to	2 0 0

New York.....	0 0 0	0 0 0	0 0 5-32	0 0 0

With the exception of an advance of 6d per cwt in the value of raw sugar, at which improvement considerable business has been transacted, colonial and foreign grocery produce is without material change in price from last week. Generally speaking, the markets have been quiet; nevertheless, previous quotations have, in most instances, been supported. Last week, duty was paid on 164,669 lbs of tea, whilst the export for the week ending May 11 was 353,098 lbs, making a total of only 517,767 lbs, against 1,799,861 lbs last year.

Advices from the leading Chinese ports state that the inquiry for most kinds of black tea was much restricted, and that prices had, in most instances, given way. Green teas, however, which were in request on American account, were firm in price. The export from all China to Great Britain from June 1 to March 31 was 112,062,410 lbs, against 106,582,670 lbs during the corresponding period last season.

The coffee trade at Colombo, during the fortnight ending April 17, was very quiet. The accounts respecting the appearance of the

Digitized by Google

crops were most satisfactory; nevertheless, owing to the favourable reports from the European markets, the value of all qualities was well supported. Plantation produce was quoted at 12s 6d to 13s per bushel; native ditto, unpicked, 43s 6d; picked and dried, 49s to 50s per cwt. The following statement of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from COLOMBO from Oct. 1 to April 17.

The public sales of colonial wool are progressing with a fair amount of activity. French buyers are operating freely, but the transactions both on home and foreign account are at the reduction in prices noticed last week. The next series of public sales will not be commenced before the 17th of August. For English wool there is a moderate demand, at full prices.

We have letters from Melbourne to March 25. The shipments of wool since October 25, 1864, had amounted to 124,103 bales, being 21,167 bales in excess of the export during the corresponding period in 1863-4. The trade during the month ending as above was steady, and the rates current at latest date were as follows:—Greasy—Inferior to ordinary, 7d to 9d; ordinary to average, 9d to 10d; good to inferior, 11d to 1s 1d; ditto cross-bred, 1s 1d to 1s 2d. Fleece—Inferior to ordinary, 1s 3d to 1s 5d; ordinary to average, 1s 5d to 1s 7d; good to inferior, 1s 9d to 2s 1d. Scoured—Ordinary, 1s 4d to 1s 7d; good, 1s 8d to 1s 10d; superior, 2s to 2s 2d per lb.

From Sydney, we learn that the wool trade from February 21 to March 21 had been very inactive. The following were the prices current at latest date:—First scoured, 1s 10d to 2s 1d; second ditto, 1s 6d to 1s 8d; first fleece, 1s 8d to 1s 10d; second ditto, 1s 3d to 1s 6d; greasy, 7½d to 11d per lb.

The total export of silk from Shanghai, from July 1 to March 25, was 35,232 bales, against 33,112 bales during the same period in 1863-4. The trade at the above port, at latest date, was very firm, and prices ruled high. The stock was estimated at only 300 bales, against 4,000 bales last year, and 2,000 bales in 1863.

Hemp is dull, at 28*l* to 29*l* for clean Russian qualities. Flax is firm, and prices have an upward tendency.

The quarterly public sales of East India indigo were brought to a close on Monday last. During their progress, good and fine Bengal qualities sold readily at an advance in prices of from 3d to 6d per lb. Good and fine Madras, and Kurpah qualities, were in request, at from 2d to 4d more money, as compared with the February sales; but in inferior produce, both from Bengal as well as from other parts of India, very little change took place. Of the quantity brought forward, it is estimated that 1,280 chests were bought in, 4,687 chests withdrawn, and that about 3,000 chests were sold. About 2,000 chests were taken by export buyers.

At latest date, the tobacco trade at New York showed signs of improvement; but during the greater part of April it was in a most inactive state; and prices ruled next to nominal. The following table shows the extent of the deliveries in April last, and also the stocks on April 1 and May 1:—

Scotch pig iron is less active, and has sold at 53s 6d cash, mixed numbers. In spelter, considerable business has been done, at 22*l* 10s to 23*l* per ton, on the spot. Tin is steady, at 93*l* 10s for Straits. Copper rules firm; but lead is a dull inquiry.

The oil trade has been very quiet. On the whole, however, prices have ruled firm. Linseed oil is quoted at 31s 9d; and foreign-refined rape at 43s 6d to 44s per cwt., on the spot. French spirits of turpentine are now selling at 54s 6d to 55s per cwt. The following table shows the stocks of naval stores at New York on the 1st of the present month:—

	1865. bbls	1864. bbls	1863. bbls
Turpentine	30	704	39
Spirits Turpentine	495	2,156	526
Rosin	1,501	1,480	3,174
Tar	4,255	2,386	12,902

Tallow has changed hands to a very moderate extent. In prices, however, no change of importance has taken place. P.Y.C. is quoted at 40s 3d to 40s 6d per cwt., on the spot. At St Petersburg, the price at latest date was 45 silver roubles.

A large business was transacted in cotton goods at New York during the week ending May 6, but owing to the fall in the value of the raw material and the decline in the premium on gold, most dealings were at reduced prices. For woollen goods there was a fair demand, and the quotations ruled firm. In foreign grocery produce, about an average number of transactions took place, without leading to any material change in prices. Trade in breadstuffs, however, was in a most unsatisfactory state, and scarcely any business was doing for export. In the money market, there had been no change of importance: prime short bills were quoted at 6 to 7; three to four months' do., 7 to 8 per cent. The premium on gold fluctuated between 141½ and 143½, the latest quotation being 141½ per cent. The subscriptions to the new loan had amounted to 5,175,000 dols. The exports of specie from Jan. 1 to April 29 had been 1,085,100*l*; against 3,237,980*l* last year; 3,397,120*l* in 1863; 2,580,930*l* in 1862; 500,000*l* in 1861; 1,434,930*l* in 1860; and 2,840,500*l* in 1859. The stock of bullion in the banks on the 29th ult. was 3,809,980*l*; and the balance in the Sub-Treasury, 6,434,660*l*. The exports for the nine months, from July 1 to March 31, were valued at (excluding specie) 35,731,240*l*; against 24,096,000*l* in 1863-4; and 29,135,160*l* in 1862-3; whilst the exports for the three months from Jan. 1 to March 31 were valued at (excluding specie) 9,342,100*l*; against 8,285,950*l* last year, and 10,123,000*l* in 1863. The receipts from Customs duties, for the nine months ending March 31, were 7,777,800*l*, against 11,271,460*l* in 1863-4; and 7,892,760*l* in 1862-3.

THE COTTON TRADE.

LIVERPOOL—MAY 19.

The heaviness in the cotton market noticed at the close of last week continued on Friday and Saturday, with a general decline in prices. On Monday the demand decidedly improved, and has since become very extensive from the trade as well as exporters, and with strengthening accounts from New York, up to the evening of the 6th instant, the decline has been recovered, and most descriptions have further advanced. In Sea Island a moderate business has been done, and the tendency of prices is slightly against buyers. American has been in extensive request both for consumption and export, and closed with a partial advance of ¼d per lb on last week's quotations. After a decline of nearly 1d per lb in all kinds of Brazil, a very large business has been done by both the trade and exporters, re-establishing last week's quotations. Egyptian in the early part of the week fell ¼d to ½d per lb, but subsequently, with a greatly increased demand, prices have rallied and closed about ½d above former rates. Smyrna being in continued request by the trade, has recovered the decline submitted to in the middle of the week, and closed ¼d per lb dearer than the last

Digitized by Google

quotations. The market opened with a fair demand for East India, but the supply was so abundant that prices fell ¼d to ½d per lb. On Tuesday, and since, the sales of all descriptions have been so considerable that quotations for fair, with good staple, have nearly recovered this decline, with the exception of Western Madras, which is selling at lower rates. China and Japan fell about ½ per lb, which induced large operations, and prices have recovered about ¼d per lb, at which the market is freely supplied.

The only transactions reported, to arrive, have been, on Tuesday, in Maceio, fair average, at sea 12½d, and on Wednesday, in Pernam, first quality, shipping or shipped 14d per lb.

The sales of the week amount to 88,040 bales, including 9,210 on speculation, and 32,010 declared for export, leaving 46,820 bales to the trade, The sales to-day amount to about 20,000 bales, at prices slightly higher than the above quotations.

LONDON—MAY 19.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—Our market opened quietly this week and prices declined ¼d to ½d per lb. On Tuesday an improved demand set in, chiefly for Tinnivelly and Bengal; a good business has since been transacted, and the decline has in most cases been recovered.

NEW YORK—MAY 6.

The cotton trade at the commencement of the week was very dull, and prices declined 5 to 6 cents per lb. The demand, however, has since improved, and considerable business has been transacted during the last few days. The quotations, however, are 2 cents per lb. lower than on Saturday last. About 7,800 bales have changed hands. The imports amounts to only 876 bales, making the supply received since Sept. 1, 196,127 bales. The following are the prices current:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

MARKETS IN THE MANUFACTURING DISTRICTS

Very little change has taken place in the value of goods in the manufacturing districts this week. On the whole, trade has ruled steady, but extensive transactions have been confined to very few articles. The iron trade has been in a healthy state, at full currencies. In coals, only a moderate business has been transacted, at about stationary prices.

MANCHESTER, May 18.—The market has been supported by a fair general demand for goods, and by the consequent demands of spinners on the Liverpool market for cotton. Full prices have been readily paid for most articles, but as the trade are light in stocks, and are full of orders for future delivery, some advance on former rates is very often required, but at such advance hardly any sales are made. In Eastern yarns and cloths very few considerable transactions are reported, this branch being affected by rumours of failures at Bombay, though such are not so far authenticated. Production is everywhere increasing, and many mills which have for a long time been closed have been reopened.

BRADFORD.—Lincoln and Yorkshire wools, and especially wethers, are considerably sought after. Business in yarns has been considerably restricted. Pieces—The season is favourable to this branch of trade, and manufacturers are better engaged than of late upon orders for almost all markets. Prices are advancing, but very gradually.

HUDDERSFIELD.—Piece-dyed black doeskins keep in brisk demand, and manufacturers of these goods are still full of orders. Manufacturers of better class fancy trouserings and coatings have also been receiving orders to pattern more freely of late, and prospects of continued employment throughout the district are

Digitized by Google

now very satisfactory. Unions and other shipping goods continue to be slow of sale.

LEICESTER.—The hosiery trade continues active, and there has been a good amount of business doing in most classes of goods.

BIRMINGHAM. —Trade here continues quiet. The country orders for the spring trade have not come up to expectation. In the foreign department an average amount of business is being done.

SHEFFIELD.—The Canadian market is very flat, as it has been throughout the season. There is no revival in the American orders. There is some little improvement in the home orders, though the London, Lancashire, and some other markets are languid.

WOLVERHAMPTON.—The iron trade in this district continues active, and the exceptions are few in which works are not in full operation.

NEWCASTLE.—The general tone of the iron trade has been quiet. The stocks in the makers' hands are unimportant. The chymical market is about the same as last week, with the exception of bleaching powder, which is firmer. There is no alteration in prices.

NEWPORT.—There is a cheerful tone in the iron trade. There are considerable orders for railway iron, and there is also a fair inquiry for bars and other descriptions.

BELFAST.—Business in linen goods has much increased, and some large lots have been sold at advancing prices. Buyers on home and foreign account have been in the market and have operated freely. The demand for yarns continues brisk, and prices keep firm at recent advance. Stocks are small. The supplies of flax at the country markets are not large, and prices continue to tend upward.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 6.—Our market continues in a most inactive state, the demand both for flour and wheat being heavy in the extreme, and at lower prices. There is scarcely any export movement, and home buyers have operated merely to meet their immediate wants. The following are the quotations:—Flour—State, superfine brands, $6.60 to $6.75; State, extra brands, $6.89 to $6.95; State, choice brands, $7 to $7.30; Ohio, common brands, $7.65 to $7.90; Ohio, fancy brands, $7.90 to $8; Ohio, good and choice extra brands, $8 to $9.40; Michigan, Indiana, Wisconsin, &c., $6.65 to $7.50; Genesee, extra brands, $7.70 to $9.40; Missouri, $8 to $12; Canada, common, $7 to $7.40; Canada, good to choice extra, $7.50 to $9.25 per barrel. Wheat: Amber Michigan, $1.72½ to $1.82; amber Kentucky, $1.80 per bushel.

EXPORTS of GRAIN, &c., from NEW YORK in April.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Costwise and by land-carriage, the arrivals of English wheat have been very moderate, but in full average condition. Really fine samples have sold steadily, at an improvement in the quotations of 1s per quarter. Other kinds have changed hands slowly, on former terms. The show of foreign wheat has rather increased, yet selected parcels have been in good request, at fully late rates. Inferior kinds have commanded very little attention. Malting barley has met a dull inquiry, and, in some instances, the currencies have had a drooping tendency. In the value of grinding and distilling sorts no change has taken place. Malt has been in full average supply, and sluggish request, at previous quotations. Good dry sorts have maintained their previous value; but heated samples have gone rather lower. Beans and peas have continued scarce, and in fair request, at full prices. The flour trade may be considered firm.

The various local markets have been scantily supplied with wheat, for which the demand has ruled steady, on rather higher terms. Most descriptions of spring corn have moved off slowly, at about previous rates.

Wheat has sold at very full prices in the various continental markets, although the demand for export has not increased. In barley, oats, &c., a good business has been transacted. The American markets still continue heavy.

In Scotland wheat has commanded rather more attention. Otherwise, the trade has been in a sluggish state.

The Irish markets have been firm for wheat at very full prices. Other articles have changed hands slowly.

At Mark lane to-day the wheat trade was somewhat quicter. Prices, however, both of red and white produce ruled firm. Foreign wheat, the supply of which was very moderate, was held at fully late rates, but the demand was far from active. Barley was a dull inquiry, at rather lower prices. Oats, of which there was a good supply on the stands, met a slow sale, and the quotations had a drooping tendency. Beans and peas were in short supply, and they fully supported previous quotations. The flour trade was steady, on former terms.

Mr George Dornbusch reports that the arrival of grain-laden vessels off coast have amounted to 24, 15 cargoes of which consist of wheat, 2 maize, 4 barley, and 3 cotton-seed. Business in cargoes afloat has ruled quiet, yet very little change has taken place in prices.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—A large business has been done this week, the most recent transactions showing 6d per cwt advance, and numerous floating cargoes have sold for the United Kingdom. The reduced quantity offered by auction has chiefly found ready buyers. 3,634 casks West India had sold in three days. Barbadoes, 29s to 36s 6d; grainy and crystallised, 32s 6d to 37s 6d per cwt. Rather heavy landings have increased the stock to 80,086 tons, against 68,529 tons in 1864 at the same period. The deliveries, however, continue steady.

Mauritius.—1,139 bags were disposed of at full rates, from 35s 6d to 37s for grainy. Privately, several parcels have sold.

Bengal.—717 bags sold steadily: brown sorts, 25s 6d; grey, 31s to 31s 6d per cwt.

Madras.—1,369 bags, offered on Tuesday, were disposed of: dark Jaggery, 24s to 25s; grey date sort, 26s to 26s 6d per cwt.

Manilla.—3,606 bags part sold at 30s for clayed brown. 2,900 bags bright grainy yellow realised 35s to 36s 6d. 4,000 bags clayed have sold privately at 30s per cwt.

Other Foreign.—Two cargoes of Porto Rico have been disposed of at 33s and 34s 3d. Four floating cargoes Cuba, for the United Kingdom: muscovado at 22s to 22s 6d; clayed, 23s to 27s for yellow and white. One of brown Bahia, 20s 9d; one of brown Maroim, at 21s. Three of Havana, at 25s 9d to 26s 9d, Nos. 12 to 13½. A floating cargo of Havana has sold, for a near port: No. 14, at 27s. One of Cuba muscovado at 23s 6d. On the spot, 4,000 bags Pernambuco at 30s per cwt.

Refined.—The market has been steady, but with a partial improvement in the quotations of dry goods.

MOLASSES.—30 puncheons Antigua have sold at 15s 6d per cwt.

RUM is in steady demand. Jamaica commands higher rates, and the stock is getting moderate. Leewards sell at 1s 6d; fair Demerara at 1s 7d per proof gallon.

COCOA.—The latest sales in Trinidad have established a fall of 1s to 2s; 1,536 bags, by auction, were partly sold at 61s 6d to 68s for the lower qualities, and 69s to 86s for middling to fine. 1,841 bags Grenada part sold at 49s 6d to 51s 6d; fine, 65s 6d to 71s per cwt.

TEA.—Great firmness has been shown by importers, and as the dealers generally have not been buyers, the extent of business done has been small; but where particular qualities or parcels have been in demand, full prices have been paid, and particularly so for all fine congous. The public sales of this week have passed off flatly. Of 11,690 packages brought forward, 8,829 packages printed "without reserve" found buyers.

COFFEE.—The Netherland Trading Company's sale of Java held yesterday went rather dearer, but this market is unchanged, owing to the large quantity of Ceylon unsold. 959 casks 283 barrels and bags plantation brought to auction, however, sold averaging about previous rates: pale and small berry to good, 80s to 86s 6d; very good to fine, 87s to 94s. 371 casks 118 bags native sold at 66s 6d to 70s 6d per cwt

Digitized by Google

according to conditions. 1,300 bags Malabar are reported by private contract at 70s. 820 packages Cochin, in public sale, realised 72s 6d to 76s 6d. A floating cargo of good fresh Rio has sold at 60s 9d per cwt, for Trieste.

RICE.—A large business has been done this week, and holders of soft grain seem indisposed to make further sales unless at some advance. 7,463 bags Moulmein offered by auction were taken in at 9s to 10s for the sound portion. Privately transactions of fair extent are reported. White Bengal, 12s to 14s 7½d; soft grain, 8s to 10s 3d per cwt.

SPICES.—Some large parcels of pimento have changed hands privately, at 2⅜d to 2½d. 494 bags by auction part sold at the latter price. Black pepper is steady for Singapore; 1,119 bags selling at 3¼d to 3⅜d. 1,072 bags Penang partly met with buyers, at 3d to 3⅛d for common. Some business is reported to have been done privately at 3d, usual terms. 120 bags heavy Malabar were withdrawn at 4⅛d. 100 bags Singapore white were taken in at 6d to 6¼d per lb. A few lots of mace and Zanzibar cloves sold upon former terms. 268 barrels Jamaica ginger sold steadily, at 60s to 97s, with one lot 103s. Bengal was taken in at 25s per cwt.

SALTPETRE.—A parcel of Bengal refraction 6½ has sold at 26s 6d. 50 tons to arrive, refraction 5 per cent., at 26s 6d per cwt.

COCHINEAL is steady and holders asking higher rates.

DRYSALTERY GOODS.—No change of interest has transpired. Cutch and Gambier are rather quiet.

SAFFLOWER steady.

METALS.—The principal feature of the week has been a further advance upon spelter, partly caused by speculative operations: 21*l* 15s to 22*l* paid this week on the spot, and for forward delivery. Holders at one time refusing to sell under 23*l*, and in one instance 22*l* 15s paid for immediate delivery. Straits tin last sold at 93*l* 10s cash. The market is now quiet. Scotch pig iron has been quiet at 53s 3d per ton, mixed numbers. Other metals are unaltered.

MANILLA HEMP is less in demand than last week. 2,729 bales partly sold at 28*l* 5s to 29*l* 15s per ton for ordinary to good roping quality.

JUTE.—5,040 bales, offered by auction, on Wednesday, chiefly sold: low to good, 10*l* 10s to 22*l* per ton.

OILS.—Considerable sales have been effected in sperm at 90*l* per tun. Other fish oils are quiet. Olive oils still sell slowly. Linseed is a trifle dearer, closing yesterday at 32*l* on the spot. Rape quiet, but a fair business has been done in foreign brown, for delivery in the last four months, at 42*l* 10s. Fine palm still sells freely at 36*l* 10s to 36*l* 15s. Ceylon cocoa-nut has been active, with considerable sales at 41*l*, holders now requiring 41*l* 10s; Cochin held at 43*l* per ton.

SPIRITS TURPENTINE.—French have fallen to 54s 6d per cwt.

PETROLEUM.—American refined Pennsylvanian has sold readily at 2s to 2s 1d per gallon.

LINSEED.—The market is firmer. Calcutta, 53s 6d to 54s; Bombay, 56s. Calcutta and Mirzapore, to arrive, 54s 6d per quarter.

TALLOW.—A quiet tone pervades the market for foreign. 1st sort, Petersburg, Y.C., 40s 3d to 40s 6d; for delivery in October to December, 41s 6d to 41s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, May 15, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes firmly. 8,024 bags Mauritius, numerous parcels West India, and 1,350 bags Bengal by auction, went off at previous rates. Week's business in West India 5,030 casks. A floating cargo of Havana sold at 27s for the United Kingdom. Two of Cuba at 22s 9d per cwt.

COFFEE.—123 casks 1,516 barrels native, and 663 casks 150 barrels and bags plantation Ceylon, offered by auction, sold upon former terms to some advance for colory kinds of the latter; a few lots of fine obtaining 94s 6d to 101s per cwt.

GINGER.—85 barrels Jamaica sold at 73s to 206s per cwt.

SALTPETRE.—500 bags Bengal, refraction 4 to 3¼, were taken in at 28s sold at 26s 6d per cwt.

RICE.—A good business was done privately in soft grain at 8s to 9s 9d per cwt.

OIL.—650 casks cocoa-nut by auction sold dearer for Ceylon, namely, 41s 6d to 42s. Cochin, 43s to 43s 6d per cwt.

TALLOW.—810 casks by auction chiefly sold, including Australian, at 38s 9d to 41s 6d. South American, 40s to 40s 3d per cwt.

SPELTER sold at 21*l* 15s to-day.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues well supported, at former prices. In Holland, crushed sugar continues firm, and some few sales have been made on easier terms.

GREEN FRUIT.—Demand continues. Oranges support the value obtained of late; some parcels Valencia, Terceira, and Sicily, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. Lemons of good quality in request, stock of all kinds light, and supply likely to be limited. A moderate sale for Para and Barcelona nuts.

DRY FRUIT.—The market for currants is dull and heavy, but there is not any decided reduction in prices. The clearances, as usual in May, are remarkably heavy. Raisins continue steady, and are in good demand, but the stock is rapidly diminishing. The reports from Smyrna and Denia are not such as to lead to the prospect of a fine crop next season.

COLONIAL WOOL.—The public sales are progressing firmly, the foreign buyers are operating freely.

FLAX market firm.

HEMP market firm, and a fair business doing in Manilla. The market is very firm.

SILK.—The market continues active, and prices very firm; the reports of the progress of the European crops showing no improvement.

TOBACCO.—We have to report a rather better demand for some descriptions, and sales to a moderate extent made. Prices remain unchanged.

LEATHER AND HIDES.—There is but little change to report in the state of the leather market. On Tuesday there was a moderate supply of fresh leather, and rather more inquiry; a fair amount of business was transacted. The articles most inquired for were prime light English butts, good crop hides, 40-lb to 50-lb calfskins, 28-lb to 32-lb Spanish horse hides, and best kips.

METALS are all quiet, with no perceptible sign of coming change. Copper is decidedly lower in price all round, and business continues very small indeed. Tin keeps steady at late prices. Spelter has been puffed up by some forced operations, but closes quietly. Lead continues to be neglected. Tin plates are steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	0
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, May 15.—The total imports of foreign stock into London, last week, amounted to 11,279 head. In the corresponding week in 1864 we received 6,478; in 1863, 6,189; in 1862, 5,430; in 1861, 5,530; in 1860, 5,215; and in 1859, 3,865 head.

There was a large supply of foreign stock on sale here to-day. Both for beasts and sheep the demand ruled steady at quite previous rates. The quality of the stock was but middling. Fresh up from our own grazing districts the arrivals of beasts were very moderate, in fair condition. There was a good supply from Scotland of excellent quality, but the receipts from Ireland were very limited. For nearly all breeds there was a steady demand, at fully last Monday's currency and in some instances a slight advance. The general top figure was 4s 10d but a few very superior Scots realised 5s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 1,200 Scots and crosses; from other parts of England, 500 of various breeds; from Scotland, 881 Scots and crosses; and from Ireland, 50 oxen and heifers. The supply of English sheep on sale was very moderate; but the quality of most breeds was good. The mutton trade was firm. Good and prime Downs and half-breds changed hands at an advance in prices from Monday last of 2d per 8 lbs, and all other breeds sold at fully late rates. The top price was 6s 2d per 8 lbs. Lambs (the supply of which on sale was moderate) realised previous quotations. Good and prime breeds sold readily, the top quotation being 8s per 8 lbs. Calves were in fair demand at late rates. The market was but moderately supplied. For pigs there was a moderate demand, at previous quotations.

SUPPLIES.

	May 16, 1864.	May 15, 1865.
Beasts	4670	4260
Sheep and lambs	25520	22910
Calves	192	237
Pigs	530	320

THURSDAY, May 18.—The supply of beasts on sale here to-day was very moderate. The trade for most breeds ruled steady, at full prices. Very prime Scots realised 5s but the more general top price was 4s 10d per 8 lbs. Sheep were in moderate supply. Most breeds were in steady request, and the quotations ruled firm; prime Downs and half-breds realised 6s 2d per 1 lbs. Lamb—the supply of which on sale was but moderate—moved off steadily at full prices, viz., at from 6s 8d to 8s per 8 lbs. Calves were in fair demand at previous rates. The pork trade was quiet.

Per 8 lbs to sink the offal.

	s	d	s	d		d	s	d
Coarse and inferior beasts	3	4 to	3	8	Prime Southdown sheep	6	0 to	6	2

Veal	4	0	5	0	Small pork	4	8	5	0

Lambs, 6s 4d to 7s 8d.

HOP MARKET.

FRIDAY, May 19.—No change has taken place in the value of English hops since last week. The supply of home-grown produce on sale is very moderate, and the demand rules steady, at full currencies. In foreign hops a fair business is doing at late rates:—Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 130s; older hops, 30s to 90s per cwt.

POTATO MARKETS.

FRIDAY, May 19.—Moderate supplies of potatoes are on sale, and the demand for most qualities rules steady, at the annexed quotations:—Yorkshire Regents, 90s to 120s; ditto Flukes, 130s to 150s; ditto Rocks, 85s to 100s; Scotch Regents, 90s to 100s; ditto Rocks, 80s to 90s; Dunbar Regents, 100s to 120s; Foreign, 60s to 80s per ton.

Digitized by Google

HAY MARKETS.

THURSDAY, May 18.—The trade continues dull, and prices have given way. The following are the quotations :—

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Meadow hay	80 to 100	85 to 115	80 to 100
Clover	90 to 123	100 to 130	90 to 123
Straw	30 to 36	32 to 36	30 to 36

COAL MARKET.

FRIDAY, May 19.—Walls end :—Haswell 18s—South Hetton 18s—Tees 17s 6d—Braddyl's Hetton 17s 6d—Eden Main 16s 6d—Tunstal 16s 3d—Cowpen Hartley 16s. 31 ships at market; 80 at sea.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 19.—There has been moderate inquiry this week, still business continues on a limited scale, as consumers and dealers do not buy beyond immediate requirements. Prices of all useful descriptions keep pretty steady.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 19.—Market thinly attended. Wheat in fair demand at Tuesday's prices. Flour, slow sale at late rates. Indian corn in better demand; a turn dearer; Galatz, 30s. Boasts, oats, and oatmeal dull.

The Gazette.

TUESDAY, May 16.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 6th of May, on 11,851 miles, to 657,443*l*, and for the corresponding week of last year, on 11,490 miles, to 622,962*l*, showing an increase of 361 miles, and of 34,481*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,384 miles, to 525,195*l*. and for the corresponding week of 1864, on 8,097 miles, to 505,819*l*, showing an increase of 287 miles, and of 29,376*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 15.—This being the day of the preparation for the settlement in the middle of the month, about half the transactions were for the new account, and the movements in the final quotations indicate a firm tendency in English, colonial, and foreign railways; but the banks were rather disposed to weakness, and the other descriptions were almost unaltered in tone. Of the English lines, South-Eastern recovered ¼, and North-Western and Great Northern (A stock) ½ each; and ditto (original), Caledonian, Lancashire and Yorkshire, South-Western, North-Eastern (Leeds), and Metropolitan ¼ each, ditto (extension) ⅛, and Great Eastern and Great Western ¼ each. In colonial, Bombay and Central India, Eastern Bengal, Great Indian Peninsula, Madras (5 per cent.), and Delhi (stock) all advanced ½. In foreign, Antwerp and Rotterdam and Dutch-Rhenish improved ¼ each, and Great Luxembourg and Lombardo-Venetian a further ⅛ each. In American, no alteration occurred in the closing prices. In British mines, East Caradon recovered ½, and East Bassett declined 3. In foreign mines, Washoe Gold (of both descriptions) improved ¼ each.

TUESDAY, May 16.—In the share market to-day, although the transactions were few, the movements in the final quotations show a rather general firmness of tone, particularly in English railways and mines, some of the banks again being exceptional. Of the English lines, South Devon improved 1, and Metropolitan (new) ½; and ditto (original) further advanced 1¾, Caledonian and Great Northern (A stock) 1 each, and Great Eastern, Lancashire and Yorkshire, North-Western, and South-Eastern ¼ each. In colonial, East Indian (J extension) and Great Indian Peninsula (new) improved ¼ each. In foreign, Great Luxembourg further improved ⅛, and Lombardo-Venetian ⅛. In American there was again no movement in the closing prices. In British mines, Devon Great Consols advanced 10, Wheal Seton 2½, Providence 1½, Great Laxey, Great Wheal Vor, Tincroft, and West Caradon ½ each, and East Gunnislake ¼; and Wheal Buller receded 5, and Marke Valley ½. In foreign mines, Lusitanian improved ½.

WEDNESDAY, MAY 17.—The share market to-day has again been inactive, and with few exceptions the general tone at the close was rather adverse. In English railways, Scottish North-Eastern (Aberdeen stock) advanced 4, Scottish Central 2, West Hartlepool (A stock) 1½, and Edinburgh and Glasgow 1; on the other hand, Great Northern (A stock) relapsed 1, Lancashire and Yorkshire, and Metropolitan ¾ each, and North-Western and South-Eastern ½ each; and Midland receded ½, and Great Western ¼. In colonial, Great Indian Peninsula (new) relapsed ¼, and ditto (stock) declined ½, and Great Western of Canada (shares of both descriptions) ¼ each. In foreign, Great Luxembourg relapsed ¼, Imperial Mexican declined ¾, Lombardo-Venetian ½, and Bahia ¼; and Antwerp and Rotterdam, Belgian Eastern Junction, and West Flanders, are now quoted ex dividend. In American, Atlantic and Great Western (New York, 1st mortgage) improved 2, and ditto (remaining descriptions) 1 each; and Illinois Central (shares) declined ⅜. In British mines, Herodsfoot improved 1, Clifford Amalgamated ½, East Wheal Russell ¼, and Devon Great Consols further 5; and Vigra receded 1, South Condurrow ¼, and Wheal Buller further 5. In foreign mines, Washoe Gold (paid up) improved ¼.

THURSDAY, May 18.—In the share market to-day dulness very generally prevailed, and the movements in the closing prices showed a downward tendency in all the descriptions. Of the English railways, South Devon improved 1; and Metropolitan (new) and ditto (extension) receded ⅛ each, Caledonian and Great Northern ½ each, ditto (A stock) a further 1, and South-Eastern a further ¼. In colonial, Grand Trunk of Canada (1st preference) declined 1, and Scinde and Delhi stocks ½ each. In foreign, Dutch-Rhenish declined ⅛, and Paris and Mediterranean ¼. In American, Illinois Central sterling bonds improved ½; and ditto (shares) receded a further ½, Erie shares (paid up) 1¼, Virginia (6 per cent.) 1, and United States (5-20) ½. In British mines, Drakewalls and Chiverton improved ⅛ and ¼ respectively; and Grenville and East Grenville declined ¼ each, and East Lovell and Great Wheal Vor ½ each. In foreign mines, Washoe Gold (3*l*) improved ¼, and Port Phillip receded ⅛.

FRIDAY, May 19.—The railway market was inactive to-day. The variations in the principal stocks comprised a rise of ¾ per cent. in Metropolitan and ⅛ in South-Eastern, and a decline of ¼ in Great Western and Lancashire and Yorkshire. Foreign and colonial railway securities were quiet.

PRIZE MEDAL AWARDED.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues by post free.

Also, Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands Canteens, &c., by post free.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

COUGHS, ASTHMA, AND Incipient Consumption are effectually cured by KEATING'S COUGH LOZENGES, which are daily recommended by the Faculty—testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy, and convenient remedy for Cough and all Disorders of the Lungs, Chest, and Throat.—Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 11s each, by T. KEATING, Chemist, 79 St Paul's Churchyard, London. Sold retail by all Druggists, &c.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

E. MOSES AND SON'S LONDON ESTABLISHMENTS:— Minories and Aldgate, New Oxford street, Tottenham Court road. COUNTRY BRANCH:— Bradford, Yorkshire.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and filed. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W

RHEUMATISM, CHILBLAINS, &c. —COLES'S ALGA MARINA has stood the severe test of many years' public experience, and has thereby acquired a celebrity which is unrivalled and daily increasing as a remedy for Rheumatism and Rheumatic Gout, Glandular Affections, and Chilblains, Contractions and Weakness of the Limbs and Joints, Neuralgic and other Pains, Spinal Curvature, &c. The numerous testimonials to its good effects in all that class of diseases for which the sea-side is recommended may be obtained with the Pamphlet for three postage stamps, of Mr KEATING; amongst them will be found the certificate of a Physician in Her Majesty's service, that it is the most efficacious remedy for Chilblains he has ever met with in his experience. The public should guard against spurious imitations by asking for COLES'S ALGA MARINA, and being careful to observe that his signature appears upon the label which encircles each bottle. Every packet also contains the pamphlet, without which none is genuine.—Sold in bottles, 2s 9d, 4s 6d, and 11s each, by T. KEATING, 79 St Paul's Churchyard, London, and by all Chemists.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

HOLLOWAY'S PILLS.—Enfeebled Existence—This medicine embraces every attribute required in a general and domestic remedy: it overturns the foundations of disease laid by indigestible food and impure air. In obstructions or congestions of the liver, lungs, bowels, or any other organ, these Pills are especially serviceable and eminently successful. They should be kept in every family, as they are a medicine without a fault for young persons and those of feeble constitutions. They never cause pain or irritate the most sensitive nerves or most tender bowels. Holloway's Pills are the best known purifiers of the blood, and the best promoters of absorption and secretion, which remove all poisonous and obnoxious particles from both fluids and solids.

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14. 1850.

THE PATENT
KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS

DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Sir Cusack P. Roney, 15 Langham place, London.
Sir John Maxwell Tylden, Milstead, Sittingbourne.

SOLICITORS.—Messrs Freshfields and Newman, 5 Bank buildings.
ENGINEERS.—Joseph Cubitt, Esq., C.E., Great George street; E. F. Turner, Esq., C.E., Parliament street.
SECRETARY.—W. E. Johnson, Esq.
GENERAL MANAGER.—J. S. Forbes, Esq.

PROSPECTUS.

The present object is to offer for public subscription the first half of the A stock of the Metropolitan Extension Railways of the London, Chatham, and Dover Company, amounting to £1,212,000, which, with the £1,213,000 to be issued only as fully paid-up stock, at not less a price than £10 per cent. increase on the present price of issue, or earlier than twelve months hence, completes the amount of £2,425,000 the total amount of that stock.

Full details of the lines and their present position are given at length in the statement annexed, which, with the maps attached, show the routes of the lines and those in connection.

In considering this stock as an investment, the principal points for consideration are, first, the amount of stock to pay dividend upon—secondly, the probable receipts—thirdly, the minimum dividend per cent. to yield a fair return on the price of issue.

The Capital of the Metropolitan Extension Railways is constituted as follows, viz:—

Debentures		£1,433,000
B Stock, entitled to 6 per cent. Preference		825,000
C Stock, entitled to 6 per cent. Preference after B		1,050,000
A Stock, (Present Issue)	Entitled to remainder of Profits up to 6 per cent.	1,212,000
For Future Issue as fully paid-up Stock		1,213,000
		2,425,000
		5,733,000

The total mileage is about 14 miles.

The traffic on the Metropolitan (Under Ground) Railway has amounted since 1st January, 1865, to an average of £673 per mile, per week, which is moreover daily increasing, and at present arises from metropolitan passengers, a trifling amount only of through traffic, and no goods being as yet carried on this line.

When it is considered that the present traffic on the Metropolitan Extension Railways of the London, Chatham, and Dover Company, is conducted over only two lines of way, and with an inadequate amount of rolling stock, also that it is still unfinished, and that the portion at work has only recently been opened, it will be observed that the present receipts afford no reliable data upon which to form an estimate of the probable traffic.

To fix the amount at anything like what is felt by competent judges will be the actual result when the enormous traffic that the junctions with the Metropolitan (Under Ground), the Great Northern, the Midland, the Great Western, the West London Extension, the South-Western, and the North-Western will bring on the lines, might be considered an exaggeration by those inexperienced in the wonderful elasticity of Metropolitan and suburban traffic.

It is therefore thought better not to estimate the probable traffic higher than the average of the mileage receipts of the Metropolitan (Under Ground) Railway, as above mentioned, viz., £673 per mile per week. This multiplied by the mileage of the Metropolitan Extension lines of the London, Chatham, and Dover Railway Company, would give a return of £489,944 per annum. From this sum must be deducted 40 per cent. for working charges, which is a liberal estimate. The net results from passengers only may be estimated therefore at £293,966 per annum.

The large goods traffic, which these lines will enjoy alike from the admirable position and number of the stations as from the arrangements made for working the traffic, will certainly augment the receipts by at least 40,000 net per annum; which, in that case, after paying interest on debentures and on the B and C stocks, would yield a dividend of 5 per cent. on the whole of the £2,425,000 A Stock, (including the present issue,) which at the price it is now offered at, would be equal to 10 per cent per annum.

The price at which the A stock is now offered must be considered most advantageous to the investor, if only one half this result is attained; when, however, the increased receipts would permit a dividend of 5 per cent., the stock must certainly rise to par, which would practically be a profit of upwards of 47 per cent. above the price of issue.

It is considered that results approaching the above figures will be reached in less than two years; and that a steady increase may be further looked for from that time. Arrangements have therefore been made with Sir S. Morton Peto, Bart., Betts, and Crampton, to guarantee interest as from 1st January, 1865, until 1st July, 1867, at the rate of 6 per cent. per annum on the amount paid up, by which latter date it is confidently believed the intrinsic merits of the whole system will have developed themselves.

The belief entertained as to the augmentation in value of this stock, when it is considered that the lines possess metropolitan termini as well as metropolitan and suburban traffic, is borne out by the relative prices of the shares and stock of the Great Northern and of the Metropolitan (Under Ground) Railway Company, before they had finished their lines and afterwards, viz.:—

The Great Northern A stock was in October, 1853, quoted in the Stock Exchange List at £54 per £100 stock, it now is worth £145, or £91 per cent. increase in value.

The Metropolitan (Under Ground) Railway was in April, 1861, only four years ago, quoted in the Stock Exchange List at equal to £54 per £100 stock, it now is worth £135, or 81 per cent. increase in value; these facts speak for themselves as to the prospects of the stock now offered for subscription.

The price of subscription is fixed at £21 per certificate of £40, equal to £52 10s per £100 stock, and the periods of payment are as under:—

£1 per Certificate on Application.		
4	—	Allotment.
4	—	1st September, 1865.
4	—	1st December.
4	—	1st March, 1866.
4	—	1st June. —
£21		

All calls not duly paid will render previous payments liable to forfeiture. When the whole amount of £21 per certificate is paid, £40 stock for each certificate will be transferred into the name of the then holder thereof.

The option will be given to all subscribers to pay up in full on allotment (entitling them to interest on the whole amount of the price of issue from 1st January, 1865); and discount at the rate of 6 per cent. per annum will be allowed on the prepayment of instalments. These two allowances would further reduce the price of issue by about £2 16s per cent.

In the allotment, those applications the whole balance on which it is intended by applicants to be paid in one instalment on allotment will be first considered.

Application must be made on the forms annexed, and accompanied by payment of £1 per share (without which no application can be considered) to any of the undermentioned bankers:—The London and County Bank, Messrs Glyn, Mills, Currie, and Co., the Agra and Masterman's Bank (Limited), Messrs Smith, Payne, and Smiths, the National Bank, London, Dublin, and its branches in Scotland. In the event of no allotment being made, the deposit paid will be returned forthwith without deduction; and if less are allotted than the number of certificates applied for, the sum paid will be applied towards the amount payable on allotment on the number so allotted.

Prospectuses, with maps, plans, &c., may be had of the undermentioned stockbrokers:—Messrs Laurence, Son, and Pearce, 9, Angel Court, E.C.; Messrs J. and A. Scrimgeour, 10 Old Broad street; Messrs Knight, Dale and C., 1 Royal Exchange buildings, E.C.; and of the Credit Foncier and Mobilier of England, Limited (Alfred Lowe, Esq., Secretary), at their offices, 17 and 18 Cornhill, London, and at the offices of the London, Chatham, and Dover Railway Company (W. E. Johnson, Esq., Secretary), Victoria station, Pimlico, S.W.

BANKERS.

The Bank of England.
The National Bank. | The Alliance Bank.

SOLICITORS.

Messrs Flux and Argles.
Messrs Newbon, Evans, and Co.

BRANCHES AND AGENCIES.

Bombay, Calcutta, Colombo, Kandy, Hong-Kong, Shanghai, Yokohama, Singapore, Point de Galle, Manilla, Foochow, Ningpo, Hankow, Nagasaki, Kiu-Kiang.

Third Report of the Directors, presented to the shareholders at the Annual Meeting held at the London Tavern on the 15th May, 1865:—

The Directors beg to submit to the shareholders a general statement of the affairs of the Company for the year ending 31st December, 1864.

The net profits of the year, after defraying all expenses and providing for losses, amount to £15,893 12s 11d, including a balance of £827 11s 1d brought forward from the accounts of the previous year, out of which the sum of £14,746 5s has already been paid as an interim dividend on the 20th August last, leaving a balance of £1,147 7s 11d, which it is proposed to carry forward.

The Directors have to express their regret that the operations of this Company during the past year have not exhibited a more profitable result; but taking into consideration the comparatively recent formation of the Bank, and the gradual extension of the branches abroad, the peculiarly disorganised condition of commercial affairs in the latter part of the year 1864, and the existence of a state of things specially calculated to embarrass the successful working of the branches, it must be a source of satisfaction that the transactions of the year have resulted in a profit, that a solid footing has been acquired by the Bank, and its business and connections further extended.

The causes which acted prejudicially to the welfare of the Bank were of a peculiar and exceptional character. They have now ceased to exist. The operations of the present year have shown decided progress and satisfactory results, and it is therefore evident that the temporary interruption to the successful operations of the Bank was caused by circumstances which were beyond the control of the Directors.

The meeting which confirmed the amalgamation with the Imperial Bank of China, India, and Japan (Limited) took place on the 12th of September last, and on and after the 12th of October the names of the shareholders in that institution (with the exception of those who expressed their dissent within the specified time) were transferred to the register of shareholders of this Bank.

The number of shares unallotted in the Imperial Bank of China, India, and Japan (Limited) was 1,310, and the number of shares refused by shareholders in that Bank expressing dissent was 58. Thus, of the 20,00 shares of the new issue by this Bank, 1,368 may be considered as unallotted.

The total amount of capital in this Bank on the 31st Dec., 1864, was £586,237, and on the 29th ult. it amounted to £720,444.

The Directors have the pleasure to report that, notwithstanding a variety of adverse circumstances, the calls have, on the whole, been remarkably well met.

The reserve fund of the bank amounts at present to £92,900.

In July last the Colombo branch, with its sub-branches at Kandy and Point de Galle, were opened. The progress of these establishments, although extending over a period of scarcely six months, is satisfactory. The Directors have also to announce that in February last a branch was opened at Yokohama.

The Directors have, with regret, to report that a vacancy occurred in the Board, during the past year, by the death of Mr J. H. R. de Castro; and, acting in accordance with the powers conferred upon them by the articles of association, they have elected Mr Sassoon David Sassoon to fill the vacant seat, which election they have no doubt will meet with the approval of the shareholders.

The Directors who retire by rotation are James Nugent Daniell, Esq., Deane J. Hoare, Esq., and Henry Young, Esq., who, being eligible, offer themselves for re-election; and the Auditors, James Goodson, Esq., and Frederick Wm. Spooner, Esq., also retire, and being likewise eligible, they offer themselves for re-election.

J. N. DANIELL, Chairman.

JAMES GOODSON,
May 11, 1865. F. W. SPOONER, } Auditors.

The Secretary having read the advertisement convening the meeting, the seal of the Company was affixed to the register of transfers.

The report was taken as read.

The following resolutions were moved, seconded, and carried unanimously:—

1. That the report and statement of accounts of the Directors be received and adopted.
2. That James Nugent Daniell, Esq., and Henry Young, Esq., be re-elected Directors, and
3. That Mr Sassoon David Sassoon's appointment by the Board be confirmed.
4. That Frederick Maynard, Esq., and Frederick William Spooner, Esq., be elected Auditors.
5. That the thanks of the meeting be given to the Chairman for his able conduct in the chair.
6. That the thanks of the meeting be given to the General Manager.

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present.—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryamjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ramchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,982,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,550	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 5,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premiums on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,64,730 rs 4a 10p, and the Directors proposed to apply them as follows:—

Rs.	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (in all 10,00,000 rs.)
5,54,636-4-10...	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Hormusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Maneckjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq, and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

A. MACKINTOSH, Manager.
JOHN SMITH, Secretary and Accountant.
Bombay, 3rd April, 1865.

We have examined the above Balance Sheet of the Financial Association of India and China (Limited), and accompanying account of Profit and Loss, at 31st March, 1865, and having compared them with the Company's books, find them to be correct. We have also examined the securities, and counted the cash taken credit for as in possession of the Company, and have found the same to be in order.

SECRETARY—C. T. C. Grant, Esq.

DEBENTURES OF THIS BANK ARE ISSUED IN BONDS TO BEARER OF £20, £100, £500, AND £1,000 EACH, REDEEMABLE AT PAR WITHIN 30 YEARS, BY HALF-YEARLY DRAWINGS.

Interest, £5 per Cent. per Annum.
Payable half-yearly.
The price of issue is £87 for every £100.

These debentures are secured by the whole of the Bank's invested funds (which must always be equal to the total debentures current), and by the additional guarantee of the uncalled capital of £1,600,000 represented by a proprietary of upwards of 1,500 shareholders.

The above price of issue gives to the subscriber 5¾ per cent. interest on the amount invested, and a cash bonus of £14 18s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which—averaging the period of drawing—yields a return of 6¼ per cent.

The bonds being to bearer (coupons for interest payable, 1st January and 1st July, attached) transfers pass from hand to hand without endorsement, and are free from any further stamp duty.

Applications to be made at the offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

ALFRED LOWE, Secretary.

London, 17 and 18, Cornhill, 4th May, 1865

DEBENTURES ISSUED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz.:—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years	6	per cent.	per annum.
— Five years	6½	—	—
— Seven years	7	—	—

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers. The first payment of interest will be made on the 30th June next.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, May 4, 1865.

DEPOSITS RECEIVED BY THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital	£500,000
Paid-up and invested	£100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par, what is equivalent to interest at the rate of from Six to over Seven per cent. per annum according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

THE MAURITIUS LAND CREDIT and AGENCY COMPANY (Limited).

DIRECTORS.

Major-General H. P. Burn, Chairman.

George Lyall, Esq.	Robert Mc Kerrell, Esq.
George Ireland.	Peter Ranken, Esq.

The Company effect, as agents, investments on mortgages of freehold property in Mauritius, guaranteeing seven per cent. interest payable half-yearly in London. Apply to the General Manager, 25 Fenchurch street, London, E.C.

DEBENTURES 6, 6½, AND 7 PER CENT.

THE ORIENTAL FINANCIAL CORPORATION (LIMITED).

	£
Nominal capital	1,000,000
Subscribed —	500,000
Called up —	100,000

The Directors of this Corporation are prepared to issue Debentures bearing Interest at 6, 6½, and 7 per cent., for one, two, and three years respectively.

They are also prepared to transact financial business to make advances on approved Securities, to promote industrial enterprise, and to receive moneys on deposit at rates to be agreed upon.

J. FRED. PRIGGEN, Secretary.

15 Ladenhall street.

CREDIT FONCIER OF FRANCE.

The general annual meeting of the shareholders of the Credit Foncier was held on the 29th April, in the house of the Company at Paris.

The report on the operations of 1864 was presented by the Governor.

The accounts submitted to the approbation of the shareholders were unanimously adopted.

An augmentation of about 900,000f in the profits, and distribution among a number of shares double that of the preceding year, of a dividend superior to that of 1863,—such were the most characteristics result of the year 1864.

The following, according to the report and to the balance sheet, settled to Dec. 31, was the situation of the principal accounts of the year:—

	francs	c
Mortgage loans realised in 1864	75,065,000	0
Communal loans	37,084,753	86
Balance of advances on deposit of securities	13,588,582	37
Balance of sums deposited with the Credit Foncier in current account	66,295,551	45
Net profit of the year 1864	5,599,664	46
The profits of 1863 were only	4,703,466	15

The important augmentation of about 900,000f in the profits, comes first from an increase 628,223f 44c in the profits on loans, and next from increase in the interest on capital and reserves, commission on discounts, &c.

The increase of more than 600,000f in the profits on loans is the normal consequence of loans for long periods. Each year in fact profits not only by the loans made in the course of it, but also by loans realised previously.

The amount of mortgage loans consented to in 1864, which was 75,065,000f is inferior by 38,000,000f to the amount of loans of the same kind granted in 1863. The financial crisis which prevailed during all the year, and which occasioned extreme dearness of money, and the raising of the rate of discount of the Bank of France on an average to 6½ per cent., and at times to 8 and 9, rendered less considerable the sale of bonds of the Credit Foncier the interest of which during all the crisis remained at the customary rate of 5 per cent.

In consequence, the Board of Directors had to lessen the amount of its loans. It must be remarked that it is principally in the department of the Seine that the diminution has taken place.

The amount of loans in the provinces remains nearly the same, and the number has augmented. The share of the provinces and of rural property thus becomes more important from year to year. In 1863 the provinces obtained the fourth part of the mortgage loans of the Credit Foncier; in 1864 they obtained the third. In 1863 the loans accorded in the provinces were on an average 50,000f; in 1863 they averaged 35,000f.

The accessory operations of the Credit Foncier also present satisfactory results. The number of depositors in current account has increased. Last year it was 8,958; it is now 10,211. The average of each deposit account is 6,500f.

It was in the year of 1864 that the 60,000 new shares came for the first time to participate in the dividend in conjunction with the 60,000 old shares. In order that the doubling of the coparceners should not cause a diminution in the dividends, the Company made in the two years preceding a reserve amounting to 2,099,577f 90c specially destined to complete the dividend when 1865 should arrive, and the new shares should possess the same rights as the old ones. The profits for 1864 have allowed 2f 50c more to be distributed to 120,000 shares than was awarded in the preceding year to 60,000 shares, and that has been done by taking only 500,000f from the special reserve.

There thus remains disposable of that reserve the sum of 1,599,577f 90c. With a special reserve so important and with the normal augmentations of profits, it may be hoped that the doubling of the capital will not check the progress of the dividend of the shares of the Credit Foncier.

In addition to the special reserve, the Credit Foncier possesses statutory reserves in real property, and a provident fund, which amounted, on the 1st January, 1865, to 6,882,429f 46c.

The dividend of the year 1864 was fixed by the meeting at 47f 50c per share. A provisional distribution of 12f 50c per share was made in the month of January; and a complimentary payment of 35f will take place on the 1st July.

The shareholders can receive this dividend by anticipation, from the 15th May, on paying discount at the rate of that of the Bank of France.

In the meeting, M. Josseau, deputy in the Corps Legislatif, was elected a member of the Board of Directors, in the room of Count de Rainneville, deceased.

MANAGER—C. J. Braine, Esq.

The Directors are prepared to ISSUE DEBENTURES for one, three, and five years, at 5, 5½, and 6 per cent. respectively.

They are also prepared to invest money on mortgage in Ceylon and Mauritius, either with or without the guarantee of the Company, as may be arranged.

Applications for particulars to be made at the office of the Company, No. 7 East India Avenue, Leadenhall street, London, E.C.—By order,
JOHN ANDERSON, Secretary.

IMPERIAL OTTOMAN FIVE PER CENT. LOAN, 1865.

Notice is hereby given, that the Scrip of the above Loan will be ready for delivery on Tuesday next, the 23rd May.

The Scrip will be deliverable in exchange for the deposit, and allotment receipts, which must be left for examination at the offices of the General Credit and Finance Company of London, Limited, two clear days before.

R. J. BUTLER, Secretary.
7 Lothbury, E.C., 19th May, 1865.

CONSOLIDATED FIVE PER CENT. PERUVIAN LOAN.

The Undersigned Brokers of the Loan beg to inform you that the BONDS of the CONSOLIDATED FIVE PER CENT. PERUVIAN LOAN of 1865 will be READY for DELIVERY in exchange for Scrip on and after the 5th day of May, at the offices of Messrs J. THOMSON, T. BONAR, and CO., 57½ Old Broad street, London.

The Bonds will be found to contain two important ameliorations in the original terms and conditions of this Loan, namely:—

1. The sinking or redemption fund of 4 per cent., or £400,000 is raised to 5 per cent., or £500,000 per annum, with accumulating interest on the Bonds redeemed.

2. In lieu of the application of this sinking fund to the purchase of bonds in the market, as previously proposed, it is to be applied half-yearly, on the 1st of July and the 1st of January, to the redemption of the bonds, by drawing them by lot, and by the payment of the nominal amount in full, with interest, on 1st October and 1st April following the drawing respectively.

The first drawing of £250,000 will take place on the 1st July, 1865, and all bonds issued to that date will participate therein. Then also the first half-yearly dividend is payable.

The yearly rate of interest on this Loan is 6½ per cent., independently of the Coupon due 1st of July and of the £16 10s per cent. bonus by the sinking fund, or calculating both these items it exceeds 8 per cent. per annum.

£2,000,000 of this Loan, hitherto unapplied for, the undersigned are authorised to place at the price of the original issue of £83½ per £100, the purchaser to be entitled to the dividend due on the 1st July of £2 10s per £100. They offer it, therefore, to subscribers on the following terms, viz.:—

£10 per cent. on application, payable to the Consolidated Bank.
£35 per cent. on allotment, against Scrip to be issued by J. Thomson, T Bonar, and Co.
£10 per cent 7th June,
£17 10s per cent., less £2 10s per cent. for 1st July Coupon.
£11 per cent. 2nd August.

The instalments may be delayed to the 2nd August by payment of interest of 5 per cent. per annum.

N.B.—To participate in the drawing of Bonds of £250,000 on the 1st July, 1865, it is requisite that holders of Scrip shall have exchanged it for Bonds not later than the 27th of June, by payment in full under discount at 5 per cent. per annum on the instalments then outstanding.

Applications will be received by the undersigned up to Wednesday, the 24th May, at Four o'clock; and forms of Application may be obtained from them or at the Consolidated Bank.

MULLENS, MARSHALL, and DANIELL,
3 Lombard street, London.
LEWIS H. HASLEWOOD.
Founder's court, Lothbury, London.

THE TRUST AND LOAN COMPANY of UPPER CANADA.

William Lance, Esq., M.I.A., Railway Statist, 26 Throgmorton street.

SECRETARY—G. Blizard Cox, Esq.
Temporary Offices—9 Finsbury place South, E.C.

PROSPECTUS.

This Company has been formed to carry out, among others, the following objects:—

To facilitate the formation or execution of railways and other public works.

To provide the contractors for such works with a medium for securing prompt and effectual support to their undertakings.

To lessen the disappointments and delays often met with by contractors and others in obtaining prompt advances on railway and other securities.

For effecting these purposes, the memorandum of association includes powers—

To contract for the construction of railways or other public works, either directly or by way of guarantee.

To make advances to contractors and others for such works upon every description of approved securities.

To negotiate any such securities.

To assist in providing or guaranteeing the materials, rolling stock, or other plant required for such works, and to acquire any patent rights.

To negotiate concessions and to provide the capital required for giving effect to the same.

To organise or co-operate with any other companies in such manner as the Directors from time to time consider advisable.

To act as financial agents generally.

The safe and profitable character of finance companies is shown by the large dividends paid by them.

Independently of other public works, the railways of Europe, America, India and the British Colonies already have an extent of more than 70,000 miles, involving a cost exceeding 750 millions sterling, on which the floating debts exceed 200 millions sterling, requiring a very large sum every week to meet engagements falling due upon bonds, obligations, or shares, or sales effected.

The extent of the field open for the operations of this Company may therefore be readily inferred.

Applications for shares must be made upon the form annexed to the prospectus. Each applicant will be required to pay to the bankers of the Company £1 on each share applied for on application; and, upon allotment, £2 per share on each share allotted; and a further sum of £2 per share at a period not exceeding one month after the date of allotment.

If no allotment be made, the deposit will be returned in full, but without interest.

Prospectuses and forms of shares may be had of the secretary, the solicitor, the auditors, the brokers, and at the temporary offices of the Company, where also the memorandum and articles of association may be inspected.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned. W. E. JOHNSON, Secretary.
Victoria Station, Pimlico, S.W., March 21, 1865.

EDGWARE, HIGHGATE, AND LONDON RAILWAY COMPANY.

The Directors of the above Company are prepared to receive tenders for Loans on Debentures, bearing Interest at 5 per cent. per annum, repayable in 3 or 5 years. The line will shortly be opened and will be worked by the Great Northern Company, who have subscribed one-third of the capital.—Applications to be made to the undersigned,
EDWARD BELLAMY, Secretary.
19 Duke street, Westminster, S.W.,
March 16, 1865.

EAST INDIAN RAILWAY COMPANY.

The East Indian Railway Company is prepared to receive Tenders for the supply and delivery of 5 WROUGHT IRON GIRDERS of 110 feet span, as per specification and drawings to be seen at the Company's Offices.

Tenders, endorsed "Tender for Wrought Iron Girders," must be delivered to the undersigned on or before 12 o'clock at noon, on Thursday, the 1st day of June next.

The Company is not bound to accept the lowest or any tender.—By order of the Board,
D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk,
New Broad street, London 10th May, 1865.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD.—SEVEN PER CENT. BONDS.

The Half-yearly Interest on the above bonds, due on the 1st June, will be PAID on that day and any succeeding day, at the counting house of Messrs J. Henry Schroder and Co., No. 145 Leadenhall street, between the hours of Eleven and Two o'clock. The coupons must be left for examination two clear days before applying for payment.
London, May 16, 1865.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD.—SEVEN PER CENT. LOAN for £90,000 Sterling.

Notice is hereby given, that in carrying out the operation of the sinking fund of the above Loan, whereby £7,000 is to be provided annually for the redemption of the bonds,

The following 70 bonds of £100 have been drawn by lot:—

21	108	351	449	511	601	677
26	113	390	455	533	615	678
28	122	391	456	546	625	689
32	129	423	462	556	636	719
42	132	424	468	560	639	738
44	173	425	469	563	650	751
57	189	429	470	567	655	758
62	213	434	471	571	664	792
65	226	440	482	572	669	818
101	276	447	508	600	672	828

The holders are requested to present the same for payment on the 1st June next, at the counting house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, as all interest upon them will cease and determine from that day.

The bonds must be left two clear days for examination. J. HENRY SCHRODER and CO.
London, May 16, 1865.

Manchester and Liverpool—The District Bank.

London Offices—Langbourne chambers, 16½ Fenchurch street, London, E.C.

AGENT—Henry Haymon, Esq., Langbourne chambers, London, E.C.

PROSPECTUS.

This Company is formed for the purpose of building and repairing men-of-war and merchant vessels of every description (especially iron-clad frigates, corvettes, gunboats, steam, and other vessels), also for constructing dockyards in the well-known port of Kiel.

The capital of the Company is ten million thalers, of which the first issue is one-half, viz., five million thalers, in 25,000 shares of 200 thalers or £30 each. The Company is empowered to commence operations as soon as the fourth part of the first issue of shares is subscribed for. The capital will be called up according to the progress of the works.

As the Company will not be able to commence work much before the expiration of the first year, Four per cent. interest will be paid upon the subscribed capital for that period.

The first issue of the capital of the Company is considered to be sufficient for the purchase of land, construction of works, and working capital. The second issue can only be made by a resolution, to be passed by a general meeting of the shareholders.

The Royal Prussian Ministry of Marine have granted to this Company the preference for the building and repairing of all their vessels, and an order for an iron-clad frigate will be given so soon as the Company is in a position to commence work.

A suitable site for the Docks and Shipbuilding Works has been purchased, and approved of by the Royal Prussian Ministry of Marine.

The land situated near to Altona and Kiel Railroad, facing the town of Kiel, has been purchased on highly advantageous terms. The town of Kiel has willingly granted, free of charge to the Company, the right of reclaiming a considerable portion of the harbour contiguous to the Company's land.

The success of establishments of a similar kind in other countries is well known; and it must be acknowledged that the advantages this Company possesses, protected by the Royal Prussian Ministry of Marine, must secure profitable results to the shareholders.

The certificates of shares will be printed in English for English shareholders.

A copy of the statutes may be inspected at the offices of the Company.

The preliminary expenses will be strictly confined to matters of actual outlay, no promotion money being paid to any one.

Prospectuses and forms of application for shares can be obtained at the bankers, or at the offices of the Company.

ENGLISH FORM OF APPLICATION FOR SHARES.

To the Directors of the Norddeutsche Schiffbau-actien-Gesellschaft, or the North German Ship-building Company (Limited).

Gentlemen,—I request you to allot me shares in the above Company, which I hereby accept, or any less number, and I further consent to sign the Statutes of the Company (Articles of Association), and pay the first instalments of three pounds and nine pounds per share respectively, when required, or in default authorise you to cancel the allotment.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.

Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,

SOLE CONSIGNEES:

ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

CREDIT MOBILIER OF FRANCE.

REPORT

Presented by the Board of Directors at the General Ordinary Meeting of Shareholders, held in Paris, on the 15th May, 1865,

M. ISAAC PEREIRE in the Chair.

GENTLEMEN.—The founding of our company dates as far back as the year 1852; we therefore have now for the thirteenth time to give you an account of our proceedings, and to explain the situation of our affairs.

That situation has not ceased to be satisfactory, although it has not made the progress we could have wished, but you are aware that during the past year circumstances have been anything but favourable.

The causes of the uneasiness which has been felt during that period are no mystery.

The halt which your company has experienced is due to the influence of external circumstances which it was not in our power either to foresee or overcome; we specially allude to the precarious state in which the money market has so long remained, to the constant high rate of interest during the crisis as yet scarcely passed, and the effects of which still oppress industry and trade.

A rise in the rate of interest naturally produces serious perturbations in industry, and those perturbations are more particularly felt by enterprises whose prosperity especially depends on the amelioration and facility of the conditions of credit, on the abundance and cheapness of capital.

Under such circumstances, the establishments of credit ought to consider themselves fortunate when they possess, as we do, sufficient resources not to be placed under the necessity of abating the activity of works undertaken at more favourable moments. But the high rate of interest has not only the result of increasing the burdens of industry; it also stops business, and completely paralyses the spirit of enterprise, and thus it is seen that in these moments of universal slackness, one of the principal elements of general prosperity disappears.

In fine, and this is a point of resemblance between our situation and that of the generality of proprietors and capitalists, as soon as the rate of interest rises, all descriptions of property, all investments personal or real, are affected by a corresponding depreciation.

These facts we notice, not with a view to any idle criticism, but solely on account of the influence they exercise on our affairs.

Happily it is not by the proceeds of a single year that the nature of the services of an establishment like ours is to be appreciated; a proper judgment can only be formed from the results obtained during a certain number of years, and those results, in any case, are expressed by an average revenue of 15½ per cent. per annum on the capital of our shares ever since the foundation of our company.

We have stated how we have had to suffer from the monetary crisis; but if we suffered more than others, owing to the great amount of our investments, and the loss necessarily imposed by all depreciation in the value of our assets; if we thus are the first to feel our part of the sufferings which the country may experience, it must also be acknowledged that, by a just compensation, we share to a large extent in the advantages inevitably attending the return of prosperity.

We are now in a position to profit by such a return, for during the whole crisis through which we have passed, we have never ceased to labour for the amelioration and development of all our undertakings, we may therefore congratulate ourselves on having been able energetically to resist the disturbing causes above mentioned, and with not having allowed the suspension, for a single instant, of any of the works of the companies placed under our patronage, and with having on the contrary aided them by placing at their disposal all the resources they required; we have thus placed them in a most advantageous position.

You will be able to judge, gentlemen, by the accounts about to be laid before you of the general state of the principal undertakings to the development of which our company is devoted.

Without further reference to the companies of which we have been accustomed to speak, and which continue the course of their operations without any noticeable change, we will briefly allude to those with which our relations have continued the most active, and we will lay before you in greater detail the situation of those establishments to which we have especially lent our co-operation during the past year.

Allow me first to enumerate the financial operations in which we have taken part.

The issue of the first Mexican loan is the most important of those operations.

We had not to discuss the conditions of that loan; they had been determined by an English house of the highest class, when we were invited to undertake the issue in France.

We did this simply as commission agents, with the aid of the receivers-general. Our connection furnished a very large contingent to the subscription for that loan; we were consequently most painfully affected on witnessing the depreciation which those securities suffered.

We did not hesitate to share the fortune of our clients; we shrunk from no sacrifice which could have the effect of improving their position, and we regret to say that those efforts have had no other result than to cause us an important loss in addition to that of the commission which had been allowed us.

We have never thought of asking for any compensation on this head; but is there not good ground, on the part of the Mexican Government, to grant some indemnity to the subscribers who have participated from the first main operation, the realisation of which has not been without effect for the founding of the new Empire?

We have also taken part in the negotiation, on the account of the Ottoman Bank, of the second part of the Turkish loan, which had been reserved for the subscribers of the first.

This supplementary loan, which amounted to fifty millions of francs, has been entirely placed.

The present quotations offer subscribers a profit on the price of emission.

Such are the only operations of credit in which we have engaged beyond the efforts we have made to dispose of the bonds of certain of our undertakings.

We continue to have every reason to be satisfied with the relations which we have never ceased to entertain with the Imperial Ottoman Bank. The operations of that establishment have undergone a considerable increase during the year 1864. We cannot enter into circumstantial details on this point without encroaching on the domain of the board of directors, which, next month, is to present to the general meeting of shareholders, assembled in London, a complete statement of the affairs of the bank down to the 31st December last. We will merely call your attention to the notice published by the English journals, according to which the directors intend to propose the distribution of a dividend of 37f 50c per share (including the instalment of 12f 50c paid in January), which, on 250f paid up, represents 15 per cent. per annum.

Besides the issue of the supplementary loan of 50 millions already mentioned the Bank has constantly lent its aid to the Ottoman Government in all its financial measures; however, it has not thought proper to take any part in that for the unification of the internal debts, which the Government has just commenced, or in the issue of the new loan of 4,000,000 Turkish pounds at 5 per cent.

The bases of this combination did not appear to the Bank to present any substantial advantage either for the Government or the holders of the internal debt; the Bank felt bound in the interest and as the organ of the holders of the external debts, in the issue of which it had taken part, to demand in their favour the absolute maintenance of the guarantees and rights of priority assured to them. Always ready to unite its efforts with those of the Government to ameliorate and develop the financial system of which it is the official agent, the Bank could not, however, accept a measure tending to create a competition with the external stock in the Paris and London markets.

On this occasion it submitted to the Government of the Sublime Porte respectful observations, which were kindly received.

Why are we compelled to oppose to the results obtained by the Ottoman Bank those which have marked the proceedings of the Societe Neerlandaise de Commerce et d'Industrie (Netherland Company of Commerce and Industry)?

During the past year we have felt deep regret to see the affairs of this last named company enter upon a phase which its beginnings gave no reason to anticipate.

Excessive permanent investments which, at other times would have caused only a transient remission in its social operations, suddenly assumed extraordinary gravity, when it came to pass that the director-general abandoned his post owing to disastrous private speculations, and left an important deficit to be borne by the company. To meet immediate engagements the Netherlands

The Political Economist.

Owing to the want of space, we are compelled to omit the half-yearly reports of some of the Joint Stock Banking Companies. The omission will be supplied next week.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK NOTES ISSUE BILL.

THE Bank Notes Issue Bill has been altered so many times that very few people know how it now stands. We, therefore, give below the material clauses as they now read after the alterations introduced by the Chancellor of the Exchequer, and by Mr Heygate, on behalf of the committee of issuing bankers, in the committee of last evening. Divested of technicality, they amount to this :—that joint stock banks who wish to open a business in London, or to purchase the issue of other banks, and that private banks who wish to enlarge their number of partners, may obtain these advantages by conforming to the Bill. The price of these advantages as fixed by the Bill is twofold.

1st. That the conforming banks should pay the tax of 1*l* per cent. on their circulation per annum for 15 years.

2ndly. That they and *they only* should, at the end of 14 years, receive a year's notice that the present arrangement is to terminate, and then either the present issues will finally cease, or be renewed on such terms as Parliament may think fit. The terms of the clause are permissive, but after the discussion which has taken place and the words of the preamble, it must be considered to be practically certain that the notice will be given. It was very clearly explained, however, on Thursday evening by Mr Goschen—first, that the Bank of England did not desire the extension of the country issues of these banks, or of any banks; 2ndly, that he did not himself object to the continuance of the issues of the conforming banks after the elapse of the 15 years, but only to their continuance on "the "present footing"—in plain English, he meant, and the Chancellor of the Exchequer means, that a conforming bank must count on being compelled to give security, and on having to pay an augmented tax at the end of that time. Banks *not* conforming to the Bill will not be affected by its provisions.

We have nothing to say on the policy of the Act which would be new to our readers, or which would be worth repeating, but we must make two observations on the debate of last night, one on the speech of Mr Hubbard, and another on the doctrines of certain issuing bankers.

Mr. Hubbard said that the abolition of the country issues would cause no "deficiency of the circulating medium." And it is quite true that the total abolition of the country issues, or of the Bank of England issues too, would in the end, and when things had adjusted themselves, cause no want of local cash; what it would cause is the increase of metallic circulation. Bank notes can only cease to exist by being paid, and people who now hold the notes would then hold the sovereigns. Doubtless a sudden large absorption of the precious metals would for the moment derange the bullion market and the money market; but, in the end, all would come right, sovereigns would be found to do the work of the nation. The country would lose the economy of the paper circulation, and pay the cost of a metallic circulation, but that would be the whole difference, *as far as circulation goes.*

But it would not be the whole difference as far as banking goes. If the country issues had been abolished thirty years ago, the consequences would have been the extinction of the best half of country banking, and even now their abolition in very many less wealthy and less progressive districts would be a severe blow. Mr Hubbard said that "country bankers "do not lend at less than the market rate, and, therefore, they "are entitled to no consideration." We should say they are entitled to very little consideration if they did : they would be doing harm by making accommodation artificially cheap, and so creating business which ought not to be created. Country bankers are "entitled to consideration," not for the money they give out, but for the money they take in. They establish little "receiving shops" all over the country, absorb local capital in fragments, and transmit it to London in masses. This could not have been done at all at first, and could not now be done to the extent it is done if the profits of the local issue were not given to the local banker. His deposits would not have enabled him to keep open his place of business; he must have shut it up;—but being subsidised by this issue he was able to carry on his trade. Deposit banking is not a self-supporting business in backward rural districts even now where those districts are few, nor in old times when they were many. Our English political economy has been made mostly in cities, and bears traces of the place of its origin. It does not recognise the unquestionable fact that the rural English issues created the London money market; that they made possible the existence of that diffused organisation—that receiving network by which its vast means are first obtained and then transmitted.

2ndly. We have a word of caution to the extreme party among the country issuers. As the current political economy has so exclusively been made in towns, so their views have been wholly made in the country. There is a tinge of local importance about their notions. They do not perceive their real position either economical or political. They fancy that they can by manipulation of members rule the permanent policy of Parliament. Parliamentary management has no such power, and if it had, Parliamentary Government would be a

Digitized by Google

curse and not a blessing. The country bankers may have at the eve of an election great power over the momentary fortunes of a little Bill. But they have no lasting power over a national question. They must fight the battle of their exclusive privileges in the House of Commons and not in the lobby, by argument and not by canvas, and then it will be seen what a lame argument it is. Let us state the questions as they would be stated in a committee. We will suppose a country issuer examined, say next year, by the Chancellor of the Exchequer:

Chancellor of the Exchequer—You and the other issuing bankers established in 1844 have a monopoly of the English local issues, have you not?

Country Issuer—No, we have not a monopoly, but only an exclusive privilege.

Chancellor—Well, we won't quarrel as to words, You have something which you would like to keep, and which no one else can get?

Country Issuer—Yes. But I am not worse than the Bank of England. That has an exclusive privilege, too.

Chancellor—Are you aware that the Bank of England issue is heavily taxed and perfectly secured?

Country Issuer—Yes.

Chancellor—Are you aware that the country issue is untaxed and unsecured?

Country Issuer—Yes.

Chancellor—Can you say that the two circulations are in these respects in the same position?

Country Issuer—No.

Chancellor—Would you say abstractedly that the best issue, the secured issue, should be taxed, and that the worst, the unsecured issue, should be untaxed?

Country Issuer—No.

And so on, through an unpleasant catechism. Enterprising men of business, intent on their own business, thinking their own thoughts, hardly appreciate the effect of these admissions on fresh minds. Alderman Salomons is, as the representative of the opinion of the banking London world, to move that this Bill be read "this day six months," because he thinks it far too favourable to the issuing bankers. Some of them are going to help him, because they think it too unfavourable. He will smile at them for so doing.

The preamble and principal provisions of the Bill are as follows:—

"Whereas divers restrictions are imposed by Act of Parliament on bankers in England issuing their own bank notes: and whereas it is expedient to permit the said bankers to exempt themselves from the said restrictions by payment of such per centage on their issues of notes as is hereinafter mentioned, and to fix by law a time whereat the present statutory right of issue on the part of bankers obtaining such exemption shall determine, in order that either their issues may become subject to the enactments of the Bank Act of 1864 hereinafter mentioned in respect to lapsed issues of bank notes, or that Parliament may make further provision concerning them as it shall think fit upon grounds of public policy be it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

"There shall be repealed, so far as respects any bank of issue undertaking to pay such per-centage on its issue of bank notes as is hereinafter mentioned, any provision of any Act of Parliament whereby the number of partners in certain banks of issue is restricted to six, or whereby certain banks of issue is restricted to six, or whereby certain banks of issue are prohibited from having a house of business or establishment as banker in London, or at any place not exceeding sixty-five miles from London, or whereby banks of issue are prohibited from making payable bank notes in London or at any place not exceeding the distance of sixty-five miles from London.

"Any bank of issue or any number of banks of issue may transfer to any other bank of issue the right of issue or rights of issue vested in it or them, or any part or parts thereof, on such last-mentioned bank undertaking to pay such per centage in respect of its own issue and of the issue or issues so transferred as is hereinafter mentioned; and such last-mentioned bank shall be entitled to the same privileges in respect of the issue of notes and all other matters as the bank or all the banks from whom the right or rights of issue is or are derived would have been entitled to if it or they had continued such issue or issues on an undertaking to pay the said per centage in accordance with this Act: provided always, that nothing in this Act contained shall, except as the right of transfer of issue hereby conferred, alter or affect any of the provisions now in force by law in regard to any banks other than those which shall voluntrrily accept the terms and conditions of this Act.

"On or before the 1st of January, 1879, notice *may* be given by the Commissioners of the Treasury, by publication in the *London Gazette*, to all the banks issuing notes in respect of which such per centage as aforesaid is payable, requiring the termination of such issues, and then, unless Parliament shall otherwise determine, the said issues shall cease on the 1st of January, 1880. In the event of Parliament putting an end to the issues mentioned in this section at any time before the 1st of January, 1880, there shall be paid to every bank for time being enjoying the right to such issue full compensation for any loss it may sustain by the determination of that right before such time as aforesaid."

THE CAPTURE OF MR DAVIS.

THE capture of Mr Davis involves the United States in a great political difficulty. The act of which he has been guilty is one which must be punished, and for which, nevertheless, there is no suitable or appropriate penalty. The head and chief of a dangerous rebellion must be punished; not to punish him would be dangerous bounty on future rebellions; and yet when you come to settle the sentence, it is difficult to say what it is to be. There is, indeed, one important section in the United States, as they must now again be called, which believe that Mr Davis ought to be executed—that he ought to suffer the worst which any one by law is allowed to suffer

And if it could be made out that he was in the remotest manner participant in, or accessory to, Mr Lincoln's assassination, every one would agree that no punishment would be too severe. An illegal President who should plot to murder the legal President—an educated and refined man who could share in so mean and cruel an act, would deserve the worst penalty man ought to inflict. But if, as we all believe, no evidence of participation in Mr Lincoln's assassination can be produced, if Mr Davis is to be tried solely as a rebel and chief of the rebellious States, we think there are conclusive arguments to prove that he should not be executed. that his is not a case for the last and gravest of human penalties.

An act of treason, though a very dangerous act, and though often a very pernicious act, is not necessarily, perhaps is not even commonly, a very guilty act. We measure guilt not by what men do, but by what they intend to do. We must abstract our minds from the result,—we must put away all larger, truer, sounder views than theirs, and see what dreams flitted before them; what secret hope was in their hearts, what vision haunted their fancies. A rebel has almost always some imagination of what he thinks an improved country to palliate and excuse his sin against his actual country. He goes beyond the law in the hope to gain a result which the Legislature did not contemplate. The act is guilty no doubt, but it is not so *very* guilty—so inexcusable and without palliation as to deserve the sharpest punishment reserved for the worst criminal. It is a conspicuous indication of comparative innocence in political offences, that very often they gain the co-operation of numbers and the sympathy of half mankind. Many people do not co-operate, none, not even the worst people, admire the worst forms of wickedness. The aid given, and sympathy evinced with a political criminal are signs that though his offence is grave, yet there is an excusable point in it, that it has a plausible side, a venial element; and if so there is *prima facie* at least ground for supposing that the last penalty of the law ought not to be enforced. Our law must embody our conscience if it is to have life and vigour, if it is to be in any full sense a law at all.

As to the great majority of the American insurgents every one admits this. No one dreams of executing General Lee or General Johnston, or any officer in the Confederate army. even though the case against many of such officers is according to common rules very complete. Many of them have committed the highest conceivable military offence. Being officers in the Federal army, they *deserted* and went over and served in the Confederate army. If any one should suffer the most, these deserters ought to suffer it. If they are not strict (and they will not be so), Mr Davis certainly should not be hanged.

Digitized by Google

It is quite true that in early stages of society—when civilisation is but beginning—when the social bond is very weak—it is necessary to punish treason very severely. Treason is an attempt to break the political bond, and in early ages there is no sort of co-operation or unity among mankind but that of politics, and its destruction is therefore always calamitous. But in civilised times, if a political society is weak, it is most likely that it ought to die. If the inducements to maintain it are so few,—if the rage against it is so great that it is half about to burst asunder,—probably it "ought to be broken as soon as it can be broken." We reason thus:—as Venetia, we say, wants to be disunited from Austria, therefore, it ought to be disunited. No one says that a Venetian patriot is a traitor to the country to which by every sort of law he yet belongs.

The case of Mr. Davis is not like the case of a Venetian patriot. There were no just grounds for the Southern rebellion, but there were reasons which persuaded the great body of the Southern people. A man who only acts on reasons appreciated by, sympathised in, and approved by the mass of men, may indeed be a criminal, but he can hardly be a criminal of the very worst sort—a criminal deserving death. Burke said he could not draw "a warrant of indictment against "a whole people," he could still less have drawn a warrant for their execution.

It may be said that the execution of Mr Davis is necessary to preserve the Union, and that after all which has been done and suffered for the Union by the Americans, they are bound above all things to preserve it. But if the preservation of the Union required the perpetration of a cruel public act, it could not be preserved; if it was in such a critical state already, it could not last long. Consider what the argument means. It means that some persons, important and numerous enough to be dangerous to the Union, so hate the Union that they would break it if they did not fear to die "as Davis "died." But if there are so many people so eager to break the Union as that, it will not last, and ought not to last. But events show that whatever may be the future fortunes of the Union, its maintenance is supported by forces far greater than any terror that can be struck by an execution, however frightful. If the Union is preserved in future, it will be preserved, as it has been preserved now, by the loyal attachment of a great people, and by the enormous resources of men and money which that people can bring into the field. Without these, a cruel execution would be useless; and with these, it is assuredly unnecessary.

The greatest danger to the Union would, as far as can be judged at this distance, be the execution of Mr Davis. What is now desirable is the speedy oblivion through the South of the late passions and the late hopes. But the best mode of invigorating a decaying sect, is to give it a martyr. Even Mr Davis might, perhaps, be enshrined in the memory of the South, if the North treated him with a severity which dispassionate men cannot praise, and which his passionate admirers would deem execrable.

The difficulty of settling his punishment certainly remains. A common punishment would be unworthy both the dignity of the criminal and the magnitude of his offence. You can hardly "give a man ten years" for trying to destroy an empire. Perpetual exile is putting him in the same position as if he had escaped. Perpetual imprisonment is always odious, and would in this case embalm in the best manner the memory of what ought to be as soon as possible forgotten. On the whole, perhaps exile for life, with the loss of civil rights, of the capacity to hold or inherit American property, of all benefits from American political society, would be the best punishment on the able rebel, who for a moment endangered the existence of that society.

LEGISLATIVE ENCOURAGEMENT TO FRAUDULENT DEALINGS WITH THE PUBLIC MONEY.

The accusations made against the Lord Chancellor have as yet had no effect on that great functionary, and probably will not have. Nothing is likely to be proved against him inconsistent with his continuing to hold the Great Seal. But there is good reason to hope that the revelations of subordinate matters consequent on those accusations may ensure a very great reform in public money matters.

Nothing can be safer than the honesty of English officials *on the high road*. The great sums which are received by all important departments, by the Customs, or the Excise, or the Stamp and Taxes, are entirely beyond question. But there are great number of bye-ways to the English Exchequer. There are many out-of-the-way recipients of the public money for occasional charges and incidental fees, who are under no check, who are subject to no audit, who are often in arrear, who do just as they like.

Mr Edmunds, who is now so notorious. was one of these. His mode of dealing with the public money is now on record by official investigation and out of his own mouth, and, therefore, it is easy to speak of it correctly, and due to the public to describe what it was. Mr Edmunds was Clerk of the Patents,—that is, not only to the patents for inventions, which, in common conversation, are exclusively so called, but also to what the law calls patents, that is, the special licenses which are preliminary both to the duties and the profits of the principal offices under the Crown. There are very considerable sums annually paid for these licences, as is natural, since a great number of the best places in the State cannot be obtained without them. Mr Edmunds duly received these monies, but did not pay them over. He placed them in a bank account which is thus described in the evidence of Mr Greenwood, the solicitor to the Treasury, who inquired into the matter, and thus caused the entire disturbance:—

"Lord Chelmsford—What is the title of the book?—'Leonard Edmunds, Esquire, Patent Office Account.' The address is, '121 Regent street,' altered afterwards to '21 Berkeley square.' This is the pass book, headed 'Patent Office Account, Leonard Edmunds, Esquire, with Messrs Coutts and and Co.,' and this that I hold in my hand is a transcript of what was handed to me by Mr Leonard Edmunds.

"Earl of Derby—It begins I see in November 1833?—Yes that is the first entry.

"And it is continued down to when?—It continues down to April the 27th, 1864. In the first page there are three drafts to private account of 187*l* odd, 180*l* odd, and 100*l*, and in the next page, 'To your account, 148*l* 9s.

"'To your private account, 229*l* 11s'?—Yes, there is that entry; and then in 1835, 'To your account, 100*l*' 'To yourself, 50*l*,' that is in 1836; and then on August 3rd, 'To your private account, 99*l* 7s 6d.' March 7th, 1837, 'To your private account, 100*l*.' and in December, 'To your account, 150*l*,' and then afterwards to bearer, 50*l*, and so forth. I said we should desire to have an account of those monies. It had been stated by Mr Edmunds that the monies which had been paid in to Messrs Coutts' consisted of public monies, and then, it appearing that a number of these sums had, as far as we could judge from the way the pass book was made up, been paid to the private account, we desired to know for what reason they were transferred to the private account.

"Lord Taunton—Do you mean transferred from the public account with Messrs Coutts to Mr Edmunds' private account with Messrs Coutts?—I have never seen Mr Edmunds' private account at all, but it is entered here 'To your private account.'

"Were these transfers from the public account kept by Mr Edmunds to his private account; is that what you mean by transferred?—I cannot tell. I have no materials except these.

"Earl of Derby—Did you examine Mr Edmunds with this pass book in your hands, and call his attention to these payments specially, and ask him to account for them?—Yes. every one of them.

"Did he give you no account of them?—None."

That is to say, Mr Edmunds paid the public money to an account at a private bank, and drew on it for his own benefit.

We boldly say that this circumstance *of itself* ought, under a proper management of the national Treasury, to be a valid reason and a certain cause of immediate dismissal. A man ought not to remain a day in the public service who even began such a practice, much less a person like Mr Edmunds who continued the bad custom more than thirty years. It has been gravely argued that at first at least Mr Edmunds put back the money,—that the transfers to his "private "account" were in the nature of mistakes, were somehow abnormal,—and other weak defences. But under a tolerable system of national finance it would be impossible that such defences should be made. They are a worse condemnation of our present system than the offences they are offered to palliate. They show on the part of those who make hem a lax notion of the manner in which public money

Digitized by Google

ought to be dealt with,—more dangerous than specific misconduct.

Even if Mr Edmunds had never been in arrear with his accounts, we should have considered the system faulty, though we should not have blamed him. Indeed, we do not now blame him for what he did as much as the system which permitted what he did. You have no right to tempt a man with untold gold. You have no right to authorise a public servant for many years to mix up public monies with his own monies, and then to be surprised if he cannot distinguish them. The final difficulty of making the distinction was very great. Mr Edmunds himself tells us :—

"In July last I employed Mr Hooper, a professional skilled "accountant, to assist me in making out the accounts for the "whole 31 years, which accounts had never before been "rendered or audited in any shape. I worked with Mr "Hooper for some weeks upon these accounts. The book con-"taining the accounts of receipts of fees and distribution of "the same, commencing in 1833 and ending in 1846, has "been lost or mislaid by Mr Ruscoe, the Chief Clerk, who had "the custody of the books of the office; that book has dis-"appeared, and no reasonable account is given of its dis-"appearance. However, it is gone from the custody of Mr "Ruscoe, who had the custody of the books."

This singular statement is a part, not of the accusation, but of the defence. Mr Edmunds, who for thirty years and more has received a certain part of the public income, admits he has never during all that time rendered any account of it, and says he cannot be sure of what he has received and what he ought to pay because of the loss of an account book relating wholly to transactions now more than twenty years past.

Nor is this the end. It sounds like a jest, but it is a literal fact, that thirteen years ago Mr Edmunds ceased altogether to pay over this branch of the public revenue. Before that he had paid over uncertain sums at uncertain intervals, but after that time he ceased to pay over at all. The dialogue between him and the Solicitor to the Treasury would be ludicrous if the matter were not so grave :—

"Mr Greenwood—Since August 9th, 1852, I do not find "that there has been any payment to the Exchequer, although "there are very large balances ; are you in a position to tell us "why you have not paid any accounts into the Exchequer? "Mr Edmunds—Not at present. Will you allow me a "reasonable time, and I will put in an account of the whole "matter? Mr Greenwood—These are questions not to be "answered by accounts?—No, I am aware of that. Mr "Greenwood—It is a remarkable fact, that throughout you "pay considerable sums to the Exchequer, and that in "August, 1852, that is more than twelve years ago, you seem "to have ceased to make any payment to the Exchequer, "although large balances are in your hands. I want to know "whether you can explain that? Mr Edmunds—I cannot "reasonably."

The practice of receiving the people's money without paying it over or accounting for it is undoubtedly difficult of "reasonable explanation."

It naturally occurred to the Committee of the House of Lords, and it must occur to our readers, to ask how such gross misconduct should be possible. They inquired whose duty it was to call such an offender as Mr Edmunds to account; they evidently expected to find, as they ought to find, some specific functionary charged with watching Mr Edmunds and seeing that he paid the money over rightly. They find that there is no such functionary. The law, as explained by the authorised expositors, is not only in a defective state, but in what, to those who are not familiar with it, who hear it for the first time, is an incredible state. The Act under which Mr Edmunds was appointed prescribes that the "fees and emoluments" received by him "shall be accounted for once in every three "months, commencing in the first instance from the date of "such appointment respectively, and shall be paid by the "said officers respectively into the receipt of His Majesty's "Exchequer, and be carried to and made part of the Consoli-"dated Fund of the United Kingdom of Great Britain and "Ireland; and the account of the party so paying such fees "shall be verified by his oath, which oath any one of the "Masters in Ordinary of the High Court of Chancery is hereby "required and authorised to administer."

It would strike a person new to the study of English institutions, that the Chancellor of the Exchequer—the head of the Exchequer—was the person responsible for its business. But this is an error. It would be much truer to say that the Chancellor of the Exchequer was the *enemy* of the Exchequer; he is the head of the Treasury, and there is an entire series of defensive enactments intended to protect the Exchequer from the Treasury. The true head of the Exchequer is the "Comp-"troller," and he is so far from being an officer under the Treasury, that he is the person to resist the Treasury. The Chancellor of the Exchequer is the person who *spends* the public money: the "Comptroller" is the person who prevents its being spent improperly: his business is to see that no money not duly authorised by Parliament should ever be expended. Popularly, the Exchequer and the Treasury are looked upon as one thing, but they are two things, and even two hostile things: the Treasury is a paying machine; the Exchequer is a receiving machine strictly, and out of abundant caution fenced against the paying machine. It would be exaggerating to say that in practical life, the Exchequer is an office hostile to the Treasury, but it is strictly true to say that it is an office most jealous of the Treasury.

To explain the almost inconceivable mode in which this separation of offices works, we must give the very words in the official statement, for we are afraid otherwise it will not be believed. Mr Gladstone, with Mr Hamilton and Mr Arbuthnot, two principal permanent officers of the Treasury, were examined by the Committee, and answered thus :—

"Lord Chelmsford—When the money is spoken of as having been paid into the Exchequer, which is the department of the Exchequer into which the money would be paid?—The Exchequer is an entirely distinct and independent office, and has no connexion whatever with the Treasury, except such as rests upon law or known usage. The Exchequer is not a department of the Treasury, nor is it an office subordinate to the Treasury. There are certain fixed relations between the Exchequer and the Treasury; but beyond these the Exchequer is entirely independent and separate.

"(To Mr Arbuthnot)—The word "Exchequer" is a mysterious word; can you help us to understand it?—I think I can explain it. According to the old usage every payment of revenue was made at the office of the Exchequer, which is termed in Acts of Parliament the receipt of the Exchequer, and was brought to account at the Exchequer; but in course of time the Bank of England became the bankers of the Exchequer, and people tendering money had to go to the Exchequer to get a receivable order from the Comptroller General for the Bank to receive it, in order that it might be carried to the proper account; but legally and nominally the money is still paid into the receipt of the Exchequer as it was before.

"Had then the Comptroller General any check at all upon the payment of money? Did he know what ought to be paid?—He had no check, except from the affidavit of the person tendering the money.

"It appears that Mr Edmunds offered an affidavit to the Exchequer, and that they would not receive it?—He had to swear the affidavit before a Master in Chancery.

"Earl of Derby—He said he wanted to make the affidavit before them, and they said it was no part of their business to take affidavits?—I think the Act prescribes that the oath was to be taken before a Master in Chancery.

"Lord Chelmsford—After a certain time there was no Master in Chancery; the office was abolished. Can you give us any notion at all what sort of check there would be upon the receipts of Mr Edmunds and the money to be paid over by him to the Exchequer?—I think it is one of the mysteries of the Court of Chancery."

So the law controlling Mr Edmunds worked thus,—The Comptroller of the Exchequer said, 'I can't interfere; I am 'an officer to receive money, but not an officer to induce 'persons to pay money. I have no compulsory powers vested 'in me; I can prevent money going out, but I cannot interfere 'to make it come in.' The Treasury say,—'We cannot inter-'fere. We are not named in the Act. The money is to be 'paid into the Exchequer. The Exchequer is "over the way;" 'we have no authority to interfere there, and if we did, an inter-'ference would be much disliked, and not at all attended to.' The Master in Chancery had the best defence of all; he said, —'I cannot interfere, because I am abolished.'

It is painful to think that in the nineteenth century we should be gravely discussing for an important object such miserable technicalities. It passes patience that there should

Digitized by Google

be two great finance departments, each with power to counteract the other, but neither with power to stop actual malversation,—both industrious, rigid, and virtuous, but both permitting a petty clerk to withhold accounts and appropriate monies for years. What is a financial organisation fit for if it does not even attempt to check the most frequent, easy, and probable of financial offences?

This is only, however, one out of very many such cases, and when we consider how English institutions have often originated, the continuance of such cases is very natural. We allowed our institutions to *struggle up;* we did not create them, but let them grow. The whole structure of our law courts is the history of the gradual expansion of certain germs which showed themselves capable of expanding, but which were in their origin very different from what they afterwards became. As long as they did not cost anything, or come to the Treasury for any money, they were permitted to enlarge their functions almost as they liked. Take the case of the Court of Exchequer, which is so closely connected with the old office of the Exchequer that has been mentioned. This court was originally a court for deciding revenue cases in which the Crown was interested and no others; it is now a court authorised to decide all cases. By the monstrous and almost incredible fiction that the plaintiff in every case is rendered liable to pay a debt to the Crown because the defendant would not pay *him*, the Court of Exchequer extended its originally restricted jurisdiction to an almost universal civil jurisdiction. The motive for so doing was to increase its income; everybody about it was paid not by salaries but by fees, and the more suits increased, the more fees augmented. A very great number of separate pecuniary *entities* have thus grown up in the interstices of English institutions, which claim to have separate interests, separate rights, separate monies apart from the nation. Nothing can of course be more absurd. All the necessary expenses of a department—of a law department as much as any other—ought to be defrayed from the national Treasury, and all monies received by the department ought to be paid into the national Treasury. This might seem a truism, but it is a truth on which it has as yet been found impossible to act. The lawyers steadily maintain that the Treasury is not to be trusted with their monies, that the Executive Government is not to be trusted, What, then, it may be asked, do the lawyers do with their money? And the answer is perhaps the most amusing part of all. They *invest it in the securities of the Executive Government;* they buy Exchequer bills and Consols. Having first proved that the Government cannot be trusted, they immediately proceed to trust it implicitly. The alternative is plain. On the one hand, if the English nation cannot be trusted, Consols are a name not for a reliable income, but for an unreliable promise, and then it is absurd to buy them; on the other hand, if the English nation is trustworthy, it is absurd in its own courts and offices not to trust it, but to buy into its securities one against the other, raising the price against each other, and wasting the public money in useless fees to unnecessary brokers. In fact, the custody of money is a pleasant thing, and many lawyers and many other people do not like to give it up.

The proper remedies are two—first, that all persons permitted to receive money should be bound to pay it over without delay to the Exchequer at the Bank of England, and that the Treasury should be bound to see it is paid. Secondly, that as few persons as possible should be permitted to receive money. All minor charges, all fees, all but the great productive branches of the public money, should be paid not in money but in stamps. Nobody will misuse these, and their custody is not so pleasant that people will cling to it at the risk of any absurdity.

Persons who have not attended to the subject, think that such abuses as those could not stand for a day; but, in fact, the most influential people in England have been trying to alter them for years, but have failed. The present Chancellor says:—

"I believe that the root of the mischief lies in this Act of Parliament, and not only in this Act of Parliament, but in a rather wide-spread system under which there are vast sums of money in this country in various categories for which the public would be ultimately responsible, and with regard to which, if they disappeared, the House of Commons would be called upon for a vote for their replacement, and with regard to which, nevertheless, the Treasury has no power whatever.

"Chairman—Will you state some of the instances to which you refer?—I may mention the Chancery funds, to begin with; the Suit[illegible]s' Funds.

"Did you no[illegible]once attempt to deal with that fund?—The Cabinet, at my instance, and the instance also, if I remember right, of the Lord Chancellor, who was then Attorney General, advised the Crown to issue a commission for the purpose of inquiring into the condition of that fund, with a view to a change, and the commission has reported. They reported, after a long inquiry, but no measures have been taken upon the subject of that report; and the commission has not touched the question in its report whether the control, as far as custody is concerned, should or should not be given to any department of the Executive Government over those monies.

"Is there any jealousy of the Treasury with regard to interference with any of those branch funds?—If I were asked my own private opinion, I should say undoubtedly there is very great jealousy of the Treasury, whenever it shows an inclination to interfere. It would not be difficult to show, from reports of discussions of the House of Commons, the jealousy of the Treasury, which, perhaps, not unnaturally arises, when it endeavours to get into its hands and under its control money which is not there now."

In fact, if you talk to the parties interested, they say, "Ah! "Gladstone has been trying for years to get hold of our monies, "but he has not got hold of them *yet*. We have beaten him, "and we hope we may beat him. When he goes away, per- "haps we may get a quieter man."

CONFESSION OF FAITH OF THE RADICAL REFORMERS.

THERE is a vast step gained in any controversy when the matters in dispute are narrowed and made clear. The moment the question at issue is distinctly seen by the contending parties, broadly stated, and honestly and courageously avowed, the work is more than half done. It is when controversialists are in doubt as to their own meaning and their own views, when they hide ulterior designs behind plausible professions, when they are either insidious or confused, when they are content to half say one thing and half believe another, that discussion becomes a weary and disreputable waste of words. In nearly all political questions, the nation would have little doubt about its wishes and opinions if the point at issue were laid nakedly before it, stripped of all irrelevant matter, all subtle evasions, and all misty declamations. As soon as you can force your adversary to show his colours, you know at once who he is, and generally whether you can beat him.

Now this step has been at last gained in reference to Parliamentary Reform. The recent debates, on which we commented at some length, showed us what were the deliberate views of the thoughtful and influential Liberals. The Reform Convention, which met last week in Manchester, has shown us what are the views and plans of the Radicals. Henceforth there can be no question and no mystification as to what they mean, what they want, or what their doctrines really are. We should be wrong were we to call it an influential meeting, for Mr Forster was the only man of real note or weight present; but the party itself is not influential, and though neither Mr Bright nor Mr Baines was there, it is well known—it was distinctly understood that they agreed in the objects and opinions of the meeting, and in a word that the resolutions there adopted embodied the doctrines and purposes of the leaders of the advanced Reform party. They were suspected and inferred before. They are openly adopted and avowed now. The two resolutions moved and passed were as follows:—

"1. That this meeting, believing it was an act of gross in- "justice to the working classes to exclude them any longer "from the franchise, recommends the constituencies through- "out the country to support no candidates who will not pledge "themselves actively to support a comprehensive measure of "Reform, which, while it provides for a large extension of "the suffrage, *shall not recognise the principle of finality.*

"2. That this meeting, admitting the principle that repre- "sentation and taxation should be co-extensive, and that "every man who is not presumably incapacitated by some "consideration of personal unfitness or political danger, is "morally entitled to come within the pale of the Constitution, "declares that no Reform Bill can be regarded as [even] an "instalment of the just rights of the people which does not at "least extend the right of voting to every householder or "lodger rated, or liable to be rated, for the relief of the poor,

Digitized by Google

"and provide for the re-distribution of Parliamentary seats in "proportion to population and property, shorter Parliaments, "and vote by ballot."

Now, putting aside the somewhat clumsy verbiage and want of precision observable, and reading these resolutions by the light of the comments made upon them by the several speakers, most of whom declared themselves in favour of manhood suffrage, and all of whom dwelt and insisted on the point that every admission of working men to the franchise that could be gained now was only to be accepted as, and made, a step towards still further admissions, it is clear that the programme of the Radical party, their deliberate confession of faith, goes the full length of the principle of Government by the numerical majority. All men (they declare), all tax-payers must sooner or later be voters, and have equal votes, man for man, with all other electors—without reference to classes, and whatever be the preponderating numbers of the lowest class. The position is broad, logical, intelligible, and well-defined; it is based on a distinct principle; it leads to an obvious and unmistakeable end; and we are sincerely glad to see it so honestly and courageously avowed at last. There can be no further mystification or shuffling. We know now distinctly what we have to fight against or to yield. Are the labouring classes—the comparatively uneducated and the wholly unpropertied—to have the *command* of the representation,—or are they not?

Ultimately or *ever*, is the question;—how soon, or how gradually, by what steps, at what speed,—are matters of infinitely small concern. As long as the Radicals said, or seemed to say, or left it to be assumed that they meant, that they only proposed to admit certain numbers of the working classes, the more intelligent and highly-paid, the nation was inclined to listen to them and believe in them:—now that they tell us they mean to admit considerable numbers at once and *all* at last, the nation will reconsider the light in which it views their proposals. There is no disguise now; there can be no deception henceforward. We have at last a distinct principle before us, and we can say whether we like it or not.

We rejoice unfeignedly to see the question at last placed upon this issue,—partly because it is the honest one, partly because it is an easy one to argue, partly because it is one on which the nation will not have the slightest difficulty in making up its mind and pronouncing its decision. We have no intention of arguing the question now—the question, we mean, as to the soundness of the doctrine of the Radical party;—but what we desire earnestly to represent is that the doctrine is one which will never be conceded by the sincere constitutional Reformers of Great Britain; that it is not a development, but a negation, of the whole principles of constitutional Reform; that to insist upon it is not to promote but to oppose Reform. For if one thing is clearer than another it is this:—that the committal of the preponderance of political power to the mere numerical majority of the inhabitants of the realm, *i.e.* to the poor and uneducated classes, is a reversal of our whole system which neither the Parliament, nor the existing constituencies, nor the people of England, will ever consent to. For a political party, therefore, to avow this as their aim, as a demand nothing short of which will satisfy them, is to court defeat, to confess that their object is unattainable, to declare that they are permanently and radically at variance with their fellow-citizens as to the very foundations of the polity under which they live.

This is the practical point of most importance. But that settled, we confess it does fill us with amazement that a party containing such men as Mr Bright, Mr Baines, and Mr Forster (we do not include Mr J. S. Mill, because in reality he differs with those gentlemen as fundamentally as we do,) would set their seal to such a programme as that contained in these Manchester resolutions. To take one point only:—How is it they discover that if representation is to be co-extensive with taxation, they must enfranchise not only all men of twenty-one, but all women who support themselves, and all boys who earn their own living—all labourers in a word however ignorant or brutal—who all unconsciously pay taxes, and must continue to do so till our whole fiscal system is changed? If, indeed, a poor man is pecuniarily prudent or physiologically wise enough to confine himself to bread and meat and water for his diet, he pays no taxes, and need, therefore, have no vote. But the moment he takes a glass of beer or spirits or tea, he becomes a tax-payer, and would so *drink himself* into the franchise. If indeed, again, Mr Bright's old scheme for abolishing all indirect taxation were adopted, and one great impost laid on property instead, the labouring man would be wholly relieved from fiscal contributions; but what, then, would become of his tax-claim to the suffrage? And if he were still to have it, although paying nothing to the State, would ever Radical Reformers long be able to defend a system under which all the burdens should be borne by the rich, and all the power wielded by the poor? Lastly, how is it that men who claim to be so logical do not perceive the inevitable corollary from their doctrine,—the corollary, namely, that if representation ought in justice to be *co-extensive* with taxation, it ought equally in justice to be *co-equal* and *corresponding* with it,—that if a man is entitled to a vote because he pays one shilling to the State, by a parity of reasoning he must be entitled to more than one vote—to ten votes, or to five at least—if he pays a guinea?

On the whole, we doubt whether sensible men ever took up a political position at once more candid, or more practically weak and logically untenable than that assumed by the Manchester Reformers when they "went in" for the final supremacy of the numerical majority; and yet it was the only honest one which their declared principles left for them to take. It must be admitted, however, that they kept off it as long as they could, till the recent discussions drove them to their true entrenchments.

THE CHANGES IN THE AUSTRIAN TARIFF.

We showed our readers last week how entirely the protective system of Austria had failed in either bringing money into the coffers of the Government or wealth into the possession of the people. We are well aware that the increase of exports and imports does not absolutely measure the growth of wealth of a people. In a country like England, whose special advantages are very great for manufacturing purposes, owing to the quantity of iron, coal, and water-power to be found in her soil, and whose comparative advantages for the growth of agricultural products are small, the increase of prosperity will be measured with tolerable certainty by the increase of her foreign trade. The same is not necessarily true to the same degree of all other countries. It is theoretically conceivable, though practically impossible, that a given country might be the richest in the world without *any* interchange with its neighbours, but then that would involve its including all climates and all the special natural agents of the globe. Still there can be no doubt that, practically speaking, a country like Austria will be rich or poor in a pretty constant proportion to her foreign commerce. As we showed last week, at present she does not supply her people with more than a *quarter* of the cotton clothing which the Swiss earn for themselves by their labour, and as cotton clothing is a fair sample of the commodities most needed by the mass of the people, it is certain enough that her protective system has failed even more grievously towards the people than towards the Government. How small the external trade of Austria has been as compared with the natural resources of that great Empire, will be apparent enough when we say that the total of exports *and* imports in the year 1862 was only worth 53 millions sterling. Remembering that the United Kingdom, with a population less by one-fourth than that of Austria and a mere fraction of its territory, in the old *protectionist* days, before any of the burdens on industry had been taken off, *exported* alone commodities up to this value (and the imports in the end must be of equal real value with the exports, for they pay for the exports). it will be obvious at once to our readers how miserably depressed the foreign commerce of Austria is. With great resources, a vast territory, and an industrious people far outnumbering the English, Austria is thus shown to be exchanging with other countries to not more than half the value of the exchanges of the United Kingdom under a protective tariff. But though Austria is in a far worse commercial position than England even before the time of free trade, it is remarkable that in the *stationary* character of her commerce she presents exactly the same phenomena which England presented before the fetters were taken off her industrial energy. For years together, under the old regime, the trade of England never took any start, and the Austrian figures show precisely the same symptoms. After the relaxation of the almost *prohibitive* system which existed before 1853, there was indeed a sudden start, but since then the in-

Digitized by Google

crease has been almost imperceptible, and, as we shall presently see, has been due to the trade with the Zollverein—the only part of the world with which the Austrian commerce has not been narrowly restricted:—

VALUE of AUSTRIAN IMPORTS and EXPORTS (without the precious metals).

	Imports.	Exports.	Totals.
	£	£	£
1853	19,467,200	21,040,900	40,508,100
1858	25,723,300	22,967,300	48,690,600
1859	20,063,100	21,737,000	41,800,100
1860	20,884,000	26,466,100	47,350,100
1861	21,669,900	29,029,300	50,699,200
1862	23,896,400	29,297,800	53,194,200

No doubt there is a progress, especially in the Austrian *exports*, due no doubt in part to the changes in the English wine duties,—but it will be observed that in imports the value of the trade in 1862 falls considerably below that in 1858, the value being barely 24,000,000*l* sterling in 1862, and near 26,000,000*l* sterling in 1858. France, with about an equal population, imported in the same year to the value of 97,000,000*l*, and exported to the value of 105,000,000*l* sterling, or had a commerce very nearly quadruple that of Austria.

But the case for a revision of the Austrian tariff becomes much stronger when we look into the details even of such trade as it had. The Austrian commerce by sea, chiefly by way of Trieste, is small, and the value of the whole trade was thus made up in 1862:—

	£
Commerce by sea.....	9,860,000
Commerce by land with Zollverein	30,570,000
Commerce by land with other countries	12,770,000
	53,200,000

In other words, three-fifths of the whole commerce in 1862 was with or through the Zollverein, with which the duties were comparatively light. And not only is this the most considerable, but it is the only prosperous, the only increasing, part of the Austrian commerce. Thus we find the analysis of the *imports* of Austria before the relaxation of the prohibitive system, afterwards, and at the present time, to be as follows:—

	1852.	1858.	1862.
	£	£	£
Imports from Zollverein.	7,231,000	13,236,000	14,310,000
Imports from other countries..	6,018,000	5,321,000	5,208,000
Imports by sea	6,217,000	7,165,000	4,377,000
Total imports.....	19,466,000	25,722,000	23,895,000

From this it is obvious enough that the effect of the alteration in 1853 was *less* to increase the total import trade of of Austria than to divert it from its previous channels to the one favoured channel, that by way of the Zollverein, where the least duty is paid. The imports into Austria, by way of Trieste, and the seaports, and by the foreign frontiers, have fallen off by about 2,700,000*l*, while those by way of the Zollverein have only increased by 7,100,000*l*, leaving no doubt a real gain to Austria by the change of 1853, but yet one very trifling in comparison with the diversion in the lines of traffic.

We are now in a position to form some general estimate of the prospects of Austria from the change of tariff to take effect in July. The change is not a very large one; it is no doubt a timid and tentative change, but is in the direction of free trade, and good so far as it goes. The Zollverein will lose their special advantages as the avenue to Austria, for the principle of the new general tariff is to adopt the new treaty with the Zollverein as its basis, and thus get rid of the mischievous practice of differential duties. At the same time, the general customers of Austria (Zollverein included) will not in future be in anything like so favourable a position as the Zollverein exclusively has been up to the present time. The *greatest* reductions of duty only go so far as bringing down the general duty to the level of the former Zollverein duty,—while in a great number of cases the duty to all importers will be in future something *between* the duty hitherto paid by foreigners and that hitherto paid by the Zollverein. In English woollens, worsteds, and cottons indeed, the duty will be reduced as low as the late Zollverein duty; that is, these goods will enter by Trieste and other routes at the same duty as that at which they, or similar goods, have hitherto entered by way of Saxony. For the common worsted goods the reduction would in practice be from about 37½ per cent. of the value to 22½ per cent. *if* they had hitherto always paid the foreign duty. The chances are, however, that many of those which have reached Austria have got there through Saxony, and been imported as Zollverein-manufactures at the lower rate. Again, the new duty on iron will not be so low as the old duty to the Zollverein, though lower than that to foreign countries. Thus English pig iron has hitherto paid 2.10 florins per centner, and Prussian pig iron only 1 florin. The new duty for both will henceforth be 1.50 florin. Polished iron plate, tin plate, &c., from England has hitherto paid 5.25 florins per centner, and German only 2.62 florins, but now both alike will pay 4 florins. Again, black iron plate, iron wire, iron and steel in bars, from England, have hitherto paid 40.20 florins per centner, and German only 1.50 florin; in future both will pay 2.50 florins. And the same principle of putting the new duty between the old duty to foreigners and the old duty to the Zollverein has been very generally adopted. The change, therefore, for English goods formerly smuggled over the Saxon frontier as German goods will be for the worse; but of course the change will do away to a great extent with the bad practice of smuggling.

On the whole, therefore, we do not think that the new changes can do more for Austrian commerce than the change of 1853, if it does as much. But, by sweeping away differential duties, and rendering it a matter of indifference whether our goods go by sea to Trieste or by way of the Zollverein, no doubt some advantage will be gained. But it is only as an instalment that the change of next July can have any considerable interest for us. It will not in any great degree increase our trade with Austria, but it will prepare the way for a very considerable increase of trade at some early period, when Austria has learnt that she only gains by this tentative change, and that the Zollverein under its new treaty with France is gaining a larger and larger share of the trade of the world, in which Austria might participate if she would only go further in the same path.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

Owing to this being Ascension and a holiday, the return of the Bank of France has not been issued: it will appear to-morrow.

The Bourse is closed to-day. Since my last it has been much agitated by the news from America, and there has consequently been a fall in the majority of securities, that on Mexican stock being very heavy. The Government, however, makes its newspapers represent that the Washington Cabinet cannot fail to take measures for preventing enrolments for Mexico, and that consequently there is no real danger of a conflict between the United States and France. The following are the comparative quotations of Thursday last and yesterday:—

	May 18.	May 24.

The report of the Committee on the Budget, presented to the Corps Legislatif, though it took months to prepare, is so full of errors, even in items of great importance, that a table of errata has had to be distributed to the members. The political sagacity of the Committee is, besides, about on a par with its accuracy in figures,—the report, after briefly noticing the political events of the past year, declaring that to "the sentiment of just pride with which the glorious part played by France inspires us, is added the lively satisfaction of not perceiving abroad any complication which can impose on her new sacrifices." In presence of the recent news from America, this assertion is certainly curious. Though the report demonstrates that the financial situation of France is not satisfactory, it shows that it is improving,—a fact of which all the honour belongs to M. Fould. In 1860 the deficit was 119,000,000f, and in 1861, 164,000,000f; and in those years M. Magne was Minister: but under M. Fould the deficits were cut down to

Digitized by Google

34,000,000f for 1862, and 22,000,000f for 1863; whilst that of 1864, in spite of a reduction in the registration duties and modifications in the sugar duties, will probably be only from 22,000,000f to 25,000,000f. His Excellency has, too, succeeded in reducing to moderate limits the supplementary credits which were formerly carried to such an extent as to cast budgets into confusion:—in 1862, these credits were 239,000,000f, in 1863 only 215,000,000f, and in 1864 87,000,000f. He has, moreover, succeeded in reducing the transfers by Ministers of sums voted for certain specified purposes to other objects from 32,000,000f in 1862 to 10,000,000f in 1864; and, finally, the floating debt which in 1862 was 937,523,379f was on the 1st of the present month cut down to 873,484,300f. Next to these facts, what is most noticeable in the report is the expression of a wish that the French troops may be recalled from Mexico as promptly as possible, and that France, "renouncing warlike enterprises, may henceforth devote all her energies to the productive labours of peace." Afterwards, the report treats of the different branches of revenue, examines the rectified budget of 1865, and reviews the budget of expenses and receipts of 1866. All this it does at a length which is as wearisome as it is unnecessary. The upshot as regards the budget of 1866 is, that the committee alters various small items set down by the Minister of Finance both in the expenditure and in receipts, and fixes the total of the former at 1,698,292,290f. of the latter at 1,699,901,837f, leaving a surplus of 1,609,547f. But this is the ordinary budget; the extraordinary one is fixed at 151,718,800f in expenses, and 151,805,011f in receipts—surplus, 86,211f.

The bill on cheques has at last, after about two years elaboration and much discussion, been passed by the Corps Legislatif. In the form in which it was originally presented by a committee of the legislature, it was so imperfect that it had to be sent back for revision; but it has not gained much by that operation. It enacts that the holder of a cheque must demand payment within five days from the date, if it be payable in the place in which it is drawn, and within eight days if payable elsewhere, under pain of losing all claim on the endorsers, and even on the drawer "if the provision shall have perished." It also enacts that the issue of a cheque without date, or with a false date, shall be punished by a fine of 6 per cent. on the amount; and that the drawing of a cheque without previous deposit of funds shall be punished with the same fine "without prejudice to the application of the penal laws if thought desirable." The bill further enacts that though a person may draw a cheque without doing what the French laws call an "act of commerce," and thereby placing himself within the operation of commercial laws, "all the enactments of the Code of Commerce relative to the joint responsibility of drawer and endorsers to protest, and to the exercise of action in guarantee in the matter of bills of exchange, should be applicable to cheques." It is evident that such enactments as these will make people exceedingly wary in drawing, and still more in receiving cheques;—and moreover lawyers maintain that the latter part of them will produce grave technical difficulties, especially when combined with the definition of a cheque given in another clause, namely, that it is "a writing" in the form of an order to pay disposable funds standing to the credit of the drawer in the office of the person drawn on. There is indeed only one single clause in the whole bill which has escaped animadversion from economists and men of business; that which declares cheques free from stamp duty. At first it was intended to confine the bill to that simple enactment, leaving cheques under the operation of the existing laws, and leaving time and experience to show the modification therein which might be desirable. If that had been done, no doubt a vast and rapid extension of the cheque system might have been expected. But the terrible mania of the French for minutely regulating all matters has prevailed, and the result is a measure which may be justly entitled "a bill for discouraging the use of cheques."

The observations which from time to time I have to make about the Bank question in this country have the misfortune never to obtain general satisfaction here. When they tend to show that the fixity of interest is a fallacy they give offence to the school and the following of M. Isaac Pereire; and when they are not favourable to banking monopoly they displease the partisans of the Bank of France. Yet in both cases they are in accord with great authorities, both in political economy and in practical business. What I said in the letter in the ECONOMIST of the 6th May about the evidence of the Rue du Sentier traders before the Superior Council of Commerce in the Inquiry on Banks, has brought forth the following epistle from a very learned and influential personage:—

"I consider your letter very unjust and very severe for these gentlemen. They are not a handful of mere shopkeepers confined to the Rue du Sentier, but three hundred honourable merchants and manufacturers, doing business to the amount of 500,000,000f or 600,000,000f* and perhaps more. Next, if they presented contestable propositions—and to whom does it not happen to do so?—they displayed great intelligence, made many sensible remarks, and expressed some very just opinions. What they said of the capital of the Bank, and of the number of its branches, was in particular extremely sagacious, and their opinion that the number of bankers in the directory of the Bank ought to be reduced, is not so foolish as you seem to indicate.

"As to your prognostication that the inquiry will result in a triumph for the Bank of France, it will be well to wait and see. Who can flatter himself that he knows the future? Who can tell what will be said in an investigation which has only just been commenced? The question under discussion may be summed up thus:—Is Commerce made for the Bank, or the Bank for Commerce? The witnesses the other day were for the second proposition. You must admit that for poor shopkeepers they were not so silly."

In answer to this letter, I beg to state that I know well that the petitioners for the inquiry respecting banks who were represented in the last sitting of the Superior Council, consist of a considerable number of eminent commercial men; but as they are headed by some dealers in tissues of the Rue du Sentier, it has for the sake of convenience become the fashion to speak of them as the Rue du Sentier traders. What they said before the Council I only know from gentlemen who were present, no reports of its proceedings being published, which *par parenthese* is much to be regretted. But that they entirely failed to present anything like a "reasonable reason" in support of the doctrine of the fixity of a low rate of interest I am assured, and that is really easy to believe. If they expressed the opinion that any change in the mode of employing the capital of the Bank, or of constituting the Board of Directors, could exercise any influence on the rate, I humbly venture to think that they were in grievous error. In predicting the triumph of the Bank in the inquiry there was no rashness, albeit the trade of prophet is proverbially dangerous: for the prejudice in favour of the Bank is so strong in high commercial circles and in governmental regions, that the clearest and most weighty evidence would be required to overcome it; and yet, instead of such evidence, we see the very men who petitioned for the inquiry, and who, in the face of the public, took an engagement to prove that the Bank can lend money cheap at all times,—we see their present "contestable propositions,"—a polite phrase, I presume, for propositions that are untenable and impracticable. After them there only remains M. Isaac Pereire, and he I apprehend, with all his vast talent, can say nothing more than he has written down in his book. And whilst the adversaries of the Bank thus fail in their great means of attack—the fixity of interest—they have grown lukewarm in the campaign they commenced against the Bank's monopoly of the issue of notes, the point in which it is really vulnerable. M. Michel Chevalier writes no more on that matter in the *Journal des Debats;* M. Pereire issues no more pamphlets; the zeal of M. Courcelle-Seneuil has slackened; M. Leonce de Lavergne is silent; the pen of M. Coebut is broken; there are no more squabbles in the Academy of Moral and Political Sciences; and the Society of Political Economy has resumed its dull discussions of dull questions.

The subscription at Turin to the part of the new Italian loan reserved to Italy has been extraordinarily successful, the amount offered being almost eleven times that which was needed,—about 86,000,000f rente to 8,000,000f. This success has attracted the serious attention of Parisian capitalists, and will probably have the effect of bringing Italian stock into greater favour than ever in France.

Nothing has yet been settled as to the manner or the date at which the new loan of 250,000,000f for the City of Paris is to be raised.

The Agra and Masterman's Bank is about to establish a branch at Paris, which is to be under the direction of M. de Laski, banker, M. Pastre, President of the Chamber of Commerce of Marseilles, M. Arles Dufour, member of the Chamber of Commerce of Lyons, M. Delessert, director of Messageries Imperiales, M. Sautter, banker, and Mr Lynch, chairman of the London and Bagdad Banking Association.

The Chamber of Stockbrokers of this city has decided that henceforth variations in quotations may be as low as 2½ centimes for French and Italian stock; 25c for railway bonds; and 25c for shares and bonds of companies of the value of 300f and under. Formerly the lowest variation allowed was 5c in stock, and 1f 25c in shares and bonds.

A Nantes letter says that a report which was current some days back of the failure of a great French house at Batavia is confirmed.

The meetings of the shareholders of the Spanish Credit Mobilier, the North of Spain Railways, and the Cordova to Seville Railway, which had been called for the 31st, 29th, and 30th May, have, on account of sufficient shares not being deposited, been postponed to the 17th June. These companies, as is known, are in connection with the Credit Mobilier of Paris. The meetings are to be held at Madrid.

A treaty of commerce has been concluded between Prussia and Belgium, and the former has entered into negotiations for one with Italy. The treaty of commerce between France and the Hanse towns is to come into effect at the same time as that between France and the Zollverein.

Great interest has been excited by a law-suit which has for some time been proceeding before the Tribunal of Commerce, between the Societe Neerlandaise de Commerce et d'Industrie, and a Mr Landauer, a Bourse speculator, the Company demanding

* These are the figures given, but they seem exaggerated.

Digitized by Google

from him 1,686,056f for money lent on deposit of securities, and he not only disputing his liability, but claiming from the Company 761,485f as balance due on some speculating transactions. The case turned on the point whether numerous speculations which Landauer had undertaken at Paris, in conjunction with M. Mendel the managing director of the Company, who has taken to flight, were on his (Landauer's) own account or on that of the Company. The tribunal, in a judgment just given, has found that Landauer did not act for the Society, and it has accordingly rejected his claim, and ordered him to pay the 1,686,056f demanded. The case created interest in consequence of the Credit Mobilier being largely interested in the society and having been concerned in some of the transactions which took place.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 24th day of May, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,909,355	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14 359,355
		Silver Bullion	...
	29,009,355		29 009.355

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,984 441
Rest	3 220 530	Other Securities	19 719 276
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,997 105	Notes	8,147,440
		Gold and Silver Coin	939 913
Other Deposits	13,551 860		
Seven Day and other Bills	468,575		
	39,791.070		39,791,070

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21.330,490	Securities	30,800,717
Public Deposits	7,997,105	Coin and Bullion	15,299,268
Private Deposits	13,551,860		
	42,879,455		46.099,985

Dated the 25th May 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,220 530*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£438,552
AN INCREASE of Public Deposits of	336,123
AN INCREASE of Other Deposits of	62,569
No change in Government Securities.	
A DECREASE of Other Securities of	307.925
AN INCREASE of Bullion of	275,355
AN INCREASE of Rest of	7,265
AN INCREASE of Reserve of	720,440

The changes in the above account are unusually extensive and sufficiently account for the reduction in the rate of discount this week. The reserve shows the important addition of 723,440*l*, while the bullion has increased by 275,355*l*. The diminished demand for money is shown by the reduction in the other securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20 637,674	21,265,561	20,909,819	20,868,047	21,330,490
Public deposits	5 196,161	6 957,808	8,002,346	7.971,0 3	7 997,105
Other deposits	11 932,316	14,685 087	13,842,718	12,884,042	13,551,860
Government securities	12.1:0,721	10,335,491	11,151,395	10,785,267	10 984,441
Other securities	12,315,896	19,392 213	20,163,795	20,414.915	19,719,276
Reserve of notes & coin	11.447,466	10,225,585	8,776.279	7,947,138	9 087,353
Coin and bullion	17,064,781	16.178,815	14,500,019	13,713,943	15,299,268
Bank rate of discount	4 p c.	3 p. c.	4 p. c.	7 p. c.	4 p c.
Price of Consols	92¼	92¼ xd	92¼	91⅝	90⅞
Average price of wheat	76s 10d	56s 9d	46s 8d	39s 8l	41s 8d
Exchange on Paris (short)	25 15 20	25 20 25	25 17½ 25	25 22½ 30	25 17½ 22½
— Amsterdam ditto	11 0⅝ 12	11 16 16⅛	11 15⅝ 16	11 17⅜ 18	11 17 17⅛
— Hamburg (3 months)	13 7¼ 8	13 8¼ 8¼	13 7¼ 7½	13 8¼ 9	13 9½ 9⅝

In the corresponding week of 1855, General Canrobert had tendered his resignation as Commander-in-Chief of the French army in the Crimea, and had been succeeded by General Pelissier. The Austrian Cabinet had expressed its desire to send a further message to St Petersburg before taking an active part in the struggle. New gold discoveries had been made at Mount Ararat in Australia. The funds were firm, and a considerable rise had taken place in Consols.

In 1862, the details of Mr Laing's Indian Budget had been received. The opening of the new Prussian Chambers had taken place in the absence of the King. The demand for money in England had increased, and the Bank of England had raised the rate of discount from 2½ to 3 per cent. The differences between the intervening Powers in Mexico had occasioned a little uneasiness, and a decline in Mexican stock.

In 1863, the rate of interest at the Bank of England had been advanced from 3 to 3½ per cent., and from 3½ to 4 per cent., at two successive sittings of the Directors.

In 1864, the King of Prussia had made a speech in reply to the address requesting that Schleswig-Holstein might be made an independent State. Public opinion in Copenhagen had assumed a more warlike tone. A deputation had waited on the King, urging him not to prolong the armistice. The Ministerial crisis at Brussels had terminated, all the Ministers having withdrawn their resignations. At Lisbon, a Royal decree had been published creating a Colonial Bank. At Turin, the commercial treaty between Holland and Italy had been approved. The news from Algiers was more favourable. Two great battles had been fought in Virginia between Generals Grant and Lee. The Federal losses had been estimated at 40,000 men in killed, wounded, and missing. The Bank of France had lowered its rate of discount from 7 to 6 per cent., and the Bank of England from 9 to 8 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 383,490*l*; in 1862, a deficiency of 4,707,126*l*; in 1863, a deficiency of 6,321,077*l*; and in 1864, a deficiency of 7,532,873*l*. In 1865, the deficiency is 6,167,416*l*.

DISCOUNT AND MONEY MARKET.—The Bank of England yesterday lowered their rate of discount from 4½ per cent., at which it had been fixed three weeks back, to 4 per cent.

The increasing ease in the money market in the commencement of the week had generally prepared the public for this step, although in some quarters it was thought that any change would be postponed for a week. The rapid accumulation of the resources of the Bank, however, as shown by the return published above and the continued influx of bullion fully warranted an immedlate reduction. In the open discount market the demand remains light, and the best short paper is taken at a fraction below the official minimum. For six months' bills there is a notable diminution in the rates indicating a general return of confidence, notwithstanding the announcement of further large failures and the fear that others will follow. Annexed are the current terms for paper of various dates :—

30 to 60 days	3⅞ per cent.
3 months	4 per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange the supply of money is abundant and large sums are offered on Government securities at 2 to 2½ per cent.

The discount houses and joint stock banks have reduced their allowances on deposits ½ per cent., the following being the present terms :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

About 131,000*l* in gold was sent into the Bank to-day, and 72,000*l* yesterday.

The Crown agents for the colonies are inviting tenders, receivable until Tuesday, the 6th of June, at 1 p.m., for Cape of Good Hope Government Six per Cent. Debentures to the amount of 29,000*l*. These debentures are redeemable in 30 years from the 15th October last. Principal and interest are payable in London. Interest accrues from 15th ult.

The Committee of the Stock Exchange have appointed the 1st of June to be a special settling day in the shares of the China Steam Ship and Labuan Coal Company.

It appears that Earl Russell has informed Messrs Baring Brothers and Co. that the British Charge d'Affairs in Venezuela has made a strong representation to the Government with regard to their conduct towards the British bondholders, whereupon General Guzman Blanco has replied that he had made some proposal to Messrs Baring Brothers, the answer to which he was awaiting; but he endeavoured to excuse the publication of the obnoxious decree as a financial step and for the

Digitized by Google

bondholders' protection; and finally, that he suggested to send a commission to London for the purpose of conferring with Messrs Baring Brothers and Co.

The Credit Foncier and Mobilier of England have announced the issue of 1,212,000*l* A stock of the Metropolitan Extension Railways of the London, Chatham, and Dover Railway Company, in 40*l* shares, at the price of 21*l*. Interest at the rate of 6 per cent. per annum is guaranteed by Messrs Peto, Betts, and Crampton for 2½ years. This project has been received with considerable favour, the shares being quoted 3½ to 4 prem the 5*l* paid, and 4½ to 5 those fully paid.

The following are the rates of discount in the principal cities of the Continent, showing no alteration from last week:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3½	3⅜
Vienna	5	5⅛
Berlin	4	3½
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4¾ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2¾
St Petersburg	5½	5½

English Funds.—The reduction of the Bank rate of discount, the favourable weather, and the contradiction of adverse political rumours which had obtained a certain amount of attention, have caused a rise in the funds of a half per cent., the market closing with a firm appearance. Consols for the account, which left off last Friday at 89 to 89⅛, advanced this morning to 89⅝, buyers, and were last quoted 89½ to 89⅝. For money, the first price was 91 to 91⅛, including the dividend. Reduced and New Three per Cents. closed at 88⅝ to 88⅞, and India Five per Cents., 106⅜ to 106½, being steady.

Exchequer bills are the same as last week, at 2s to 5s premium, while India bonds have improved to 15s to 20s premium.

Foreign Stocks.—Although the amount of business in this department remains limited, prices have shown an upward tendency, nearly all the leading descriptions closing at an advance. Venezuela bonds are the prominent exception. Spanish securities have been chiefly in demand, particularly the Certificates. Turkish Consolides have risen to 48⅞ to 49⅛, and the foreign loans are also higher. Confederate stock is nominally quoted 8 to 10, the same as yesterday, the news by this morning's steamer having exercised no effect on the market. United States Six-twenties, on the other hand, have improved nearly 4 per cent. to 67¼ to 67¾. The new Imperial Ottoman scrip, after falling to 2½ to 2 discount, closed at 2¼ to 1¾.

The last price of French Three per Cent. Rentes, on the Paris Bourse, this evening, was 67f 40c, showing a fractional decline on the week.

The following has been issued with respect to Mexican Arrear Certificates:—"The Committee of the Stock Exchange at Amsterdam have sent the Baron d'Escury to Paris with instructions to take steps to bring about a settlement of the claims of the Mexican Arrear Certificate holders. The agents of the Dutch committee have applied to the chairman of the committee of Mexican Deferred bondholders to invite the British bondholders to join in the formation of a committee to effect an arrangement of this matter, and it is proposed to ask for a liberal grant of land in discharge of the claims of the Arrear Certificate holders."

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

Railways and other Shares.—There has been a good demand for railway stocks this week, purchases being induced in anticipation of the approaching dividends. The traffic returns also continue favourable, and are expected to improve steadily, from the increase of pleasure traffic during the present brilliant weather. Nearly all the leading stocks show an advance of ½ to 1½ per cent., the firmest being London and North-Western, Midland, Lancashire and Yorkshire, North-Eastern, and Great Northern. North British has been comparatively dull.

In the colonial market, there has been an improvement in Great Western of Canada shares. Indian guaranteed stocks were less steadily supported. No change of importance occurred in foreign descriptions.

Joint stock bank shares remain without material recovery. The financial Companies, however, are better, International leaving off at 1⅛ to 1¼ prem.; General Credit, 1⅝ to 1¾ prem.; and Credit Mobilier and Foncier, 3⅛ to 3⅜ prem. In the shares of new Companies, Lion Brewery have again advanced to 3¼ to 3¾ prem.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

Foreign Exchanges.—Owing to the decreasing value of money here, the rates this week have been less firm.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The amounts to hand this week are rather considerable, and comprise—The Poonah, from India and Alexandria, with 22,800*l*; Great Britain, from Melbourne, with 189,000*l*; True Briton, from Melbourne, with 45,000*l*; Africa, from Boston, with 61,000*l*; City of London, from New York, with 121,000*l*. The exports are—15,000*l* to Mauritius by the Syria, from Southampton; and 41,000*l* to Alexandria, by the Messageries steamer, from Marseilles.

India Government loan notes are rather weaker, and may be quoted 108 to 110 for 5½ per Cents., 100 to 102 for 5 per Cents., and 88 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last prices; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 10½d per oz std

Digitized by Google

last price; Spanish doubloons, 75s 6d to 76s per oz; South American doubloons, 73s 9d to 74s 3d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s $\frac{5}{16}$d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅝d per oz std, last price; Mexican dollars, 4s 11¼d per oz, nearest; 5-franc pieces, 4s 11¼d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Scotia, to-day, from New York has brought 187,000*l*, and the Bavaria 22,000*l*. The Red Rover from Port Phillip has 12,000*l*.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The failure has been announced of Messrs Byramjee Cama and Son, of London and Liverpool, and of Mr Byramjee Hormusjee Cama of Bombay. The London and Liverpool houses existed only in the character of agencies, the firm being in reality represented at Bombay. The engagements of the London and Liverpool firms represent at least 1.000,000*l*; and, with the liabilities of the Bombay establishment, the total must approach nearly 3,000,000*l*.

Messrs Lindsay and Co. of Shanghai, and Wilson Ritchie and Co. of Ceylon, have also suspended, but only a small portion of the loss will fall upon London.

The failure of Messrs Rimington, Cartwright, and Co., the London agents of Messrs Leckie and Co., of Bombay, was announced on Thursday. The liabilities are placed at about 250,000*l*, but the assets appear very large, and show a surplus of at least 70,000*l*.

Mr William Duthie, connected with the trade of the Cape of Good Hope, has also also stopped payment. It is expected that his liabilities will not be insignificant, but no certain information has transpired.

The accounts from Liverpool advise the suspension of Messrs Dirom, Davidson, and Co., in the East India trade. The liabilities are placed about 300.000*l*.

The suspension was reported this afternoon of Messrs Braginton, Rimington and Co., of Great Torrington. The liabilities are not believed to exceed 100,000*l*.

PUBLIC COMPANIES.—The report of the Scinde, Delhi, and Punjaub Bank to be presented on the 30th, shows a profit of 31,062*l*, but does not propose a dividend, owing to losses by the late commercial failures.

The directors of the Trust and Loan Company of Upper Canada announce that the available balance of profit for the past half-year is 14,300*l*, out of which a dividend is proposed at the rate of 8 per cent. per annum, with the usual appropriations to the reserve fund and preliminary expenses.

The proposed dividend of the Peninsular and Oriental Steam Navigation Company for the six months ending the 31st March last, is 3½ per cent., without additional payment.

The London Steam Collier and Coal Company (Limited) is announced, with a proposed capital of 300,000*l*, in shares of 10*l* each, of which one-half are to be now issued.

At the adjourned meeting of the Chartered Mercantile Bank of India, London, and China, Mr James Murray Robertson and Mr Ellis James Gilman were unanimously elected directors, in the room of Mr G. P. Robinson and Mr Thomas Stenhouse, resigned. The chairman took the opportunity to state, for the satisfaction of the meeting, that the failure of Messrs B. H. Cama and Co., of which intelligence was received this morning, will cause only a very trifling loss to the Bank. The chairman also mentioned that the Bank would not be sufferers by the failure of Messrs Lindsay and Co. in China, nor by that of Messrs Wilson, Ritchie, and Co., of Ceylon.

The following is from the report of the directors of the London Chartered Bank of Australia, to be submitted at the general meeting on the 2nd of June. On reference to the accounts it appears that after the usual deductions, and also after making allowance for bad and doubtful debts, there remains to the credit of profit and loss the sum of 53.436*l* 14s 9d, out of which the directors recommend that a dividend be declared for the half-year of 4 per cent., free of income tax, 40.000*l*; and they furtuer recommend that a sum of 5,000*l* be placed to the reserve fund, which will then amount to 90,000*l*; leaving to be carried to next account a balance of 8,436*l* 14s 9d.

The prospectus of the Maritime and General Improvement Company (Limited) is in circulation.

A prospectus has been issued af the Dublin Trunk Connecting Railway Company, established for the construction of a line about seven miles in length, forming an extension of the Dublin and Kingstown Railway, which it will connect with the docks and the other main lines of railway by a semicircular course on the north of the city. The capital is 255,000*l*.

At a meeting of the Ionian Bank, to-day, a favourable report was presented, announcing the payment of dividends for the year 1864 equal to 10*l* per cent. per annum.

The Northern Assam Tea Company, founded in October last year, is about to issue 25,000 shares of 10*l* each, to be called B shares, for the purpose of purchasing some valuable estates belong to the Assam Company (the first established in India), contiguous to their own. It is stated as a proof of the profitableness of the business, that the Assam Company in 1863 disposed of their outlying estates in the district of Cachar, for the purchase of which a company was formed in Calcutta, called "The Central Cachar Company," the shares of which company are readily saleable at 25 per cent. premium. Those of the Assam Company are at above 150 per cent. premium.

The Railway Credit Company's share are 1½ to 2 premium.

The subscription list for the A stock of the Metropolitan Extension Railways of the London, Chatham, and Dover Company will close on Saturday for London. and on Monday next for the country. The certificates are 3⅞ to 4⅛ prem.; the fully paid, 4⅞ to 5⅛ prem.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.25 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in London than in Paris.

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria cap. 14:—

Corresponding week in	Quantities Sold.			Average Prices.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended May 20, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	88,015 5	41 8
Barley	8,181 0	29 9
Oats	3,359 3	22 2

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the fineness of the weather and the increased importation of foreign wheat—a considerable proportion of which has gone direct to the millers—the trade for English wheat at Mark lane, to-day, although the show of samples on the stands was limited, ruled heavy, and prices were 2s per quarter lower than on Friday last. Foreign wheat was very dull, and the quotations declined 1s to 2s per quarter. Barley met a slow sale, at about previous rates. Oats—of which there was a large supply on offer—moved off slowly, at rather lower prices. Beans and peas were firm, at full currencies. The flour trade was quiet, on former terms. This week's imports amount to 23,490 quarters wheat, 5,990 barley, 60,380 oats, and 430 sacks of flour.

At Liverpool, this morning, wheat had a slow sale on rather easier terms. Flour and maize were a dull inquiry. The wheat trade at Wakefield was in a most inactive state, and prices had a downward tendency.

There has again been a good and extensive demand for all descriptions in the Liverpool cotton market this week, the trade buying largely. However, as the market has been freely supplied by holders, prices have not been so favourably influenced as would otherwise have been the case. An irregular advance of ¼d to 1d has taken place. Yesterday and to-day a quieter feeling has prevailed, and the trade having supplied their present wants, the demand is on a narrower scale. Prices are again in buyers' favour. To-day's sales amount to 8,000 bales, market closing without animation.

From Bombay, we have letters to April 28. The demand for cotton since the 14th had been in a most inactive state, and at one period there were no buyers of Dhollera at 220 to 225 rupees per candy. The transactions, which were extremely small, were chiefly confined to Dhollera produce. The following tables of prices and exports are from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, April 22.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0¼d Freight 2l 5s. per lb

America	358	...
Grand total	313,408½	307,126

Postal advices from Calcutta are to April 22. During the fortnight prior to that date, the cotton trade was very dull, and prices declined 2 rupees per bazaar maund. The export to England from April 1 to April 20 was 5,217 bales.

Advices from Alexandria to May 20 state that the cotton trade at that date was firm, with an upward tendency in prices. During the week ending as above, a large business had been transacted. Fair open-ginned produce was quoted 14¼d per lb, free on board. The arrivals, from May 5 to May 13, had amounted to 2,532 bales, and the sales to 4,771 bales. The Egyptian Commercial and Trading Company, in their circular dated the 13th inst., observe that "the low state of the Nile this year will considerably shorten the crop, there being not being sufficient water for the young plants; and it is fully expected that there will not be more than two-thirds, perhaps only one-half of the present crop."

The arrivals of cotton at New Orleans for the week ending April 28 amounted to 1,064 bales, making the total received since Sept. 1, including the stock on hand at that date, 58,843 bales. The export for the week ending as above was 1,089 bales, and since Sept. 1, 49,028 bales, leaving the stock on hand and on shipboard at latest date, 9,815 bales.

We have letters from Pernambuco to April 28. Since the 14th, the cotton trade had, for the most part, been dull. The latest quotations were:—Pernams, 12.23d to 12.48-100d; Maceios, 10.16d to 10.79-100d; Paraibas, 12.03-100d per lb, with 5 per cent. commission, but without freight and insurance.

Digitized by Google

The following were the rates of freight for cotton to London and Liverpool, at some of the leading ports at which that staple is exported, at the date of our latest postal advices:—

	London.				Liverpool.			
	£	s	d		£	s	d	
Bombay	2	0	0	to	0	0	0	
Calcutta	2	10	0		0	0	0	
Alexandria	0	0	0		0	0	0

	Liverpool.							
	£	s	d		£	s	d	
Bombay	1	5	0	to	2	0	0	
Calcutta	2	15	0		3	0	0	
Alexandria	0	0	3-16		0	0	0	
New York	0	0	3-16		0	0	0	

Only a moderate business has been transacted in colonial and foreign grocery produce in Mincing lane, this week. As compared with Friday last, scarcely any change has taken place in prices.

Advices from Havana, to May 6, state that the demand for sugar for export to the United States had improved. The general state of the market, however, was by no means active; nevertheless, prices ruled firm. According to Messrs Morales and Co.'s circular, the following were the prices current at the above date:—Cucuruchos, Nos. 8 to 10, 19s 2d to 21s; ordinary yellows, 11 to 12, 21s 7d to 21s 7d; middling ditto, 13 to 14, 22s 2d to 22s 9d; fine ditto, 15 to 16, 23s 11d to 25s 1d; florette ditto, 17 to 19, 26s 3d to 27s 5d; ordinary whites, 26s 10d to 27s 5d; middling ditto, 28s 8d to 29s 10d; fine and florette ditto, 32s 2d to 35s 9d; crystallised, Nos. 15 to 16, 22s 9d to 23s 4d; ditto, 17 to 20, 25s 1d to 25s 8d; muscovadoes, fair to good refining at outports, 17s 3d to 18s 5d per cwt, free on board.

Owing to limited arrivals—only about 1,500 bags per diem—the sugar trade at Pernambuco during the fortnight ending April 28, was firm as regards prices, although the demand had somewhat fallen off. The total export since Oct. 1 had been 28,131 tons, against 37,721 tons last year. The following were the prices at latest date:—Whites, No. 1 to 2, 32s to 32s 11d; No. 3, 30s 7d to 31s 4d; No. 3, regular, 29s to 29s 10d; No. 4, 27s 6d to 28s 3d; Somenos, 25s 2d to 25s 11d; muscovado, yellow, 19s 8d to 20s 6d; good brown, 17s 5d to 19s 4d; ordinary unclayed brown, 16s 3d to 16s 8d per English cwt of 3½ arrobas, free on board, with 5 per cent. commission, but without freight and insurance, at the exchange of 25½d.

During the fortnight ending April 23, the coffee trade at Rio de Janeiro was somewhat active. Certain qualities of produce, however, had been disposed of at rather easier terms. A few parcels of the *new* crop had arrived at market. The quotations were as follows:—Prime superior, 61s 1d to 69s; superior and prime good first, 64s 8d to 66s 5d; good first, 61s 2d to 62s; ordinary, 55s 1d to 56s 10d; good second and ordinary, 49s 10d to 53s 4d, f.o.b., including freight 60s, at the exchange of 25½d.

From the leading rice ports in British Burmah, we learn that the rice trade was very firm. The demand, both for shipments to th Straits and China, as well as to Great Britain, had ruled active, and a considerable advance had taken place in prices. The export returns of the various ports showed an increase in the shipments to the last, but a decrease in those to Europe, as compared with last year.

Continental—more especially French—buyers having operated freely, and having taken more than an average quantity of produce, the public sales of colonial wool have gone off with a fair amount of activity during the week. In prices, no changes of importance have taken place; but the tendency of certain good and fine qualities, suited to the uses of foreign buyers, is decidedly in an upward direction from the late lowest point. For English wool, in the private contract market, there is a moderate demand, at about stationary prices.

A report from Port Elizabeth, dated the 11th ult., thus alludes to the state of the wool trade at that port:—Wool has begun to come in more freely from the country districts, and the market has of late been better supplied. The demand for wool of really good quality, both washed and in the grease, continues, and prices remain unchanged, except for seedy, burry, or otherwise inferior parcels. Indeed, the market is very firm, as is evidenced by the fact that despite the cash terms on which produce is now sold, and the marked reduction in the rate of exchange, former prices are maintained. The wool arriving this season is, on the whole, much superior to last year's clip, both in quality and "get up." It is of longer staple and sounder in every respect. The following may be quoted as the current rates:—Fine fleece-washed, 1s 2d to 1s 3¼d per lb; medium, 1s 1d to 1s 2d; hand-washed, superior, 1s 4d to 1s 5d; medium to good ditto, 1s to 1s 1½d; inferior seedy, 10½d to 1s; fine unwashed superior, 7¾d to 8⅛d; medium, 7d to 7¾d; inferior short and seedy, 6¼d to 7d. Export in March, 4,609 bales.

In the metal trade, the chief feature is a considerable fall in the value of spelter, the quotation being 21*l* 5s to 21*l* 7s 6d per ton on the spot. Scotch pig iron is less active at 53s 3d cash, mixed numbers. Other metals may be considered steady. Linseed oil is firm at 32s per cwt on the spot. In other oils, a very moderate business has been transacted. The tallow trade is quiet at 40s 6d per cwt on the spot.

Advices from New York state, that up to May 13, nearly one-half of the new seven-thirty loan has been absorbed by the public; and that 230,000,000 dollars of the second half would be issued immediately, a portion of the interest on which the Government would reserve the right of paying in currency. The premium on gold on the 16th instant was 30½ per cent. The money market was quiet: prime short bills were quoted at 6 to 7; 3 to 4 months' do, 7 to 8 per cent. Trade on the whole was in a tolerably healthy state. The public sales of cotton and woollen goods had gone off with a fair amount of animation, at fully late rates; and the demand for grocery produce, by private contract, had ruled steady, at full prices. The stock of bullion in the banks on the 6th inst. was 4,017,680*l*, being an increase of about 208,000*l* as compared with the previous week; whilst the balance in the Sub.-Treasury had been increased to 7,440,800*l*. The shipment of specie for the week ending May 6, was 117,570*l*, raising the total, since Jan. 1, to about 1,210 000*l*; against 3,472.900*l* last year; 3,466,020*l* in 1863; 2,724,500*l* in 1862; 575,420*l* in 1861; 1,905,960*l* in 1860; and 3,354,370*l* in 1859.

THE COTTON TRADE.

LIVERPOOL—May 19.

The increased demand for cotton noticed at the close of last week has been followed by a very extensive business daily, and the advices from New York and of the Manchester market have aided to confirm the confidence of buyers both for the trade and for export. Prices have further advanced, but only moderately, considering the extent of sales. On Wednesday three was less animation, and the confirmation of large failures in Bombay and elsewhere has tended to create a quieter feeling, the market closing with some concession from the extreme prices of Tuesday. The reduction of the Bank rate to four cent. became known only late in the day. Sea Island has been in good request, and some descriptions are 1d to 2d per lb dearer. American continues in demand from the trade and exporters, and closed at ½d to 1d per lb above last week in the current qualities. In Brazil large transactions have again taken place, at an advance of ¼d to ⅜d, per lb. Egyptian has been in good demand throughout the week, and gradually advanced 1¼d, but yesterday was more freely offered, and declined ½d per lb in some instances from the highest point. The business in East India has been very extensive at a rise of about ½d per lb in almost all qualities; subsequently the desire to sell has increased, and prices are barely supported at this advance.

The transactions, to arrive, reported during the week, have been:—In Egyptian, on Saturday, fair open, at sea, 14½d; Maceio, fair average, ship named, on Monday 13½d, and on Tuesday 13⅝d; Bengal, fair new, at sea, 6½d on Tuesday, and April shipment 6¼d yesterday.

The sales of the week amount to 108,770 bales, including 16,770 on speculation, and 32,770 declared for export, leaving 59,230 bales to the trade. The sales to-day amount to about 8,000 bales, with a quiet market.

LONDON—MAY 26.

The following is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened with a good demand, which increased on the receipt of news of continued high prices in New York. The daily sales were on a large scale until Wednesday, and prices showed a pretty general advance of ¼d per lb; but the heavy failures announced during the last two days have had the effect of limiting operations, and ¼d of the above advance has been lost.

NEW YORK—MAY 13.

A somewhat extensive business has been transacted in cotton this week. Prices have fluctuated considerably, and are, to-day, 5 cents per lb higher than on Saturday last. In the early part of the week, middling Upland produce realised 56 cents; but the quotation is now 53 cents per lb. The total sales are estimated at 15,100 bales. The arrivals amount to 2,174 bales, making the total import since Sept. 1, 196,301 bales.

NEW YORK, May 16.—The cotton trade is dull, middling Upland produce being quoted at 50 cents per lb. The following are the prices current:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.

MARKETS IN THE MANUFACTURING DISTRICTS

The demand for cotton goods in the manufacturing districts, this week, has been far from active, yet prices have ruled firm. Cotton yarn, however, has sold readily, and considerable business has been done for shipment to the continent, on higher terms Woollen, silk, and flax goods have changed hands to a fair average extent, at fully late rates. The pig iron trade has ruled quiet; but for manufactured iron, there has been a moderately active demand, at full prices. About an average business has been done in coals.

MANCHESTER, May 25.—The activity in the cotton market has occasioned a stronger feeling here this week. Yarns, especially in the finer numbers, have gained considerably in price, as much as 2d per lb advance having been obtained on 60's twist. India buyers refused to pay more for goods, and the business in this department is on rather a small scale this week. For other kinds of cloth there is a fair general demand, and prices are tending upwards:—

BRADFORD.—The tone of the wool market is decidedly quieter. Prices remain the same. Some rather extensive orders have been placed in yarns, and spinners are generally better employed. A better business is doing in pieces for both home and foreign trade, and prices have a hardening tendency.

LEEDS.—The woollen cloth trade continues much the same. Purchases are of a miscellaneous character as to goods, and are not very large in quantity. A little more business is doing in heavy goods. The flax trade is steady

ROCHDALE.—Some firms are doing an improved business in fancy goods, and especially for the best and medium sorts, the prices of which keep well up, and are not affected by the languor in other branches. The demand for Yorkshire common woollens is poor.

NOTTINGHAM.—There is barely so much doing in some departments of the lace trade. Silk mechlins continue in excellent request, the prevailing fashions being greatly in favour of this class of lace. Black silk laces for trimmings meet a fair inquiry. Other branches of the silk trade are rather quiet.

LEICESTER.—The hosiery trade remains buoyant, there being a good business in hosiery generally. Manufacturers continue well employed with orders on hand, and no stocks of any kind are allowed to accumulate. Yarns are firm, and high prices are quoted. In wools there is no important change, prices remaining very high.

HUDDERSFIELD.—Various parcels of summer stock have been cleared out at reduced rates, in consequence of the lateness of the season, but except in this case prices keep very firm for all sorts of goods. Manufacturers of better class goods in fancy trouserings and coatings are now receiving orders to pattern for next season's goods more freely than of late.

NEWCASTLE.—The trade of the district has been rather flat. The chemical market is without much change. Crystals of soda are a little firmer.

NEWPORT.—The improved feeling in the iron trade is maintained. The continental inquiry remains without change, and the home requirements are pretty good.

DUNDEE.—Our flax market has continued firm, and the business doing, both in goods on the spot and on contract, has been at full rates. In jute there is very little activity, consumers being in many instances supplied with arrivals via London or Liverpool. The yarn market is very firm. There is rather more demand for some kinds of linens, but, upon the whole, this branch of our trade is not active.

SHEFFIELD.—Inquiries for Sheffield goods for America are more numerous. Some good orders have come to hand lately from Australia, and there is still a moderate trade with France and some other continental States. In the home market the orders are still below the average.

WOLVERHAMPTON.—There is a steady, though not active demand for most kinds of finished iron, and, as a rule, the works in this district are pretty fully employed.

BIRMINGHAM.—The trade of this town remains dull; the orders coming in on account of the country trade are moderate for all descriptions of hardware goods, manufacturers having barely enough to keep their establishments at work full time, and in some branches stocks have been augmented; this is the case with the jewellers and some other of the fancy trades.

BELFAST.—A steady consumptive demand continues for all qualities of yarn, at full prices, though the tone of the market is rather quieter, in consequence of a decline in the speculative tendency. Stocks, however, are very small. The supplies of flax in the country markets are small, although larger than at the corresponding period of last year. Prices are advancing.

Digitized by Google

GLASGOW.—The iron market has been dull, with a tendency towards lower prices.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 13.—The arrivals of flour have been large, and the trade has ruled heavy on easier terms. About 40,000 bushels of wheat have been taken for export during the last few days, but at fully the late decline in prices. Corn has sold heavily, at reduced quotations. The following are the prices current:—Flour—State, superfine brands, $6 to $6.35; State, extra brands, $6.50 to $6 65; State, choice brands, $6.70 to $7; Ohio, common brands, $7.25 to $7.50; Ohio, fancy brands, $7.55 to $7.60; Ohio, good and choice extra brands, $7.65 to $9.30; Michigan, Indiana, Wisconsin, &c., $6 to $6.95; Genesee, extra brands, $7.10 to $9.25; Missouri, $7.60 to $12; Canada, common, $6.55 to $6.95; Canada, good to choice extra, $7 to $8.25 per barrel. Wheat—Milwaukee Club, $1.40; No. 2 Chicago spring, $1.32½; No 1 ditto, $1.40. Corn—New yellow, $1 to $1.20; mixed Western, $1; white New Orleans, 95 cents per bushel.

NEW YORK, May 16.—The demand for wheat and flour is in a sluggish state, at barely late rates.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing to the prevailing fine weather, and the favourable accounts at hand from nearly all all parts of England in reference to the appearance of the crops generally, the wheat trade has been very inactive this week. The small supplies of English wheat on the stands have been with difficulty disposed of at previous quotations, and there has been only a limited inquiry for foreign, at late rates. Both English and foreign barley has met a dull inquiry, at about stationary prices. Malt has come freely to hand, and all kinds have moved off heavily, at the late decline in value. The imports of foreign oats having been very large, the oat trade has continued in a sluggish state, and the currencies have had a downward tendency. Beans have ruled a shade higher. Unusually small qualities are now held by the growers. In the value of peas, no change has taken place. Both English and foreign flour has moved off slowly, but at full prices.

The country markets have been scantily supplied with wheat; nevertheless, both red and white qualities have met a dull inquiry, at late rates. Spring corn has commanded very little attention.

On the continent, the transactions in wheat, especially in fine qualities, have been on the increase, and a full average business has been passing in barley and oats at full quotations.

In Scotland, the wheat trade has ruled heavy. Prices, however, have been fully supported. Barley and oats have commanded less attention.

The Irish markets have been dull for wheat at late quotations. In other kinds of produce, the transactions have been on a moderate scale.

Although the supply of English wheat on sale at Mark lane, to-day, was small, the trade for all qualities was very dull, and prices were 2s per quarter lower than on Friday last. Foreign wheat—the import of which has increased—sold heavily, and the quotations declined 1s to 2s per quarter. Barley met a slow sale at barely late rates. Oats, owing to the large importation, were very dull, and rather lower in prices. Beans and peas steadily supported previous rates. The flour trade was quiet, at about stationary prices.

Mr George Dornbusch reports the arrival off coast of 21 cargoes of grain. The demand for nearly all kinds of produce has fallen off, and the quotations are barely supported. Cotton seed has sold at 6*l* 10s to 6*l* 15s per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY NIGHT.

SUGAR.—A firm tone still pervades the market, and prices have occasionally ruled 6d per cwt higher than on Friday last, with a continued good demand from the trade. Floating cargoes also readily saleable. Of West India, 2,413 casks had changed hands to yesterday (Thursday afternoon), including Barbadoes, by auction at 29s to 36s per cwt. The deliveries are still large, and the stock at this port shows some further reduction. 72,400 baskets Java offered at auction by the Netherland Trading Company this week sold rather dearer.

Mauritius.—About 5,000 bags have changed hands by private contract, and 5,416 bags by auction were disposed of as follows:—Grainy and crystallised, 34s to 38s; brown, 32s 6d to 33s; soft brown and grey, 30s to 32s 6d; grainy, 11s 8d duty, 38s 6d to 39s 6d per cwt.

Bengal.—3,725 bags about two-thirds sold; yellow Gurpatta date, 32s to 33s; low brown sorts, 24s 6d to 26s 6d; Dalloah, 26s 6d to 28s 6d per cwt.

Madras.—3,621 bags chiefly sold: native, 26s to 21s; low soft brown sorts, 22s to 24s 6d.

Manilla.—Business has been done in clayed privately at 30s. By auction 4,753 bags sold at 30s to 31s 6d. 1,550 bags grocery realised 36s 3d per cwt.

Other Foreign.—448 casks Porto Rico sold steadily at 32s to 37s 6d; 605 bags Siam (11s 8d duty) were taken in at 38s. Five floating cargoes of Cuba muscovado have sold for the United Kingdom at 21s 6d to 22s 9d; one of Porto Rico at 22s 9d; one of brown Bahia at 21s. 1,200 boxes Havana on the spot, No. 13, at 27s per cwt.

Refined.—The market continues firm, and the lowest price of dry goods is now 43s 6d per cwt.

RUM continues steady. Demerara has sold at 1s 7d. Jamaica maintains the recent advance. 100 puncheons old Penang at 1s 5d per proof gallon.

COCOA.—Of 1,085 bags Trinidad by auction, the greater part sold at 60s to 87s 6d per cwt, being previous rates.

COFFEE.—The sales have passed off with fair spirit at stiffer rates, especially for coloury plantation Ceylon, and the market generally is firm. 958 casks 1,141 barrels and bags sold from 79s to 85s for low middling and small to good middling, up to 95s 6d for fine. 689 casks 2,771 bags native, at 66s to 70s 6d for ordinary to fine. 2,300 bags Guatimala sold at 72s 6d to 80s. 1,500 bags damaged Rio at 62s. 60 barrels 332 bags Jamaica, 70s to 102s per cwt. A floating cargo of good first Rio sold at 64s 9d for Trieste.

TEA.—The market is firm, but without much animation pending the new duties coming into operation on the 1st inst. Fine and finest grades congou are readily saleable.

RICE.—A moderate business has been transacted in soft grain descriptions at 9s 3d for Necrancie, 9s 3½d to 9s 6d Bassein, and 10s 6d per cwt for good Rangoon. No sales reported in white Bengal.

SPICES.—Black pepper remains quiet. 336 bags Singapore, by auction, were taken in at 3¼d to 3⅜d. Of 3,018 bags white Singapore, two-thirds sold at ¼d decline, from 5⅜d to 5¾d, with good to fine at 6¾d to 6½d. 445 bags good Penang at 5⅜d to 5½d. 438 barrels Jamaica ginger went

Digitized by Google

rather cheaper for the lower qualities: very ordinary to good, 57s to 120s. 350 cases cassia lignea were chiefly bought in, a few lots good selling at 87s per cwt. 200 bags pimento were taken in at 2½d per lb.

SALTPETRE.—1,000 bags Bengal have sold: refraction 7 to 3, 26s to 26s 6d; 50 tons to arrive at 26s 6d per cwt.

COCHINEAL.—842 bags were about two-thirds sold. Honduras blacks, of which the sales contained 260 bags, went at fully 2d decline, from 3s 4d to 5s per lb. Other kinds about the same as before

METALS.—Staffordshire and Welsh iron are steady in price. Scotch pig has been dull. The last sale of mixed numbers was at 53s 9d per ton cash. Spelter is dull, and lower, viz., 21*l* 7s 6d per ton. Tin has been unsettled. The Netherland Trading Company's sale is fixed for the 29th June, to comprise 168,700 slabs Banca.

JUTE.—On Wednesday, 10,370 bales, offered by auction, two-thirds sold at about former prices: low to good, 10*l* 10s to 22*l* per ton.

MANILLA HEMP has been in rather better demand: good roping 29*l* 15s; Sorsogon 30*l* 10s per ton.

OILS.—Linseed has advanced to 32s 6d on the spot. For delivery to the end of the year 33s 3d could be obtained. Considerable sales of rape have been made for future delivery: foreign brown, 43s 6d; English, 42s to 43s. Foreign refined on the spot quoted 44s 6d to 45s per cwt. Olive remains steady, but is not at all active. Cocoa-nut has advanced 6d to 1s. Fine palm continues firm at 36s 6d per cwt. Fish oils are quiet, but sperm is still saleable at 90*l* per tun.

TALLOW.—The market is still inactive. This morning 1st St. Petersburg Y.C., is quoted 40s 3d to 40s 6d; October to December 41s 6d to 41s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, May 22, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The public sales went off at full prices in most instances, 3,490 bags grocery Madras, 3,165 bags Bengal finding buyers, besides several parcels of West India. Week's business in the latter 3,189 casks. A floating cargo of Cuba for the United Kingdom at 22s 4½d. Two of Havana, No. 12, at 26s 6d; No. 11¾, at 36s 9d landed. 330 casks 120 boxes Cuba on the spot at 33s 6d to 34s per cwt.

COFFEE.—1,162 casks 1,889 barrels and bags plantation and native Ceylon offered by auction sold steadily. The former went rather dearer, the latter at full quotations.

PEPPER.—1,070 bags Penang black offered by auction partly sold at 3d per lb.

SHELLAC has declined 5s per cwt.

OIL.—72 casks cocoa-nut sold as follows:—Ceylon, 41s 6d to 42s 9d; Cochin, 43s 6d to 44s. 176 casks good quality palm sold at 36s 6d per cwt.

TALLOW.—460 casks by auction went as follows:—Australian beef, 38s 9d to 39s; sheep, 39s 9d. North American bought in. Taganrog sold at 38s 6d to 40s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains well supported; no alteration worth noting as respects prices. Dutch crushed rather scarce, the demand is rather languid.

GREEN FRUIT.—Arrivals of oranges have been large this week from Valencia, but landing out of condition, prices have been in character. Some parcels sold by Keeling and Hunt went at 2s to 3s per case lower. Lemons of sound quality sustain their value. Para nuts 1s per barrel lower. Barcelona nuts in moderate demand.

DRY FRUIT.—Sales of currants have become very limited and prices are in favour of buyers. Turkey red and Eleme raisins, owing to a large supply of perishing parcels being thrown on the market, show a fall on last week's sales. Valencias continue firm with an upward tendency for finest sorts.

ENGLISH WOOL.—Rather more demand.

COLONIAL WOOL.—During the present week prices have been rather easier, foreign buyers still operating freely.

FLAX.—Market unaltered.

HEMP.—Market very dull this week, and but little doing.

SILK.—Market rather less active than last week, but prices firm. Reports of the progress of the European crops a shade better.

TOBACCO.—In North American tobacco there is still but little doing, but for other growths there has been a rather better demand.

LEATHER AND HIDES.—The demand for leather during the past week has been dull, but with very little change in prices. The supply at Leadenhall on Tuesday was moderate, but the attendance of buyers was small, and the transactions limited. Good crop hides, prime light English butts, and light calf skins, are the articles most wanted. Bellies scarcely supported late prices.

METALS.—A further week of quiet has passed in our market, and whilst we have a constant repetition of failures in high commercial circles, we can look for no substantial improvement. Copper is very dull of sale, and prices are weaker Iron is well supported by demand for Welsh, but other kinds are quiet. Tin has fallen, rather more flat. The annual sale of Banca for this year is announced for the 30th June. Quantity, 168,700 slabs. Spelter has receded in value. Lead continues to be neglected. Tin plates keep in steady request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	0
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	0	0

METROPOLITAN CATTLE MARKET.

MONDAY, May 22.—The total imports of foreign stock into London, last week, amounted to 10,914 head. In the corresponding week in 1864 we received 8,703; in 1863, 5,353; in 1862, 3,929; in 1861, 6,147; in 1860, 6,972; and in 1859, 3,762 head.

There was a large supply of foreign beasts and sheep on sale here to-day, in somewhat improved condition. The trade ruled inactive, and prices were rather easier. The arrivals of beasts fresh up from our own grazing districts were somewhat on the increase, and the quality of the stock was good. The market was well supplied with Scotch beasts, in excellent condition. Very few Irish beasts were on offer. Although the attendance of butchers was good, the beef trade was in a sluggish state, and prices were rather lower than on Monday last. However, the prime Scots and crosses realised 4s 10d per 8 lbs. The total supply of sheep was somewhat extensive; but the arrivals of English breeds—although rather in excess of Monday last—were only moderate. The mutton trade ruled inactive. Good and prime Downs and half-breds changed hands at full prices, the top figure being 6s 2d, and, in some instances, 6s 4d per 8 lbs; otherwise the quotations had a drooping tendency. The market was but moderately supplied with lambs, yet the lamb trade was dull on rather easier terms. The general top figure was 7s 8d—the extreme, 8s per 8 lbs. Calves were in moderate supply, and slow request, at last Monday's currency. For pigs the inquiry was limited. Prices, however, ruled stationary.

SUPPLIES.

	May 23, 1864.	May 22, 1865.
Beasts	4190	5810
Sheep and lambs	25610	24650
Calves	68	241
Pigs	390	380

THURSDAY, May 25.—The arrivals of English beasts fresh up to our market to-day was very moderate. The supply of foreign beasts was good, and the trade ruled inactive at about Monday's currency. The top price was 4s 10d per 8 lbs. Sheep—of which there was a moderate supply on offer—sold somewhat slowly, but at full prices for all good and prime breeds. Prime Downs and half-breds realised 6s 2d per 8 lbs. The lamb trade was quiet at 6s 8d to 7s 8d to, in some instances, 8s per 8 lbs. Calves were in moderate supply and slow request at late rates. Pigs moved off slowly at previous quotations.

Lambs, 6s 4d to 7s 4d.

HOP MARKET.

BOROUGH, Friday, May 26.—Our market is still very moderately supplied with hops, and the trade for all qualities of home-grown produce rules firm, at full currencies. Good and fine foreign hops move off steadily, at quite previous rates; but inferior parcels are a dull inquiry. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; yearlings, 110s to 130s; older hops, 30s to 90s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, May 26.—The supplies of potatoes on sale are moderately large, and the trade rules somewhat active, at about stationary prices. Yorkshire Regents, 90s to 130s; ditto Flukes, 130s to 150s; ditto Rocks, 85s to 100s: Scotch Regents, 90s to 100s ditto Rocks, 80s to 90s; Dunbar Regents, 100s to 120s: foreign, 60s to 80s per ton.

Ships at market, 32; sold, 13; gas contracts, &c., 15—28; unsold, 4; ships at sea, 75.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, MAY 26.—We have experienced an increased demand for all current kinds this week, and the result has been a fair amount of business for home consumption, at fully late rates. There is also some inquiry for export to the States.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 25.—The market generally quiet. Wheat slow sale, and prices are rather lower. Flour unchanged. Indian corn very dull. Beans, oats, and oatmeal exceedingly flat.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 13th of May, on 11,851 miles, to 649,524*l.* and for the corresponding week of last year, on 11,490 miles, to 646,732*l.* showing an increase of 361 miles, and of 2,792*l.* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,384 miles, to 527,497*l.* and for the corresponding week of 1864, on 8,097 miles, to 535,787*l.* showing an increase of 287 miles, and a decrease of 8,200*l.*

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 22.—In the share market to-day, but a small amount of business was transacted, and the variations from Saturday's quotations were not of average importance in any of the descriptions, except banks, which showed a slight tendency downward. In English railways, North British (Edinburgh, Perth, &c.) improved ½, and Midland, North-Eastern (Berwick), and ditto (York) ¼ each; and Metropolitan declined ½; ditto (Extension A shares) were finally quoted 3½ to ¾ pm., and ditto (paid up) 4½ to 5 pm. In colonial, Great Western of Canada (6 per cent. bonds) advanced ½, and ditto (shares of both descriptions) ¼ each; and Cape Town and Dock declined 5, Eastern Bengal ½, and East Indian (J Extension) ½. In foreign, Great Luxembourg recovered ⅛, and Lombardo-Venetian improved ⅞; and Northern of France and Southern of France each receded ½. In American, Illinois Central (shares) recovered ¾, United States (5-20) and Panama Railroad (second mortgage) improved 2¼ and 1 respectively, and Erie shares (paid up) further declined ¾. In British mines, Chiverton advanced ½, Tin Croft ½, West Seton 5, and West Chiverton further 5; and East Carn Brea and North Wheal Crofty declined ¼ each, East Lovell 1½, and Vigra 2. In foreign mines, Yudanamutana further improved ¼.

TUESDAY, May 23.—In the share market to-day there was again only a limited amount of business, but English railways and American securities closed with firmness, while the other descriptions showed no material change of tone. Of the English lines, Metropolitan recovered 1; Caledonian, Great Northern (A stock), Lancashire and Yorkshire, and North-Western improved ½ each, Great Western, North-Eastern (Leeds), and South-Eastern ¼ each, and Midland a further ¼. In colonial, Great Western of Canada shares (of both descriptions) further improved ⅛ each, and Grand Trunk of Canada (Equipment) and ditto (1st preference) receded 2 and 1 respectively. In foreign, Great Luxembourg further improved ⅛, Antwerp and Rotterdam declined ⅛, and Lombardo-Venetian were finally quoted ⅞ lower than the closing price erroneously given in the official list of yesterday. In American, Erie shares (paid up) recovered ½; Atlantic and Great Western (New York, 2nd mortgage), ditto (Pennsylvania, 2nd mortgage), and Marietta and Cincinnati Railroad advanced 1 each, and Illinois Central shares and United States (5-20) a further ¼ each; and Virginia (6 per cent.) declined 1. In British mines, Great South Tolgus improved ¾, Great Laxey ½, Chiverton a further ¼, and West Chiverton further 2½; and Wheal Buller declined 3¾, East Bassett 1¼, Great Wheal Ver 1, Hingston Downs ¾, East Caradon ½, and East Lovell a further ½. In foreign mines, Alamillos and Val Antigonia receded ¼ each.

WEDNESDAY, May 24.—In the share market to-day English railways again closed rather firmer: foreign also showed a similar tendency, but the banks were disposed to weakness, and the other descriptions were again without average alteration. In English railways, Glasgow and South-Western and North British (Edinburgh, Perth, &c.) improved ½, Metropolitan (new) ½, North-Eastern (Berwick) and ditto (York) ¼ each, ditto (Leeds), Lancashire and Yorkshire, Midland, and South-Eastern a further ¼ each, and Great Northern (A stock) a further ½. In colonial, no movement occurred in the final quotations. In foreign, Dutch-Rhenish and West Flanders advanced ¼ each, and Great Luxembourg a further ⅛. In American, United States (5-20) further improved ½. In British mines, Devon Great Consols advanced 5, and Chiverton a further ½; and North Roskear receded 1, and Mwyndy Iron ¾. In foreign mines, Santa Barbara declined ⅛.

THURSDAY, May 25.—In the share market to-day the actual transactions were few, but English railways, American securities, banks, and miscellaneous shares closed with a firm tendency, mines and foreign railways being slightly inclined towards weakness. Of the English lines, North-Western improved ¼, South Devon 1, Great Northern ½, ditto (A stock) and Glasgow and South-Western a further ½ each, and North-Eastern (Berwick) and ditto (York) a further ¼ each. In colonial, Cape Town and Dock advanced 2½, and Indian Branch receded ½. In foreign, Dutch-Rhenish and Great Luxembourg relapsed ¼ each, and Belgian Eastern Junction declined ⅛. In American, Illinois Central sterling bonds advanced 2½, Atlantic and Great Western (Pennsylvania, 2nd mortgage) 6, ditto (New York, 1st mortgage), 1, Erie shares (paid up) ½, and United States (5-20) a further ¼. In British mines, East Bassett improved 1; and West Chiverton declined 2½, Margaret 1, and Great South Tolgus, Hingston Downs, and South Condurrow ¼ each. In foreign mines, Capula Silver and Fortuna declined ¼ each.

FRIDAY, May 25.—The railway market was firm to-day, and prices improved in several instances. Great Northern A stock was in especial request, and advanced 1 per cent. An improvement ranging from ¼ to ½ also took place in Great Western, London and North-Western, Midland, and Lancashire and Yorkshire. East Indian and Great Indian Peninsula railway stocks were inquired for, as well as Dutch-Rhenish shares. Canadian lines ruled quiet.

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

*** No connection with any one of the same name.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

HOLLOWAY'S OINTMENT AND PILLS.—Hope or all.—Whatever their ailments, none need despair of being cured till they have tried these inestimable remedies. Whether the disease be internal or external, spontaneous or the result of violence, if a cure be possible, Holloway's medicaments will effect it. The severity or duration of the malady is no bar to the successful influence exerted by these twin medicines, which cleanse, purify, and invigorate every solid and fluid in the body, and completely renovate the digestion. They render every order of secretion healthy. These admirable antidotes to disease act immediately on the absorbent system, lungs, heart, and circulation, whereby they invariably give energy, tone, and vigour to all the natural functions of life.

THE YOUNG MAN'S LIBRARY
OF
USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,
THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,
PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Issac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested ..... £.00,.00
This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par, what is equivalent to interest at the rate of from 8 x to over Seven per cent. per annum according to the length of the term.
The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.
By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.
For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present:—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryanjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ranchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,987,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,530	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 5,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premiums on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,61,750 rs 4a 10p, and the Directors proposed to apply them as follows:—

Rs.	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (In all 10,00,000 rs.)
5,54,636-4-10	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Homusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Maneckjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq., and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

BALANCE SHEET, at 31st March, 1865.

A. MACKINTOSH, Manager.
JOHN SMITH, Secretary and Accountant.
Bombay, 3rd April, 1865.

We have examined the above Balance Sheet of the Financial Association of India and China (Limited), and accompanying account of Profit and Loss, at 31st March, 1865, and having compared them with the Company's books, find them to be correct. We have also examined the securities, and counted the cash taken credit for as in possession of the Company, and have found the same to be in order.

PROSPECTUS.

The Cheshire Amalgamated Salt Works Company has been formed for the purpose of purchasing and developing existing Salt Works,—and by a judicious union of interests under one management, to effect at once a large saving in agencies and working expenses.

The salt district of Cheshire is the source of four-fifths of the entire quantity produced for home and foreign supply.

The Company has entered into a contract to purchase the extensive and well-known works belonging to Mr Blackwell and Messrs Kay and Son, which are considered the most complete and efficient in the trade, and consist of the following freehold and leasehold properties:—

The Northwich Works,
The Winsford Works,
The Whitehall Works,
The Malkin's Bank,
The Wheelock Works,
and
The Wharton Salt Works.

These works are now employing 500 men, and producing upwards of Two Hundred Thousand Tons of Salt per annum, all of which meets with a ready sale.

By the terms of the contract for purchase, the works are to be handed over at once to the Company, although the payment for the same is to spread over a period of more than twelve months. The purchase includes machinery, plant, workshops, brine shafts, railway waggons, barges, and flats, as well as contracts, both for manufactured salt, and the supplying of brine to other works in the district.

Prior to the signing of the contract for purchase the whole of the properties were valued by Messrs Wilkinson and Hoare, and the books examined by Messrs C. F. Kemp, Cannan, Ford, and Co., on behalf of the Company.

The supply of Brine, of which the Company will have the entire control, is inexhaustible, and an extra revenue of £2,400 per annum is actually derived from the sale of Brine to other salt manufacturers. It is the intention of the Directors to extend their powers of production, by providing additional evaporating pans, for which the properties afford ample space, and which can be done at slight expense, as no new machinery would be required, the existing pumps and engines being fully capable of yielding a much larger quantity of brine than is now used.

The demand for Salt is not merely confined to the United Kingdom. The exports to the continent and our colonies, including India, are about one million tons annually, valued at more than £4,000,000 sterling, whilst the demand for home consumption is increasing day by day, and no fresh sources of supply are as yet discovered in the country.

Mr James Blackwell, whose large experience in the salt trade has enabled him to carry on his works with marked success, is only induced to part with them from declining health, but he will continue to aid the Company with his assistance and advice as Director; and his Son, being fully qualified for the post, is recommended as Manager of the works.

Mr Christopher Kay, under whose management the Wharton works have been for many years conducted, will also take a seat at the Board; and thus those great elements of success, practical knowledge of the trade, powerful union of interests, and comparative absence of competition, have been in this instance combined.

The value of this arrangement is best evidenced by the fact that both Messrs Blackwell and Kay have stipulated that they shall receive nearly one-third of the purchase money in shares of the Company, and a like amount in debentures, not payable until after a term of five years, during which time they will bear interest at the rate of five per cent. per annum.

From information derived from parties having a personal knowledge of the trade, the directors feel justified in stating that these works will yield a dividend of not less than Twelve per cent. per annum to the shareholders under their present rate of production, which can however be very materially increased at a very small outlay.

No promotion money has been or will be paid by the Company.

The Articles of Association may be inspected at Messrs Ashurst, Morris and Co.'s offices, 6 Old Jewry; and prospectuses and forms of application may be obtained of the bankers, brokers, and solicitors of the Company, and of Messrs G. H. and A. T. Jay, 15 Tokenhouse yard.

CAPE OF GOOD HOPE 6 PER CENT. DEBENTURE LOAN, £29,000, authorised

by an Act of the Colonial Legislature, No. 24 of 1864, "For making further provision to complete the improvement of the Harbour of Algoa Bay" (Port Elizabeth).

The Governor of the Cape of Good Hope having instructed the undersigned to raise the sum of £29,000 by the issue of Debentures under the above Act, they hereby give notice that they will be prepared to receive tenders for the whole or any portion thereof until One p.m. on Tuesday, the 6th June next.

The Debentures are drawn for sums of £500, £300, £200, and £100 each, redeemable in 30 years from the 15th October, 1864, and bear interest from the 15th April, 1865, at the rate of 6 per cent. pet annum.

The Principal when due, and the Interest—by coupon—half-yearly, on the 15th April and 15th of October of each year, are made payable at the offices of the Crown Agents for the Colonies in London.

Both principal and interest are amply secured by the Act above cited: First, on the Wharfage Dues and property of the Harbour Board of Port Elizabeth; and secondly, on the general Revenue of the Government of the Cape of Good Hope.

Tenders in the form annexed must be delivered not later than 1 p.m. on Tuesday, the 6th proximo, when the Debentures will be allotted to the highest bidders provided the prices offered are not below the minimum which will be fixed in the usual manner before the tenders are opened.

No fraction of sixpence in price will be recognised, and in the event of an equality of tenders beyond the amount required, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on allotment, and the balance on the 21st June, 1865.

Purchasers of the Debentures will be entitled to the interest accrued since the 15th April last, equal to about one per cent.

The Debentures will be delivered at the offices of the undersigned in exchange for the Bank receipts.

PENROSE G. JULYAN, } Crown Agents
W. C. SARGEAUNT, } for the Colonies.
Spring gardens, London, 23rd May, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies, Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the Cape of Good Hope 6 per Cent. Loan authorised by Act No. 24 of 1864, subject to the conditions contained in your advertisement of the 23rd of May, 1865, viz.:—

Debentures to the extent of £ . for which I undertake to pay at the rate of £ in money for every £100 in Debentures.

THE OTTOMAN RAILWAY FROM SMYRNA to AIDIN, of His Imperial Majesty the SULTAN.

At a Special General Meeting of the above Company, held at the London Tavern, Bishopsgate street, London, on Friday, the 21st April, 1865,

Sir MACDONALD STEPHENSON in the Chair,

The following resolution was unanimously passed, viz.:—

"That the Council of Administration be and they are hereby invested with the power to dispose of the unissued 13,175 shares in the Company at such price and on such terms as they may determine, provided that such shares shall be offered in the first instance to the shareholders rateably in proportion to the number of their shares."

In pursuance of the above resolution, the Council of Administration have fixed the price of issue at £20 per share, payable as under:—

£1 per share on application.
£2 — on allotment.
£3 — on 1st August, 1865.
£3 — on 1st November, 1865.

Scrip, with £3 paid, will be issued in exchange for the banker's receipts, and on payment of the last instalment, share certificates of £20 each will be delivered, with coupons attached, from 1st July, 1865.

Subscribers will have the option of prepaying the instalments, on either of the above dates, upon which interest at the rate of 5 per cent. will be allowed.

Applications in the annexed form will be received, up to the 1st June next, at the Company's office in London, and by the Company's bankers, Messrs Chas. S. Hanson and Co., at Constantinople, and Messrs Hanson and Co., at Smyrna, respectively.—By order of the Council,
London, May 12, 1865. S. J. COOKE, Secretary.

N.B. Printed forms of application may be obtained at the Company's offices, 2 St Michael's House, Cornhill, E.C.

FORM OF APPLICATION.

Bankers of the Company—London: Messrs Smith, Payne, and Smiths, 1 Lombard street. Constantinople: Messrs Charles S. Hanson and Co. Smyrna: Messrs Hanson and Co.

To the Council of Administration of the Ottoman Railway from Smyrna to Aidin, of his Imperial Majesty the Sultan, 2 St Michael's House, Cornhill, E.C.

Gentlemen—Having paid to your bankers the sum of £ , being £1 per share on shares, I have to request that you will allot to me unissued shares of £20 each, at £9 per share, and I hereby agree to take the same, or any portion that may be allotted to me, and to pay the instalments in conformity with the terms of your circular dated 28th April, 1865.

This Company is formed for the purpose of supplying a want in the transit of Coal to London and elsewhere by means of Iron Screw Steamers.

The annual consumption of coal in London alone is, in round numbers, 5,000,000 tons. Of this quantity about 2,000,000 tons are brought by rail, and 3,000,000 tons are seaborne. Notwithstanding this vast importation, it is well known that the metropolis is not adequately supplied. During the past few months the deficit in the supply of coal in the London market from want of carriage has been estimated at not less than 50,000 tons per week. Referring to this want of the means of transport, the following very striking remarks appeared in the "Times" City Article of the 3rd January:—

"During the greater part of the past autumn, and especially at the present moment, in consequence of the prevalence of easterly winds and gales on the north-eastern coast, the ordinary sailing ships have been prevented, though laden, from putting to sea, and the two principal railways, notwithstanding their extra efforts, have been unable sufficiently to meet the demand. The time has evidently arrived when the difficulty should be provided against. Strange as it may seem, the possibility exists under the present system that London, or some portion of it, may on some occasion before long be in darkness from absolute want of coal to carry on its illuminating process. This contingency is affirmed to have been within the last three or four winters, by reason of frosts and detentions by wind, &c., more than once extremely probable, and to such an extent on one occasion or more have some of the gas companies been in want of coal that it has been bought by them in small quantities from day to day at unprecedented prices from such places as Winchester, Reading, Basingstoke, and other large towns beyond the limits of the London district, although those places, as regards their own wants, mainly look to London itself."

And again in the "Times'" City Article of the 9th March:—

"Last session the project of the Great Eastern Line for extending their route so as to enable them to bring supplies of coal to the East end of London at comparatively low rates of freight, was defeated in Parliament, actually on the ground that the Company would thus be in a position to furnish coal to the metropolis at a cost lower than would be convenient to the Great Northern and the London and North-Western Companies. The measure is now again coming up for consideration, and the influence of these two powerful opponents is reported to be put forth with redoubled energy to defeat it. Should they succeed in doing so, the population of London and of all the counties and districts south of London will, according to the calculations of persons most conversant with the statistics of the trade, be compelled to pay beyond the price that would otherwise prevail 2s or 3s upon every ton of coal they may consume; and this tax is not the worst part of the evil, since, owing to the inadequate means possessed by the existing lines for meeting any casual increase of demand, it is found that the supply even for lighting the metropolis is very often jeopardised, and that it is not an uncommon event for some of the gas companies to be obliged to make up their stores by sending round their respective neighbourhoods and effecting almost retail purchases at extraordinary prices. As to the inconvenience and extra cost at which the multifarious manufacturing establishments in London and the southern towns generally are carried on under this condition of affairs, and the burden it imposes upon them in their competition with other producers, all persons connected with commerce can easily form an opinion."

The Bill was brought forward in the House on the 14th March and was defeated, thus showing strongly the necessity of a Company like the present.

They who are best acquainted with the operations of the London Coal Trade are aware of the delay inseparable from the employment of Sailing Colliers. The uncertainty of transport by such vessels, and the inadequacy of other means of transit, have been the causes of the high price of coal during the winter seasons. The Directors of this Company believe that they will be able to remedy this by importing large cargoes of coal in rapid succession, thus rendering an incalculable boon both to the trade and the public, whilst securing a satisfactory result to the shareholders.

How soon Steam Colliers may displace Sailing Colliers in the London Coal Trade is a question which is not very difficult to determine; that such a displacement is already at work is clear from a consideration of the following statistics:—

PORT OF LONDON FOR THE YEAR 1862.

—SAILING COLLIERS— No. of Voyages.	Tons.	—STEAM COLLIERS— No. of Voyages.	Tons.
9,411 ...	1,637,993	1,204 ...	556,196

FOR THE YEAR 1863.

8,627 ...	1,507,528	1,385 ...	659,786

The statistics for 1864 and 1865, so far as they have been made up, exhibit still greater results, and show that the use of Steam Colliers is so decidedly on the increase as to justify the conclusion, that the employment of that class of vessels has been proved to be very profitable.

It has been ascertained that a well-found Screw Collier trading between London and the North can make five voyages per month. The average freight for the past year earned by Steam Colliers may be taken at 6s per ton, and these rates, owing to the demand for vessels in other trades, are on the increase. The appliances for loading in the northern ports are such that a vessel of 1,000 tons placed under the "shute" in the morning can be loaded and ready for sea before nightfall, while the average time occupied in discharging does not exceed twenty-four hours.

The experience of those engaged in the coal trade, and more especially in the working of steam colliers, shows that vessels having a carrying capacity of 900 to 1,000 tons are the most profitable.

The estimated cost of such vessels has been carefully gone into, together with the expenses of management wear and tear, and contingencies in detail; and upon an estimate of only four voyages per month, it has been calculated that a dividend of a highly remunerative and progressive character must result to the shareholders.

Powers will be taken for the Company to trade in coal and successfully develop the coal trade in London and elsewhere, from which further profits will arise.

Negotiations are in progress for the purchase of vessels now nearly completed, thus enabling the Directors to commence a profitable trade without delay.

In the event of no allotment being made, the deposits will be returned in full. Should a less number of shares be allotted than are applied for, the deposits will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses and forms of application for shares may be had of the bankers, the brokers, the secretary, and at the offices, 2 King's Arms yard, E.C. The Articles of Association may be inspected at the solicitor's office, or a copy obtained on payment of the usual fee of one shilling.

THE NORTHERN ASSAM TEA COMPANY (LIMITED).

Registered under the Companies Act, 1862, on October 22, 1864.

Increase of Capital to £400,000, by the issue of 25,000 (B) Shares of £10 each.

£2 payable on application, and £1 on the 10th July next.

Where no allotment is made the deposit will be returned in full.

Until the 1st July, 1868, the B shares will be entitled to a Preferential Dividend (so far as the profits from the Estates purchased from the Assam Company will admit) of 10 per cent. per annum. Any excess of profits over 10 per cent. being divisible rateably between the A and B Shares respectively.

DIRECTORS.

SECRETARY—Mr C. H. Fielder.

Offices—35 Bucklersbury, London, E.C.

The Assam Company, the first established for the cultivation of tea in India, being desirous of concentrating and confining their operations to the southern division of Upper Assam, and thus centralising the management of their extensive properties, have determined on selling to the Northern Assam Tea Company (Limited), whose estates are contiguous, the whole of the northern and eastern division of their property in Assam, instead of adopting the alternative of promoting a new company to carry them on, or placing them under separate management.

The present extension of capital, therefore, is for the purpose of purchasing direct from the Assam Company the whole of their outlying estates in the neighbourhood of the Tingrie and Deching rivers in Upper Assam, forming their northern and eastern division, and consisting of the following gardens:—

The Tingrie Mookh, Hoogrie Jaun, Kehung, Naholia, Cato, Tippum, Hookan Joorie, Towrock.

These comprise some of the fine old indigenous gardens, respecting which so much has been written, and which only require opening out to ensure their profitable extension. They are at present producing the finest tea and tea seed in Assam—the latter in sufficient quantity to enable the purchasers to plant out any extent of new land without further cost on this head.

The area at present under cultivation is about 1,000 acres, of which over 500 are in full bearing. The gardens are surrounded by lands, for which grants have been obtained to the extent of 10,000 acres, all of which is very superior and suitable for the growth of tea.

The Assam Company's right to the whole of this property, together with all buildings, plant, implements, tools, boats, and live stock, will be handed over to the Northern Assam Tea Company for the sum of £100,000, to be paid as follows:—

8th June,	1865	£30,000
15th July,	—	20,000
15th August,	—	20,000
15th November,	—	30,000
		£100,000

The crop of tea of this season, and any further grants of land that the superintendent or agents of the Assam Company may have acquired up to the date of completion of this sale, together with all cultivation commenced during the current season, commencing November 1, 1864, has also been contracted to be transferred to this Company, on payment of the sums actually disbursed since that date.

No commissions or promotion money have been paid or allowed.

In the allotment of shares a preference will be given to shareholders in the Northern Assam Tea Company and the Assam Company.

The Assam Company in 1863 disposed of their outlying estates in the district of Cachar, for the purchase of which a Company was formed in Calcutta, called "The Central Cachar Company," the shares of which Company are readily saleable at 25 per cent premium. Those of the Assam Company are at above 150 per cent. premium.

The success of tea growing in Assam is now thoroughly established. Indian teas are rapidly increasing in favour and value owing to their great strength and pungency. Further it may be stated, that the recent reduction of the duty has already caused a considerable advance in prices here, and the supply is still inadequate to the demand.

In reference to the quality and capabilities of the lands proposed to be purchased, the following extracts are taken from the last reports.

The resident secretary in India of the Assam Company, in his report on the property contracted for, says:—

"The lands in this part of the province are the finest for tea cultivation in Assam. The soil is not only the very best, but the forests contain the most splendid timber, inexhaustible in extent, which is not the case in the Southern division. It needs no foresight to predict that the property the Company holds in this part of the country may be made within the next ten years equal, if not superior, to that which they will be in possession of at that time in the Southern division.

The following are also extracts from a report made to the Directors of the Assam Company by their chief superintendent in January last, when he visited the property:—

"That the land is first-rate, there is no question or doubt, but to effect such an object (that is, work it to full advantage) it must be divided into a distinct field, and the management given to the person residing on the spot."

"I have now got the Deputy-Commissioner to accept three applications near Tingrie, for probably an area of about 7,000 acres, including the land between Tingrie, Hoogrie Jaun, and Kehung, along the banks of the Tingrie river; and this, with what we have already secured in other quarters between the Deehing and the Tingrie, will bring the Company's holding up to at least 10 or 12,000 acres; and I would recommend the extending in this quarter for the reason that the land is very superior, and the position likely to be much more healthy than any other portion of the Northern and Eastern division.

"The present gardens, if worked up to their capabilities, would yield 2,000 maunds of tea.

"The plants in the nurseries, which were put down last year for the purpose of planting out, have come up very well, some of them eighteen inches and others two feet high."

The estates have been frequently visited by the managing director of the Northern Assam Tea Company during the last thirteen years, and as lately as March last. He fully confirms the favourable views above expressed, and is of opinion that with comparatively small outlay the indigenous plants alone can be worked up to an annual yield of 4,000 to 5,000 chests of tea.

Since the contract for the purchase has been concluded, the Assam Company have received from their managing director in India, and from a large shareholder in both companies now visiting Assam, valuations of the property greatly in excess of the price agreed to be paid.

On the above grounds, therefore, the acquisition of these estates will render the Northern Assam Tea Company one of the most influential and profitable in India.

Application for shares to be made on the annexed form on or before Wednesday, the 31st May, on which date the list will be closed.

London, May 23, 1865.

SOLICITORS.—Messrs Freshfields and Newman, 5 Bank buildings, E.C.
ENGINEERS.—Joseph Cubitt, Esq., C.E., Great George street; E. F. Turner, Esq., C.E., Parliament street.
SECRETARY—W. E. Johnson, Esq.
GENERAL MANAGER—J. S. Forbes, Esq.

The present object is to offer for public subscription the first half of the A stock of the Metropolitan Extension Railways of the London, Chatham, and Dover Company, amounting to £1,212,000, which, with the £1,213,000 to be issued only as fully paid-up stock, at not less a price than £10 per cent. increase on the present price of issue, or earlier than twelve months hence, completes the amount of £2,425,000 the total amount of that stock.

Full details of the lines and their present position are given at length in the statement annexed to the prospectus, which, with the maps, show the routes of these lines and those in connection.

In considering this stock as an investment, the principal points for consideration are, first, the amount of stock to pay dividend upon—secondly, the probable receipts—thirdly, the minimum dividend per cent. to yield a fair return on the price of issue.

The Capital of the Metropolitan Extension Railways is constituted as follows, viz:—

Debentures		£1,433,000
B Stock, entitled to 6 per cent. preference		825,000
C Stock, entitled to 6 per cent. preference after B		1,050,000
A Stock (present issue)	Entitled to remainder of profits up to 6 per cent.	1,212,000
For future issue as fully paid-up stock		1,213,000
		2,425,000
The total mileage is about 14 miles.		5,733,000

The traffic on the Metropolitan (Under Ground) Railway has amounted since 1st January, 1865, to an average of £673 per mile per week, which is moreover daily increasing, and at present arises from metropolitan passengers, a trifling amount only of through traffic, and no goods being as yet carried on this line.

When it is considered that the present traffic on the Metropolitan Extension Railways of the London, Chatham, and Dover Company, is conducted over only two lines of way, and with an inadequate amount of rolling stock, also that it is still unfinished, and that the portion at work has only recently been opened, it will be observed that the present receipts afford no reliable data upon which to form an estimate of the probable traffic.

To fix the amount at anything like what is felt by competent judges will be the actual result when the enormous traffic that the junctions with the Metropolitan (Under Ground), the Great Northern, the Midland, the Great Western, the West London Extension, the South-Western, and the North-Western will bring on the lines, might be considered an exaggeration by those inexperienced in the wonderful elasticity of Metropolitan and suburban traffic.

It is therefore thought better not to estimate the probable traffic higher than the average of the mileage receipts of the Metropolitan (Under Ground) Railway, as above mentioned, viz., £673 per mile per week. This multiplied by the mileage of the Metropolitan Extension lines of the London, Chatham, and Dover Railway Company, would give a return of £489,944 per annum. From this sum must be deducted 40 per cent. for working charges, which is a liberal estimate. The net results from passengers only may be estimated therefore at £293,966 per annum.

The large goods traffic, which these lines will enjoy alike from the admirable position and number of the stations as from the arrangements made for working the traffic, will certainly augment the receipts by at least 40,000 net per annum; which, in that case, after paying interest on debentures and on the B and C stocks, would yield a dividend of 5 per cent. on the whole of the £2,425,000 A Stock, (including the present issue,) which at the price it is now offered at, would be equal to 10 per cent per annum.

The price at which the A stock is now offered must be considered most advantageous to the investor, if only one half this result is attained; when, however, the increased receipts would permit a dividend of 5 per cent., the stock must certainly rise to par, which would practically be a profit of upwards of 47 per cent. above the price of issue.

It is considered that results approaching the above figures will be reached in less than two years; and that a steady increase may be further looked for from that time. Arrangements have therefore been made with Sir S. Morton Peto, Bart., Betts, and Crampton, to guarantee interest as from 1st January, 1865, until 1st July, 1867, at the rate of 6 per cent. per annum on the amount paid up, by which latter date it is confidently believed the intrinsic merits of the whole system will have developed themselves.

The belief entertained as to the augmentation in value of this stock, when it is considered that the lines possess metropolitan termini as well as metropolitan and suburban traffic, is borne out by the relative prices of the shares and stock of the Great Northern and of the Metropolitan (Under Ground) Railway Company, before they had finished their lines and afterwards, viz.:—

The Great Northern A stock was in October, 1853, quoted in the Stock Exchange List at £54 per £100 stock, it now is worth £135, or £81 per cent. increase in value.

The Metropolitan (Under Ground) Railway was in April, 1861, only four years ago, quoted in the Stock Exchange List at equal to £54 per £100 stock, it now is worth £135, or 81 per cent. increase in value; these facts speak for themselves as to the prospects of the stock now offered for subscription.

The price of subscription is fixed at £21 per certificate of £40, equal to £52 10s per £100 stock, and the periods of payment are as under:—

£1	per Certificate on	Application.
4	—	Allotment.
4	—	1st September, 1865.
4	—	1st December.
4	—	1st March, 1866
4	—	1st June, 1866.
£21		

All calls not duly paid will render previous payments liable to forfeiture. When the whole amount of £21 per certificate is paid, £40 stock for each certificate will be transferred into the name of the then holder thereof.

The option will be given to all subscribers to pay up in full on allotment (entitling them to interest on the whole amount of the price of issue from 1st January, 1865); and discount at the rate of 6 per cent. per annum will be allowed on the prepayment of instalments. These two allowances would further reduce the price of issue by about £2 16s per cent.

In the allotment, those applications the whole balance on which it is intended by applicants to be paid in one instalment on allotment will be first considered.

Application must be made on the forms annexed, and accompanied by payment of £1 per share (without which no application can be considered) to any of the undermentioned bankers:—The London and County Bank, Messrs Glyn, Mills, Currie, and Co., the Agra and Masterman's Bank (Limited), Messrs Smith, Payne, and Smiths, the National Bank, London, Dublin, and its branches in Ireland; the National Bank of Scotland, Edinburgh, and its branches in Scotland. In the event of no allotment being made, the deposit paid will be returned forthwith without deduction; and if less are allotted than the number of certificates applied for, the sum paid will be applied towards the amount payable on allotment on the number so allotted.

Prospectuses, with maps, plans, &c., may be had of the undermentioned stockbrokers:—Messrs Laurence, Son, and Pearce, 9, Angel Court, E.C.; Messrs J. and A. Scrimgeour, 10 Old Broad street; Messrs Knight, Dale and Co., 1 Royal Exchange buildings, E.C.; and of the Credit Foncier and Mobilier of England, Limited (Alfred Lowe, Esq., Secretary), at their offices, 17 and 18 Cornhill, London; and at the offices of the London, Chatham, and Dover Railway Company (W. E. Johnson, Esq., Secretary), Victoria station, Pimlico, S.W.

ABRIDGED PROSPECTUS.

This Company is formed for the construction and working of two lines of Railway in Peru—one to connect the Seaport of Pisco with the town of Yca, the other to connect the City of Arequipa with the Port of Mejia.

The Peruvian Government guarantees for the period of twenty-five years—or until the railways have produced, over and above the cost and provision for repair, renovation, and maintenance for the space of two consecutive years, dividends at the rate of 7 per cent. per annum—an income of £233,800 per annum, charged upon the public revenues of the State, and further secured by hypothecation of the guano shipped to European States. The concessions for the railways contain the usual provision for reimbursing to the Government (out of any surplus profit exceeding a ten per cent. per annum dividend to the shareholders) such sums, if any, as may have been paid by them to cover their guarantee.

The concessions are for a period of period of ninety-nine years from the opening of the railways. A sufficient sum will be set apart to form a sinking fund for the redemption of the whole capital, at a premium of £100 per cent, to be operative yearly after the first twenty years of the working of the railways.

A contract for the construction of the lines has been entered into with the International Contract Company (Limited), according to the estimates of G. P. Bidder, Esq., C.E., and J. M. Heppel, Esq., C. E.

In accordance with the terms of each concession the Company will be converted into a Societe Anonyme with shares to bearer, or, if necessary, into two Societes Anonymes.

The capital of the Societe Anonyme, or Societe Anonymes, will be £3,340,000—to be issued in shares and bonds.

Applications for shares must be made in the annexed form, addressed to the directors: but no application will be considered unless accompanied by the receipt of one of the Bankers of the Company for £1 per share on the number of shares applied for.

Detailed prospectuses and forms of application for shares may be had at—

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moors, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Sondesdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Shirley, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawcett, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 12d.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

CONSUMPTION, COUGHS, COLDS, ASTHMA, BRONCHITIS, NEURALGIA, RHEUMATISM, SPASMS, &c.
CAUTION—"In Chancery."
CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receip of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition
Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with table outside, and the fac-simile of his signature.
At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.
Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,
SOLE CONSIGNEES:

FRASER'S MAGAZINE FOR JUNE. No. CCCCXXVI. Price 2s 6d.
CONTENTS.
English Ultramontanism. In Two Parts.—Part I.
The Bank Charter Act of 1844. By Bonamy Price.
Gilbert Rugge.—A Tale. By the Author of "A First Friendship." Chapters XLI.—XLIV.
England's future Attitude towards Europe and towards the World.
On Subterranean Ice.
The Royal Academy Exhibition. By W. M. Rosetti.
The Amulet.—A Tale of Spanish California. Chap. XVIII.—XXI.
Nooks and Byways. By an Old Campaigner.—Mr Swinburne's Poems.
The Assassination of President Lincoln. By an American Abolitionist.
London: Longman, Green, and Co., Paternoster row.

Four Shillings and Sixpence.

THE EXTENSIVE READY RECKONER, containing tables which rise by farthings, from a ¼d to 3s; by halfpence, from 3s to 5s; by pence, from 5s to 7s; and by threepence, from 7s to 20s; while the calculations rise in successive numbers from 1 to 200, and by useful gradations from 200 to 30,000.
By F. D. FLACK, of Manchester.
London: Simpkin, Marshall, and Co.; and by order of all booksellers.

Just published, Third Edition, price 1s, post free for 14 stamps, with Photographic Illustrations.

SKIN DISEASES AND THEIR REMEDIES.
By ROBERT J. JORDAN, M.D
Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood, causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.
"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—MEDICAL TIMES AND GAZETTE, August 4th, 1860.
To be had direct from the Author, 27 George street, Hanover square, London, W.

NEW EDITION.—POST FREE.

GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive).
Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.
These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.
London:—27 Harley street, Cavendish square, W.
City Establishment:—36 Ludgate hill.
(Four doors from the railway bridge).
Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.
Messrs GABRIEL guarantee every case they undertake.

LAURIE'S TABLES OF SIMPLE INTEREST for EVERY DAY in the YEAR, at 5, 4½, 4, 3½, 3, and 2½ per cent. per annum, from £1 to £100, &c. Twenty-seventh Edition, 800 pp., 8vo, cloth, strongly bound, £1 1s; or in calf, £1 8s.

LAURIE'S TABLES OF SIMPLE INTEREST, at 5, 6, 7, 8, 9, and 9½ per cent. per annum, from 1 day to 100 days. Eighth Edition, 8vo, cloth, 7s.
London: Virtue Brothers and Co., 1 Amen corner, E.C.

MR MAY'S CONSTITUTIONAL HISTORY OF ENGLAND.—A New and Revised Edition of the Second Volume of "The Constitutional History of England, since the Accession of George III. 1760–1860."
By THOMAS ERSKINE MAY, C.B.,
Will be ready on Monday next, the 29th instant.
London: Longman and Co.

In 8vo, with Two Maps and Seven Wood Engravings, price 18s,

VANCOUVER ISLAND AND BRITISH COLUMBIA; their History, Resources, and Prospects.
By MATTHEW MACFIE,
Five Years' Resident in Victoria, V.I.
London: Longman, Green, and Co., Paternoster row.

Now ready, in 8vo, pp. 746, price 12s cloth,

TRANSACTIONS OF THE NATIONAL ASSOCIATION for the PROMOTION of SOCIAL SCIENCE, York Meeting, 1864. Edited by G. W. HASTINGS, LL.B., Gen. Sec. of the Association.

PROPRIETARY SCHOOL, GRAVESEND.
Head Master, Mr M. GUTTERIDGE, B.A.
The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.
Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.
For terms and prospectuses, apply at the School.

TO SPORTSMEN, MILLERS, AND OTHERS.—TO BE LET, 16 miles from London, a Family Residence, containing 3 sitting and 7 bedrooms, suitable offices, with garden, orchard, meadow land, considerable stabling, excellent trout and other fishing, and a valuable water-power for mill purposes. Any or the whole of the above can be had if required. The residence is prettily situated in its own grounds, approached by an entrance lodge within a mile of a railway station, and in the vicinity of the Queen's and other Hounds.—By letter only, to H. P., Goddard and Sons, stationers, 54 Great Portland street, W.

CAPITAL AND PARTNER, WITH OR without limited liability, wanted, for the importation from a new market of a natural product, which is in great and ever-increasing demand, but at present scarce.—Apply by letter, addressed Mr Schneider, 1 Robert street, Adelphi, London.

WANTED, A WELL-EDUCATED active Youth, who has some knowledge of the German and French languages, as Junior Clerk in a foreign and general mercantile house in Mincing lane. Undoubted references will be required.—Apply by letter to J. N., 27 Mincing lane, E.C.

A FRENCH GENTLEMAN, OF extensive commercial experience both in Continental and Indo-China trade, with the best connections, is now open to a re-engagement. Is a first-class correspondent, and possesses a thorough knowledge of raw materials, such as silk, cotton, &c., &c., and of all descriptions of woven or printed goods. Highest references.—Address B. M., care Davies and Co., Advertising Agents, Finch lane, Cornhill.

A PUPIL CAN BE RECEIVED IN one of the largest Mechanical Engineering Establishments in the South of Italy, where the practice embraces nearly every branch of Mechanical Engineering construction. For information and terms, apply by letter to A. B., care of Messrs Sporr, 16 Bucklersbury, London.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.
PLYMOUTH MEETING.
LAST DAY FOR ENTRY OF STOCK, 1st JUNE.
All certificates received after that date will be returned to the senders.
H. HALL DARE, Secretary.
12 Hanover square, London, W.

JAMES B. BRENCHLEY, 78 OLD Broad street, London, E.C. (Member of the Mining Exchange), effects SALES and PURCHASES in MINING, RAILWAY, FINANCIAL, and EVERY DESCRIPTION of MARKETABLE STOCK, at close prices.
BANKERS—London and Westminster.

MANCHESTER.
H. R. FORREST,
COMMISSION AGENT,
2 Cleveland buildings, Market street.
H. R. F., being well acquainted with the Continent, offers his services to foreigners who visit this market on business. He speaks German, French, &c., and has had eighteen years' experience of the trade of Manchester. References interchanged.

IMPORTANT TO COTTON GROWERS, FARMERS, MERCHANTS, &c.
JAMES SMYTH AND SONS,
PEASENHALL, SUFFOLK,
Manufacturers of CORN and SEED SOWING MACHINES, MANURE DISTRIBUTORS, CORN SEED and MANURE DRILLS.
DROP DRILLS for depositing COTTON SEED in patches 5 feet apart.
DROP DRILLS for MANGOLD WURZEL SEED, &c., &c.
Illustrated Price Catalogues post free on application.
Prize Medal, London, 1862. Oldest house in the trade

THE RECENT ROBBERIES FROM IRON SAFES.
GEORGE PRICE CALLS attention to his TREBLE and QUADRUPLE PATENT FIRE-RESISTING (212°) and BURGLAR-PROOF SAFES now making on his improved principle to resist every kind of violence, as well as drills, gunpowder, and picklocks. These unrivalled Safes are made of half-inch boiler plate, with one-inch solid case-hardened doors. New illustrated Price-lists are now ready, and may be had post free, from the sole Patentee and Manufacturer, George Price, Cleveland Safe and Lock Works, Wolverhampton; 18 Blackfriars street, Manchester; and Wade lane, Leeds.

E. DENT AND CO., WATCH, CLOCK, and CHRONOMETER MAKER to Her Majesty, H.R.H. the Prince of Wales, and H.I.M. the Emperor of Russia, and Maker of the Great Clock for the Houses of Parliament.
61 Strand, W.C., and 34 and 35 Royal Exchange, E.C.

	Guineas.		Guineas.
Gold Lever Watches from...	16 to 30	Silver Lever Watches from...	5 to 15

The Political Economist.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE REDUCTION IN THE BANK RATE OF DISCOUNT.

THE reduction of the rate of discount by the Bank of England is amply justified by their accounts, and also by those of the Bank of France. Last year the bullion reserve of the two Banks was:—

	£
Bank of England	14,052,761
Bank of France, on June 9th	11,795,688
	25,848,449
Now it is—	
Bank of England	15,838,491
Bank of France	19,635,264
	35,473,755

being an augmentation of almost ten millions, and the reserve in both Banks continues to accumulate.

It is true that there is no extreme change within the last few days, but we must remind our readers of that which we have so often brought to their notice, the delicacy of the money market. Very slight causes may produce a considerable change in the value of money. A little money too much, or a few bills too little, may soon cause an important effect; and so it is on the present occasion.

There are two circumstances which should carefully be remembered at the present moment. First, that the traders' demand for discount depends not only on the quantity of commodities, but also on their value. The bill is drawn for the price at which the goods are sold, and as that price declines, the amount drawn for declines too. When, as now, a great fall has taken place in the value of many most important articles, the diminution in the bill-creating power of new transactions becomes of considerable importance. The savings of the country go on decreasing day by day, but the new bills created by new transactions go on diminishing day by day, even when the consumption,—the quantity of goods bought and sold,—remains unaltered.

Secondly, it has again been proved that a stagnation is a force much more powerful upon the state of the money market, not only than any other single force, but almost than all other forces put together. It was thought, and we were inclined to think so ourselves, that loans to foreign countries would, in a depressed state of the money market, exercise an influence more considerable than up to the present time has been the case. As it was very accurately expressed in the celebrated article on "Seven per Cent.":—"While numerous countries are eagerly competing for our "financial assistance, now that a system has arisen on an "adequate scale by which that assistance can be rendered "without excessive risk to the lender, it is clear that so long "as this new system remains sufficiently popular to command, "if not to entrap, the confidence of investors, *the rate of in-*"*terest cannot possibly, ceteris paribus, fall below a point at which* "*companies trading with foreign countries are willing to take it.*" But at present those companies cannot so far command the confidence of the public as to abstract sums large enough to counteract the capital set free by the stagnation of ordinary commerce. Many finance companies are so "locked up" with what is old, that they can take in hand almost nothing new; and altogether, for the present, it is certain that our new trade of lending is one of much less effect on the value of money than the old trade of buying and selling.

THE SPEECH OF PRINCE NAPOLEON AT AJACCIO.

THE severe and public reprimand with which the Emperor has visited the speech uttered by his cousin at Ajaccio has procured for that performance a degree of attention it did not at first receive. It was a very remarkable speech, an effort by the first Prince of the Buonaparte family to explain his view of the Napoleonic ideal, to show that the regime of which the founder dreamed, and which Prince Jerome desires, as he hints, to realise, is consistent with the practice as well as the principles of pure democracy. With the historical section of the thesis we have little concern. The first Napoleon was by turns soldier, Jacobin, Consul, Emperor, conqueror, fugitive, and captive, and playing so many parts, naturally said many and very different things. Almost any idea can be attributed to him, and it would not be hard, by taking separate utterances, to prove that he was a furious despot and a Republican, a man breathing war and a man devoted at heart to the establishment of a lasting and universal peace. If Prince Jerome is convinced that the "mission of Napoleon was to "lead Europe through a dictatorship to emancipation," all it is worth while to say is, that Prince Jerome's view of history is at once narrow and one-sided. He probably does not quite think what he says, but simply speaks as religious innovators often speak, when they try to support their own apparently wild ideas by showing that the Church at some period or other of its history had sanctioned similar views. The important point is the programme to which the historical review is intended to lead up. Prince Jerome asserts that the true Napoleonic idea consists in the union between a dictatorship and a free democracy. He dislikes and apparently despises Parliamentary Government. "I love," he says, "liberty "under all its forms, but I would not disguise any "emphatic preference for that form which I have

Digitized by Google

"styled the liberty of all; that seems to me the "one most in harmony with the genius of my country; "yes, I prefer liberty and a system of politics influenced by free "opinion, as manifested through the press and in public meet- "ings, to a regime of Ministers who are often the product of a "Parliamentary coterie which has forced them upon the "Sovereign. One yields more easily to the will of the people "than to a coalition often negative. Let us have no illusions "as to the consequences of restricted liberty; what is the great "idea which the privileged classes have, I do not say inspired, "but even accepted? The Italian war? Commercial liberty? "The amnesty of 1859? Will it be in the future the suppres- "sion of the temporal power? No." In short, Prince Jerome desires an elective dictatorship, moderated by Chambers possessed of the right of debate though of small prerogatives, and guided by the opinion of the masses to whom he would guarantee the right of free speech and of association. In other words, he desires the Red programme plus a Napoleon as its executive chief.

That is a very dangerous programme. It is quite possible that some day a great European nation may try the hitherto untried experiment of substituting for a Parliament an individual elective like the Parliament, and like it changeable at the discretion of the electors. It is also possible, though unlikely, that such an experiment would under certain conditions succeed, that the nation might not be compelled to make a revolution whenever it desired to change a policy. We can conceive, for instance, that if the United States entrusted the Legislative as well as the Executive power to the President, the country might be reasonably well governed, might retain its freedom of thought and speech, and might be able to change its President at the appointed time without violence or bloodshed. But the two conditions of success in an experiment so dangerous are the frequent change of the individual, and the absence of a standing army, and Prince Jerome accepts neither. Supposing even a Parliament to be perpetual, it would be certain at some time or other to be out of *rapport* with the popular conviction, and therefore to be exposed to the chance of a revolution, and an individual is and must be, except in the case of a man with special qualifications and a special history, like the present Emperor, less sensitive to opinion than a Parliament. A collision would be sure to occur, and would be sure, if the dictator were unchangeable and had an army at his disposal, to end in a scene of violence fatal for the time to civilised order. In France this is more especially certain, because the French being essentially logical, are not content merely to will a certain policy, as Germans for example are, but insist on that policy being carried out,—will, unless held down by repressive measures, carry it out themselves. That does not matter when the dictator is a sovereign chamber, for the nation, if irritated, can change it; but how is it to change a representative Sovereign? It would have to revolt, and that process being very troublesome, slow, and uncertain, it would ultimately have to assassinate, the exact thing which occurred when the experiment was tried for so long a time in Imperial Rome. The only result of the Prince's programme would be a greatly increased danger of anarchy, a danger amounting almost to certainty. It is quite possible we believe to govern a free France, but only on condition that the chief of the Government shall be changed whenever France desires it, that is only on condition of government by responsible Ministers.

To this programme of internal policy the Prince attaches one of foreign affairs. Speaking always as an exponent of the ideas of the first Napoleon, he declares that France ought to be the armed friend of the nationalities, ought to aid in completing the unity of Italy, in liberating Poland—old Poland, not the "kingdom" merely—and in emancipating Hungary; ought, above all, to break finally with the temporal power, with Papal Rome, the centre of ideas hostile to France and to the age. This is a declaration of war to the greater part of Europe. It is not too much to say that had such words been uttered by the Emperor himself all Europe would at this moment be in disorder; and the Prince stands so close to the throne that his utterances have some at least of the force of his cousin's. On the other hand, he praised up to the skies that alliance with the United States which the Mexican expedition has endangered, and with an obvious allusion to the events of to-day lauded the foresight of Napoleon in selling Louisiana to the Government of Washington. We can scarcely wonder that the embassies, the English excepted, contemplated for a moment a common protest, or that the Emperor felt it absolutely necessary to repudiate ancient rancours, and exhibited an irritation strangely foreign to his habitual self-restraint. The speech was indeed a most trying incident. Napoleon had left France for the first time since the Italian war, relying on the aid of his cousin, who as first Prince of his family, next after his son in order of succession, and Vice-President of the Council of State, he had made virtual Regent, and that Prince took the opportunity of his absence to declare for an internal policy more democratic than that of his Sovereign, and an external policy on one side almost propagandist in its aggressiveness, and on the other diametrically opposed to that which the Emperor is pursuing. Even had the new programme been the wiser of the two such an incident would have been lamentable, but it is not. The external policy of the Emperor at least secures European order, very costly it is true, and very much over-weighted with armaments, but still order; the external policy of Prince Jerome would produce civil war everywhere at once. As to his internal policy, if anything could be worse than Cæsarism, it would be Cæsarism tinged with Red Republican ideas. The Emperor's policy purchases order by repressing freedom, the Prince's would retain the dictatorship without the order which is its best apology. Of all conceivable combinations of character, a Jacobin Prince of the Blood is the most dangerous, and the Emperor, in declaring that, for the future, he intends to govern his family as absolutely as his people, is wise as well as logical. Let France decide her course as she pleases, but new and wild programmes uttered in her name by Princes who do not represent her, are simply elements of disturbance as sterile and as dangerous as sandstorms.

PARLIAMENTARY OATHS.

RESTRICTIVE oaths, like restrictive laws, like all restrictions in fact, may be considered to be in themselves objectionable. They are fetters on a man's freedom of action. There is a *primâ facie* case against them. They may be expedient, under the circumstances in which they were imposed; they may have been indispensable conditions at one time of benefits which could not have been secured without them; but if necessary, they are only necessary evils; nothing short of their necessity could justify their imposition or retention; and the proof of this necessity lies with their advocates. If superfluous, if inoperative, if immoral, they are clearly indefensible. Now, it is scarcely too much to say—indeed it appears to be pretty generally admitted, for even the speeches of Sir John Pakington and Sir Hugh Cairns, either directly or by logical inference, went nearly that length—that the Roman Catholic Parliamentary oath, and we should be disposed to add every Parliamentary oath, comes under one of these condemnatory categories—is either superfluous, or inoperative, or immoral—sometimes perhaps all three.

The practical part of the discussion was brought, by the debate on Tuesday morning last, within very narrow compass. Catholics on entering the House of Commons are obliged to swear that "they do not hold the doctrine that excommuni- "cated Princes may lawfully be deposed and murdered by "their subjects." Well! no one now dreams of charging them with holding anything so monstrous; they feel it to be an affront to be called upon to renounce such wicked nonsense; and even the antagonists of Mr Monsell's Relief Bill, all of them at least of any note, admit that this part of the oath is both needless and offensive, and are quite willing to consent to its repeal. That section of the question may therefore be passed over without more words. It is self-condemned, and condemned by the great majority of sensible and reasonable men. But Catholics are also required to swear that "neither the Pope of Rome nor any foreign Prince what- "ever has or ought to have any temporal or civil jurisdiction "within this realm." Well! this is partly matter of opinion, and partly matter of fact:—as far as regards the matter of fact, Protestant and Catholic quite agree;—as far as regards opinion as to what ought to be, the restriction is admitted to be so theoretical and inoperative, so purely *in nubibus* as a practical question, so impossible to be even raised in Parliament, that Sir John Pakington will waste no words upon it, but consents to Mr Monsell's proposed modification (not

Digitized by Google

naming the Pope at all) without the slightest objection. Thirdly, the Catholics are required to declare that they take their oath "in the plain and ordinary sense of the words, and "without any evasion, equivocation, or mental reservation "whatsoever." Well! this part also is surrendered without defence as utterly needless and insulting:—Nay more: Mr Horsman reminds the House that if a similar declaration were required from the Protestant Members of Parliament in reference to their oath, their consciences might be not a little embarrassed; since even Mr Newdegate is obliged to swear that the Pope has no spiritual jurisdiction in this realm, though he knows that he has, and that he himself is constantly objecting to that jurisdiction and assailing it. And Mr Newdegate has to explain that he "mentally" inserts a word which is not in the oath itself, in order to save himself from swearing to a notorious untruth. Three portions of the oath may thus be considered to be surrendered as needless, and therefore unwarrantable.

But the remaining clause in the Roman Catholic oath is defended on the ground that it is both operative and just. It is this. "I do hereby disclaim and solemnly abjure any intention "to subvert the present Church Establishment as settled by "law within this realm; and I do solemnly swear that I will "never exercise any privilege to which I am or may become "entitled, to disturb or weaken the Protestant religion or the "Protestant Government in the United Kingdom." Now this oath appears to us to unite almost every objectionable quality that an oath can have. In the first place, it is superfluous,—needless, that is, for the protection of the Established Church,—which is about the strongest portion of our national institutions, while the oath implies a secret consciousness that it is one of the weakest. If it cannot defend itself against the votes and speeches of Catholic members—and what "privi-"lege" does a man gain by becoming a member except the privilege of voting and speaking?—it assuredly is too weak to stand. If it can, why deprecate and prohibit those votes and speeches? If the country ever returned a sufficient number of Catholic members to vote down the Church of England, the Church would *ipso facto* be already gone. If the Catholics, as Mr Horsman very pertinently asked, ever became powerful enough, by themselves or with the help of any allies, to subvert the Establishment, would they not *a fortiori* be strong enough to repeal the oath? and if it hampered their action, would they not repeal it as the first preliminary?

But again the oath is inoperative. Like most oaths, it is a stumbling-block and a barrier only to tender consciences: it is a mere cobweb to robust ones. Lord Edward Howard assured the House that it would never prevent *him* from voting on questions affecting the English Church. He would feel himself perfectly at liberty to vote away Church rates, on the plea that their abolition would indirectly tend not to subvert the Establishment but to strengthen it. Again, the Church of England is in no danger whatever; the English Church in Ireland is in very great danger. The one is almost unassailable: the other is almost indefensible. The maintenance of the Establishment in Ireland is the only real danger that threatens the Establishment in England. A Catholic Member might very well join Mr Gladstone and Mr Baines in voting for the reduction or the abolition of the Irish Church, and plead that he best kept his oath as well as best served his country by doing so. Most certainly for ourselves, if we thought the Ecclesiastical Establishment of the realm was menaced, our first instinct would be to save it by cutting adrift its greatest incumbrance and its most unwarrantable portion, namely, the Church in Ireland.

But, lastly, this portion of the oath is demonstrably immoral and unjust. It swears the Member of Parliament *not* to do his duty in Parliament. It withdraws, or seeks to withdraw, from his consideration a large set of questions most important to the country, and declares that those questions shall be determined by only a portion of the Legislature. It restricts arbitrarily the sphere of his legislative functions. It pronounces that he may not exercise his judgment or his patriotism on certain matters on which dissenters and philosophers, who object to the English Church just as much as he does, are yet free to speak and vote. It may oblige him to allow public questions to be decided in a way in which he conscientiously thinks wrong and mischievous. It forbids him to perform his full functions as a senator,—that is, to consult and advise according to what he thinks best for the country. It was imposed by the strong Protestant feeling of the country in order to protect from free Parliamentary discussion institutions to which the Protestants of the country were warmly attached. By a parity of reasoning, and with equal justice, the Conservative feeling of the country might have imposed an oath on members not to subvert the existing suffrage, or as they would call it, "the Constitution as by law established." It would be as equitable to swear Mr Forster or Mr Bright not to disfranchise small boroughs, not to propose household suffrage, not to republicanise our institutions, as to swear Mr Monsell and his Catholic colleagues not to assail or curtail the Irish Church. If the Tories had had as much power in 1832 as the ultra-Protestants had in 1829, possibly they might have attempted to saddle the Reform Bill with a declaration on the part of future members that they would not attempt to subvert the 10*l* franchise or the 40s freehold as then by law established. But even they would scarcely have imposed this oath exclusively on the representatives of the new constituencies.

For ourselves, we doubt whether *any* office or parliamentary oaths are of the faintest use or in the least degree desirable. A simple oath of allegiance no one probably would object to, but where is the need for it, or what would be the good of it? Is it conceivable that any man would go into Parliament with the least idea of subverting the Throne, or cashiering the Queen; or that, if he did, he would not be perfectly harmless there; or that, if he went in with any such aim, the oath would restrain him for one hour? What would be the purpose of an oath binding Members to be faithful to the Constitution? Would it not be either unmeaning or immoral? Is it not as much the bounden duty of every Senator to *amend* the Constitution as to *maintain* it,—to improve our institutions according to his notions of improvement, even if such improvement involves a manifest step in a democratic, and therefore by implication, in a Republican direction? Is the Throne less important or less dear to us than the Church? And are we prepared to exclude Members who are Republicans at heart, or to bind them, while in Parliament, to forego their Republican predilections? The only declaration that justice and sound sense suggest that we ought to demand from our representatives, would be "that they would honestly and faithfully consult "and act for the welfare of the country, according to the best "of their ability and lights";—and probably wisdom and good sense would suggest further that we should let even this alone. It is an oath virtually implied and taken by their candidature, and no forms could ever bind men whose consciences did not already bind them adequately to so elementary an obligation.

REGISTRAR-GENERAL'S REPORT.

The Registrar-General has issued his quarterly return. It comprises, amongst other statistics, the births and deaths in England and Wales during the quarter ending March 31, 1865, and the marriages in the quarter ending December 31, 1864. Perhaps the most interesting fact disclosed is the extraordinary number of births (194,287) during the first quarter of the present year. "The birth-rate of the quarter (children born to 100 persons living) was" (at the rate per annum of) "3·768 against an average of 3·628," or, as we should express it more simply, the quarterly birth-rate was 3·768 to every 400 persons. This is above the average (3·627) of the ten January—March quarters in the years 1855—64, and much above the average (3·464) of the forty quarters comprised in these years. In the last ten years (with the exception of 1861—62—63, when it was highest in the second quarter), the birth-rate has always been highest in the first quarter of the year, arising, probably, from a wise provision of nature that babies, like other young animals, may have all the summer months in which to gather strength. The increase in the birth-rate certainly cannot be accounted for by any increase in the marriage-rate, except upon a theory by no means complimentary to the morality of the nation, for the marriage-rate is invariably highest in the last quarter of the year; and though the average of the quarter ending June 1864 was a little above the average of the ten corresponding quarters in the decade 1855—64, it was lower than that of either of the

Digitized by Google

two corresponding quarters in 1861 and 1863, and not so high as the average of the October—December quarter in any one of the last ten years. The probable explanation of the increase of births in the first quarter of this year as compared with the corresponding quarters in other years, seems to be the general prosperity of the country in the second quarter of 1864. The average price of wheat, 39s 7d per quarter, was unusually low, and the average price of beef and mutton in the carcase not more than 5¼d and 6⅛d per lb respectively, while potatoes were at 50s per ton, and the rate of pauperism unusually low. "The marriage-rate in the year (viz., pro-portion of persons married to 100 of the population,) was "1·736, and it was high throughout the year. The annual "marriage-rate of the fourth quarter was 2·020, against an "average rate of 1·963; in the ten years 1855—64 there is "only one instance of a higher rate (2·026) which occurred "in 1859." The total number of marriages in 1864 was 180,263, or on an average 494 daily. In the previous year it was 173,510.

Not only are the births most numerous in the first quarter, but the deaths also, and invariably so. In each of the last ten years the mortality in the first quarter exceeded that in any other, the average rate being—

1st quarter	2·522
2nd —	2·191
3rd —	1·972
4th —	2·180

The deaths in the 1st quarter of this year were 140,646, the average 2·728 being higher than that of any quarter in the last decade, except the 1st quarter of 1855, when it was 2·910, and the 1st quarter of 1864, when it was 2·773. The rate of mortality in the districts comprising the chief towns amounted in the quarter ending March 31st, 1865, to 2·881, against an average of the corresponding quarters of the last ten years of 2·073, while in the districts comprising the small towns and country parishes it amounted to 2·514 against 2·313. The annual average of the last ten years was, for the chief towns, 2·412; for the country and small towns, 1·987. Thus, though the average rate of mortality is greatest in the large towns, it is not so much affected by the seasons as in the country, where there is less protection from the weather. Mr Kingsley has been prompted, by a love of paradox, to sing the praises of the East wind, and perhaps some people have such excellent constitutions as to be unaffected by cold, but there can be no doubt that to the majority of the population, especially those who are unable to obtain the proper amount of nourishment, an unusual degree of cold causes a diminution of vitality.

"*The mean temperature of January* was 36 deg. 3 min., being "1 deg. 9 min. *below* the average of the preceding 24 years, "and 0 deg. 2 min. less than in 1864. *The mean temperature "of February* was 36 deg. 6 min., being 2 deg. 1 min. *below* "the average of the preceding 24 years, but 0 deg. 6 min. "above that in 1864. *The mean temperature of March* was "36 deg. 6 min., being 5 deg. 4 min. *below* the average of the "preceding 24 years, and 4 deg. 7 min. below that of 1864. "The temperature in March is, therefore, very remarkable, as "we have to go back many years to find one so cold, viz., in "the year 1845, when it was 35 deg. 2 min.; in 1837 it was "35 deg. 8 min. The next very cold March was in 1814, "when it was 35 deg. 1 min.; and for 25 years before that "there was no instance of such low temperature; in 1789 it "was 34 deg. 4 min.; in 1786 it was 34 deg. 2 min.; in "1785, 33 deg. 9 min.; in 1784, 36 deg. 2 min.; and in "1771 it was 34 deg. 7 min. From this it will be seen that "the month of March was much more frequently cold towards "the end of last century than lately. Usually, February is "2 deg. warmer, and March 5 deg. warmer than January. "This year the mean temperature of each month has been "very nearly the same; the usual increase has not taken "place."

There is an old saying about the difficulty that invalids and old people find in getting up "May Hill," but the difficulty seems in reality to come earlier. The French are more alive than we are to the necessity of paying increased attention to health in the early part of the year, but they attribute this necessity rather to the strain upon the constitution, "when "the sap is rising," as they say,—when a fresh start in life is made,—than to the cold. Perhaps a combination of the two causes best accounts for the increased mortality. The high rate cannot be attributed to any rise in the price of provisions, but the following table shows an unmistakeable connection between the mortality, the plentifulness or otherwise of employment, and the temperature:—

Quarters ending	Average Rate of Mortality.	Average Prices: Wheat per quarter in England and Wales.*	Average Prices: Meat per lb at Leadenhall and Newgate Markets (by the carcase).† Beef.	Average Prices: Meat per lb at Leadenhall and Newgate Markets (by the carcase).† Mutton.	Average Prices: Best Potatoes per ton, at Waterside Market,‡ Southwark.	Pauperism. * From the return of the Corn Department, Board of Trade.
† Deduced from the weekly tables published in the ECONOMIST. The average of the highest and of the lowest weekly prices is here shown in cols. 3, 4, and 5, and not the absolute highest or lowest price quoted at any period of the quarter.
‡ Deduced from the Returns of the Poor Law Board.

There is, too, a great probability of the fulfilment of the prediction of the Registrar-General that "the effect of the "winter, like the severity of March, doubtless remains to be "read in legible characters in the registers of the quarter "now running; and the lateness of that unpropitious weather "must be considered in any comparison between the last two "winters. The mean temperature of the winter of 1864 was "37 min. 9 deg. at Greenwich, and was higher by 1 min. 4 deg. "than that of last winter; but the weather was marked by more "frequent and abrupt changes, and as the cold was more "seasonably confined to the first two months, its effect would "be apparent chiefly on the death registers of that quarter. "The deaths from bronchitis in London in the winter quar-"ter of 1863—5 were successively 2,217, 4,023, and 3,217.

"The following statements exhibit the progress of scar "latina and typhus in London since 1860. Scarlatina dis "covers a uniform well-marked tendency to increase in the "last six months, and attain its maximum in the December "quarter, the earlier half of the following year witnessing a "decrease. It was decidedly less fatal in 1864 than in 1863, "while typhus, after declining in 1863, rose again in 1864. "The last quarter of the year also favours the development "of typhus, but by a law which is apparently less constant:—

Deaths in London from Scarlatina.

Years.	March Quarter.	June Quarter.	September Quarter.	December Quarter.	Total.
1861	420	326	467	1,145	2,358
1862	774	677	841	1,165	3,457
1863	880	1,055	1,519	1,621	5,075
1864	749	593	805	1,095	3,242
1865	566	...	...	...	...

Deaths in London from Typhus (including typhoid, continued fever, &c.)

Years.	March Quarter.	June Quarter.	September Quarter.	December Quarter.	Total.
1861	354	347	429	624	1,754
1862	991	1,015	833	796	3,635
1863	735	624	652	881	2,892
1864	862	783	980	1,064	3,689
1865	936	...	...	...	...

These figures contradict the very popular opinion that fever is most fatal in summer, which probably arises from the fact that, in hot weather, noxious vapours, to which fever may be so often attributed, are most offensive to the sense of smell. The following statements contain a severe satire on the boasted civilisation of the 19th century:—

"Scarlatina caused 20 out of 22 deaths at Northam, South-"ampton, a low-lying ground near the Itchen. Typhoid "fever and scarlatina prevailed at Ilchester, Somersetshire,

Digitized by Google

"where there are old dilapidated hovels, over-crowded, and "without drainage or ventilation. In the sub-district of "Mount Pleasant, Liverpool, of 1,150 deaths from all causes, "no less than 318 were from typhus, nearly 300 of which "occurred in the workhouse. At Everton, West Derby, 104 "out of 775 deaths were from typhus and typhoid fever. In "the sub-district of Cheetham, Manchester, there was great "mortality in the workhouse at Crumpsall, 119 deaths "occurred in it, 63 of which were from measles. Rochdale, "Haslingden, Blackburn, Preston in Lancashire, Todmorden, "Huddersfield, Halifax, Bradford, Hunslet, Ecclesall Bierlow, "in the West Riding, suffered greatly from scarlatina.

"The Registrar of Rillington (Malton) writes as follows:—

"'West Heslerton used to be a most healthy village until "'it was drained last year; but it has never been free from "'fever since. The drain terminated in a walled receptacle "'at the end of the village, which was entirely closed at the "'top, thus throwing poisonous gases into the houses at every "'back door. As medical officer I made my protest against "'this arrangement to the surveyors of the place, as well as "'the board of guardians, who were pleased to return me "'their thanks, but with the exception of opening the top "'of the reservoir nothing has been done. At a slight ex-"'pense the work might be carried into a field about 300 "'yards from the spot, and the village thus cleared from "'what has proved a heavy scourge to its inhabitants.'

"Taking the ten large towns in the United Kingdom, the "death-rate of Liverpool (borough) was 3·979 per cent. in the "quarter. The next highest rate is that of Glasgow, 3·898; "Dublin, 3·431; Manchester, 3·414; Leeds, 3·203; Edin-"burg, 3·035; Birmingham, 2·874; Bristol, 2·813. London "and the borough of Salford showed the lowest death-rates "2·796; and their rates were almost the same."

In studying the statistics of mortality, it is hardly necessary to remind our readers that every increase in the death-rate implies an increased liability to disease in the surviving population, and a consequent diminution of the labour power and increase of the poor-rates. Not only duty but self-interest demands that we should cleanse our towns and villages, and purify the air we breathe and the water we drink. The fever which affects a permanent lodgement in crowded cottages and ill-drained alleys, causes a diminution of the rents and profits of the landowner and capitalist, and makes occasional forays into the households of the rich. Hygienic science, or our knowledge of the laws of nature as bearing upon health, is advancing rapidly; but the necessity for obedience to those laws increases *pari passu* with our knowledge of them. The population becomes every day more dense, while the progress of manufactures and sedentary pursuits renders the physical condition of the masses more susceptible of evil influences, and more dependent on sanitary regulations:—

"The births, as has been stated, were 194,287; and the "deaths in the same period were 140,646. The excess of "the former over the latter was 53,641, and represents the "natural increase of the population.

"But the population of the United Kingdom lost about "25,000 by emigration in the quarter that ended 31st March; "and of these about 8,903 were persons of English origin. "The total emigration (including foreigners) from British "and Irish ports where there are emigration officers, was "27,513 persons,* and showed a great decrease on that of "the same quarter in 1863, which was 37,806, and a still "greater as compared with the number last year, which was "41,037. The emigration to the United States was little "more than half of that which took place in the March "quarter of 1864.

"Of 17,865 emigrants who went to the United States in "the present year, about 3,700 were English, 800 Scotch, "and 11,000 Irish. The rest were foreigners."

* Return with which the Registrar-General has been favoured by the Emigration Commissioners. Of 27,513 emigrants the origin was undistinguished in 751 cases, which have been distributed by calculation.

BOARD OF TRADE RETURNS.

According to the returns issued by the Board of Trade, the total value of the exports of British and Irish produce and manufactures, during the first four months of the present and two previous years, was as follows:—

	£
1863	39,458,381
1864	49,894,420
1865	47,706,818

The above figures show a falling off of rather more than 4 per cent. compared with the same period last year; but an increase of upwards of 21 per cent. on 1863.

The shipments in April only were:—

1863	£11,897,177
1864	13,225,039
1865	12,071,111

These returns show a decline in the exports this year of about 9 per cent. compared with 1864; but there is a slight increase on 1863. The reduction, however, is fully accounted for by the decline which has taken place in so many articles of production.

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first three months of 1865, compared with the same period in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease. £
Coffee, raw	433,547	552,051	118,504	...

TESTIMONIAL TO MR RODWELL.

A SECOND TESTIMONIAL was given a few days since, by the Banks of Issue, to Mr Rodwell, the well-known banker of Ipswich, who has for so many years conducted their relations with the Government with so much tact, ability, and courtesy. The former testimonial was given to him after 1844, by one generation of country bankers, and he has now received a similar mark of respect and gratitude from a second generation. For the sake of the Banks of Issue, it is much to be hoped that so wise, sagacious, and experienced a representative will be able next year to give evidence before the Committee Mr Gladstone has announced.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending May 20, 1865 :—

The market report is as follows :—

FLOUR.—Calm continues to prevail at Paris, and yesterday the quotations were 45f to 50f the sack of 157 kilogs. Six marks disposable, 50f; June, 50f 25c; July and August, 51f 50c to 51f 75c. Type Paris the 101 kilogs, 29f 50c disposable.

WHEAT.—At *Paris*, yesterday, the prices were exactly the same as those of the preceding week, but more firm. Choice red and white 26f to 27f the sack of 120 kilogs; ordinary, 25f to 25f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 7,423 bales, and the arrivals 5,198. The stock was estimated at 60,485 bales. The closing quotations were 3f to 5f higher for United States; 5f higher for Brazil; 10f Coconada; 3f China; other sorts unchanged. Low New Orleans was consequently 195f the 50 kilogs, and good ordinary qualities in Broach 135f; Tinnevelly, 112f; Madras, 130f; China, 120f; Egypt, 200f. This week, the market has been animated, and American has risen since Friday 5f to 10f; India, 2f 50c to 5f. United States low were consequently yesterday 205f, and Madras, 130f and 135f.

COFFEE.—At *Havre*, in the week ending Tuesday, the demand was not very animated. 700 sacks Port-au-Prince, and Jacmel, 83f 50c the 50 kilogs in bond; 126 Cape, 86f; 600 Rio not washed, 85f to 85f 50c; 100 for delivery, 75f; 96 Bahia, disposable, 80f 50c; 200 La Guayra grages for delivery, 106f; and some Guadaloupe habitant, 142f 50c, duty paid. By auction, some damaged Jacmel, Rio, and Bahia, were sold. The arrivals exceeded 15,500 sacks. This week, Rio, 82f in bond and 78f 50c; Jacmel, 83f 50c; Gonaives, 88f 50c and 91f; St Marc, 91f and 81f 50c; Malabar, for delivery, 89f; Guatemala, 95f. At *Nantes*, last week, no sales, and none this week. At *Bordeaux*, last week, 364 sacks Mysore, 117f 50c; 400 La Guayra triage at prices not stated. This week, Rio washed, prices not stated. At *Marseilles*, last week, 300 sacks Rio ordinary, 70f. By auction, 1,974 San Domingo damaged, 72f 25c to 73f 75c. This week, Mocha trie, 115f.

SUGAR.—At *Havre*, in the beginning of the week ending Friday calm prevailed, but holders having made concessions, transactions became more active. 940 casks French West India, disposable, the greater part at 49f 25c the 50 kilogs, bonne quatrieme, duty paid; the rest at 50f; some at 52f 50c to 52f 75c; 20 casks Havana, disposable, 31f, No. 12 in bond; 576 ditto, by Spanish ship, 30f, same number; 300 for delivery by French ship, 31f 50c, same number. By auction, some damaged Guadaloupe, Rounion, and Havana. This week, French West India, 49f 25c, bonne quatrieme; usine, 63f; Havana, foreign flag, 31f, No. 12. At *Nantes*, last week, prices were firm: 442 sacks Reunion, 53f 50c, and 151 for delivery, same price. Some Guadaloupe on sample, 63f 59c and 58f 95c. This week, Porto Rico, floating cargo in English ship, 49f 25c, bonne quatrieme; French West India, 60f 50c, on sample. At *Bordeaux*, last week, 290 casks Havana at 33f 50c, on sample. This week, French West India, 50f 50c, and 50f 75c. At *Marseilles*, last week, some French West India, in the port, 32f, bonne quatrieme of Havre. This week, ditto, 31f 50c, ditto; and Havana, by Spanish ship, 30f, No. 12.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 20 chests Bengal disposable at 75c to 80c above the estimates; 20 expected at 9f 40c the ½ kilog; 1 seron Guatemala at prices not stated. The arrivals were 415 chests. This week, Bengal at prices not stated, and at 80c to 91c above the estimates. At *Bordeaux*, last week, 198 chests Bengal at an advance in prices of 25c to 40c; 14 Madras at preceding quotations; 14 Kurpah, though of ordinary quality, at an advance of 10c to 20c. This week, Bengal at prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 728 Monte Video dry cow, 89f the 50 kilogs; 2,942 ditto, salted saladeros cow, 46f to 47f; 1,500 Rio Grande salted ox, 51f for light to 56f; 1,000 Pernambuco salted 45f; 1,200 Tampico dry cow, 71f, ox 73f; 507 Valparaiso salted ox, 54f. By auction, 19 Buenos Ayres dry, 75f; 62 Tuspan, 71f; 76 Lima dry, 72f 75c; 166 Arica ditto, 57f to 58f 50c indifferent quality; also various lots damaged. The arrivals exceeded 9,000. This week,

Digitized by Google

Rio Grande salted ox, 56f; Valparaiso, 56f; Buenos Ayres dry cow, 92f 50c; Monte Video dry, 90f; and cow, 82f 50c; Monte Video horse salted, 42f 50c.

WOOL.—In the course of the week ending Friday there was, at *Havre*, an important auction, which was well attended by French buyers, though not by foreigners. Out of 2,386 bales Buenos Ayres unwashed, 535 merinos were taken at 170f to 260f the 100 kilogs; 382 prima, 162f 50c to 135f; 166 secunda, 162f 50c to 212f 50c; 26 tertia, 160f to 192f 50c; 18 quarta, 160f to 185f; 8 quinta, 137f 50c to 185f; 25 lamb, 210f to 262f 50c; 24 other sorts, 70f to 210f. Out of 2,101 Monte Video unwashed offered, 218 merinos went at 150f to 157f 50c; 298 prima, 170f to 232f 50c; 140 secunda, 175f to 242f 50c; 56 tertia, 162f 50c to 215f; 23 quarta and quinta, 127f 50c to 185f; 23 lamb, 157f 50c to 235f; 23 other sorts, 105f to 210f; 10 bales Monte Video washed, 165f to 265f; 2 La Plata washed, 360f; 20 Chili unwashed, 170f; 4 bales La Plata sheepskin unwashed, 77f 50c to 105f. Apart from the auction, 73 bales Buenos Ayres unwashed went at 1f 65c to 2f 10c the kilog; 27 at 2f to 2f 36c; 71 bales damaged Buenos Ayres and Monte Video, 1f 2½c to 2f 17½c the kilog. The arrivals exceeded 2,100 bales. This week, Monte Video unwashed, 2f 17½c; ditto sheepskin unwashed, 1f 52½c to 1f 90c; Buenos Ayres unwashed, 1f 70c to 2f 50c; Chili, 1f 70c and 2f 10c.

TALLOW.—At *Havre*, in the week ending Friday, 42 casks La Plata, disposable, 48f 50c the 50 kilogs, indifferent quality; 450, for delivery, 50f to 50f 50c. The arrivals were 345 casks. This week, La Plata, for delivery, 50f 50c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, 104f 95c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 54f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 71f; beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The discussion of the Austro-Prussian Commercial Treaty was concluded a few days ago in the Lower Chamber of the Reichsrath. The measure was adopted by the Select Committee appointed to consider it, by eleven votes against four; and on the presentation of their report to the House, a most animated debate took place, which lasted three days. The best speech against the treaty was made by Mr Schindler, who reproduced the usual Protectionist arguments; and the two best speeches in favour of it were those of Mr Kaiserfeld and Count Kinski. Mr Kaiserfeld is one of the members from Styria, the iron trade of which would be materially affected by the treaty. The speaker declared himself very much in favour of the reduction of the duties on iron, and stated that the ironmasters of Styria were also of the same opinion. He showed that the export of iron had increased enormously since 1853, when the duties were reduced.

Messrs Sharp and Co., writing from Hong Kong, on the 15th of April, thus alludes to the state of the bullion market, for the fortnight ending as above:—Gold, owing to smaller arrivals, has slightly advanced in price. The receipts represent $360,000, chiefly in transit from Shanghai: the exports, including those per Ottawa, on the 1st inst., and excluding those to leave to-morrow, amount to over $800,000. Silver—The equivalent of $420,000 has been received, and of $170,000 sent away. The value remains very much as last quoted. Dollar Currency—We continue to be liberally supplied with coin, while the small sums exported indicate the difficulties of employing it profitably elsewhere. The amounts to hand aggregate $740,000, of which a good deal has come in from the coast: the sums sent away are only equal to $130,000. Clean coin have again been a little in demand at an improvement, owing probably to the depreciation of a portion of the defaced and broken currency rather than from any immediate requirement of the new. Discounts and Mortgages—Loans on first-class discounts have been made at 6 per cent., and mortgages have been arranged at 9 and 10 per cent. Exchange—Sterling has receded nearly 2 per cent., the news from England causing a scarcity of private paper. In rupees there has been no corresponding movement, this having been prevented by the news of a fall in sterling there. Exchange and Bullion—Closing Quotations—On London, 6 months' sight, 4s 5¾d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 218 rs; on Shanghai, 15 days' sight, 72 tls; on Singapore, 15 days' sight, par; Bar silver, 17 dwts *B.*, 10½ cent. prem.; Sycee, 9 per cent. prem.; Mexicans, ½ per cent. prem.; gold leaf, $22.95 per tl; gold bar, $22.99 per tl, equivalent to 100 touch; Spanish doubloons, $14.10 each; Sovereigns, $4.50 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 16 per cent. prem.

The following is a statement of deposits and coinage at the United States Mint, Philadelphia, for the month of April, 1865:—

Pittsburgh, Fort Wayne and Chicago	467	738,107	588,066	150,041

* Decrease, 1,035 dols.

In addition to the municipal taxes, the duty on foreign tobacco at Mexican ports is now as follows:—

	per lb. c
Leaf tobacco, gross weight	25
Chewing do —	50
Snuff do —	75
Cigarettes, net weight	75
Segars —	150

Tobacco entered with a final destination to interior custom houses is to pay as a counter registry duty the following rates:—

	per lb c
Leaf tobacco, gross	25
Chewing do —	50
Snuff do —	50
Cigarettes, net	50
Segars —	100

In leaf tobacco no deduction has been allowed in weight from the original packages. Segars include the ties, but the boxes will be deducted from the weight.

From statistical tables recently compiled by Mr F. Gisborne, it appears that with the exception of the Spezzia and Corsica line, which remained in working order about ten years, no deep sea cables, those, for instance, laid down at a depth exceeding 100 fathoms, have met with any degree of success. Neither have any cables laid at a depth less than 20 fathoms been worked for any considerable period. Cables laid at a moderate depth have met with more success, and where the coating has been suited to the nature of the bottom on which it has been laid have remained in operation for some period. Mr Gisborne states that the only cables which have as yet proved successful for any length of time, are heavy cables laid in moderate depth of water, viz., of from 20 to 100 fathoms.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending April 29, 1865, compared with the previous month:—

	April 1, 1865.	April 29, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	19750334	21051570	1301236	...
Private Banks	2894084	3040531	146447	...
Joint Stock Banks	2756205	2895910	139705	...
Total in England	25400623	26988011	1587388	...
Scotland	3972·32	4015156	178524	...
Ireland	5694360	5858097	163737	...
United Kingdom	35067615	36997264	1929649	...

And, as compared with the month ending the 30th of April, 1864, the above returns show a decrease of 426,426*l* in the circulation of notes in England, and a decrease of 107,107*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,148,560*l*, the English joint stock banks are below their fixed issue 330,147*l*,—total below fixed issue in England 1,479,007*l*: the Scotch banks are above their fixed issue 1,401,815*l*; the Irish banks are below their fixed issue 496,397*l*. The average stock of bullion held by the Bank of England in both departments during the month ending April 26 was 14,980,404*l*, being an increase of 96,721*l* as compared with the previous month, and an increase of 1,978,344*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,318,168*l*; gold and silver held by the Irish banks, 2,123,898*l*; total 4,442,066*l*; being an decrease of 85,938*l* as compared with the previous return, and an increase of 199,357*l* when compared with the corresponding period last year.

During the week ending May 31, the imports of bullion were:—Gold, 700,253*l*: silver, 451,032. The exports were:—Gold, 12,939*l*; silver, 115,516*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 31st day of May, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,569,375	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	14,919,375
		Silver Bullion	...
	29,569,375		29,569,375

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	11,480 025
Rest	3,190,279	Other Securities	19 823 240
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8,706,848	Notes	8,558,780
		Gold and Silver Coin	919,116
Other Deposits	13,919,431		
Seven Day and other Bills	511,603		
	40,881,161		40,881,161

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,422,198	Securities	31,400,265
Public Deposits	8,706,848	Coin and Bullion	15,838,491
Private Deposits	13,919,431		
	44,048,477		47,238,756

Dated the 1st June 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,190,279*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£91,708
An INCREASE of Public Deposits of	709,743
An INCREASE of Other Deposits of	367,571
An INCREASE of Government Securities of	495,584
An INCREASE of Other Securities of	103 964
An INCREASE of Bullion of	539,223
A DECREASE of Rest of	30,251
An INCREASE of Reserve of	490,543

The figures presented in the Bank return this week indicate the large additions that are being made to its resources. Notwithstanding the increase of more than half a million sterling in the Government and private securities, the reserve exceeds by 490,543*l* the amount held last week. The addition to the stock of coin and bullion is 539,223*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20.726,089	£ 21,515,243	£ 21.009,392	£ 21,346,840	£ 21,422.198
Public deposits	5,211,168	7,518,009	8,779,387	8,286,719	8,706.848
Other deposits	13,282,876	13,188 136	13,896.450	12,493,776	13,919,431
Government securities	12,677,816	10,335,491	11,151,395	11,072,267	11,480,025
Other securities	12,419,158	12,409 373	21,140,649	20,159,854	19,823,240
Reserve of notes & coin	11,048,897	9,286.183	8,607,188	7,815,326	9 577,896
Coin and bullion	17,789,102	15,486,723	14,425,553	14,052,761	15.838,491
Bank rate of discount	4 p c.	3 p. c.	4 p. c.	7 p. c.	3½ p. c.
Price of Consols	91⅞	92⅛ xd	92	91⅛ xd	90 xd
Average price of wheat	77s 7d	55s 2d	46s 5d	39s 5d	41s 9d
Exchange on Paris (shrt)	25 10 15	25 20 27½	25 17½ 25	25 25 30	25 15 22½
— Amsterdam ditto	11 17½ 18	11 15½ 16	11 15½ 16	11 17½ 17¾	11 17 18
— Hamburg (3months)	13 7 7½	13 8½ 8¾	13 7½ 7¾	13 8½ 8¾	13 9 9½

In the corresponding week of 1855, news had been received of the success of the allied expedition against Kertch. The allies had also occupied the line of the Tchernaya. In India, trade continued in a very depressed state. Money was abundant, and the market easy.

In 1862, the French Government had presented a Bill to the Corps Legislatif to legalise the quarterly payment of the dividend on the Old Three per Cent. stock. Animated debates on the national armaments were going on in the Houses of Parliament.

In 1863, public attention was seriously occupied with the question of public works for the benefit of the Lancashire operatives. A Prussian loan for 1,573,840*l* at 7 per cent. interest, had been announced by Messrs Erlanger and Co. The interest on the June Exchequer bills had been raised from 2½ to 2¾ per cent. The publication of Sir Charles Trevelyan's Indian Budget had created a favourable impression.

In 1864, a Bill to establish free trade in corn had been introduced to the Cortes at Lisbon. News had been received of the occupation of the Chincha Islands by the Spanish Admiral. In Algiers, the French forces had defeated the insurgents in several small engagements. In America, a severe contest was being carried on at Charleston between Federal ironclads and the Confederate batteries. Reinforcements were being hurried forward to Grant. The Confederates had defeated Generals Butler and Sigel. General Johnstone was retreating to Atlanta. The National Bank of Italy had reduced its rate to 8 per cent. The Bank of England had reduced its rate to 7, and the Bank of France to 6 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 863,718*l*; in 1862, a deficiency of 6,221,237*l*; in 1863, a deficiency of 7,244,199*l*; and in 1864, a deficiency of 7,666,078*l*. In 1865, the deficiency is 5,903,809*l*.

The diminished extent of trade, the reduced value of foreign and colonial produce, and the absence of any export demand for the precious metals, the amount of which is constantly increased by new arrivals at the Bank, have led to a further reduction in the rate of discount. On Thursday the Bank directors lowered the official minium from 4 to 3½ per cent. The rate at the Bank of France was on the same day reduced to 3 per cent. A moderate demand exists, but operations have been done to-day at 3⅜ per cent.

The following are the current terms for paper of various dates :—

30 to 60 days	3½ per cent.
3 months	3½ per cent.
4 months	4 per cent
6 months—Bank bills	4 per cent.
6 months—Trade ditto	4½ 5 per cent.

Money has been in slightly better demand on the Stock Exchange, where it has commanded 3 per cent.

The allowance for deposits at the joint stock banks and discount houses has been altered as follows :—

Joint Stock Banks	*2½ per cent.
Discount houses at call	2½ per cent.
Do. with seven days' notice	2½ per cent.
Do. fourteen days	3 per cent.

* At the London and Westminster 1½ per cent. only on sums below 500*l*

6,000*l* in bar gold has been sent into the Bank, and 60,000*l* in sovereigns have been withdrawn for Portugal.

The following are the rates of discount current in the chief continental cities :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	3	3
Vienna	5	5½
Berlin	4	3⅜
Frankfort	4	3
Amsterdam	3½	3½
Turin	5	4½ 5
Brussels	3½	3½
Madrid	9	...
Hamburg	...	2½
St Petersburg	5½	5½

The following are the changes ascertained by a comparison of the returns issued by the Bank of France yesterday and on the previous week :—

	£
INCREASE.	
Cash	184,000
Bank notes	264,000
Treasury balance	26,660
Current accounts	504,000
DECREASE.	
Bills discounted	40,000

ENGLISH FUNDS.—The advance in Government stocks has continued during the week, and Consols note a further improvement. The closing price this evening is 89⅞ to 90 xd. for money and for the account. New 3 per Cents and Reduced, 89⅜ to 89½. India 5 per Cents.. 106⅜ to 106⅝.

There is little business in Exchequer bills, which are quoted at par to 5s pm., and India bonds, 15s to 20s pm.

FOREIGN STOCKS.—The markets have maintained a moderate degree of firmness, Turkish stocks and Italian 5 per Cents. both noting an improvement on previous quotations. Spanish Passive stock and the Certificates have declined. The following are the closing prices of stocks dealt in to-day :—4½ per Cent. Brazil, 81 to 83. 7 per Cent. Egyptian, 96 to 97; ditto, 1864, 93½ to 94. 5 per Cent. Greek, 21 to 21⅛; ditto Coupons, 8 to 9. 5 per Cent. Italian, 65¾ to 66¼. 3 per Cent. Mexican, 24½ to 24¾. 2 per Cent. New Granada, 29 to 31. 4½ per Cent. Peruvian, 80 to 82. 3 per Cent. Portuguese, 48¾ to 49¼, 5 per Cent. Russian 1822, 91 to 92; 4½ per Cent. ditto, 1850, 89 to 90; 5 per Cent. ditto 1862, 91 to 92. 3 per Cent. Spanish, 48½ to 49; 3 per Cent. ditto Deferred, 40½ to 41; ditto Passive, 31¼ to 31½; ditto Cer-

Railways and other Shares.—The public show great disposition to embark still more largely in railway stocks. Prices are firm, although the extreme quotations of the day were not in all cases supported at the close of the markets. Caledonian stock, compared with the price quoted last Friday, is 1½ per cent. higher; Great Eastern is ½ per cent. higher; and Great Northern stocks 1 per cent. higher; Lancashire and Yorkshire has improved 1½ per cent.; and London and North-Western 1 per cent. The advance in Metropolitan stock is 3 per cent.; Midland stock is 1¼ per cent. higher. South-Eastern stock is at 86 to 86½.

Colonial stocks are firm, with an upward tendency.

Financial shares are all firmer.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

Foreign Exchanges show no change of importance, but the tendency was triflingly upwards.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The arrivals of gold since our circular of the 25th ultimo comprise—187,000*l*, per the Scotia, from New York; 22,000*l*, per the Bavaria, from New York; 86,000*l*, per the America, from New York; 12,000*l*, per the Red Rover, from Melbourne; 140,000*l*, per the Shannon, from the West Indies; 87,720*l*, per the Euxine, from Alexandria; 9,650*l*, overland per the Messageries steamer, from the Mediterranean. 890*l* has been shipped per the Delta to Bombay. There is no demand for export. The only vessel with gold from Melbourne known to be at sea, is the Norfolk, which sailed on the 21st March, with 23,000*l* on board. Advice of further shipments is however expected. 422,000*l* in bars and sovereigns have been taken to the Bank of England since our last circular.

Silver.—Our market is still quiet, the only purchases made having been for the Continent. There is no demand whatever for the East. The nearest quotation is 5s 0⅜d per oz standard. The Shannon, from the West Indies, has brought 251,000*l*, the Dore portion having been disposed of at 5s 0⅜d per oz standard.

Mexican Dollars.—We have no sales of Mexican dollars to report except for the continent, the last quotation being 59⅜d per oz. The Shannon, from the West Indies, has brought 180,000*l* in this coin. Some further reduction in price may possibly have to be submitted to on sale.

Exchange on India remains very unsettled, owing to the uncertainty which prevails as to credit in India. Banks' drafts at 60 days' sight may be quoted from 1s 10d to 1s 11d, and commercial bills from 1s 9½d to 1s 10½d.

India Government loan notes remain without much change, and may be quoted 107 to 109 for 5½ per Cents., 100 to 102 for 5 per Cents., and 88 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price, ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 2⅜d per oz. Silver—Bar silver, 5s 0⅜d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅜d per oz std; Mexican dollars, 4s 11⅜d per oz, last price; 5-franc pieces, 4s 11½d to 4s 11⅝d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

The Committee of the Stock Exchange have authorised the shares of the Trinidad Petroleum Company (Limited) to be marked in the official list.

The Committee of the Stock Exchange have appointed Tuesday next, the 6th June, a special settling day in the shares of the Milwall Freehold Land and Dock Company, which are to be officially marked.

Failures and Mercantile Embarrassments.—An order was made on Saturday last by Vice-Chancellor Sir Wm. Page Wood to wind up the Ryde Quay Company (Limited), and Mr H. T. Edwards has been appointed the provisional official liquidator.

Messrs Fulcher, Cooper, and Co., East India merchants, of Liverpool and Bombay, have stopped payment. Their liabilities are understood to be considerable.

Messrs Woodhouse, Kerrich, and Co., merchants and agents to the East Indian Underwriters' Association, have stopped payment. Their liabilities are estimated at about 160,000*l*.

Messrs Ivens and Chessell, of Bristol, have supended engagements, with liabilities believed to be of considerable magnitude.

The failure of Messrs Bryon, Hughes, and Co., in the provision trade, has been announced. Their liabilities are said to be moderate.

Creditors of the Petroleum Trading Company (Limited) are required to send the particulars of their claims to the liquidators by the 30th June.

A petition for the winding-up of the London and Colonial Bank (Limited), is to be heard before the Master of the Rolls on the 3rd of June.

Public Companies.—The half-yearly meeting of the Imperial Continental Gas Association was held on Tuesday last, when a dividend and bonus, together equal to 3*l* 10s per share, were declared upon the 28,000 shares of the Association for the half-year ended 31st December last.

At the adjourned general meeting of the Park Gate Iron Company (Limited), held on Wednesday last, the report was adopted, and a dividend at the rate of 12½ per cent. per annum, free of income tax, declared.

At the annual meeting of the Trust and Loan Company of Upper Canada, held on Wednesday, the directors' report was unanimously adopted, and a dividend of 8 per cent. per annum, less income tax, declared.

At the annual meeting of the shareholders of John Brown and Co. (Limited), Atlas Steel, Iron, and Armour-plate Works,

Digitized by Google

Sheffield, held on the 25th ult., the net profits were stated at 76,138*l* 10s 3d. A dividend of 5*l* 5s per share was declared, and the balance 21,735*l* carried to new account.

A dividend of 4s per share is announced as payable to the shareholders of the India Freehold Land, Colonisation, Trust, and Agency Association (Limited) on the 30th inst.

The meeting of the Oriental Gas Company took place on Monday last. The available balance was stated at 8,638*l*, out of which a dividend was declared of 5½ per cent., free of income tax, making, with the interim payment of 2½ per cent. in December last, a total distribution of 8 per cent. for the past year.

The directors of the New Zealand Banking Corporation (Limited) have issued their report, showing a net profit of 3,532*l* 14s 7d; out of which it is proposed to pay a dividend of 10 per cent. per annum for the past six months, and carry forward 467*l* 9s 5d.

The meeting of the Scinde, Punjaub, and Delhi Bank Corporation took place on Tuesday last, when the directors' report was adopted. It stated that the profit balance, 3,707*l*, of the half-year, together with the reserve fund, 24,674*l*, would be absorbed by losses through the failures in the Indian trade, and that a further sum of 5,238*l* will have to be provided for.

At the meeting of the South African Mortgage and Investment Company, held on Tuesday last, a dividend was declared at the rate of 6 per cent. per annum, making a total distribution for the year of 7 per cent.

At the meeting of the Brazilian and Portuguese Bank, held on Tuesday, the directors' report, which was adopted, stated that, owing to the late failures at Rio, the profits of the year, amounting to 27,283*l*, had been absorbed, and that 19,717*l* still remains to be provided for to cover the estimated losses, which are set at 40,000*l*.

The annual meeting of the Emperor Life and Fire Assurance Societies was held on Wednesday last. It was stated that, during the year 1864, 1,300 new policies had been issued. A dividend of 5 per cent., and a bonus of 1 per cent., free of income tax, were declared. The total amount of life and fire assurances effected was 2,332,312*l*.

At the meeting of the Peninsular and Oriental Steam Navigation Company, held on Thursday last, a dividend of 3½ per cent. for the six months was declared, without additional payment.

The meeting of the Natal Land and Colonisation Company was held on Thursday, when a dividend of 7s per share, free of income tax, was declared, making a total distribution for the year at the rate of 10 per cent.

At a meeting of the A shareholders of the Northern Assam Tea Company, held on Thursday, resolutions were passed increasing the capital to 400,000*l*.

The ordinary general meeting of the shareholders of the London Chartered Bank of Australia was held to-day, when a dividend was declared for the half-year of 4 per cent. free of income tax, 5,000*l* placed to the reserve fund, and the balance, 8,436*l* 14s 9d, carried to next account.

The annual meeting of the European Assurance Society took place on Thursday last. The premiums on new life policies issued during the year were stated at 23,149*l* 16s 6d. The increase in the assets of the Society amounted to 52,925*l* 18s 10d. By the amalgamation with the British Nation Life Office, the subscribed capital is raised to upwards of 700,000*l*, and the annual income to 300,000*l*.

The Share List of the London Steam Collier and Coal Company (Limited), will close on the 6th of June, for London applications, and 7th for the country. The arrangements already made by the directors will enable operations to be commenced without delay.

The London Bridge Land Company (Limited), capital 300,000*l*, in 6,000 shares of 50*l* each, is formed for the purpose of purchasing a valuable freehold estate in Southwark of an eligible nature. Rents in that part of London are rising with great rapidity, and it is intended to take power to issue debentures so that the capital upon which a dividend is to be paid may be as small as possible.

The Devon Great Maria Consolidated Copper Mining Company (Limited), capital 50,000*l* in 5,000 shares of 10*l* each, has been formed for the purpose of working an extensive mineral property, situated near to the "Devon Great Consols," which have proved so wonderfully profitable. The directors have before them a survey by a gentleman of great experience which supports the confidence they feel in the undertaking.

MISCELLANEOUS.—Messrs Baring Brothers and Co. have received by this mail, on account of New Granada dividends, the following remittances:—From the Custom House of Santa Marta, 3,289*l* 3s 2d; and from that of Cartagena, 588*l* 7s 5d—together, 3,877*l* 10s 7d.

Messrs Baring Brothers have also notified that the dividends due on the 1st June on the New Granada Active and Deferred bonds will now paid at the rate of 5s 1½d per cent. on the Active, and 1s 4d per cent. on the Deferred.

The General Credit and Finance Company of London are in receipt of advice from their agents—Messrs H. L. Boulton and Co.—dated La Guayra, May 9, 1865, of duties collected as follows, on account of the Venezuelan loan of 1864:—Per statement No. 28, from La Guayra, 17,236 dols 39c; ditto No. 29, from ditto, 6,745 dols 50c; per statement No. 40, from Puerto Cabello, 41,326 dols 17c; ditto No. 41, from ditto, 9,827 dols 25c—total, 75,135 dols 31c.

The Ecuatorian Commission of Agency have given notice that on the 5th June they will pay a final instalment of 2s 7d in the pound to the holders of certificates issued by them in exchange for the 12th coupon due the 1st November, 1864, representing the claims of the holders of Ecuador bonds on the sum recovered from the estate of Messrs Guttierer and Co., of Guayaquil.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

The quotation of the exchange at New York on London is now generally made in gold, as was the case before the great depreciation of the currency. The last price was about 110 per cent. for bills at 60 days' sight. At this rate there is a small profit on the importation of gold from the United States.

REPORTS OF JOINT STOCK BANKS.

Continued from Page 24 of Supplement of May 27.

LONDON CHARTERED BANK OF AUSTRALIA.

The following report of the court of directors of this bank will be presented at the thirteenth ordinary general meeting of the proprietors, to be held at the London Tavern, Bishopsgate street, on the 2nd June, 1865:—

1. In accordance with the terms of the charter of incorporation and deed of settlement of the company, the directors now submit to the proprietors their thirteenth annual report, accompanied by the accounts, duly audited, and showing the position of the bank's affairs to the 31st December, 1864. 2. It is gratifying to the court to be able to state that the general results of the past year's operations have been successful. From the accounts appended to this report it appears that the divisible profits are somewhat in excess of last year, a fact which the proprietors will learn with satisfaction, viewing the depressed state of trade which has existed in the Australian colonies, as well as the severe competition this bank has had to contend with. 3. The latest advices from the colonies extend to the 25th March last, and speak in favourable terms of the position and prospects of the bank. The inspector, Mr Bramwell, arrived in Melbourne and resumed the management of the bank's affairs in February last. 4. The accounts for the past year are annexed to this report, being made up, as customary, to the 31st December last. On reference to them it appears that after the usual deductions, and also after making allowance for bad and doubtful debts, there remains to the credit of profit and loss the sum of 53,436*l* 14s 9d, out of which the directors recommend that a dividend be declared for the half-year of 4 per cent., free of income tax, 40,000*l*; and they further recommend that a sum of 5,000*l* be placed to the reserve fund, which will then amount to 900,000*l*, leaving to be carried to next account a balance of 8,436*l* 14s 9d.

PUNJAUB AND DELHI BANK CORPORATION (LIMITED).

At the fourth half-yearly meeting of the shareholders in this company, held at the London Tavern, Bishopsgate-street, on the 20th May, 1865, the following report was presented:—

The half-year ending December 31st last has been one of unusual risk and uncertainty to all banks connected with India. The rapid decline in cotton, and depreciation in East India produce generally, rendered it necessary for the directors of your bank to act with extreme caution, and restrict the branches in their operations, especially in the purchase of bills drawn against produce. The high rates of discount which prevailed on this side from June to December (the Bank of England minimum having ranged from 6 to 9 per cent.), not having been accompanied by a corresponding increase in exchange rates on England, were also severely felt by Indian banks in diminishing their profits on such transactions. The accounts now presented in the annexed statement have been duly audited, and show a gross profit of 31,062*l* 12s 7d., including the balance brought forward from last half-year, after deducting interest on current and fixed deposits. From this sum 14,551*l* 16s 3d has been deducted for current expenses, and 12,008*l* 4s 11d for rebate on bills and commision on acceptances running, 428*l* 9s 6d for 5 per cent. on preliminary expenses, and 366*l* 8s 2d for bank premises redemption fund, leaving a balance of 8,707*l* 13s 9d at the credit of profit and loss. The shareholders will not expect that the bank can have passed through the exceptional period which has proved so disastrous to many houses in the Indian trade, and during which all Indian banks have suffered more or less, without being similarly affected. The actual losses on bills unpaid during the currency of the half-year ending 31st December last amounted to about 4,000*l*. Since the above period, however, losses have been incurred from the suspension of firms, which will, it is estimated, absorb the sum at the credit of profit and loss and the reserve fund, leaving 5,238*l* 8s 1d still to be provided for. During the present half-year Mr Thornton, Mr Boyd, and Mr Worms have ceased to be directors. The board recommend that only one of the vacancies thus occasioned be filled up, and they are taking steps with a view to a suitable selection.

UNION BANK OF LONDON.

At half-yearly meeting of the proprietors, held at the court room of the banking house, 2 Princes street, Mansion House, January 11, 1865, the following report was read:—

The directors have to report that the net profits of the bank for the six months ending 31st December last, after payment of all charges (including the sum of 164,375*l* 12s 4d for interest paid and due to customers on their current and deposit accounts), and making ample provision for all bad and doubtful debts, amount to 180,195*l* 2s 11d, which, with 363*l* 6s 2d brought forward from 30th June last, amount to 180,558*l* 9s 1d. The directors now declare a dividend for the last six months at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. on the increased paid-up capital, being at the rate of 20 per cent. per annum, clear of income tax. The 20,000 new shares issued under the authority of the special general meetings held in July last were all claimed by the proprietors, except 65 shares; and in order to complete the capital, the directors have debited the profits of the half-year with 1,950*l*, the amount of such unclaimed shares. In accordance with the resolutions of those special general meetings, the paid-up capital of the bank has been thus raised from 900,000*l* to 1,200,000*l*, and the reserved fund from 67,000*l* (the amount at which it stood in July last) to 300,000*l* by the addition of 233,000*l*, part of the amount received from premiums on the new shares. The directors are of

Digitized by Google

opinion that the reserve fund is, for the present, adequate in amount, and they have, therefore, appropriated the balance of the premiums on the new shares, amounting to 67,000*l*, towards a buildings investment account. After payment of the dividend and bonus, amounting together to 119,182*l* 10s, and appropriating 67,000*l*, received from premiums, to the buildings investment account, there will remain a balance of 61,875*l* 19s 1d to be carried forward for appropriation at the end of the financial year in July next. The directors recommend that the 65 unclaimed shares should be placed at their disposal, to enable them to apply the dividends in the temporary relief of some of those urgent and unforeseen cases of pressure from illness which occasionally occur amongst the clerks in the establishment.

GENERAL BALANCE, for the Half-year ending December 31, 1864.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane, to-day, was moderate, and the trade ruled quiet, at Monday's decline in the quotations. In foreign wheat, a limited business was transacted on former terms. Barley, with which the market was very moderately supplied, moved off steadily, at full prices. Oats were in fair request, at quite previous rates, whilst the trade for beans and peas, owing to the small supplies on offer, ruled firm. Flour was in fair demand, at Monday's currency. This week's imports amount to 10,560 quarters of wheat; 7,390 barley; 16,600 oats; and 740 sacks of flour.

No change took place in the value of cereal produce, at Liverpool, this morning; the trade, however, was very quiet. At Wakefield, wheat was in fair demand, but on rather easier terms.

The demand for cotton at Liverpool has again been on an extensive scale; speculators and exporters, as well as the trade, buying largely. Many mills which have either been working short time or entirely closed are now in full operation, and have plenty of orders on hand. The Manchester market has also been very active this week, the inquiry for manufactured goods and yarn being large. Spinners have raised their price, and consequently the raw staple has advanced from ½d to 1¼d.

Advices from Madras to April 27, state that very little business was passing in old cotton. The arrivals of *new* produce had been small, and prices were considered nominal. The value of *new* Western qualities was 6¾d to 7d per lb, cost and freight. The stock of old cotton was about 10,000 bales.

A report from Shanghai, in reference to the state of the cotton trade during the fortnight ending April 8, says:—Business has come to a stand still; the transactions are for the coast ports, by the Chinese foreigners keeping entirely out of the market. No. 1 Shanghai has declined to 12.5 to 13 tls, and Kongpoh to 13 to 13.5 tls.

The sales of cotton at Hong Kong, for the fortnight ending April 15, were: -Shanghai, $21.50 to $22.50. Ningpo, $23 to

Digitized by Google

$24 per picul; sales, 6,000 bales. Japan, $24 to $26 per picul; sales, 788 bales.

At Yokohama, during the fortnight ending March 31, cotton sold at $28 to $29 per picul; but the stock on hand was very small.

Very little change has taken place in the value of colonial and foreign grocery produce this week. Tea and sugar have been dealt in to a limited extent, at about previous rates; but the demand for coffee has ruled steady, and the late prices have been well supported. The market for rice has been quiet, on former terms. In Demerara rum, considerable business has been transacted, at fully late rates.

Advices from China state that the export of tea from all ports to Great Britain, from June 1 to March 31, amounted to 112,322,310 lbs, against 109,037,210 lbs during the corresponding period in 1863-4.

The coffee trade at Colombo, during the fortnight ending May 1, was dull, at lower prices. Plantation produce was quoted at 12s 6d per bushel; native ditto, unpicked, 42s; ditto, picked and dried, 47s to 48s per cwt. The following statement of exports is from Messrs Fryer, Schultze, and Co.'s circular.—

The public sales of colonial wool have passed off steadily during the week, and a full average business has been done for shipment to the continent. Good and fine fleece and greasy wool, both from Australia and the Cape, is now without material change in value from last series; but inferior qualities show a reduction of 1d per lb. English wool, privately, moves off slowly, at late rates.

As regards the state of the tobacco trade, last month, Messrs Grant, Hodgson, and Co. observe:—The market for American tobacco has presented no new feature since our last, and with but few exceptions the sales made were for immediate requirements, consisting of small lots, chiefly of the best descriptions offering, at top market rates. Imports—253 hhds. Deliveries—769 hhds, against 1,052 hhds in the corresponding month of last year. Stock—19,882 hhds, against 16,252 hhds in 1864; 18,039 hhds in 1863; 21,960 hhds in 1862; 18,163 hhds in 1861; and 16,549 hhds in 1860.

The market for Scotch pig iron has ruled firm, at 54s 3d cash, mixed numbers. For other metals the trade has ruled quiet. The stock of spelter on the 1st inst. was 6,874 tons, against 6,417 tons on May 1, current year, and 12,448 tons on June 1, 1864. The following, from L. Th. van Houten's circular, relates to Banca tin in Holland:—

	1865 slabs	1864 slabs	1863 slabs
Import in May	10,715	18,213	3,361
Previously this year	83,797	66,509	39,397
Total five months	94,512	84,722	42,758
Deliveries in May	3,890	6,443	4,760
Previously this year	24,517	26,817	30,288
Total five months	28,407	33,260	35,048
Stock on warrants	38,500	42,278	34,692
Unsold stock	173,916	137,688	104,686
Total stock	212,416	179,966	139,378
Quotation, May 31	56½fl	67½fl	80fl

The oil trade has ruled firm. Cocoa-nut oil has been in request for export to France at enhanced rates. Linseed oil has realised 32s 6d to 32s 9d; and foreign refined rape, 44s to 45s per cwt. Tallow is in but moderate request, at 40s 6d for P.Y.C. on the spot.

The market for cotton goods at New York, during the week ending May 20, was rather quiet. At periods, there was a slight tendency to depression; nevertheless, prices of all descriptions were well supported. In woollen goods, about an average business was transacted at full quotations. The supply of foreign cotton, woollen and silk manufactures on sale was limited, and silk goods were selling at very high prices. In breadstuffs, owing to considerable arrivals, a further decline took place; a somewhat increased amount of business, however, was done for export. Most other articles of commerce were in moderate request, at about previous quotations. For money, there had been a somewhat improved demand, and the quotations were a shade firmer; prime 60 days' commercial paper was quoted at 6½ to 7; 3 to 4 months' ditto, 7 to 8 per cent. The fluctuations in gold had been trifling, the latest quotation being 130½ per cent. The stock of bullion in the banks on the 13th ult. was 4,710,650*l*; and the balance in the Sub-Treasury, 7,695,400*l*. The shipments of specie, from Jan. 1 to May 13, amounted to 1,320,770*l*, against 3,963,360*l* in 1864, 4,573,500*l* in 1863, 3,074,290*l* in 1862, 580,560*l* in 1861, 2,262,970*l* in 1860, and 4,086,400*l* in 1859. The foreign imports for the same period were valued at 10,958,000*l*, against 18,689,800*l* in 1864, and 14,057,600*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—JUNE 2.

The cotton market was quiet on Saturday, and prices of some descriptions were in favour of the buyer, but on Monday increased firmness appeared, and on Tuesday the advices per Hibernian of advanced prices in New York (to 56 cents for middling), as well as the buoyant state of the Manchester market, caused great activity. A very extensive business has been transacted daily, accompanied by enhanced quotations, particularly in American and long stapled descriptions, the reduction of the Bank rate to 3½ per cent. tending to increase the firmness with which the market closed yesterday. Sea Island has been in good request, at the full rates of last week. American continues in demand from the trade as well as exporters and speculators, and has advanced 1¼d to 1½d per lb. With very great demand for Brazil, the quantity offering has materially diminished, and quotations are raised fully 1d per lb. In Egyptian large transactions have taken place at steadily advancing rates, and the quotations are generally raised a 1d to 1¼d per lb. Smyrna has been in good demand, and is ¾d to 1d per lb dearer. For Surat there has been an active inquiry, and since Monday prices have had a gradually upward tendency, particularly for the better qualities, which have risen fully ½d per lb. Bengal and Scinde continue freely offered at ¼d per lb advance in the lower, and ½d per lb in the better qualities. In good stapled China and Japan a very large business has been done at ¼d to ½d per lb advance; the short-stapled kinds are much neglected, and without any improvement in value.

To arrive several transactions have been reported during the week, the last quotations being in Egyptian, on the 31st ult., to average fair open, ship named, at sea 15¾, and yesterday fair open, July delivery 16, and shipping 16. Ooomrawuttee, on the 31st ult., fair new merchants, ship named 11, and Bengal, yesterday, April sailing, 6¼.

The sales of the week amount to 108,340 bales, including 21,740 on speculation, and 23,790 declared for export, leaving 62,810 bales to the trade. The sales to-day amount to about 15,000 bales.

LONDON—JUNE 2.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened dull at a decline of a ¼d per lb, and continued quiet until Tuesday, when there was a decided improvement in the demand, which has since been maintained; prices have been gradually advancing during the past three days, and are now 1d to 1½d per lb dearer than on Friday last for long-stapled descriptions, ½d to ¾d for the better qualities of Surat, ½d for Madras, China, and Japan, and ¼d for Scinde and Bengal; Coconada, from its extreme scarcity, has advanced 1½d per lb.

NEW YORK—MAY 20.

In the early part of the week the cotton trade was dull, and middling Upland produce sold as low as 49 cents per lb. The market, however, has since improved, and has shown, indeed, considerable activity. Middling Upland cotton is now worth 54 cents per lb. The sales are estimated at about 10,000 bales. The receipts are 5,589 bales, consisting of 1,547 bales from New Orleans, 980 bales from Matamoras, 2,462 by railroad, and 600 bales from sundry American and West Indian ports. This additional quantity raises the quantity received, since Sept. 1, 1864, to 203,885 bales. Present quotations:—

MARKETS IN THE MANUFACTURING DISTRICTS

A full average business has been transacted this week in goods in the leading markets, and the quotations, generally, have been well supported. The iron trade has ruled somewhat active, at very full prices. For the time of year, coals have sold freely, but chiefly for export purposes.

MANCHESTER, June 1.—The extraordinary demand for cotton has caused all quotations to be fully supported, and a fair, but not large, general business has been transacted. The German and other continental buyers have operated freely in yarns. Manufacturers have bought at advanced rates for their immediate requirements, but India buyers have been passive. In cloths, India goods are dull, but firmly held, printing cloths and similar goods are freely saleable, and masters are accordingly changing their production from India cloths to the latter. T'cloths, domestics, and heavy goods have been sold to a fair extent, but generally at unchanged rates.

BRADFORD.—The demand is mostly in deep-grown English wools. Prices are hardening. A good trade has lately been done in yarn to supply both home and export demand. The activity on pieces continues, and manufacturers are able to get their machinery more fully engaged. The home and American demand is good, and a better export trade is being done.

HUDDERSFIELD.—Amongst the buyers are representatives for Irish and Canadian houses, who have made selections with a considerable amount of freedom. Operations have been effected in fancy goods of the better class to a pretty fair extent, and mediums and lower class goods have also met with purchasers, while in several cases orders of a moderately extensive character have been given to manufacturers for winter goods.

LEEDS.—Purchases are about equally divided between ordinary plain goods and those for the colder season of the year. The export trade keeps steady rather than brisk, and little or no improvement is noticeable either for Canada or America.

ROCHDALE.—A fair amount of business was done in flannel, considering the flatness of the past month or two. There was rather more doing in Yorkshire woollens, and especially for superior goods there is a satisfactory inquiry at advanced rates.

LEICESTER.—The hosiery trade continues active, and business has been about an average. Cotton goods sell freely, and manufacturers are well engaged at the warehouses with orders on hand. Yarns are firm, and spinners are fairly employed.

NOTTINGHAM.—There has not been much alteration in the lace trade. The class of goods in demand in the silk trade are plain mechlins, for which there is yet a fair sale. There is an excellent amount of business doing in the hosiery trade. All departments are well engaged and the operatives continue fully employed. The home trade is active, and the shipping trade remains buoyant. Yarns are firm, at high rates.

CARDIFF.—The steam coal trade has again improved a little, and although complaints are still made of slackness in the demand, yet there is a prospect of increased activity before long. The iron trade shows more firmness, and the principal makers are full of specifications.

BIRMINGHAM.—Trade in this town has undergone very little change. There is quietude in almost every department, many manufacturers having no more orders on their books than are just sufficient to keep them going, while others are in a less favourable position in that respect and are making up goods for stock.

SHEFFIELD.—The improvement in the American advices continues, and some fair orders are to hand from Germany for goods required to be shipped as soon as the reduced tariffs come into operation. The other markets are without change.

Digitized by Google

WOLVERHAMPTON.—There is a steady demand for iron, and only a few works are unable to keep in pretty full operation. The hardware trades are dull.

NEWCASTLE-ON-TYNE.—The coal trade, especially the steam coal trade, is very active, and the pits were never better employed. Large contracts for crystals of soda have been made. Best alkali, 2⅜d; second, 2d; crystals of soda, 4*l* 5s; bleaching powder, 9*l* 10s; bicarbonate of soda, 11*l* per ton; caustic soda, 3½d.

NEWPORT.—The iron trade continues active, and the large contracts for rails and other descriptions of iron in hand are sufficient to give ample employment at the works, and the prospects of the summer are, upon the whole, moderately favourable.

GLASGOW.—The iron market has been remarkably steady, with a moderate business doing. G.M.B., No. 1, 54s 6d; No. 3, 53s 9d; No. 1, Coltness, 59s 6d; Gartsherrie, 58s 6d; Calder, 56s; Eglinton, 53s; Glengarnock, 55s; Kinneil, 51s 6d.

BELFAST.—The linen trade has continued good, and some makes, especially light qualities for export, have improved in price. The demand for yarns has continued steady, and prices of all counts remain firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 20.—Owing to increased arrivals, the trade for flour, notwithstanding that the export demand has somewhat improved, has ruled heavy, at reduced quotations. Wheat has sold slowly on easier terms, and corn, in consequence of heavy receipts, has declined considerably in value. Annexed are the prices current:—Flour—State, superfine brands, $5.75 to $6; State, extra brands, $6.15 to $6.30; State, choice brands, $6.35 to $6.50; Ohio, common brands, $6.85 to $7.10; Ohio, fancy brands, $7.15 to $7.20; Ohio, good and choice extra brands, $7.25 to $9.10; Michigan, Indiana, Wisconsin, &c., $5.75 to $6.65; Genesee, extra brands, $6.60 to $9.25; Missouri, $8.25 to $11.50; Canada, common, $6.25 to $6.50; Canada, good to choice extra, $6.65 to $8.25 per barrel. Wheat—Milwaukee Club, $1.35; winter red Western, $1.35. Corn—New Western, mixed, 65c to 75c; old, ditto, 82c to 85c; yellow, 80c to 85c; and New Orleans, yellow, 75c per bushel.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the arrivals of English wheat up to our market, this week, have been very moderate, the demand for all kinds has ruled heavy, and the quotations have declined 1s to 2s per quarter from the late highest point. The imports of foreign wheat have been wholly confined to immediate wants, at fully 1s per quarter less money. The few samples of English barley on show have been taken at previous quotations; but foreign qualities have commanded very little attention. The sale for malt has been somewhat restricted. Prices, however, have been supported. Oats, owing to the late heavy imports from abroad, have given way 6d per quarter. Beans and peas, however, have realised extreme currencies. The flour trade has ruled somewhat heavy.

The accounts from nearly all parts of the United Kingdom state that the crops are progressing rapidly. They are looking remarkably well, with every prospect of an early harvest. Haymaking has been commenced.

Throughout the continent, most descriptions of wheat have met a slow inquiry, and prices have ruled in favour of buyers. Spring corn, however, has continued to change hands freely.

In America, very little business has been doing in produce on English account.

The Scotch markets have been scantily supplied with wheat; nevertheless, sales have progressed slowly, on lower terms. In spring corn, very little has been passing.

In Ireland, the corn trade generally has been very inactive, and the quotations have had a drooping tendency.

At Mark lane to-day, a moderate supply of English wheat was on sale, the trade for which ruled quiet, at Monday's decline in prices. Foreign wheat was in very moderate request at late rates. Barley, of which the supply was limited, sold steadily at late prices. Oats were in moderate demand, and the quotations ruled firm. Beans and peas fully supported previous rates. In flour, sales progressed slowly at late currencies.

The London averages announced this day are:—

	qrs	s	d
Wheat	2220	at 44	0
Barley	41	28	5
Oats	7	27	0

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—A more quiet tone pervades the market, business being partly suspended, as usual during the Epsom race week. Quotations, generally, remain unchanged. Several floating cargoes of foreign have sold upon easier terms. Transactions in West India to yesterday afternoon did not exceed 632 casks, and the public sales of all kinds have been very small. The stock is now 80,000 tons, or only 7,300 tons more than in 1864 at the same period. 18,700 tons more have been delivered for home use, and the export clearances are larger by 9,180 tons.

Mauritius.—There have not been any transactions reported.

Bengal.—1,134 bags, by auction, part sold: soft greyish-brown Dumma, 28s to 29s; low brown, 25s 6d per cwt.

Foreign.—1,957 boxes Havana offered by auction, were partly sold on previous terms, from 27s to 32s. Three floating cargoes of Havana are reported at 25s 4½d to 26s for the United Kingdom; No. 12 to 13, 25s 4½d. Three of Cuba at 22s to 22s 6d. One of Havana, No. 18, at 28s 6d, for a near port. One of Porto Rico for a similar destination at 22s 6d per cwt.

Refined is steady but quiet, and quotations unchanged.

RUM.—The market remains steady. Demerara, 1s 7d to 1s 8d per proof gallon, at which a few contracts have been made.

COCOA.—344 bags colonial, offered by auction, partly sold at previous rates for Trinidad, which obtained 69s to 85s for ordinary to good. Grenada was taken in at 52s to 54s and 65s per cwt for superior quality.

COFFEE.—The market has been freely supplied with Ceylon, but the bulk of the plantation brought forward has sold at very full rates to 6d advance: small to good, 79s 6d to 87s, up to 97s for fine. 1,991 casks 490 barrels and bags finding buyers. 1,194 casks 3,409 barrels and bags native partly sold at 65s 6d to 70s 6d; very fine, 74s to 74s 6d. 111 packages Jamaica: ordinary to fine, 67s to 97s. 271 bags Guatemala part sold at 74s to 74s 6d per cwt.

TEA.—Business has been partially interrupted by the races this week and the approaching Whitsun holidays, also by the new duty coming into operation yesterday. The market, however, is firm and steady.

Digitized by Google

RICE.—The demand has slackened this week, with transactions on a smaller scale than for some time past. Soft grain descriptions support their late value. A parcel of middling Necrancie Arracan has sold at 8s 7½d per cwt.

IMPORTS and DELIVERIES of RICE to May 27, with STOCKS on hand.

	1865.	1864.	1863	1862.
Imports ....tons	22800 ...	24450 ...	17150 ...	27170
Deliveries	28350 ...	30700 ...	32470 ...	23900
Stock	35700 ...	39750 ...	48750 ...	33170

The deliveries last week were 1,580 tons.

SPICE.—Few sales have been effected this week. White pepper is moving off slowly at the recent decline.

SALTPETRE.—About 1,000 bags Bengal have changed hands, by private contract: refraction 6½ to 2½, 26s to 26s 6d. 250 bags French, refracting 4, were taken in at 26s. 11 casks French refined, at 28s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to May 27, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....tons	2130 ...	7085 ...	9200 ...	7520
Deliveries	4920 ...	5340 ...	6040 ...	8020
Stocks	4620 ...	8960 ...	6965 ...	2628

Delivered last week 219 tons.

COCHINEAL.—The market is firm, with a fair business doing in Honduras privately.

OTHER DRYSALTERY GOODS are quiet. 307 bales Bengal safflower, by auction, partly sold: ordinary to fair, 4*l* 5s to 6*l* 2s 6d per cwt.

METALS.—There have been few sales made this week. Straits tin is dull, at 91*l* cash. Spelter has been steady at 21*l* 10s to 21*l* 15s, with few sellers. No change of interest can be noticed in the iron markets. The last sale of Scotch pig was at 54s per ton cash for mixed Nos. Other metals are inactive.

JUTE.—There have not been any public sales, but the market remains steady. The stock is now 16,350 tons; against 21,280 tons in 1863 and 10,415 tons in 1862 at the same period.

MANILLA HEMP.—Partial inquiries still prevail, and further business is reported this week.

OILS.—Most kinds of fish oil remain quiet. Cocoa-nut continues active at ordinary prices, some large speculative transactions being recently reported: Ceylon, 42s 6d to 43s; Cochin, 44s 6d. Palm firm at 36s 3d to 36s 6d for fine. Linseed steady at 32s 9d on the spot. Rape has been firm: foreign refined on the spot, 45s; brown, 42s per cwt. A cargo of Malaga olive oil has sold at 47*l* 15s per tun, for the United Kingdom.

LINSEED remains firm: Calcutta, to arrive here, has sold at 56s; Bombay, at 57s 3d per quarter, c. f. and i.

TALLOW.—The market for foreign may be quoted steady. 1st sort Petersburg Y C., 40s 3d to 40s 6d; October to December, 41s 9d to 42s per cwt.

PARTICULARS OF TALLOW.—Monday, May 29, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—A parcel of clayed Manilla sold to-day, at 29s 9d. The week's business in West India amounts to 659 casks.

RICE.—A parcel of fine Rangoon has sold at 11s. Two floating cergoes of Bassein, at 10s 6d for the continent; 10s 9d per cwt for the United Kingdom

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet this week; prices rather in favour of buyers. Dutch crushed is about the same as last week, but rather less disposition on the part of buyers to purchase.

GREEN FRUIT.—Demand for oranges good, warm weather and approaching Whitsun holidays being favourable for consumption. Some parcels Valencia and Sicily, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. Lemons without alteration. Nuts of all kinds in moderate request. The growth of West India pine apples is backward this season, and will retard shipment.

COLONIAL WOOL.—Rather a firmer tone than last week, foreign buyers still operating freely.

FLAX.—Market steady.

HEMP.—Market steady, and rather more disposition to purchase for forward delivery.

SILK.—Market more quiet, last prices firm; the reports of the crops being still unfavourable.

TIMBER.—Wood market flat. The importation from Norway has commenced with heavy quantities of battens, balks, and spars, for which prices continue to be very low. Dantzic fir timber is appearing before the stock of 1864 has been worked off. The supply from the Gulf of Bothnia will not be here for another month, and from the principal ports of Russia will be as late. Tonnage for charter is not abundant.

TOBACCO.—We have still to report a quiet market; prices are without alteration, and the small demand that exists is for the finest descriptions.

LEATHER AND HIDES.—The leather market has presented no change during the past week. The supply at Leadenhall, on Tuesday, was large, but without any proportionate increase in the demand; the articles most wanted were prime crop hides, 40 lbs to 50 lbs, good calf skins, Spanish horse hides, and prime kips.

METALS.—There is no improvement in our market. Copper is again heavier, but lower prices do not tempt buyers. Iron keeps steady. Tin has changed hands only to a very small extent. Lead is without inquiry. Spelter is fairly supported by demand. Tin plates steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	0
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	6	9

METROPOLITAN CATTLE MARKET.

MONDAY, May 29.—The total imports of foreign stock into London, last week, amounted to 16,463 head. In the corresponding week in 1864 we received 6,082; in 1863, 6,342; in 1862, 2,791; in 1861, 5,814; in 1860, 6,722; in 1859, 4,452; and in 1858, 2,962 head.

There was a large number of foreign beasts on offer here to-day, in but middling condition. The show of foreign sheep was likewise extensive. The trade was quiet, but at full prices. The arrivals of beasts fresh up from our own grazing districts were very moderate. From Scotland, however, the supply was large, and in prime condition, Prime Scots, crosses, &c., moved off steadily at an advance in the quotations compared with Monday last of 2d per 8 lbs—the top figure being 5s per 8 lbs. Otherwise, the beef trade was steady, on former terms. The supply of English sheep was again moderate, both as to number and quality. Downs and half-breds were taken off readily, at full quotations. Other breeds of sheep were inactive, but not cheaper. The top figure for mutton was 6s 2d per 8 lbs. Lambs came slowly to hand, and their quality was by no means prime. Prime breeds commanded a ready sale, at extreme rates—viz., 7s to 7s 8d, in some instances, 8s per 8 lbs. Inferior lambs met a slow sale, at barely late currencies. Calves were in bare supply, and steady request, at late rates. The best calves produced 5s 2d per 8 lbs. Pigs—the show of which was good—moved off slowly, on former terms.

SUPPLIES.

	May 30, 1864.	May 29, 1865.
Beasts	4750	4660
Sheep and lambs	23720	29670
Calves	224	253
Pigs	260	414

THURSDAY, June 1.—About an average supply of beasts was on sale here to-day, yet the demand for all breeds was steady, at an advance in the quotations, compared with Monday, of 2d per 8 lbs. The best Scots and crosses sold at 5s 2d per 8 lbs. The show of sheep was tolerably good. The mutton trade was firm, at 2d per 8 lbs more money. Downs and half-breds realised 6s 2d to 6s 4d per 8 lbs. Prime lambs moved off freely, at very full prices. Inferior lambs were a slow sale and rather cheaper. In some instances the best breeds produced 8s per 8 lbs. Calves—the supply of which was good—ruled steady, at late currencies. Pigs were rather dearer, and there was an improved demand for milch cows, at from 16*l* to 22*l* each.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	8	to 4	0	Prime Southdown sheep	6	2	to 6	4

HAY MARKETS.

THURSDAY, June 1.—The trade is firm at fully late rates.

	Smithfield. s	s	Cumberland. s	s	Whitechapel. s	s
Meadow hay	84	to 108	84	to 110	84	to 108
Clover	90	to 128	90	to 130	90	to 128
Straw	30	to 36	32	to 38	30	to 36

HOP MARKET.

BOROUGH, Friday, June 2.—No quotable change has taken place in the value of hops since we last wrote. The total supply of produce on sale is very moderate, and the trade rules steady at full prices. Mid. and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; yearlings, 110s to 130s; older hops, 30s to 90s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 2.—These markets are well supplied with potatoes, the demand for which is in a sluggish state at barely late rates. Yorkshire Regents, 90s to 100s; ditto Flukes, 100s to 120s; ditto Rocks, 80s to 85s; Scotch Regents, 70s to 100s; ditto Rocks, 65s to 80s; foreign, 55s to 65s per ton.

COAL MARKET.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 2.—The demand continues fair, and the business done is at fully late rates. Stocks in consumers' and dealers' hands are but light, as buyers continue to supply themselves only as positive wants arise.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 2.—The market thinly attended. Wheat in slow demand, without change in prices. Flour in moderate demand. Fresh barleys at full rates. Indian corn very dull. Mixed and Galatz, 28s 6d. Beans, peas, and oatmeal unchanged.

The Gazette.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 20th of May, on 11,851 miles, to 662,783*l*, and for the corresponding week of last year, on 11,490 miles, to 687,013*l*, showing an increase of 361 miles, and a decrease of 24,230*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,384 miles, to 538,666*l*, and for the corresponding week of 1864, on 8,097 miles, to 563,365*l*, showing an increase of 287 miles, and a decrease of 24,699*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, May 29.—In the share market to-day the chief of the transactions were for the account, and the final quotations of all descriptions of railways were rather higher. Of English lines, Great Western and North-Western recovered ½ each; Metropolitan advanced 1½, Metropolitan District (ordinary), Lancashire and Yorkshire, Manchester, Sheffield, &c., and Midland, ½ each. In colonial, Bombay and Central India and Great Indian Peninsula improved ½ each, Great Western of Canada (5½ per cent.) 1, and ditto (shares of both descriptions) ⅛ each. In foreign, Dutch Dhenish and Great Luxembourg improved ⅛ each, and West Flanders (preference) ¼, and Lombardo-Venetian further declined ⅛. In American, Illinois Central (shares), and Atlantic and Great Western (of all descriptions) advanced ¼ each, Erie shares (paid up) ½, and United States (5-20) ¼. In British mines, Vigra declined 3, West Chiverton, 2½. In foreign mines, Washoe Gold (of both descriptions) relapsed ¼ each, and Vancouver Coal decined ½.

TUESDAY, May 30.—In the share market to-day the transactions were few, and the variations from yesterday's final quotations indicated continued steadiness in English, colonial, and foreign railways, but American securities, British mines, and banks closed with a flat tendency. In English railways, Great Eastern improved ½, South-Eastern ¼, Lancashire and Yorkshire and Midland a further ¼ each, and Metropolitan (extension) a further ⅛; and Edinburgh and Glasgow declined 1. In colonial, Grand Trunk of Canada, Madras (5 per cent.), Scinde, Delhi (stock), and Punjaub severally advanced ½ each. In foreign, Northern of France improved ⅝, and Dutch Rhenish a further ⅛; and Lombardo-Venetian further declined ⅛. In American, Erie shares (paid up) relapsed 2, and Illinois Central shares ½. In British mines, Wheal Seton advanced 2½; East Grenville, East Wheal Russell, and Prosper United receded ¼ each; and Devon Great Consols, West Bassett, and West Chiverton are now quoted ex dividend. In foreign mines, Cape Copper improved ½, and Yudanamutana delined ⅛.

WEDNESDAY, May 31.—In the share market to-day the amount of business was little more than nominal, but the few alterations in the closing prices showed firmness in English and Indian railways and the banks, while American were again rather weaker, and the other descriptions were unaltered in tone. Of the English lines, Brighton advanced 1, North-Western ⅛, Lancashire and Yorkshire a further ½, and Midland a further ¼; and Great Northern (A stock) and Metropolitan receded ½ each. In colonial, Demerara, Great Southern of India (5 per cent.), and Madras (4¾ per cent.) advanced 1 each, Eastern Bengal and East Indian ½ each, ditto (J Extension) and Great Indian Peninsula (new) ¼ each, ditto (stock) ⅛, and Great Western of Canada (new) ⅛; and Cape Town and Dock declined 2½. In foreign, Lombardo-Venetian further declined ¼. In American, United States (5-20) went down ½, Erie shares (paid up) further ¾, and Illinois Central (shares) a further ½. In British mines, Chiverton improved ¼, and East Carn Brea and West Caradon declined ¼ and 1 respectively. In foreign mines no alteration occurred.

THURSDAY, June 1.—In the share market to-day the transactions were again very few, but English and colonial railways and the banks again closed with a firm tendency. Of the English lines, Metropolitan recovered ½; South-Western and Manchester, Sheffield, &c., improved ½ each, South-Eastern ¼, and Midland (9*l*) ⅛; and Lancashire and Yorkshire relapsed ½. In colonial, Bombay and Central India and Punjaub advanced ½ each, and Great Western of Canada (paid-up shares) ⅛. In foreign, Lombardo-Venetian recovered ⅜, and Pernambuco and European Central declined ¼ and 3 respectively. In American, Atlantic and Great Western (Pennsylvania second mortgage) advanced 1, and Erie shares (paid up) further declined ½. In British mines, East Lovell and Great South Tolgus receded ½ and ¼ respectively. In foreign mines, Val Antigoria Gold improved ⅛. Of the banks, Merchant Bank, Metropolitan and Provincial (of both descriptions), Midland, and South-Western improved 1 each, ditto (new), English Joint Stock, and London and Westminster ½ each, and Brazilian and Portuguese ¼; and Oriental further declined 1.

FRIDAY, June 2.—The railway market was firm to-day. Great Northern stock rose 1 per cent., Metropolitan ¾, London and North-Western and Great Western ¼, and South-Eastern ⅛.

MUSICAL BOXES, by Nicole Freres. A Selection of Two Hundred Lists of the newest descriptions. Æolian Harps vibrating with the slightest breeze, 12s to 26s. Keith, Prrwse, and Co., 48 Cheapside.

BORWICK'S BAKING POWDER, recommended by the Analyst to the LANCET and Author of "Adulterations Detected," for making DIGESTIVE BREAD without yeast, and for rendering Puddings and Pastry light and wholesome. Sold everywhere.

E. MOSES AND SON, GENERAL OUTFITTERS, HABIT MAKERS, TAILORS, HATTERS, HOSIERS, WOOLLEN DRAPERS, BOOT AND SHOE MAKERS.

E. MOSES AND SON HAVE SEPARATE DEPARTMEMTS FOR BESPOKE CLOTHING, READY-MADE CLOTHING, MOURNING, LIVERIES, UNIFORMS, SAILORS' CLOTHING, MECHANICS' CLOTHING.

E. MOSES AND SON'S LONDON ESTABLISHMENTS:— Minories and Aldgate, New Oxford street, Tottenham Court road. COUNTRY BRANCH:— Bradford, Yorkshire.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE. This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins. "THE ONLY GOOD SAUCE." The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper. Ask for LEA AND PERRINS' SAUCE. *** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

TO MERCHANTS AND SHIPPERS. The increased demand for DINNEFORD'S FLUID MAGNESIA (for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

RUPTURES—BY ROYAL LETTERS PATENT. WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer Mr WHITE, 228 Piccadilly, London. Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT. ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d. WHITE, MANUFACTURER, 228 Piccadilly London

HOLLOWAY'S PILLS.—Protectors of Health.—In the hand-to-hand struggle for existence in the present day, good health is everything. Holloway's purifying, digestive, and gently laxative Pills are admirably adapted for restoring soundness to invalids, whose functions are so feebly performed that life itself seems most precarious. The stomach has its many maladies removed by a judicious use of these Pills. The torpid liver is roused by them to active secretion, and every other organ subserving digestion is placed at its natural standard, and better fitted for its duties. It is impossible to have a doctor at our elbow at all seasons and places, but these Pills will supplant that loss, for they universally act beneficially in every ailment.

TO CLEAR THE HEAD, GIVE LIGHTNESS TO THE SPIRITS, VIGOUR TO THE BODY, increase all the wholesome appetites, improve digestion, unload the bile, strengthen the stomach, purify the blood, and produce robust health, no medicine is equal to DR LOCOCK'S EXCELSIOR WAFERS. They taste delightfully, and never fail to restore both health and spirits. Sold at 1s 1½d, 2s 9d, and 4s 6d per box. Prepared by Da Silva and Co., 26 Bride lane, London, E.C., sole preparers of Dr Locock's Pulmonic Wafers, for all disorders of the breath and lungs. To be had of all druggists.

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." WOTHERSPOON and CO., Glasgow and London.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill, E.C.

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present.—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryamjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ramchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,982,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,530	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 5,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premiums on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,64,730 rs 4a 10p, and the Directors proposed to apply them as follows:—

Rs.	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (in all 10,00,000 rs.)
5,54,636-4-10	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Homusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Maneckjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq., and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

A. MACKINTOSH, Manager.
JOHN SMITH, Secretary and Accountant.

Bombay, 3rd April, 1865.

We have examined the above Balance Sheet of the Financial Association of India and China (Limited), and accompanying account of Profit and Loss, at 31st March, 1865, and having compared them with the Company's books, find them to be correct. We have also examined the securities, and counted the cash taken credit for as in possession of the Company, and have found the same to be in order.

DEBENTURES
ISSUED BY

THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz.:—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For Three years	6	per cent.	per annum.
— Five years	6½	—	—
— Seven years	7	—	—

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers. The first payment of interest will be made on the 30th June next.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court,

ALFRED LOWE, Secretary.
London, 17 and 18 Cornhill, May 4, 1865.

If for for fixed periods, special arrangements will be made. SAMUEL BAKER, Managing Director.

ISSUE OF DEBENTURES AT 6 PER CENT.

THE INDIA RUBBER, GUTTA PERCHA, AND TELEGRAPH WORKS COMPANY (Limited).

Capital, £1,000,000.—First issue, £500,000.
Shares, £50 each; £15 paid.

DIRECTORS.

Alex. Beattie, Esq., M.D.	John Heugh, Esq.
P. N. Bernard, Esq.	Jonathan Mellor, Esq.
J. G. T. Child, Esq.	Captain Pelly, R.N.
Charles Hancock, Esq.	Stephen Wm. Silver, Esq.
John Harvey, Esq.	Hugh A. Silver, Esq.
George Henderson, Esq.	John W. Willans, Esq.

BANKERS.

Messrs Glyn, Mills, Currie, and Co., London.
Manchester and County Bank, Manchester.
Messrs Mallet Freres and Cie., Paris.

The Directors are prepared to issue Debentures for three to five years, at six per cent. The interest is payable half-yearly, at Messrs Glyn and Co., by coupons to bearer.

The security offered consists of Freehold Land and Buildings, Plant and Materials, besides uncalled Capital. Full information on this subject will be given by the Secretary at the offices of the Company.—By order of the Board,

PONSONBY A. MOORE, Secretary.
No. 2 Bishopsgate street within, London, April.

THE DEVON GREAT MARIA CONSOLIDATED COPPER MINING COMPANY (Limited).

—Capital £50,000, divided into 5,000 shares of £10 each, of which about one-half is already subscribed. Deposit £1 per share upon application, and £1 per share upon allotment. Calls not to exceed 10s a share, and at intervals of not less than three months. It is not proposed to call up more than £4 per share.

DIRECTORS.

Sir Atwell Lake, Bart., Gloucester place, Hyde Park, W.
Charles Joseph Carttar, Esq. (Coroner for Kent), Catherine House, Blackheath, S.E.
P. Johnstone, Esq., J.P., Friarstown House, Leitrim, and Belgrave road, S.W.
Joseph H. Tilston, Esq., Chepstow place, Bayswater, W.
Edward Charles Lea, Esq. (Moss, Lea, and Co., Merchants), Water lane, E.C.

BANKERS.

The Metropolitan and Provincial Bank (Limited), 75 Cornhill, E.C.

SOLICITOR.

Frederick W. Snell Esq., 1 George street, Mansion House, E.C.

AUDITOR.

Sydney G. Smith, Esq. (Public Accountant), 19 Coleman street, E.C.

LOCAL MANAGER AND PURSER—Captain Richards.
SECRETARY—Mr Thomas Spargo.
OFFICES—224 and 225 Gresham House, Old Broad street, London, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of working an extensive mineral property, situated immediately to the West of the celebrated "Devon Great Consols," which upon an outlay of £1,024, has paid in dividends £975,872; the present value of that property being £604,160.

The geological position of the two mines is identical, and the same lodes pass through the entire length of the sett; it is, therefore, reasonably expected that equally favourable results will be realised.

Upwards of £15,000 has already been expended upon the property in opening upon the lodes, and making the necessary erections for a great and permanent mine, independent of which £1,500 has been paid to the Lord in advance, on account of dues. The total outlay to bring the mine into a profitable state of working has been carefully investigated, and cannot exceed £10,000.

Applications for shares to be accompanied by a deposit of £1 per share, and £1 per share will have to be paid on allotment.

The operations at the mine are being carried on with all possible despatch, under the able superintendence of Captain Richards.

About one-half of the capital of the Company has already been subscribed.

Applications for the remaining shares may be addressed to the Secretary, Directors, or Bankers.

Prospectuses, together with reports of the Managing Agents and Consulting Engineer of the Devon Great Consols, may be had at the Bankers or Offices of the Company.

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors are prepared to receive LOANS on DEBENTURES for three or five years, to replace Loans falling due. Offers to be addressed to the undersigned.

W. E. JOHNSON, Secretary.
Victoria Station, Pimlico, S.W., May 29th, 1865.

BAY OF HAVANA AND MATANZAS (CUBA) RAILROAD SEVEN PER CENT. LOAN of £250,000, 1861.

The HALF-YEARLY INTEREST on the above Bonds, due on the 15th June, WILL BE PAID on that day, and any succeeding day, at the counting-house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of Eleven and Two o'clock. The Coupons must be left for examination two clear days before applying for payment.

London, June 1, 1865.

MATANZAS AND SABANILLA (CUBA) RAILROAD.

SEVEN PER CENT. LOANS of £200,000, 1853, and £300,000, 1863.

The HALF-YEARLY INTEREST on the above Bonds, due on the 15th of June, WILL BE PAID on that day, and any succeeding day, at the counting house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of Eleven and Two o'clock. The Coupons must be left for examination two clear days before applying for payment.

London, June 1, 1865.

MATANZAS AND SABANILLA (CUBA) RAILROAD.

SEVEN PER CENT. LOAN OF £200,000, 1853.

The particulars of the Annual Drawing of Bonds for redemption of this Loan will be announced later.

London, June 1, 1865.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Eighteenth Annual General Meeting of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, on Friday the 30th day of June, 1864, at Twelve o'clock precisely, in conformity with the terms of the Company's Deed of Settlement.

And notice is hereby further given, that the Transfer Books of this Company will be closed from Thursday the 15th day of June, to Wednesday the 12th day of July, 1865, both days inclusive, for the purpose of making up the Interest account to the 30th day of June, 1865. The interest warrants will be forwarded on the 11th July to the Proprietors who are registered in the Company's books on the 14th day of June instant.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Aldermans walk, New Broad street, London, June 1, 1865.

N.B.—Transfers will not be received at the office while the books remain closed.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

NEW THEATRE ROYAL ADELPHI,

Sole Proprietor and Manager, Mr B. Webster.

Unprecedented attraction. The great tragedienne Miss Bateman, in LEAH, for positively 12 nights only.

Monday and during the week, THE IRISH TIGER. Messrs Stephenson, Eburne, Miss Kelly. At 8, LEAH. Leah, Miss Bateman. Supported by Messrs Swinbourne, Jordan, Stuart, Ashley, Stephenson, Eburne, C. J. Smith; Miss H. Simms and Mrs H. Lewis. And the screaming Adelphi Farce of THE STEEPLE CHASE, OR, IN THE PIGSKIN. Messrs J. L. Toole, P. Bedford, Billington. Commence at 7.

On Monday, June 12th, an entirely new play, written expressly for Miss Bateman, and in which she will appear.

ROYAL POLYTECHNIC.

—Patron H.R.H. the Prince of Wales.—"Proteus; or, We are here, but not here." This startling illusion (J. H. Pepper and Thomas Tobin joint inventors) daily at 2.30 and 7.30.—Captain Richard Burton's Pilgrimage to Mecca and Medinah, illustrated by novel effects, under the superintendence of this distinguished traveller. — New Musical Entertainment by George Buckland, Esq., entitled—An old picture in a (n)ice new frame; or, Mont Blanc remounted and varnished. —Mr G. W. Jester's Ventriloquial Frankenstein.—Mr James Matthews's Curiosities of Magic.—Exhibition of Inventions for saving life in Railway Travelling.—Open from 12 to 5, and 7 to 10.—Admission 1s.

MADLLE. MARIOT DE BEAUVOISIN'S PIANOFORTE RECITAL,

Saturday Afternoon, June 3rd, at Willis's Rooms, St James's. The programme will include a selection from the works of Mozart, Beethoven, Mendelssohn, Weber, Liszt, Thalberg, Benedict, &c. Vocalists: Miss Emily Soldene, Mdlle Novati, Mdlle Pressler, Signor Ferranti, and Signor Arnbonetti. Conductor, Mr Benedict. To commence at Three o'clock. Tickets, 7s and 5s, to be had at the Rooms, and of Mdlle Mariot de Beauvoisin, 40 Carlton hill, St John's Wood, and 78 King William street, E.C.

RAILWAYS OF THE SOUTH OF AUSTRIA, LOMBARDY, AND CENTRAL ITALY.

REPORT

Of the Board of Directors presented in the Meeting held at Paris on the 16th May, 1865.

BARON JAMES DE ROTHSCHILD in the Chair.

GENTLEMEN,—We have in the first place to express the regret we felt on being obliged to delay our meeting, originally fixed for the 22nd of April, as well as the payment of the balance of dividend which has usually been made on the 1st of May. One of these two postponements necessarily involved the other, since, according to the terms of our statutes, it is your province to render definitive by your votes the propositions of the Board of Directors. You are all aware of the uncontrollable circumstances which compelled those postponements; and the postponements very narrowly escaped being insufficient, for the vote of the Italian Senate sanctioning the sale of the State railways did not take place till Saturday evening, while the official notification of the fact did not reach us till Sunday morning.

We will proceed in the statement we have to make respecting the results of the year 1864, in the same manner as in preceding reports.

The first part will give an account of the progress of the works, of the expenditure incurred, and of the financial situation of the Company to the 31st December, 1864.

The second will give the results of the working, and will submit to you our propositions, as well for the liquidation of the accounts of the year, as for fixing of the amount of the dividend.

In the third, we shall lay before you the summary and the result of the negotiations which you had authorised, and shall ask you to continue to us the full powers which you had been pleased to confer on us.

1. To settle with the Governments interested the conditions of the separation of the two networks. 2. To procure the resources necessary to meet the engagements we have contracted in the name of the Company.

CHAPTER I.

WORKS AND EXPENDITURE OF FIRST ESTABLISHMENT.

The six groups comprising the whole of the concessions made to the Company represented, according to our last year's report,

	kil.
A total length of	3,061
Of which are worked	2,581
	480

It will be seen by the subjoined table that this situation is now (May 16) modified as follows:—

	kil.
Total length of the network	3,062
Now working	2,645
Making or to be made	417

		Worked.	Making or to be made.	Total.
1st Group.	Trieste line and branches	905	46	951
2nd —	Hungarian lines	411	164	575
3rd —	Tyrolese	220	125	345
4th —	Venetian	377	45	422
5th —	Lombard	439	37	476
6th —	Central Italy	293	...	293
		2,645	417	3,062

SECTION I.—FIRST GROUP.

Trieste line	578	905 kil. now worked.
Laxenburg and Œdenburg branches	36	
Steinbruck and Sissex line	125	
Marburg and Villach line	166	
Agram and Karlstadt branch		46 kil. now making.
Total		951 kil.

TRIESTE LINE.

The works necessary to complete this line for working commenced in preceding years, have been continued in 1864.

The rails have been renewed for a length of 123 kilometres, and the ballast for a length of 85 kilometres. In all, since the Company took possession of the line, 470 kilometres of the way have been supplied with new rails and the ballast renewed over 592 kilometres.

New distance signals, 52 in number, have also been placed at the approaches to stations.

Out of 350 works of art to be reconstructed, 262 have been executed and 49 are in progress, and nearly finished.

The settlement of accounts followed the completion, and nearly all the expenses have been paid.

Among the works still to be executed or finished four only present any importance. They are:—the bridges at Marburg and Pogannegg, and two bridges at the Laybach Marsh.

The first-named, the most considerable and the most difficult on the line, is at present so far advanced that we can answer for its being finished before the end of the season.

As for the other works which may require repairing or rebuilding, they will be maintained as long as a proper regard for safety will permit, and their reconstruction will only be undertaken when the necessity becomes evident.

The works commenced last year for improving and enlarging several stations of the second order are nearly all finished.

Those at the more important stations of Gratz, Marburg, and Laybach will be terminated during the year.

Lastly, 49,000 running metres of fences have been executed where most necessary; walls to prevent snow-drifts have been made in the Karst, for a total length of nearly 2 kilometres, and the water tanks and conduits required for supplying the locomotives on that portion of the line have been completed.

The Austrian Government not having yet taken any decision on the question of the port of Trieste, the projects for the rebuilding of the station for passengers and the completion of that for goods have been postponed. The question has however advanced a step since last year. The respective limits of the ground to be reserved for the service of the port, and of that to be appropriated for the enlargement of the station, have been determined by common accord with the Government. A plan for a station has consequently been prepared and adopted in principle. This plan is at the present moment under the consideration of a special local commission.

The question as to enlarging the Vienna station is also still undecided.

We think that, for the present, we need only enlarge the goods station, which, in its actual state, is altogether insufficient, and in which the service, already very difficult, would become quite impossible, if the traffic, as we hope, should be further developed.

The Gratz iron-works have continued to give good results in 1864. They have supplied us, in addition to accessories for the line, with 16,000 tons of rails at a cost of 295f per ton, which shows a further diminution of 13f per ton as compared with the cost in 1863. This price may still seem rather high as compared with what is paid in other countries, but it must not be forgotten that this establishment was founded for the purpose of bringing about a reduction in the very high price of rails, of relieving us from the exorbitant demand of the manufacturers of the country and utilising all the old rails and other old metal which it would otherwise have been impossible to turn to profitable use. These results have been attained. The works, the capital of which is already in great part paid off, have moreover been established very economically, and may be left idle without any regret, after the completion of our lines, if the manufacturers of the country can supply us with iron at reasonable prices.

We have completed arrangements during the past year for making rails covered with steel by the Bessemer process.

The rapid gradients of the Semmering, and the crossing of the Tyrolese Alps by the Brenner pass, cause rapid wearing of the rails and great outlay for renewing them. The use of the rails with a steel surface will relieve us from this expense, and contribute to the safety of the service by preventing those accidents which arise from the breaking or crushing of the rails. These rails with steel tops will also be very advantageous in the stations and parts of the line most frequented.

The first attempts to introduce the Bessemer process, made at the close of 1864, were perfectly successful. A certain quantity of these steeled rails has been made since the beginning of this year, and some of them have already been laid down in our stations. The manufacture of them may be considered as in regular course.

The price of these steeled rails will not be more than 4f per 100 kilogs above that of ordinary rails, and we hope to make them still cheaper.

The outlay on the Trieste line in 1864 amounts to	5,505,440	02
Outlay up to 31st December, 1863.....	47,921,464	01
Total outlay to 31st December, 1864.....	53,426,904	03

MARBURG AND VILLACH LINE.

The section from Marburg to Klagenfurt opened in 1863, as appears from the report for 1864, had to be completed by certain works required by the necessities of the service in different stations; these works have been finished.

The section from Klagenfurt to Villach, 38 kilometres in length, was opened on the 1st of June, 1864, and has been worked ever since.

The whole line from Marburg to Villach, 166 kilometres in length, is therefore completed.

Only one question therefore remains to be solved, that relating to the establishment of an intermediate station, the best site for which is not yet decided.

The principal accounts have been liquidated, but their settlement gave rise, on the part of one of the principal contractors, to difficulties which are at present pending before our arbitral tribunal.

	f	c
The outlay in 1864 on the Marburg and Villach line amounts to.....	9,238,279	95
Outlay up to 31st December, 1863.....	48,805,294	37
Total outlay up to 31st December, 1864	58,043,574	32

STEINBRUCK-SISSEK LINE, AND AGRAM-KARLSTADT BRANCH.

The works of the Agram-Karlstadt branch, which we expected to be opened at the close of 1864, having been delayed by the inclemency of the winter, the opening of this branch cannot take place till the latter part of the present month.

	f	c
The outlay in 1864 on the Croatian lines amounts to ...	3,390,208	85
Outlay up to 31st December, 1863.....	27,014,873	31
Total outlay up to 31st December, 1864	30,405,082	16

SECTION II.—SECOND GROUP.

HUNGARIAN LINES.

Pragerhof to Ofen.....	326 kil	411 kil. now worked.
Uj-Szony to Stuhlweissenburg	85	
Œdenburg to Kanizza	164	now making.
Total	575 kil.	

PRAGENHOF-OFEN AND UJ-SZONY-STUHLWEISSENBURG SECTION.

The works executed on these lines, which have been open for several years, have consisted of only a few supplementary improvements which experience had shown to be necessary. For instance, the roofs of the stations at Ofen and Stuhlweissenburg being exposed to the violent winds of the valley of the Danube have had to be strengthened.

The works undertaken with the co-operation of the syndical association of Lake Balaton, for the purpose of giving a lower and regular level to the waters of that lake, are completed, and the liquidation of the accounts of the contractors is being effected. The results are satisfactory: a considerably lower level has been secured, and there is no longer any danger that the waters of the lake will rise high enough to endanger the security of our works.

ŒDENBURG-KANIZZA SECTION.

The works of this section are in progress throughout the whole length, with the exception of a short interval near Kanizza, where difficulties about expropriation have not allowed us to make a beginning.

If the weather continues favourable, this section will be opened during the autumn of the present year.

KANIZZA AND ESSEG LINE.

The concession of this line is eventual, and the time has not yet come to occupy ourselves with it; but its first portion, between Kanizza and Fünfkirchen will communicate with a considerable coal-field, and surveys have been made to ascertain whether it would be for the interest of our Company to prolong its network in that direction.

	f	c
The outlay on the Hungarian lines in 1864 amounts to	7,143,507	09
Outlay up to 31st December, 1863.....	79,088,303	98
Total outlay to 31st December, 1864.....	86,231,811	07

SECTION III.—THIRD GROUP.

TYROLESE LINES.

Innsbruck to Kufstein	73	220 kil. now worked.
Verona to Botzen.....	147	
Botzen to Innsbruck	125	now making.
Total	345 kil.	

SECTION FROM BOTZEN TO INNSBRUCK.

The works are now in progress throughout the Brenner section, included between Botzen and Innsbruck, and rapidly advancing, except on certain intermediary points where the purchase of the land has presented obstacles which have prevented us from entering on possession.

The landowners have, on many points, put forward exorbitant pretensions which were not anticipated, and an amicable understanding has been found impossible. We have therefore been compelled to have recourse to judicial expropriations which are now proceeding, but necessarily occupy much time.

There is also an interval of 3½ kilometres between Sterling and Freienfeld, on which the works have not been yet commenced. because the execution of the railway had been at the request of the local authorities combined with a project for draining a marsh. The negotiations opened to determine the respective shares of the expenditure to be made by the Company and the landowners, have not as yet led to any result.

However, all our measures have been so taken that if we have sufficient resources at command the whole line may be opened in the spring of 1867.

The experience of last winter, which was unusually long and severe, completely justifies, so far, the arrangements made for the direction and construction of this line, and enables us to affirm that it will have nothing to fear from the snow-drifts, avalanches, and torrents, which are the greatest obstacles to railways in the Alps, and have been the principal object of the solicitude of our engineers as well as of the Government in laying out this line.

Thus will be realised the first passage of the Alps by a railway, and the trade of Central Germany will be able again to take the road which it so long followed in the days when Venice was in its glory.

	f	c
The outlay made in 1864 on the Tyrolese lines amount to	9,414,402	30
Outlay to 31st December, 1863	6,089,974	41
Total outlay to 31st December, 1864	15,504,376	71

SECTION IV.—FOURTH GROUP.

VENETIAN LINES.

Nabresina to Casarsa	103	
Casarsa to Lombard frontier	*240	377 kil. now worked.
Branch from Verona to Mantua	34	
Padua-Rovigo	45	now making.
Total	422	kil.

* The increase of 6 kilometres as compared with last year is owing to the fact that the length is counted to the frontier line between Peschiera and Dezenzano, instead of the centre of the Peschiera station only, as previously.

The expenditure made in 1864 on the Venetian lines has been devoted to the construction of a bridge over the Piave, the works of the Venice station, those of the Padua and Rovigo line, and certain supplementary improvements found to be indispensable at the stations.

The bridge over the Piave was completely finished in the first days of January, and the settlement of the accounts of all kinds will be effected very shortly.

The buildings of the Venice station are finished. only the internal fittings remain to be executed. They will be completed and all the accounts settled in the course of the year 1865.

The works of the Padua and Rovigo line, the only one of this group remaining to be executed, were begun in March, 1864, and are now in active progress throughout the whole length. All the land has been purchased without difficulty at reasonable prices. The earth-works are almost entirely completed. The Cattajo tunnel is pierced, and partially lined with masonry.

Among the works of art, two only, the bridges over the Bacchiglione and the Adige are of any importance. The foundations of these bridges are now being laid, the season or the state of the rivers not having permitted the work to be commenced earlier. They will be entirely finished during the current year. All the arrangements have been made for the erection of the buildings and dependencies of the stations, and the whole line will be ready for working at the end of the present year, or the beginning of next.

The iron way will be made with the rails formerly used on the Vienna and Trieste line, but taken up because they were too weak to bear the heavy locomotives required to ascend the steep gradients of that line, though quite strong enough for the engines used on the line from Padua to Rovigo, where the gradients are very trifling. We shall thus realise a considerable saving on its construction.

	f	c
The outlay in 1864 on the Venetian lines amounts to ...	2,957,240	10
Outlay up to 31st December, 1863	51,648,728	07
Total outlay to 31st December, 1864	54,605,968	17

LEGNAGO BRANCH.

The Austrian Government has asked the Company to undertake a short line connecting the fortress of Legnago with the principal line from Venice to Verona, near Lonigo. Notwithstanding our repugnance to undertake a new line so long as the engagements already contracted were not fulfilled, we thought proper to yield to the urgent demands of the Government and have had a survey made. A negotiation has been opened with the Government, which seems disposed to grant equitable conditions, such as the Company can accept. A special guarantee is to be granted for this line, the length of which is 27 kilometres, and the rate will be high enough to secure, in any case, a sufficient return for the expenditure made.

SECTION V.—FIFTH GROUP.
LOMBARD LINES.

Frontier near Peschiera—Milan—Buffalora	†172	
Milan—Como	45	
Rho—Gallarate	27	
Milan—Piacenza	66	439 kil. opened.
Milan—Pavia	32	
Treviglio—Cremona	65	
Bergamo—Lecco	32	
Gallarate—Serto—Calende	19	37 unfinished.
Gallarate—Varese	18	
	476 kil.	

† See what was said relative to the line from Casarsa to the Lombard frontier.

The central station at Milan has been, as announced, open for the passenger service ever since the beginning of May, 1864.

To terminate the Lombard network, we have only to finish the Gallarate-Serto-Calende offshoot; and the Gallarate-Varese line, which will be opened for circulation during the present month. About the same time the definitive bridge over the Po, at Piacenza, will be opened, so that the whole Lombard network may then be regarded as quite finished. It is true that several buildings for the passenger traffic have still to be constructed on the lines most recently opened; but as temporary buildings have been erected for the purpose, the execution of the permanent edifices can be postponed without any inconvenience.

	f	c
The outlay on the Lombard lines in 1864 amounts to	11,390,094	10
Outlay up to 31st December, 1863	76,202,251	20
Total outlay to 31st December, 1864	87,592,345	30

SECTION VI.—SIXTH GROUP.
LINES OF CENTRAL ITALY.

Piacenza-Bologna, 147 kilom; Bologna-Ferrara-Ponte-Lagoscuro, 52 kilom; Bologna-Pistoja, 94 kilom; 293 kilom all worked.

The Pracchia-Pistoja portion was opened on the 30th Nov. last, completing the difficult and important line from Bologna to Pistoja, and, consequently, the whole network of Central Italy; but the heavy rains which immediately followed, and the unusual floods which were caused by them, prevented the working from the 6th November:

1. On 13 kilometres of the Bologna and Ponte-Lagoscura line, between Poggio-Renatico and Ferrara, where, owing to the bursting of the embankment of the Reno, the line and the entire plain were laid under water;

2. On 31 kilometres of the Bologna and Pistoja line, between Marzabotto and Porretta, owing to the damage done by a rise of 7 metres in the river, the deepest flood known there since the beginning of the present century.

On the first of these two lines, the water had drained off so as to allow the traffic to be resumed on the 1st January last, without any great injury having been done to the railway.

On the second, the repairs having been rapidly executed between Marzabotto and Riola, the break was reduced, from and after the 1st of January, to the 13 kilometres which separated Riola from Porretta.

Lastly, by the help of certain provisional arrangements at the bridge of Casette, from which one of the abutments had been swept away, the continuity of the service throughout the whole line was restored from and after the 20th of February.

In the course of the present summer, all the damage will be repaired; and there is reason to hope that before the rivers rise in autumn, the rockwork indispensable for the protection of the line, which the season had not allowed us to complete, will be sufficiently strengthened to secure the railway from any future damage.

			f	c
The outlay on the lines of Central Italy in 1864 amounts to			5,166,832	77
The interest of the capital engaged on this group amounts to		6,557,744	57	
But there are to be deducted:—				
1. The net proceeds of the working	2,657,626	17		
2. The guarantee paid by the State for the years 1860, 1861, 1862, 1863	750,000	0		
		3,407,626	17	
Balance to carry to account			3,150,118	40
Total outlay in 1864			8,316,951	17
Previous outlay			105,903,906	59
Total outlay up to 31st December, 1864			114,220,857	76

SECTION VII.—ROLLING STOCK, AND PLANT OF WORKSHOPS.

Including the six mixed engines ordered for our Italian lines and which are not yet delivered, our rolling stock will consist of

589 engines,
1,342 passenger carriages,
3,191 goods vans and trucks.

This stock, as compared with our report for 1863, presents an increase of

14 engines,
23 passenger carriages,
509 goods vans and trucks.

The actual stock will suffice for our requirements until the opening of the Oedenburg-Kanizza and Brenner lines.

The workshop at Milan has been so far improved that it is in a position to make all the repairs of the rolling stock on the Italian network.

	f	c
The outlay made in 1864 for stock and tools amounts to	5,463,357	68
The outlay made up to December 31st, 1863, including the value of the rolling stock existing on the lines sold by the State, was	84,860,881	30
Total outlay to 31st December, 1864	90,324,238	98

SECTION VIII.—RECAPITULATION OF COST OF FIRST ESTABLISHMENT.

	Up to 31st December, 1863.	Outlay made In 1864.	Total.
Trieste line and branches	47,921,464 01	5,505,440 02	53,426,904 03
Line from Marburg to Villach	43,805,294 37	9,238,279 95	58,043,574 32
— from Seinbruck to Sissek	26,323,624 61	44,683 70	26,368,308 31

Purchase-money of the Lombardo-Venetian lines, deducting the value of the stock and stores on taking possession (4,708,096f 27c)	56,541,903 72	—	56,541,903 72
Instalments paid on the 175,000,000 the purchase-money of the Trieste lines, deducting the value of stock and stores on taking possession (15,776,417f)	119,223,583 00	15,000,000 00	134,223,583 00
General total of capital expended to 31st December, 1864	730,518,924 06	81,820,991 46	812,339,915 52

CHAPTER II.—FINANCIAL SITUATION.

SECTION IX.

	f	c
The resources realized by the Company up to the 31st December, 1864, amount altogether to the sum of ..... viz.	776,028,445	52
Payment of 500f on 750,000 shares	375,000,000	0
Divers wares	401,028,445	52
Equal total	776,028,445	52
The expenditure made or carried to account is	812,339,915	52
Exceeding the resources by a sum of	36,311,470	0

which has been provisionally met by the net proceeds of the working.

CHAPTER III.—WORKING ACCOUNT.

SECTION X.—RECEIPTS.

The gross proceeds of the working amounted in 1864 to 63,549,215 francs, arising from the different lines in the following proportions.

	Trieste Line. f	Per cent.	Croatian Lines. f	Per cent.	Hungarian Lines. f	Per cent.
Passengers	8,001,784	23.0	335,884	15.0	1,288,873	23.0
Soldiers	1,381,580	4.0	15,821	1.0	358,552	6.5
Goods by fast trains	1,150,089	3.5	21,705	1.0	119,801	2.0
Goods by slow trains	23,619,512	68.5	1,820,568	82.0	3,828,013	68.0
Sundry receipts	408,679	1.0	15,539	1.0	37,160	0.5
	34,561,635	100	2,209,457	100	5,632,399	100

	Tyrolese Line. f	Per cent.	Venetian Lines. f	Per cent.	Lombard Lines. f	Per cent.	Total. f	Per cent.
Passengers	1,106,204	41.5	3,844,598	43.5	5,368,408	56.0	19,945,751	31.5
Soldiers	63,434	2.5	675,867	7.5	257,476	2.5	2,752,730	4.5
Goods by fast trains	32,529	3.0	560,128	6.5	887,634	9.0	2,821,877	4.5
Goods by slow trains	1,346,739	51.0	3,705,013	42.0	3,009,301	31.0	37,329,086	58.5
Sundry receipts	48,934	2.0	50,444	0.5	139,015	1.5	699,771	1.0
	2,647,840	100	8,836,050	100	9,661,834	100	63,549,215	100

A comparison with the results of the preceding year gives the following results:—

TRIESTE LINE AND BRANCHES.

	1863. f	1864. f	Increase. f	Per cent.	Decrease. f	Per cent.
Passengers	8,299,631	8,001,784	—	—	297,847	3.5

Sundry receipts	173,312	139,015	—	—	34,297	20
Totals	9,214,732	9,661,834	417,102	4.5	—	—

It appears from these tables that five lines show an increase on the preceding year, viz. :—

	f	c
The Vienna and Trieste line by a sum of	2,120,861	0
The Croatian lines	486,299	0
The Tyrolese lines	5,621	0
The Venetian lines	413,523	0
The Lombard lines	417,102	0
Total of increase	3,443,406	0
The Hungarian lines show a decrease of	210,863	0
The final result is an increase of	3,232,543	0

The receipts for the conveyance of passengers show a decrease of 541,682f, whilst those from the goods traffic have increased by 3,647,803f. The former of these results is owing in great part to the effect of a very long and severe winter, and to the abnormal temperature which prevailed in Austria, especially during the summer of 1864. The goods traffic, though decidedly superior to that of the preceding year, is, nevertheless, far from what we have reason to expect it will be hereafter.

The industrial and commercial crisis which has prevailed in Austria for several years has not yet terminated. However, the progress already realised, as shown by the constantly increasing value of the paper currency, justify the hope that the material development of Austria will ere long receive the impulse which must sooner or later be assured to her by the elements of wealth and natural resources of every kind which she possesses.

The tables inserted at the end of this report, present for the Vienna-Trieste, Hungarian, and Venetian lines, during the years 1863 and 1864, the comparative statement of the traffic in the different kinds of merchandise, and afford means of appreciating the modifications which have supervened in the commercial movement of each portion of the network.

The most interesting fact which results from these tables is the very perceptible increase in the tonnage on the Vienna-Trieste line; this increase, which proceeds almost entirely from corn, timber, coal, and building materials, may be, in great part, attributed to the reduced traffic, which the progress of our working enabled us to grant to those articles at the beginning of 1864.

The corn traffic on the Hungarian line, arrested by the dearth of 1863, only resumed some little activity in the last days of 1864. The considerable stock of corn which the harvest of 1864 has accumulated in Hungary, and the low prices which have resulted therefrom, will certainly lead to extensive exportation a few months sooner or later. Our silo-corn-stores at Trieste are beginning to be used. They received between December and March last a total quantity of 350,000 hectolitres (120,324 quarters). The merchants appear to be satisfied with them, and there can be no doubt that these new arrangements will have a most advantageous influence on the Trieste corn trade.

Section XI.—Expenditure.

The total expenses of working amount to 23,678,118 francs, divided as follows :—

	Trieste Line. f	Per cent.	Croatian Line. f	Per cent.	Hungarian Lines. f	Per cent.
Administrative services and general expenses	447,422	4	43,452	6	162,745	6.5

Traffic and movement	1,619,642	1,845,959	226,317	14	—	—
Totals	4,039,378	4,652,940	613,562	15	—	—

Comparing one year with the other, the receipts and expenditure, per kilometre, stand as follows :—

	Receipts per kilometre. 1863.	1864.	Difference per cent. as compared with 1863. Plus.	Minus.	Proportional part of Expenses of working. 1863.	1864.
Vienna to Trieste line	52,835 13	56,289 30	6 5	—	33 9	31 8
Croatian line	13,785 26	17,675 65	28 0	—	42 1	33 9
Hungarian line	14,217 18	13,704 13	—	3 5	44 6	45 8
Tyrolese lines	12,010 2	12,035 64	—	—	53 0	52 1
Venetian lines	22,702 23	23,816 84	5 0	—	36 7	37 7
Average of South Austrian network	29,334 83	30,951 97	5 5	—	36 8	35 3
Average of Lombard lines	22,493 26	21,663 30	—	3 5	43 7	48 2
Total average	28,028 19	29,057 71	3 5	—	37 8	37 3

In the South Austrian network the expense of working is only 216,000f more than in 1863, although the receipts have increased nearly 2,800,000f.

If the result is less favourable on the Lombard lines, it must be attributed to the adjunction of two lines of little traffic, Treviglio-Cremona and Bergamo-Lecco, which have increased the expenses in a greater proportion than the receipts.

On the whole of the two networks the increase of the expenses has been 829,000f, and the augmentation of the receipts 3,232,000f. The ratio of expenses to receipts has been for the whole of the network 37.3 per cent.; it was 37.8 per cent. in 1863. The diminution is therefore one-half per cent.; but if you compare the statistical returns annexed to our annual reports, you will find that the expenses of working have been constantly decreasing from year to year. Thus the cost of traction per train, and per kilometre has decreased as follows ever since 1859 :—

	1859.	1860.	1861.	1862.	1863.	1864.
South Austrian network, Northern part	3.16	1.99	1.45	1.44	1.29	1.07
Do. do. Southern part	1.20	1.13	1.07	0.78	0.72	0.74

Digitized by Google

Section XII.—Net Returns.

	f	c
According to what precedes the net returns of 1864 are	39,871,096	83
They were in 1863	37,468,204	89
Increase	2,402,891	94

Section XIII.—Sections worked on Unfinished Lines.

1. Carinthian Line.

The whole line from Marburg to Villach was opened on the 1st of June, 1864, but the proceeds of working this line were carried to the first establishment account till the 31st December following.

These proceeds amounted, for the Marburg-Klagenfurt section, duringt he whole year, and for Klagenfurt-Villach section during the last seven months of 1864,	f	c
altogether, to	1,377,906	30
The expenses were	630,960	0
Net proceeds	746,946	30

2.—Network of Central Italy.

The sections of Central Italy, worked during the year 1864, give the following results:—

	f	c
Passengers	3,067,901	43
Goods by fast trains	599,737	83
Do. by slow trains	1,693,872	29
Sundry receipts	61,753	20
Total	5,423,264	75
Expense of working	2,765,638	57
Net proceeds	2,657,626	18
From which deduct the share of the general expenses imputable to the network	200,000	0
Balance in hand	2,457,626	18

By the terms of the contract the State guaranteed for these sections during their partial working 14,000 francs per kilometre. Owing to the whole line being worked from 3rd of November to 31st December the normal guarantee of 6,500,000 francs for the whole network, comes into operation from the 1st November, so that the sum due from the State as guarantee in 1864 amounts altogether to 1,770,000 francs.

The State paid to the Company in 1864, as guarantee for the years 1860, 1861, 1862, and 1863, a sum of 750,000 francs, which is added to the net proceeds of the present year, to form the total net proceeds to be carried to account of first establishment, deducting the interest borne by that account.

The diminution of the net proceeds of this network in 1864 is owing to the interruption of the working mentioned in Section VI., page

Chapter IV.—Liquidation of the Year 1864.

Section XIV.

			f	c
The net proceeds of the working as shown above is			39,871,096	83
Add balance from preceding year			305,975	35
Total			40,177,072	18
The interest of funds invested amounts to			1,488,238	35
Total of sums disposable			41,665,310	53
The charges to be borne by the year are the following:—				
Interest and paying off loans		23,178,440 00		
From which deduct—				
1. The proceeds of sections worked on unfinished lines	4,154,527 47			
2. The complement of the interest of capital engaged in the lines in course of construction and in the lime-works	6,706,622 98			
		10,861,195 45		
Balance to be carried to general working account		12,31,7244 55

			14,256,195	78
Balance disposable			27,409,114	75
From which, deducting in conformity with Act. 49 of the statutes, the interest at 5 per cent. on 750,000 shares, being 25f per share			18,750,000	00
There remains for the net profit			8,659,114	75
To be applied to the reserve fund and divers purposes according to Acts. 44 and 53 of the statutes			865,911	48
Balance disposable			7,793,203	27
The extraordinary reserve from the net proceeds of the preceding years amounted on 31st December, 1864, to			6,827,929	15
The balance of account of profit and loss is therefore for 31st December, 1864			14,621,132	42

Thanks to the reserves made during the prosperous years, we are able to compensate, to a considerable extent, the diminution of receipts brought about by the exceptional causes which have affected the year 1864. If, owing to a winter of almost unprecedented severity, the receipts of the current year present only a small increase, there is reason to hope that commercial operations, thus suspended, have only been delayed, and that we shall recover during the last months of the year what we lost in the first months. On the other hand, we expect that the adjunction of the State network will have the effect of considerably improving the proceeds of our Italian network, and, for that reason, we dc not hesitate to propose to take from the anterior reserves the sum necessary to complete a dividend of 40 francs.

	f	c
If you adopt this proposition, it will be necessary to deduct from the above sum of	14,621,132	42
A sum representing 15f per share	11,250,000	00
Which will leave disposable a sum of	3,371,132	42

To be carried as a reserve to account of profit and loss of 1865.

There were distributed in November last 20f per share; a similar sum to complete the dividend of 40f will be paid from and after the 17th of May.

Extraordinary General Meeting.

We have to give an account to you, as an extraordinary general meeting, of the use we have made of the powers you conferred on us in your meeting of 28th April, 1863.

1. To stipulate the definitive conditions of the separation of the Italian part of the network.

2. To propose and accept, in the interest of the Company, all the concessions and adjunctions of new lines, or all modifications of the network conceded.

You know the circumstances which rendered obligatory the partition of our present network between two independent Companies, one Austrian, the other Italian, and the causes which have hitherto delayed the execution of that measure. Our Lombardo-Venetian network was reduced by the separation of Venetia to the Lombard lines, and those of central Italy; and, thus reduced, it did not present a sufficient basis for the constitution of an independent Company. This situation necessarily occupied our attention as soon as the separation was determined in principle. There was but one means to solve the difficulties it presented, and that was to obtain in Italy the concession of new lines on such conditions as would consolidate the whole of the Italian network, and give it the extent and resources it required.

In consequence, as early as the close of 1859, divers negotiations were commenced in Italy and several combinations were successively studied and put forward. Of these combinations, the one which obtained our preference, and had for its object the purchase of the State railways, has just been definitively realised by the vote of the Parliament which sanctions the convention made on this subject with the Italian Government.

We have consequently to explain to you the terms of this convention; we will afterwards lay before you the basis of the negotiations engaged for the separation of the two networks.

The network of the Italian State, which is the object of the convention of 30th June, 1864, comprises 687 kilometres now worked, also 154 kilometres of lines belonging to divers Companies, and which the State works on certain conditions.

These lines are the following:—

	kil.	
Turin to Genoa	168	
Alexandria—Arona	102	
Alexandria to Piacenza with branch to Novi	116	
Turin—Cuneo—Saluzzo	90	
Vercelli—Casale	42	
Turin—Magenta	116	
Turin—Suza	53	
		687
Divers branches		154
Total		841

The gross receipts of this network have varied in the last three years from 27,631,000f to 27,909,000f. The State guarantees a gross receipt of 28 millions, and engages, in case it should fall below that sum, to make up the difference.

The price of this network is fixed at 200 millions of francs, payable in eight half-yearly instalments of 25 millions each, without interest, the first instalment to be paid on 1st June, 1865, and the last on 5th November, 1868.

Deducting the part due to the branches, the net receipts of the State network have been about 13,500,000f. Taking into consideration the guarantee of the gross receipts, it cannot be valued at less than 14 millions.

The present worth of 800 millions payable in eight equal half-yearly instalments would, reckoning interest at 5 per cent, is about 182,500,000f.

The expenditure which the convention places to the charge of the Company comprises:—

1. Additons to the network:—

	f
For the works to be executed in the port of Genoa, with a view to establish there a conveniently arranged goods station	5,000,000

The Political Economist.

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

STATE OF THE MONEY MARKET.

The returns of the Bank of England show that there was no reason for again this week reducing the rate of discount. The bullion has but very slightly increased, and the reserve of notes has even decreased. The private securities also, which is the item in the Bank account most to be attended to at the present moment, because they indicate whether the Bank are able at the existing rate to employ their money or not, have but very little diminished. But at the same time the present probabilities are in favour of another speedy reduction. The rate in the open market is very much below the Bank rate, and when that is the case for any lengthened period, the Bank must lower its rate, or its bill-case will be empty, and its money idle.

THE CRISIS AT BOMBAY.

The panic at Bombay is a simple lesson on a very old text, but it is a lesson of such great magnitude that it deserves considerable attention. The forces which tend to produce a panic, and those which tend to aggravate it, have been on this occasion concentrated to a degree almost without example.

The primary cause of panics is unemployed money—money which people do not know what to do with. If people have in their hands capital for which they do not perceive any legitimate vent, for which their ordinary chances of investment afford no outlet, they immediately hunt out new channels. They find what they are used to and understand insufficient, and, therefore, they take up what they are not used to and do not understand. They catch at the most promising of new schemes—at the most alluring of visionary ideas. This is always the fate of new money, but it is particularly the fate of *sudden* new money. If the augmentations of wealth, though great, have been gradual, they generally bring with them a gradual increase of knowledge, and a gradual increase of social wants. Those who earn their money slowly have at least time to educate themselves to invest that money. But those who come on a sudden into a great fortune, are without the ideas, the habits, or the temper of mind fitted for its management and adapted for its use.

At Bombay the access of wealth has been enormous, and it has been most sudden. Bombay has been the *broker* of the Indian cotton trade. The cotton was not grown on the island, but it was sent from the island. And it was in the nature of a trade suddenly created, and in which the principal producer is a semi-barbarian, to yield brokerages of abnormal magnitude to the civilised broker. The trade being uncertain, the middleman needs a margin; his principal being an illiterate semi-barbarian, without forethought, without capital, without a knowledge of the market, the middleman can stretch that margin almost indefinitely.

The imports of specie into India have been—

	£
1860–61	10,679,350
1861–62	14,809,350
1862–63	20,523,459
1863–64	24,861,993

And a most heavy toll upon this has been levied by the mercantile community at Bombay.

That community too is very small, and yet mixed. The Parsee or native element is considerable, and yet the whole society is, in comparison with London ideas, very small. A population of emigrant Englishmen, anxious to make money quickly and come home soon, and of Asiatics unused to the ups and downs of European trade, and ignorant of the painful lessons of European experience, had the sudden control over a vast sum of uninvested millions.

The wonder would have been if they had kept sober. No similar population has ever resisted such temptations; a far less potent stimulant formerly drove wild the sober Dutchman, and caused the tulip mania; and Lombard street has been seduced into inconceivable follies, by comparatively a very small influx of new capital seeking for investment, and finding none certain, assured, and familiar. That Bombay would go mad was foreseen by almost every one, and now we see what the results of such madness in such a place are.

Some months since every species of local share property was at a great premium. A whole list of unfamiliar names attracted the eye. "Back Bays," "Mazagons," "Freres," "United Victorias," "Colabas," almost without limit, and forming a study and a branch of investment in themselves. One class of investment was particularly favoured. Bombay is a small island, and land speculation, whether for buying up neglected land, or demolishing the "old fort" and other useless political works, or reclaiming land from the sea, or getting land in any other plausible or even possible form, rose to extravagant values. Bombay was the great seat where this shower of new wealth was falling, and any bit of land about it would, it was fancied, receive for an unlimited time an unlimited supply of that wealth. Every acre about the place was not only to be valuable, but particularly valuable.

Other companies shared the prosperity. Financial companies, banks, shipping companies, were all, if the share list were an infallible test of prosperity, as prosperous as is possible in this world. Premiums could hardly be greater, every thing was rising, and, according to report and the papers, every thing was "firmly held."

Digitized by Google

In England we are far too familiar with the theory of crises not to know at once the end of all this. It did not require the fall in the value of cotton or the cessation of the American war to destroy all these imaginary riches. The fall in cotton and the defeat of the South have helped to make the panic worse, but nature would have made a panic without them. The *money* would have come to an end. The game of speculation is like any other game; you wish to realise your stakes at last. You cannot go on for ever getting money without solid production, without painful work; the passing from hand to hand of shares in *paulo post futurum* companies, companies *about to be* productive, is in its nature temporary. As soon as the real difficulties of true business, the difficulties of production, of lending, of distribution, become felt and imminent, the imaginary values set on untried adventures always fade away. The collapse of a mania is a certain result of the nature of a mania. It does not need an external force to destroy it, though an external force often helps, but it dies of itself by the sudden substitution of the real difficulty of making money for the supposed facility of making it.

At Bombay no kind of "shares"—nothing of this new imaginary unrealised wealth, is now saleable. For the moment there is no longer a just distinction between good undertakings and bad, all are in much danger of suffering alike. "Woe to the last holder" is the motto of a panic. Any one who has shared in the late speculation must for the moment be injured. His purchases must be nearly unsaleable, and if realised would fetch only some small fraction of what they would have yielded some time back, or in the case of solid undertakings of their real value. It is only natural that at Bombay failures should be many, that local credit should be deranged, that most things connected with Bombay should elsewhere in the world be eyed with doubt, and considered with suspicion.

It is impossible to predict the exact end of such a mania, to foretell what precise quantity of ruin it would cause, to specify nicely where safety will begin. But two considerations fraught with some comfort may be suggested to relieve the despondency which the first view of such a state of facts must occasion. First, a great deal of money was made in Bombay. Much actual profit had accumulated there. There was a large fund which may be lost, but which will stand a good deal before it is lost. If you are to gamble, it is better to gamble with a full purse than an empty one. Bombay may lose much of its new cash, and yet still be richer than Bombay used to be. Secondly. It is probable that though the Indian cotton trade cannot be the unnaturally profitable trade it has of late been, it will still be a profitable trade. The Southern States of America must for a considerable period be disorganised; *no one* knows now what their precise condition twelve months hence will be; the question is new, and there is "no precedent on the file," the problem is unsolved, and its elements incomplete. But it is not likely—it is not possible—that American production can for a long time reach its old quantity, and till it does so, the India supplement must be needed and must be valuable.

It is also to be observed that the basis of Bombay credit, the Bank of Bombay, stands well. The liabilities are—

	£
Public deposits	537,099
Private deposits, &c.	5,352,304
	5,899,403

And the cash reserve is 2,779,533*l.* which is much more than 2-5ths of its aggregate liabilities.

On the whole, therefore, though we cannot predict the precise extent of the calamities at Bombay, and though we may perhaps anticipate more failures than those which are yet announced, we must not consider that it contains no features of alleviation, or that it is in any mannner inexplicable. It would, indeed have contradicted recognised principles and falsified received maxims if it had not happened.

THE UNION CHARGEABILITY BILL IN THE HOUSE OF LORDS.

It is to be hoped that Mr Henley will find no one in the House of Lords willing to devote to the task of opposing the Union Chargeability Bill so much ability, so much prejudice, and so much zeal, as he has shown in the useless endeavour to defeat it in the House of Commons. The Duke of Rutland, who is to lead the Opposition, is a liberal landlord, though not a liberal politician, but the known intensity of his political prejudices will prevent him from wielding the influence of Mr Henley. No doubt also Lord Redesdale and the Marquis of Bath will do their little possible, but then Lord Redesdale and the Marquis of Bath are not quite such able and dangerous antagonists as Mr Henley. They will, doubtless, take ground somewhat similar to that which Mr Henley took when he found his direct effort to defeat the Bill, on the plea of injustice to landlords, was unsucessful. They will profess a profound interest in the poor; they will tremble for the prospects before the wretched paupers when the cold and abstract principles of the Union guardians replaces the warm local affections of the parish overseers. They will talk perhaps of that very mythical entity "the area of natural "charity." But they will not make much impression on the House of Lords by their very intelligible tactics, nor has either of them the sort of influence, which Mr Henley has acquired by shrewd and sagacious speeches on other subjects, to lend adventitious weight to the otherwise not very impressive argument so happily described by Mr Henley as "lying on his back "and crying fudge." Mr Henley's exclamations of this kind may be respected because he has not unfrequently exposed such humbug among his own party. But Lord Redesdale and the Marquis of Bath, should they, as seems probable, be the Duke of Rutland's most earnest supporters among the Peers, will not have this advantage. When have they not stood forward for old abuses and tried to identify them with the permanent institutions of this country?

We trust that, however keen the opposition of the landowners in the House of Lords may be, it will prove to be the opposition of a mere minority. The greatest landowners of the country, of whom the House of Lords contains so many,—such men as the Duke of Bedford,—certainly have no interest in resisting a measure the only danger of which is supposed to be the too great burden thrown upon landed proprietors by the necessity of contributing to the support of their own poor, for the greatest landowners of England have already done voluntarily far more for their own labourers than this or any similar measure will compel them to do. The House of Lords should follow the lead of such landowners as these, and not give the country reason to think that while enjoying all the privileges of property, they are unwilling to accept its duties and responsibilities. The influence which the House of Peers exerts over public opinion, depends in no small degree on the absence of anything like the predominance of class-interest in its deliberations. It should differ from the landed interest in the House of Commons, by taking a higher and more public-spirited view of questions which the landowners of the lower House have a fair right to put forward from a class-interest point of view. But the Peers, who are not properly representatives at all, except so far as all wise and independent judgment is representative, who are meant to resist hasty action and to mature defective legislation on behalf of the whole nation, and not on behalf of any one class, are bound to look at the matter from a higher point of view than such men as Mr Henley, Mr Knight, or Sir John Trollope. Only when the House of Lords rises visibly above its own interest as a House for the most part of landowners, does it command the weight to which it is fairly entitled in the country.

We can imagine no sound claim upon the support of the House of Lords which the Union Chargeability Bill cannot show. It is not an ill-considered measure. For it has long been discussed, long had the assent of the most impartial and diligent Committees, and been delayed for at least ten years after the minds of all able men had been made up that it would be valuable and needful. It is not a sudden or revolutionary measure, for the legislation of many years has been leading up to it step by step. It is not a class measure, for it is one originally proposed and supported by county members, though it has been so savagely denounced by county members in the House of Commons as if it were some sudden invasion of their rights. It will do more than any measure passed for years to increase the comfort and respectability of the agricultural labourers, whose welfare should not be indifferent to the House of Lords. That cottage building has not extended with the extending wants of the population, and that this is due to the fear of poor rates by landed proprietors, even Mr Henley, with all his prejudices, admits. That cottages have been freely pulled down in close parishes, expressly in order to diminish poor rates and throw the poor on neighbouring parishes, other country gentlemen more

Digitized by Google

candid than Mr Henley admit. It is only too obvious how this system degrades the class of agricultural labourers when it crowds them together in hovels unworthy to contain human beings at all. If it does not have *this* effect when it banishes them to the nearest town or open parish, it destroys, instead, the value of their labour by exhausting them in the long *walks* to and fro. The present system, therefore, corrupts the life of the labourers whom it does not exhaust, and exhausts the energies of those whom it does not corrupt.

But it is not only on the agricultural labourers, it is quite as much on the farmers themselves, that this system operates so injuriously. The object of the farmers is of course to diminish the rates as much as possible, and every labourer in the parish who is not employed comes upon the rates. But the class of labourers who are most liable to be unemployed are the lazy and drunken class, whose services are worth little or nothing. The effect of this system is, therefore, that the poor rates, as at present levied, act as an inducement to the farmer to employ worthless men, who would not otherwise have any chance of employment at all. In other words, we may call the poor rates as at present levied a differential duty levied in favour of idleness and helplessness against industry and efficiency. In order to avoid spending many pounds on poor rates with *no* return for them, the farmers spend their pounds on labourers who would otherwise be and deserve to be thrown out of employment, for the sake of the return (inefficient though it be) which their labour gives to such expenditure. Of course, this would be very different if the area of chargeability were the Union instead of the parish. The farmer would no longer feel it worth while to employ an inefficient labourer for the sake of the very small fraction of the *Union* rate which would fall on him personally. To show how greatly the motive for this bad practice would be reduced, it is stated that in a particular parish the yearly payment required now from the parish for two paupers is 13*l* annually, but that the same parish would only contribute 5s 4d for them if they were on the common fund of the Union. The industrious labourer would therefore get the natural advantage of his industry in the competition, and both the farmer and the labourer would reap the benefit. If these are not considerations to overbalance at once the petty considerations of self-interest on the part of such landowners as the House of Peers contains, we scarcely know what would.

But it will be said that the Unions will spend more lavishly than the parishes, for the very reason that the personal incidence of the rate will be less heavily felt. As Mr Villiers showed on the second reading of the Bill, no argument advanced in the whole discussion has less weight. The management of the guardians is probably more intelligent than that of the parish overseers; at all events, whatever may be the reason of it, experience shows that the paupers in large Unions are fewer in proportion to the population than those in small parishes or Unions. In Paddington, Islington, and Marylebone for instance, "both the expenditure and the amount of "pauperism are found to be less than in the City of "London, where the parochial divisions are so numerous." In the only instance in which the parishes have availed themselves unanimously of the permission to unite their expenditure and income in a Union—the Docking Union—the experiment has been found to be economical. In the Docking Union the expenditure decreased after the new arrangement 10·73 per cent., while it only decreased 1·82 per cent. in the neighbouring Unions. And Cambridge and Oxford also, where the same system is pursued, profess to find that it has worked admirably. In short, this experiment will be found to be not only a great boon to the agricultural labourer and to the farmer, and so indirectly to the wealth of the country, but also directly economical, by instituting a more intelligent managing body for those of the old parishes. If, with the repeated recommendations of committees in favour of this measure, and the very gradual steps by which it has been introduced, the House of Lords should be unwise enough to reject the one great beneficial reform of the session, they will bring upon their body an imputation of selfishness which must seriously, and very justly, diminish their political influence in the country.

COUNT VON BISMARCK AND HIS PARLIAMENT.

THE German political pulse is so slow, and German political diseases so chronic, that England is apt to tire of watching the course they take. The position of the Constitutional party in Prussia now *seems* to all intents and purposes the same that it did immediately after the accession of Count von Bismarck to power, and still more nearly the same as it was before the Danish war. What the Prussian Prime Minister gained in influence by that war he has lost since it was concluded; and now the inevitable split either between the King and Constitution on the one hand, or between the King and Herr von Bismarck on the other, seems just as near, but also, at first sight, just as far, as it seemed two years ago. We see a Liberal party longing for extended influence in Germany, passionately desiring new territory, new power, an efficient fleet, and a powerful national army,—yet denying itself all these satisfactions, struggling for a reduction of the army, declining altogether to build a fleet, thwarting the Government in its attempt to absorb Schleswig-Holstein, congratulating itself on the checks given by Austria to the foreign policy which of all others they most desire to carry out,—all because they dare not and will not trust the King's present Minister to carry out any of their policies, because they do not wish to see Prussia aggrandised through the instrumentality of a Minister they fear and hate, because they do wish to owe her aggrandisement exclusively to the party advocating popular rights. Such self-denial as this deserves success, and must, if supported by the constituencies, lead to it eventually, either directly or by the route of a *coup d'etat*. And in one way undoubtedly the popular party have gained by the Danish war. But for that war, we scarcely see any reason why the present split between the King and his Parliament should not have gone on for ever without any further inroad on the Constitution. With that important provision made by the Constitution for continuing the taxes of the previous year without any fresh vote in case the Parliament cannot agree to a new Budget, a Government as honestly economical as the Prussian, both of money and power, might have kept on for an indefinite period demanding new contributions which it could not get, and raising the old taxes in place thereof. Fortunately, however, for the popular party, the war seems to have made more inroad on the exchequer than was at first believed, and there seems to be real want of more money in some form or other. The House of Deputies has made the discovery that the Minister is really near the end of his resources. It seems that he has already been driven to "cook" his accounts. Our readers are aware that he intended to get a large part of his war expenditure out of Schleswig-Holstein, which he professed to have "liberated." He has been driven, however—so say the Committee on the Budget—to throw into these demands on the Duchies large items of military expenditure which were in no way due to the war "on behalf of" Schleswig-Holstein, and which must have been expended whether that had broken out or not. In other words, he proposes to levy a subsidy from Schleswig-Holstein in order to escape the difficulty of coming to his own refractory Parliament for money which they are sure to refuse. The same Committee also assert that the account of the Prussian war expenditure suppresses some items altogether which Prussia is bound in honour to pay, but which she thinks she can avoid paying,—for example, the debts contracted in the Duchies for provender, and paid for with promissory notes. So that the unfortunate Duchies are it appears to suffer doubly from their deliverer—to pay him a large portion of his national outlay on his army, and to *lose* payment for promissory notes taken in exchange for value given. If Prussia "delivers" German States after this fashion, German States will be in no hurry to be delivered.

These discoveries have afforded the Prussian deputies good ground for the reply just made in their name to the demand of the ministry for a naval fund, and refused by the deputies. They say simply that they do not *believe* the Government would spend the money asked for on the navy if they voted it; that as they had "cooked" their accounts to meet the emergency in other respects, they would be sure, if they got the loan for the navy, to apply it to the army debts, or some other unconstitutional change never yet authorised by the House of Representatives. "The House of Deputies," says the resolution, "is not in a position to grant any loans "to the existing Ministry of State, that Ministry having prac-"tically set aside the right of voting the Budget, constitu-"tionally belonging to the House of Deputies." And Herr von Virchow, in speaking in its favour, explained with rather unpleasant clearness of illustration not only the "want of "confidence," in our English sense, felt by the Chamber, but the profound confidence in the insincerity of the Government

Digitized by Google

felt by it. Much as it wished to have a navy, said Herr Virchow, the House felt no confidence that to contribute the loan demanded, would tend to its having one. Of course, the Minister replied that the Liberals had ceased to care for a navy, and then Herr von Virchow rejoined that if Von Bismark thought so, he had either not taken the trouble to read the Committee's report, or having read it, had stated "the reverse "of the truth." This, though it left an alternative open, was near enough to giving the lie to the Minister, to give Von Bismark, who is arrogant and hot-headed as well as able, a pretext for a quarrel. Indeed he seems to be losing his temper more and more completely as he is closer and closer pressed to choose between a *coup d'etat* to which he cannot drive the King, and a policy of concession to which he cannot drive himself. There was no real pretence for his charge that the Prussian deputies were indifferent to the navy, and everything to disprove it; and after it had once been made, we do not see what answer to it could have been given better than Herr von Vichow's polite dilemma. The Minister, however, chose to challenge the deputy to a duel, which seems to be still pending. We need not say that the Lower House will do very wrong if they allow any of their own members to give or accept such challenges.

The quarrel is politically interesting only as one among many indications that the time is really aapproaching when the pecuniary resources of the Government will be exhausted, and the King must either consent to accept the dictation of the Lower House, or to break his oath to the Constitution. Nothing probably will be gained by a mere dissolution. As far as we can read the signs of the times in Prussia, the desire for popular Government is, though not passionate, so great and persistent, that it will triumph over all the impatience for the extension of territory, for the possession of a navy, and for the predominance of Prussia in Germany. If this should prove to be so, if the Prussians can really be patient enough to deny themselves a political struggle with Austria and the growth of external political power in order to secure it internally, we do not think their success can be long delayed,—unless indeed the King is prepared to violate his faith like his predecessors, and rule by the army alone. Even that could not last very long, and every day that it did last would be preparing a greater ultimate triumph for the popular party.

THE *OWL* AND MR COBDEN'S FAMILY.

A PARAGRAPH extracted from the *Owl* is now going the round of the English press, which deserves a word of comment and reprobation. It is a distinct transgression of the great rule which English journalists have for years so honourably maintained, that the private affairs of public men are not within the expedient limit of public comment. The precise line at which public men become private individuals is not of course defined—is, indeed, like the line between badinage and insolence, indefinable; but it exists, and the *Owl* in its remarks upon the offer of a pension to Mrs Cobden has visibly transgressed it. The transgression would not matter much, but, unfortunately, that impudent little paper, by dint of an exclusive tone, an air of mystery, and the publication of useless little bits of "information" about appointments and betrothals—information often erroneous, but easily obtained by eavesdropping in great houses, and very dear to the uninformed mind—has acquired an authority which induces all provincial papers to republish its silly chatter, and which only a fortnight since made a baseless invention about some American demands a subject of serious Parliamentary inquiry. The malignant little paragraph to which we refer will, therefore, be seen by half the newspaper readers in the kingdom and believed in spite of evidence by half those who see it, and cause an amount of pain as annoying to the sufferers as pleasant to those who have gratuitously inflicted it. Lord Palmerston, who two years ago told Mr Cobden to stick to commerce and not presume to understand politics, has it appears thought fit to offer to Mr Cobden's widow a pension of 1,500*l* a year, in acknowledgment of his great services to the country. This pension Mrs Cobden, consulting we presume only the wishes her husband would have expressed, courteously declined; whereupon the *Owl*, which exists because it is supposed to reflect the tattle of Cambridge House, grows indignant, and attributes the refusal to Mr Bright, declares that he also instigated the refusal of a baronetcy, and hints that his motive was jealousy of his great rival and ally. For the whole statement there is of course no shadow of evidence, most of it is in the face of evidence to the contrary, and yet, appearing in the *Owl*, it will receive that kind of malicious credence always given to malignant gossip about private life. It is of course quite possible that Mrs Cobden may have consulted her husband's dearest friend as she may have consulted her sons, and journalism has about as much right to comment on the one fact as on the other. Either is an intolerable interference with private life, a breach of that rule which the *Owl*, with its affectation of *savoir vivre*, ought to have been the last to violate. As to the baronetcy, Mr Cobden needed no advice to induce him to reject an honour at variance with the habits of his life, beneath his political standing, and not in accordance with his ideas of a wise political system. He left such things to those who struggle for ribbons, who are capable of believing the baseness attributed to Mr Bright, and who think they honour Mr Cobden's widow by asserting that her husband was tricked by his closest friend, The *Owl* has been demoralised by bad joking, and the habit of reporting the love affairs of immaterial flirtations.

RESOLUTIONS RESPECTING THE DRAWBACK ON SUGAR.

THE object of the resolutions given underneath, and of the Bill which is to carry them out, is very simple. It is of great importance that the drawback on sugar should be rightly adjusted, not only by England, but by all nations, and our Government has been in communication with the principal Powers on the Continent for that purpose. The drawback to be allowed, on export, depends on the duty paid on import, and if sugar was an article of an ordinary description, there would be difficulty in so settling it. But sugar is *not* an ordinary article. As we have so often had occasion to explain it is an article in a great many stages of extraction, a great many stages of manufacture. Some sugar is in a complete state of refinement, or, as to get rid of all the trade words, we should like to say of extraction, and some in an incomplete state. And, therefore, it is not easy to say *what* duty any particular sugar paid at entrance, or what duty it ought to pay at exit.

Under a uniform duty, charging the same duty on all sugars imported, there could only be one drawback, and it is impossible that that one could be satisfactory. The duty is charged per lb, and a very refined sugar —an essence from which all the dross has been separated— would then receive only a little drawback, whereas the raw sugar from which it was elicited would have paid a large duty. A sugar of which the bulk had been somewhat diminished, but not so much diminished, would receive a greater drawback, but still one not equivalent to the duty paid. A uniform duty and a uniform drawback inevitably operate as a discouragement to refining in this country, because they give most to the heaviest sugar which is sent away, and the heaviest is the least refined.

The true principle is to charge duty, as near as you can, on the extractible sugar contained in a particular sample, and to allow drawback also as nearly as you can on the extractible sugar. It is evident that if a general arrangement among nations can be brought about for this purpose, it would be in the highest degree beneficial. If a nation gives a drawback on refined sugar higher than the duty it charges on raw sugar, it gives a bounty on refining within its limits: if, on the contrary, it only allows a drawback on refined sugar less than the tax, it discourages refining within those limits. The only sound system is that which approximates as nearly as possible to the system of free trade—to the system which gives no bounty on production anywhere, and imposes no penalty on production anywhere—which is as near as may be that which would exist if Government cost nothing and there were no duties at all.

The following resolutions are part of a scheme arranged with France, Holland, and Belgium, for this desirable purpose:—

1. *Resolved*, That, from and after the day on which the ratifications of a Convention between Her Majesty, the King of the Belgians, the Emperor of the French, and the King of the Netherlands, for regulating the Drawbacks on Sugar,

Digitized by Google

which was signed at Paris on the 8th day of November, 1864, shall be exchanged :—

In lieu of the Duties of Customs now charged on the undermentioned article, the following Duties of Customs shall be charged thereon, on importation into Great Britain or Ireland (that is to say):—

	£	s.	d.
Cane Juice..... the cwt.	0	8	2

2. *Resolved*, That, from and after the day on which the ratifications of a Convention between Her Majesty, the King of the Belgians, the Emperor of the French, and the King of the Netherlands, for regulating the Drawbacks on Sugar, which was signed at Paris on the 8th day of November, 1864, shall be exchanged :—

In lieu of the Drawbacks of twelve shilling and tenpence now allowed on certain descriptions of Refined Sugar, the following Drawbacks shall be paid and allowed on the undermentioned descriptions of Refined Sugar, on the exportation thereof to foreign parts, or on removal to the Isle of Man for consumption there, or on deposit in any approved warehouse, upon such terms and subject to such regulations as the Commissioners of Customs may direct, for delivery from such warehouse as ships' stores only, or for the purpose of sweetening British Spirits in bond (that is to say):—

	£	s	d
Upon sugar, refined in Great Britain or Ireland, in loaf complete and whole, or lumps duly refined, having been perfectly clarified and thoroughly dried in the stove, and being of an uniform whiteness throughout, and upon such sugar, pounded, crushed, or broken in a warehouse approved by the Commissioners of Customs, such sugars having been first inspected by the officers of Customs in lumps or loaves, as if for immediate shipment, and then packed for exportation in the presence of such officers, and at the expense of the exporters; and upon candy ..... for every cwt	0	12	4
Upon sugar, refined in Great Britain or Ireland by the centrifugal or any other process, and not in any way inferior to the export standard No. 3 approved by the Lords of the Treasury..... for every cwt	0	12	4

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 8th inst. The return for the previous week is added :—

DEBTOR.

	June 8, 1865. f	c		June 1, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,724	81	.....	7,043,871	81

Government stock reserve	12,980,750	14	.....	12,980,750	14
Ditto other securities	36,557,487	91	.....	36,557,487	91
Securities held	100,000,000	0	.....	100,000,000	0
Hotel and property of the bank and branches	8,424,592	0	.....	8,424,392	0
Expenses of management	1,372,915	10	.....	1,834,476	31
Sundries	11,907,797	21	.....	8,882,819	20
	1,342,807,436	69	.....	1,345,688,975	81

The return of the Bank of France must again be considered unfavourable. The metallic reserve has risen to the large sum of 493,900,000f, being an increase of 3,100,000f compared with last week, and the discounts are only 491,900,000f—an increase of 5,900,000f. The notes in circulation have declined 14,200,000f, and the deposits 3,400,000f.

The Bourse has been much agitated by the failure of a well-known speculator, M. Werner, to meet his engagements, and by his consequent "execution." He operated, it appears, for a fall in Italian stock and Credit Mobilier shares, and for a rise in Lyons and Mediterranean shares, and was disappointed in both respects. His deficiency is estimated at from 5,000,000f to 7,000,000f, and five or six stock-brokers who acted for him are believed to be hit severely:—a German banking firm, which was mixed up in his transactions, has also got into difficulties through him. His transactions in Lyons and Mediterranean were excessively great, and the failure of them has left floating a considerable number of shares. There has accordingly been a serious fall in that security, and the expectation is that the price of it will be affected for some time time to come. Apart from this affair, the market has remained in the state in which it has been for so many weeks—that is, full of distrust. The following are the quotations—that of the Messageries Imperiales is ex dividend :—

	June 1. f	c		June 8. f	c
Four-and-a-Half	95	50	.....	95	50
Fours	84	80	.....	84	80

Messageries Imperiales	820	0	.....	785	0

M. Thiers has delivered in the Corps Legislatif his great annual speech on the finances. It is certainly a striking exposure of the financial situation, and it has produced a profound impression on the country; but practically it is of no value, for it suggests no plan by which the situation can be made better. It is even marked with a certain degree of injustice, inasmuch as it seems to throw on the Minister of Finance the responsibility of a state of things which is the direct and inevitable consequence of the Cæsarism France has seen fit to adopt, or at least to tolerate, as her form of Government. The Budget of France was formerly, said M. Thiers, about 1,500,000,000f (60,000,000*l*), all expenses, ordinary and extraordinary, foreseen and unforeseen, duly counted; and now it is from 2,200,000,000f to 2,300,000,000f (88,000,000*l* to 92,000,000*l*). And the reason is, that the Government, not allowing the French people any part in the management of their own political affairs, is obliged to occupy their intellectual activity by wars abroad, which are costly things, and by great undertakings at home, which are not less so. M. Thiers next presented some severe and telling criticism on the numerous divisions of the budget, which the present Minister of Finance makes; namely :—Ordinary budget, extraordinary budget, corrected budget, special (or departmental) budget, and definitive budget:—and he affirmed that this is only done in order not to alarm the public by presenting the "total of the whole" in one lump. Herein, no doubt, he was right; but M. Fould's expedient merits some little indulgence, seeing that it is always well to gild pills which are large and bitter. M. Thiers not only objected to the multifarious divisions of the budget, but he maintained that various expenses, such as those for stocking arsenals improving forts, completing roads, &c., which manifestly belong to the ordinary budget, are put down in the extraordinary one; but he forgot that if that were not done, the ordinary budget would appear very large, and that consequently the object for which the division is made would not be attained. He also maintained that items which are put down in the corrected budget really belong to the extraordinary one: for example, the expenses of the occupation of Rome and of the expedition to Mexico figure in the corrected budget of 1865, though it was perfectly easy to foresee them when the extraordinary budget of that year was presented. But here again he does not show due consideration for the necessity under which the Minister is placed of "making things pleasant" by presenting in the first instance as moderate a budget as possible. Though complaining of the large expenditure of the Government, M. Thiers declared that it is not possible to reduce the army, albeit it is nearly double what it was forty years ago. The evacuation of Mexico would, he said, enable a large saving to be made; but he expressed the opinion that the Government would not consent to any such measure. As to the slackening of public works, which is also recommended as a means of economy, he entertained only faint hopes of seeing it. Thus, on the whole, he comes to the conclusion that, vast as the outlay is, it is not likely to be diminished. As to the receipts, he showed that they are constantly below the expenses, and for 1865 he calculated the deficit at

Digitized by Google

182,000,000f. To make up this sum, the Minister of Finance, he said, proposed to suspend the operations of the sinking fund, whereby he would get 127,000,000f; to take 18,000,000f the amount of an anticipated increase in the receipts; 27,400,000f from Mexico, —and various small items from other sources. M. Thiers, however, condemned very decidedly any meddling with the sinking fund, as a violation of good faith to the public creditors; he expressed gave doubts that the improvement in the revenue would be realised; and he maintained that Mexico could not pay the sum put down. He concluded an effective and brilliant speech, of which it is impossible to give a fair idea in a few lines of analysis, by the startling declaration that if France persists in her financial policy, she will either arrive at bankruptcy, or be compelled to adopt "deplorable and detestable imposts"—such as the income tax—which will impoverish the country and produce division among citizens.

After representing the position of the finances to be so lamentable, it was to be expected that M. Thiers would tell how it could be avoided. But, as I have said, he proposed nothing. He stated, to be sure, that the reduction of the army, the withdrawal of the troops from Mexico, the slackening of public works, and the revival of the sinking fund, were remedies; but he at the same time declared that those measures could not, or would not, be adopted; and of course the presentation of impracticable or unacceptable schemes is equivalent to presenting none at all. M. Thiers' omission to throw light on this important point has surprised the public. Equally surprised are they that he should have pronounced against a reduction of the army, which is certainly desirable, and could certainly be effected without danger; that he should have condemned an income tax, which the example of Peel in England and of Wilson in India proves to be an admirable instrument in embarrassed situations ,and even as a permament branch of income; and that he should have repeated the stale arguments about the sinking fund.

In a second speech, the honourable gentleman, in order to present the situation of affairs as concisely and as strikingly as possible, said that in 1863 the total budget was 2,292,000,000f, in 1864 more than 2,160,000,000f, and in 1865 will be 2,200,000,000f; and that the veritable receipts,—that is, those coming from taxes,—were in each of those years only from 1,930,000,0000f to 1,940,000,000f. The difierence, he said, has to be made up by manipulation of the resources of the sinking fund, or by "equivocal resources, which frequently are only loans in disguise." M. Vuitry, in the name of the Government, replied to M. Thiers: he displayed great talent, but of course failed to prove that the situation of the finances is satisfactory. He, however, showed that they are improving, and that is something.

The Corps Legislatif yesterday rejected a demand for 6,000,000f made by the Government for the erection of a new General Post Office. This vôte has created considerable sensation, the Legislature having scarcely ever before refused applications for money, however unreasonable they might be. Hopes are entertained that it will henceforth execute more rigidly its duty of guardian of the public purse.

The Emperor's visit to Algeria will not be sterile in a commercial point of view. A convention has been concluded between the Government and M. Fremy, Governor of the Credit Foncier, and M. Paulin Talabot, Director-General of the Mediterranean Railway, acting for other persons as well as for themselves, by which they undertake to form in three months a company with a capital of 100,000,000f, in 200,000 shares, for "procuring capital and granting credits for all industrial, agricultural, and commercial operations in Algeria, and to undertake such operations itself.' The company is to place at the disposition of the Government 100,000,000f in instalments, payable in the course of six years, to be employed in making roads, ports, railways, canals, irrigations, &c.; the said sum to be reduced to 62,000,000f if, in the course of three years, the Government should think fit. 5¼ per cent. is to be paid by the Government as interest and sinking fund of the debt, which is to be paid off in fifty years; and the company is to have 100,000 hectares of land at a rent of 1f the hectare, and all the mines it may discover in the course of ten years. The company is to issue debentures.

Some eminent capitalists of Paris sent representatives to Madrid to make biddings for the new Spanish loan. This fact will not fail to be noted by the Spanish bondholders in England: it proves that the French have ceased to think that the non-fulfilment by Spain of her past engagements is a reason for refusing to enter into new ones with her.

The Agra and Masterman's Bank has already commenced business in its Paris branch. It allows interest on deposits. As banking on the English joint stock plan seems on the eve of taking considerable extension in this country, it is expected that other English banks will establish branches here.

Among the many publications to which the Bank question has given rise, a *Memoire*, entitled *Enquete sur la Circulation Monetaire et Fiduciaire*, by Monsieur A. Boutarel, is exacting attention. M. A. Boutarel is of opinion that the Bank of France ought to continue to enjoy its monopoly of the issue of notes, but subject to the condition that, as its statutes of 1808 decided, it shall be nothing more than a bank of discount, and that consequently it shall cease to make advances on deposits of Government stock, railway shares and bonds, bonds of the City of Paris and the Credit Foncier, also on deposits of bullion, and finally shall cease to lend to the Government. If this were done the Bank, he says, would constantly be able to discount bills at a moderate rate, and would thereby render an immense service to commerce. In support of his position M. Boutarel compares the Bank returns as they now stand with what they would be under his system; and the figures are certainly concise. The idea of preventing the Bank from making advances on deposits of securities is, however, by no means new. It was at one time, I believe, seriously entertained by the Government, and M. Isaac Pereire in his pamphlet speaks in favour it. And that there is much to be said in support of it in a commercial point of view, there can be no question. But that such a measure, if carried into effect, would influence the rate of interest, is not easy to perceive. Whether notes be given for bills or for securities, they must be paid on presentation; and when a great demand for the precious metals arises, they would flock in just as fast in one case as in the other—and in one case as the other the Bank would be under the necessity of defending its till by the only efficacious method of doing so yet discovered,—which is the raising of the discount.

It was stated some time back, that the Bank of France, in order to enlighten the public on the grave questions relative to banks, currency, and commercial crises, had published a translation of portions of the evidence given before Committees of the House of Commons on those matters. Within the last few days, the Bank has issued a translation of the testimony of the principal witnesses before the Committee of the House of Lords on the Commercial Crisis of 1847. The publication, like the first one, is made under the direction of M. Coullet and M. Juglar.

The Messageries Imperiales Company (Services Maritimes) has held its annual meeting. The directors presented a report on the operations of 1864, which afforded great satisfaction to the shareholders. It stated that on the 31st December last the Company possessed 17 steamers of 17,530 horse-power, an increase of 6 vessels and 1,660 horse-power compared with the corresponding date of the year preceding. The traffic on the Black Sea and Mediterranean lines, compared with 1863, had increased by more than 8¼ per cent. in passengers, and more than 16½ in goods; on the Brazil and La Plata lines, 5½ per cent. in goods; on the lines of the Indian and Chinese Seas, more than 26¾ in goods, 18 in passengers, 62 in specie. The total receipts were 44,528,284f 50c, and the expenses 32,294,959f 75c, leaving a balance of 12,233,324f 60c. Out of this balance, 5,094,019f 58c were set apart for assurances, sinking fund, and depreciation in vessels and stores; 742,893f were absorbed by the interest on bonds; and so there remained 6,396,411f to be disposed. On the proposition of the directors, the meeting decided that 319,820f 50c of the sum should be added to the reserve fund, 6,050,000f to be distributed as a dividend of 55f per share, and 26,591f 23c be carried forward. Of the 55f, 20f have already been paid on account.

The Societe de l'Eclairage au Gaz et des Hauts-Fourneaux et Fonderies de Marseilles, et des Mines des Portes et Senechas, has declared a dividend of 26f for 1864. The profits exceeded those of 1863 by 198,152f.

The shareholders of the Colonial Credit Foncier have held their annual meeting. The report stated that in 1864 there was a great increase of business compared with the preceding two years. The total demands for loans in the three colonies of La Reunion, Guadaloupe, and Martinique were 23,116, 326f, and of these 16,699,175f were recommended by the Colonial Commissions after an examination into the security offered, and 9,046,575f were definitively accorded by the directors at Paris. The Council General of La Reunion has consented to increase its guarantee to 500,000f in the event of the company working loans to the amount of 20,000,000f in the colony. The profits of 1864, after deducting 56,520f for the reserve fund, were 169,562f, and they were sufficient to allow a dividend of 7f per share to be declared, leaving a small sum to be carried forward. These 7f added to 6f 25c already paid as interest, make the revenue per share rather more than 10½ per cent. on the paid up-capital.

The Company of the Ligne d'Italie par le Simplon Railways solicits subscriptions for 60,000 bonds at 400f, bearing 15f interest per annum, and to be paid off at 500f in thirty years by annual drawings.

The Madrid, Saragossa, and Alicant Railway has declared a dividend of 30f per share for 1864. As the traffic was less than in preceding years, it was necessary to take a sum from the reserve to make up the 30f.

The Austrian (State) Railway receipts were in 1864 only 4.663,890 florins, after deducting working expenses and other outgoings. In consequence the interest of 5 per cent. on the shares could only be paid.

The market report is as follows:—

FLOUR.—At *Paris* calm prevails. Yesterday the quotation was 45f to 50f the sack of 157 kilogs. Six marks declined: current month, 49f 75c and 49f 50c; July and August, 50f 50c and even 50f 25c. Type Paris, the 101 kilogs, current month, 29f 25c; July and August, 30f 50c.

WHEAT.—The accounts of the growing crops are favourable in certain regions, unfavourable in others: on the whole, however the hopes of a good harvest are better than they were a fortnight ago. At *Paris*, yesterday, choice white was 27f to 27f 50c the sack of 120 kilogs, and 26f

Digitized by Google

50c to 27f; first quality, 25f 50c to 26f; ordinary current sorts, 24f 50c to 25f.

COTTON.—The sales at *Havre*, in the week ending Friday, were 11,370 bales, and the arrivals 11,723. The stock was estimated at 61,630 bales, of which 2,920 were of the United States. The closing quotations were 15f to 25f higher for United States sorts, 7f higher for Brazil, 12f Peru, 10f Surat, 8f to 11f Tinnevelly and Madras, 5f Coconada, Bengal, Kurrachee, China, and Jumel. Low New Orleans was consequently 215f the 50 kilogs; good ordinary qualities in Broach, 145f; in Tinnevelly, 120f; Madras, 140f; China, 125f; Egypt, 205f. This week, the market has not been active: America, 210f; Madras, 150f and 147f 50c; Tinnevelly, 117f 50c and 116f 50c (the latter for delivery from England); China, 115f, 110f, and 105f; Bengal, 85f and 75f; sawginned, 170f; Oomrawuttee, 150f.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular, and prices were firm. 740 sacks Port-au-Prince and Jacmel, 81f 50c (for old) to 84f the 50 kilogs in bond; 236 Cape, 85f 50c to 86f; 965 Gonaives and Saint Marc, 88f 50c to 91f; 2,530 Rio not washed, 75f 50c to 82f; 199 Guatemala, 95f; 2,500 English cwts Malabar expected, 89f to 90f; and some Guadaloupe, 145f duty paid. The arrivals exceeded 19,500 sacks. This week, Guatemala, 95f in bond; Malabar, 92f 50c; Maracaibo, 85f; Rio, 82f 50c and 85f 50c; Porto Rico, 100f to 100f 50c. At *Bordeaux*, last week, 200 casks Santiago, 116f to 120f; 530 sacks Rio washed, 102f to 110f; 141 unwashed, 82f; 100 Bahia, 83f; 1,312 Mysore, 117f. This week, Rio washed, 102f. At *Nantes*, last week, no sales, and none this week. At *Marseilles*, last week, 2,400 sacks Maracaibo in port at, it was said, 83f; a small lot of Mocha trie, 115f. By auction, 670 damaged Rio, 65f to 72f. This week, some damaged Rio by auction, 63f to 67f 50c.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 350 casks French West India, disposable, 49f 50c the 50 kilogs, bonne quatrieme, duty paid; a small lot of choice, 50f; 1,960 in port or for delivery, 49f 25c; 250 usine, 58f 50c to 63f on sample; some ditto, 64f; and a small lot at 52f 50c bonne quatrieme. 135 casks Havana, by Dutch ship, 31f, No. 12 in bond. The arrivals were about 12,000 casks. This week, Havana, No. 12 in the port, 31f 50c; French West India for delivery, 49f 25c duty paid; usine on sample, 64f 50c and 62f 50c; Reunion, bonne quatrieme, 52f. At *Nantes*, last week, some French West India usine, 60f 50c to 66f, and 56f on sample; 700 casks Porto Rico, for delivery by English ship, 49f 25c bonne quatrieme. In Reunion and Mauritius nothing done, but the quotation of the former was 53f 25c to 53f 50c bonne quatrieme, and of the latter 53f 75c to 54f 50c ditto. This week, some Guadaloupe usine, at prices kept secret. At *Bordeaux*, last week, French West India, 48f 50c and 49f bonne quatrieme; usine 60f to 61f; 1,670 casks Havanna, for delivery, 32f, No. 12; 965, 31f 50c same number. This week, French West India, 48f 50c to 48f 62½c; usine, 61f to 65f 50c; Havana for delivery, 31f 75c No. 12. At *Marseilles*, last week, 125 casks Hanvana, by Spanish ship in the port, 30f, No. 12: 300 Santiago. ditto, 28f bonne quatrieme of Havre; some French West India, 30f 50c to 31f 50c bonne quatrieme of Havre. This week, French West India, 30f 50c bonne quatrieme of Havre.

INDIGO.—At *Havre*, in the week ending Friday, 46 chests Bengal new went at 75c to 90c above the estimates: 14, at 80c to 1f; 10, old, at 8f 75c the ½-kilog; 24, by the Radama, at prices not stated. The arrivals were 1,386 chests by the Radama, and 155 from Rotterdam and England. This week, Bengal, at a premium of 85c, 10c, 90c, 1f; at prices kept secret; and the ½-kilog, 9f 91c. At *Bordeaux*, last week, 73 chests Bengal, 9 Madras, at established prices. This week, some Bengal, Madras, and Kurpah have been sold at prices not given.

HIDES.—The sales at *Havre*, in the week ending Friday, were 1,890 Monte Video dry cow, 82f 50c to 90f 25c the 50 kilogs; 801 salted saladeros cow, 46f; 750 mataderos cow, 41f; 950 Rio Grande salted ox, 51f for light, to 56f; 100 Valparaiso salted ox, 56f; 800 New Orleans salted, 38f; 1,401 Buenos Ayres and Monte Video horse salted, 42f 50c to 42f 68¾c; and 159 dry, 4f 50c each. By auction, a quantity of different sorts of damaged were sold. The arrivals were abont 50,000. This week, Buenos Ayres salted ox, 57f.

WOOL.—At *Havre*, in the week ending Friday, there was a good demand: 392 bales La Plata, unwashed, 1f 70c to 2f 25c the kilog; 84 bales Chili, unwashed, 1f 45c to 2f 10c; Monte Video sheepskin, unwashed, 1f to 1f 90c.. The arrivals exceeded 3,000 bales. This week, Buenos Ayres, unwashed, 2f 5c; Monte Video, unwashed, 2f 25c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 100 pipes La Plata, disposable, 50f the 50 kilogs; 100 pipes in disembarkation, 49f 50c. The arrivals were 726 casks. No sales this week. At *Paris*, yesterday, 100 kilogs, octroi, duty included, 104f 70c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 54f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 72f; 3-6 beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

According to recent New York advices the American shipowners and builders, now that the demand of the Government for steamers has ceased, are disposed to turn their attention to the formation of new mail and passenger lines. Among the most prominent of those for which the arrangements have been completed are the New York and Brazilian line, the North American and Italian line, the American and Mexican line, and the Havre line. For the Brazilian line the first vessel—a side-wheel steamer of 1,000 tons, named the Favorita—has been completed, and others are soon to follow. The North American and Italian line has been established under a special grant from the Italian Government, which guarantees 4 per cent. per annum upon a capital of 800,000*l*. This company endeavoured to purchase the Arago and Fulton, hitherto in the Havre trade, but have now resolved to build new vessels, and still hope to open the line during the summer. Their route is to be between New York and Genoa, touching at Cadiz and Madeira. For the American and Mexican Mail Steam Company the ships are nearly complete. They are to run between New York and Vera Cruz, and the first—the Manhattan, of 1,420 tons, is to commence on the 15th of the present month, to be followed by the Vera Cruz. With regard to the Havre trade, it appears that the New York Mail Steamship Company will despatch the steamer Guiding Star on the 24th inst., and will continue to build and add other vessels if the line shall receive support.

Subjoined are the statements of the banks of the State of New York, for the quarters ending December 31 and March 25:—

The following report of the money, share, and exchange markets is dated Calcutta, May 5:—We have no alteration to quote in the value of money, though the demand for it continues very easy, and imports of specie during April have been excessive, namely, upwards of 67 lakhs in silver and 45 in gold; of the latter 18 lakhs are entered as from Australia and nearly 16 lakhs from Ceylon; exports on the other hand have fallen off to less than 12 lakhs, including silver and gold. Government securities continued at about 4 annas under last quotations till about the 1st instant, when a further decline took place, and prices to-day are fully one rupee lower, say 8 to 8.4 for 5½ per Cents., with a very dull market. The share market continues exceedingly dull, and our quotations may for the most part be considered nominal. Exchange—The business done during the fortnight has not been large: at first the rate had an upward tendency, but latterly it has been falling. One of the leading banks has sold at 2.0¼, other banks are selling at 2.0⅜; credits are not inquired for.

Annexed are the returns of the Bank of Bengal for the weeks ending April 25 and May 2:—

Liabilities.	April 25.		May 2.

In reference to the state of the money market at Bombay, Messrs Clason and Co., writing on the 13th ult., observe:—The fortnight we have just passed will long remain in the memory of Bombay as a period of the greatest depression and distrust ever witnessed here. Considering the present state of our market, these are grave symptoms, and the addition of any disastrous unforeseen event would be enough to bring down a general crisis. Several meetings were held for the purpose of devising some expedient for the restoration of confidence, but, no plausible result having been arrived at, they have only tended to make matters worse. The principal cause of our present situation is the crazy speculation in shares which possessed Bombay during the past year. The settlement term for time bargains falls in the month of July. The banks continue to reduce their engagements, and are excessively severe in their choice; they refuse to buy documentary bills against cotton shipments, however small the advance demanded. Shares have been entirely unsaleable, and have experienced a heavy decline; during the last two days, however, a pretty sharp reaction took place, and if this improvement can be maintained, it would serve as a relief to some of the apprehensions for the future. According to telegraphic news from Bombay to June 4, the banks were advancing only 7*l* per bale on documentary bills against cotton shipments.

During the week ending the 7th inst., the value of the bullion imported was:—Gold, 478,250*l*; silver, 16,816*l*. The exports were:—Gold, 306,491*l*; silver, 78,212*l*.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,635,494	Securities	30,249,555
Public Deposits	7,954,181	Coin and Bullion	15,860,615
Private Deposits	13,357,083		
	42,946,758		46,150,170

Dated the 8th June 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,203,412*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An increase of Circulation of	£213,296
A decrease of Public Deposits of	752,667
A decrease of Other Deposits of	562,348
A decrease of Government Securities of	1,000,000
A decrease of Other Securities of	110,710
An increase of Bullion of	22,124
An increase of Rest of	13,133
A decrease of Reserve of	231,286

The return of the Bank of England is this week chiefly affected by the repayment of the loan of 1,000,000*l*, made some time ago by the Government on a deposit of Exchequer bonds. There is a consequent decrease of 1,000,000*l* in the Government securities held by the Bank. The amount of Government deposits has been reduced by 752,667*l*. The reserve only shows a decrease of 231,286*l*, notwithstanding the falling off of 562,348*l* in the private deposits. There is a slight decline in the amount of private securities, and the trifling increase of 22,124*l* in the stock of coin and bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	20,487,862	21,529,641	21,080,460	21,766,405	21,635,494

Price of Consols	91⅜	91¼ xd	92½	91¼ xd	90½ xd
Average price of wheat	77s 5d	54s 7d	45s 10d	38s 11d	41s 11d
Exchange on Paris (short)	25 10½	17⅛ 25 22½ 30	25 17⅛ 25	25 22½ 30	25 15 25
— Amsterdam ditto	11 17⅜	18⅛ 11 16 16½	11 16 16½	11 17⅛ 17⅜	11 17⅛ 17⅜
— Hamburg (3 months)	13 6½ 7	13 8⅝ 9½	13 7⅝ 8	13 8½ 9	13 9 9⅛

In the corresponding week of 1855, the English and French Governments had agreed to close the Vienna Conferences. The Cabinet of Vienna had openly declared its unwillingness to take an active part in the war, and Prussia had also proclaimed neutrality. A further rise had taken place in cotton owing to the deficiency in the crops.

In 1862, the Viceroy of Egypt had arrived on a visit to London. A few political disturbances had taken place in the north of Portugal. In America, M'Clellan's army was advancing on Richmond, The exports of bullion on account of recent loans were slightly trenching on the resources of the Bank of England.

In 1863, the elections to the French Legislative Assembly had been concluded. In London the money market was quiet. The Greek throne had been accepted by the Danish Prince William.

In 1864, the North Schleswigers had protested against the proposal of the London Conference to divide Schleswig. A despatch from the Grand Duke Michael had announced the termination of the Caucasian war. The Bill regulating political meetings had been passed by the Cortes at Madrid. In Algiers, the insurgents of the province of Oram had been defeated. News had been received from New Zealand of two severe engagements between the natives and English troops. A contract had been concluded between the International Financial Company of London and the Russian Government for the construction of the Moscow and Sebastopol Railway. In America, Grant had been repulsed in an attack on the Confederate lines, with a loss of 1,200 men. Johnstone was continuing his retreat to Atalanta, pursued by Sherman. The demand for discount was moderate.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 863,554*l*; in 1862, a deficiency of 7,108,079*l*; in 1863, a deficiency of 8,108,534*l*; and in 1864, a deficiency of 7,576,269*l*. In 1865, the deficiency is 6,355,447*l*.

Discount and Money Market.—The general demand for money is of a very moderate nature, and transactions are frequently at ⅛ or ¼ per cent. below the Bank rate. There are some indications that withdrawals for the provinces will operate at an earlier period than usual this year on the resources of the Bank. The influx of the precious metals from countries to which they had been suddenly carried in large amounts naturally follows, from the wants which have been stimulated by so much wealth;

Digitized by Google

and as many of the manufacturing trades of Europe had been checked by the simultaneous operations of causes connected with the American war, the increased activity now experienced acts in the same direction as the return of gold to our shores; and, when taken into account with the prospects of a plentiful harvest, seem to promise a period of almost unexampled monetary ease. To-day there has been little activity in the money market.

The following are the current terms for paper of various dates:—

30 to 60 days	3½ per cent.
3 months	3⅝ per cent.
4 months	3¾ per cent
6 months—Bank bills	4 per cent.
6 months—Trade ditto	4½ 5 per cent.

In the Stock Exchange, money has been in request during the greater part of the day, at from 3 to 3½ per cent.

The allowance for deposits at the discount houses and joint stock banks, is as follows:—

Joint Stock Banks	*2½ per cent.
Discount houses at call	2½ per cent.
Do. with seven days' notice	2¾ per cent.
Do. fourteen days	3 per cent.

* At the London and Westminster 1½ per cent. only on sums below 500*l*.

52,000*l* in gold have been sent into the Bank.

The following are the rates of discount current in the chief continental cities:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4¾ 5
Brussels	3	3
Madrid	8	...
Hamburg	...	2½
St Petersburg	5½	5½

The biddings for 300,000 Government bills on India took place at the Bank of England on Wednesday last. The proportions allotted were—to Calcutta 195,774*l*; to Madras, 2,500*l*; and to Bombay, 91,500*l*. The minimum prices were —1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. All tenders on Calcutta, Madras, and Bombay, at and above 1s 10¾d, will receive in full.

The Bank of New Zealand has announced that tenders for the second and final instalment of the 300,000*l* of the 500,000*l* Six per Cent. Otago Provincial Government Loan, redeemable in 1898, will be received up to Thursday next, the 15th instant.

The return issued by the Bank of France shows the following results compared with that published last week:—

	£
Increase.	
Cash	120,000
Bills discounted	152,000
Advances	32,000
Treasury balance	140,000
Current accounts	300,000
Decrease.	
Bank notes	570,000

English Government Funds.—The attention of speculators appears to be again directed to Government securities; the increasing abundance of money, which, in consequence of the long continuance of the high rates of interest, is now flowing into this country, rendering it probable that investments will before long be made in these stocks. At the corresponding period of last year the price of Consols was precisely that now quoted; but the Bank rate of discount was 6½ per cent. Considering that the harvest prospects of this year render the chances of an export bullion demand for the purchase of cereals very improbable, and that we have paid in advance for the raw produce coming to our shores from many parts of the globe, consignments of our manufactures in those directions will probably lead to a continued influx of the precious metals; the effect of the consequent addition to the wealth stored in this country can hardly remain long unfelt in the stock market. It is true that for a long time past the public have sold Government securities and embarked in speculations promising a higher dividend rate. Large part of the investments thus made have however been in shares of the financial and other companies, whose operations hardly seem to promise a continuance of their first success. In some cases there is a marked disposition to realise holdings of shares, and some proportion of the proceeds will likely enough, at the low prices now quoted, be carried to the 3 per Cents. and other Government stocks. The settlement of the monthly account, which took place to-day, has not shown any new features, but prices have been moderately steady, showing a slight reaction only after the advance of ½ per cent. which took place yesterday. Consols close 90⅜ to 90½ for July, and 90⅛ to 90¼ for money. New 3 per Cents. and Reduced, 89⅝ to 89¾. India 5 per Cents., 104 to 104¼.

The transactions in Exchequer bills are few, and the market is rather dull at par to 4s prem. India bonds are unaltered at 15s to 20s prem.

The principal feature in the foreign market has been the fluctuations in the Spanish Passives and Certificates, and the continued advance of Turkish Consolidés, which show a rise of exactly 1 per cent. on last Friday's quotation. Spanish Passive bonds have fallen ¾ per cent. during the day, and the Certificates ⅜. The scrip of the new Ottoman loan has improved to 1¼ to 0¾ discount, on the announcement of a settlement for the scrip. Subjoined are the prices of stocks dealt in to-day:—Brazilian 4½ per Cent., 1863, 81¼. 1 per Cent. Ecuador, new consolidated, 11¾. 7 per Cent. Egyptian, second issue, 96¾; 7 per Cent. ditto, 1864, 94 to 94¼. 5 per Cent. Italian, 1865, 75; ditto scrip, 67*l* 10s paid, 2½ to 2⅜ dis. 3 per Cent. Mexican, 24¾ to 25. 6 per Cent, Montevidean, European, 64½. 4½ per Cent. Peruvian, 1862, 79⅞. 3 per Cent. Portuguese, 1853, 49¼. 5 per Cent. Russian, 1862, 91¼ to 91½. Spanish Passive, 30⅝ to 30¾; ditto Certificates, 15¼ to 15⅜. 6 per Cent. Turkish, 1858, 73; ditto, 1862, 74. 3 per Cent. Venezuela, 17⅞.

The price of French 3 per Cent, rentes, telegraphed this evening from Paris, is 67·45 for money and for July account.

The committee of the Stock Exchange have appointed Monday next, the 12th inst., a special settling day in the scrip of the Imperial Ottoman 5 per Cent. loan, to be marked as scrip and fully paid up.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

Railways and Other Shares.—The news received of the serious accidents on the Great Western line has occasioned a decline of near 2 per cent. in the stock of the Company. A reaction is also to be noted to-day in the value of many of the other railway stocks, notwithstanding which a few prices show an improvement over those quoted last week. Caledonian is 1 per cent. higher. Great Northern stocks are lower; the ordinary showing a decline of 2 per cent. and the "A" stock of ½ per cent. Lancashire and Yorkshire is ½ per cent. lower. Blackwall, 1 per cent. higher. London, Chatham, and Dover, 1 per cent. higher. London and South-Western, ½ per cent. higher; and Metropolitan also shows an advance of ½ per cent. South-Eastern stock has declined ½ per cent.

In banking shares, although businses has been on a small scale, the continued decline of Alliance Bank shares is to be noted. In some of the new banks the market is dull, sellers being numerous.

Digitized by Google

American stocks and railway shares have exhibited a firmer tendency within the last few days. United States bonds 5-20 show an advance of 1¼ per cent. on last week's quotations, closing to-day at 67 to 67¼. Erie shares left off at 90 to 90½, and Illinois Central at 76 to 76½.

In the miscellaneous market, financial shares have attracted most attention, and there has been a steady rise in prices. Credit Foncier and Mobilier show an advance of 12s 6d per share; International Financial 7s 6d; and General Credit 5s per share.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—There were few bills offering and rates were consequently firm, but with little business doing.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The Parana has brought 10,360*l* from the Brazils, and with this exception all our other arrivals are from America, from whence we have several large amounts;—The Etna has brought 196,500*l*, the Erin has brought 57,000*l*, the Asia has brought 52,000*l*, the City of Boston has brought 151,000*l*, the Saxonia has brought 105,000*l*, the Virginian has brought 72,800*l*, all from New York; making a total of 634,300*l*, and further important shipments are expected from the States during the next few days. The total purchased by the Bank during the week has been only 96,000*l*, and this has been nearly balanced by the sovereigns withdrawn for Portugal, amounting to 75,000*l*. It is more than probable, however, that some large amounts will be sent into the Bank within the next day or two.

Silver.—The fine bars ex Shannon have been sold at 60⅝d per oz standard for Holland, showing no alteration from the price obtained for the silver by the previous packet. Our market is very quiet, and there are not any inquiries for the East.

Mexican Dollars.—The dollars ex Shannon, in consequence of the large amount offering, have been sold at a reduction of ¼d per oz, viz:—59½d per oz. Our market is very quiet, and for the moment but little business doing. The Ellora has taken 10,820*l* to China.

Exchange on India for drafts by the banks may called 1s 10¼d to 1s 10⅜d 60 days' sight. The Council drafts sold yesterday were taken at 1s 10⅜d and upwards.

India Government loan notes remain at last week's prices, and may be quoted 107 to 109 for 5½ per Cents., 100 to 102 for 5 per Cents., and 88 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 75s to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 0⅞d per oz std, last price; ditto, containing 5 grs gold, 5s 0⅞d per oz std; Mexican dollars, 4s 11⅛d per oz, last price and nearest; 5-franc pieces, 4s 11⅛d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension of Messrs Maltass, Pittaco, and Constantinidi, of Smyrna, is announced by the *Levant Herald*.

PUBLIC COMPANIES.—At the general meeting of the Guardian Fire and Life Assurance Society, held on Wednesday, the balance of profit at Christmas last was stated at nearly 101,000*l*. The usual dividend of 5 per cent., free of income tax, was declared.

The directors of the Ceylon Company (Limited) have issued their report to be presented at the meeting on the 13th instant. The net profit is stated at 36,275*l* 11s 8d. It is proposed to pay a dividend and bonus equal to 20 per cent. per per annum, free of income tax; to transfer 5,000*l* to the reserve fund, and carry forward the balance of 3,905*l* 11s 8d to new account.

The report of the Ebbw Vale Company has been issued. The statement of account shows a gross profit of 142,616*l*. A dividend of 10½ per cent. per annum is recommended, which, after writing off all preliminary expenses, and placing 24,000*l* to the reserve fund, will leave a balance of 18,369*l* 3s 4d to be carried forward to next account.

At the meeting of the Bank of British North America held on Tuesday last, a dividend at the rate of 6 per cent. per annum was declared, together with a bonus of 10s per share, both free of income tax.

At the meeting of the New Zealand Banking Corporation, held on Tuesday, a dividend was declared at the rate of 10 per cent. per annum for the past six months.

The directors of the National Provincial Bank of England have announced a half-yearly dividend, at the rate of 8 per cent. per annum, and a half-yearly bonus of 11 per cent., as payable on the 10th July.

Ford's Eureka Shirt Company (Limited)—capital 50,000*l*, in 10,000 shares of 5*l* each, first issue 10,000 shares—is formed to carry on the business of Mr Ford, the present manufacturer of the Eureka shirt, which has for fifteen years been well known to the public. A minimum dividend of 10 per cent. will be guaranted to the satisfaction of the directors for three years, payable half-yearly.

The Blakely Ordnance Company (Limited)—capital 750,000*l*, in 30,000 shares of 25*l* each—is formed to carry on the manufacture of the celebrated Blakely Ordnance, for which private enterprise is at present insufficient. A dividend of 15 per cent. per annum will be guaranteed, and the late profits have, it is stated, been of a still larger magnitude. The use of this kind of ordnance is constantly extending in foreign countries, both in Europe and out of it.

The report of the directors of the Assam Tea Company states that the general prospects of the workings of the Company continue to be of a satisfactory and cheering character. The net profit for the 12 months ended 30 Sept., 1863, amount to 44,512*l*, being as nearly as possible equal to 25 per cent. on the paid-up capital, which is the amount of dividend to be declared (5*l* per share), but of which 8 per cent. was paid in December last as an interim dividend.

MISCELLANEOUS.—The Atlantic and Great Western Railway Company have notified that the coupons of the New York division first mortgage bonds, Pennsylvania division second mortgage bonds, and Ohio division second mortgage bonds, will be paid on the 1st July at the rate of 4s to the dollar at the Consolidated Bank.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

The course of exchange at New York on London for bills at 60 days' sight, is about 110 per cent. in gold. At this rate there is a small profit on the importation of gold from the United States.

The Commercial Times.

LETTERS FOR THE IONIAN ISLANDS.—Information has been received from the Italian Post Office that owing to their packets on the line to Corfu now departing from the port of Brindisi, instead of from Ancona, the correspondence for the Ionian Islands, via Italy, may be despatched from this country twenty-four hours later than heretofore. Letters, &c., will, therefore, in the ordinary course of post, be in time if they are posted in or reach London not later than Thursday morning in each week. In addition to the service once a week maintained between Italy and Corfu by Italian mail packets, a second weekly communication is also provided by means of the Austrian Lloyd's packets sailing from Brindisi every Friday. Letters—*but letters only*, as newspapers and books cannot be forwarded by this line of packets—intended to be sent by the Austrian packets, will be in time if they are posted in or reach London not later than Tuesday morning in each week.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended June 3, 1865:—

	Quantities So'd. qrs bush	Average Price. s d
Wheat	70,443 2	41 11
Barley	2,873 3	29 1
Oats	2,932 2	22 8

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The trade for wheat—both English and foreign—at Mark lane, to-day, was in a most inactive state. The fineness of the weather, and the favourable accounts at hand respecting the crops, induced millers to operate very cautiously, and, in some instances, prices were rather lower than on Monday. Barley and oats moved off slowly, at late rates, but the trade for beans and peas—owing to the limited supply on the stands—was firm. Flour was in moderate request, at previous quotations. This week's imports amount to 23,810 quarters of wheat; 710 barley; 24,020 oats; and 90 sacks of flour.

Both at Liverpool and Wakefield, this morning, the corn trade generally ruled inactive. Prices were without material change; but their tendency was decidedly in favour of buyers.

Influenced by the news, per Asia, of the rumoured discovery of large quantities of cotton in the States, and also that cotton in New York had fallen 10 per cent., the Liverpool cotton market opened with a quieter feeling this week, but the later American advices showing that at New York no further decline had taken place, the market rapidly recovered its tone, and since Tuesday a good business has been done, both the trade and exporters buying freely. To-day the maket is very firm, and closes with an upward tendency in prices.

Digitized by Google

Owing to the scarcity of good cotton, a slight advance took place in the value of selected produce at Bombay during the fortnight ending May 13. Medium and inferior qualities commanded but little attention, and the total amount of business transacted was small. Dhollerah sold at from 250 to 265 rupees, and sawginned Dharwar at 270 to 285 rupees per candy. The annexed tables, showing the prices current at latest postal date, as well as the exports from January 1 to May 12, are from Messrs Nicol and Co.'s circular. It will be observed that the quotation for Dhollerah is 270 rupees per candy, being 5 rupees higher than the price quoted above; this arises from the fact that the value given is that at which that description of produce was held immediately previous to the departure of the mail, and must, in consequence, be considered nominal:—

CURRENT PRICES of COTTON at BOMBAY, May 13.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0½d. Freight 1l 10s. per lb

A telegram from Bombay, dated June 4, states that Dhollerah cotton was quoted at 8¾d to 9d; Broach, 7½d and Oomrawattee, 7¼d per lb. Freights were dull, at 17s 6d to 30s per ton.

The cotton trade at Calcutta, for the fortnight ending May 5, ruled heavy, on easier terms. The exports, from Dec. 1 to March 31, had been 219,858 maunds; against 304,826 maunds in 1863-4; and 228,508 maunds in 1862-3.

Advices from Alexandria are to May 30. At that date, the cotton trade was firm, at rising prices. Fair open-ginned was quoted at 14¼d; fully fair ditto, 14½d; good fair ditto, 15¾d per lb, free on board. The demand for produce, however, was by no means active. According to the Egyptian Commercial and Trading Company's circular, the arrivals of cotton, from May 13 to May 17, were 8,358, and the sales, 16,837 bales.

Trade in Manchester goods at Bombay during the month ending April 13 was in a greatly unsettled state, in consequence of the prevailing derangement of the money and share markets. The business transacted was very limited, and at reduced rates, both as regards yarn and cloth. The following prices of grey shirtings are from Messrs Rennie, Scovell, and Co.'s circular:—

No	Inches.		lbs	oz	s	d
13	39	14 by 11	6	0	6	9½
18½	39	14 14	7	0	10	2
24	39	16 15	8	0	11	11
27	38	16 16	8	8	12	6½
32	39	19 19	9	9	12	11½
41	45	14 10½	7	0	9	9½
45	44	14 12½	8	0	11	6
49	44 to 45	16 16	9	8	13	2
57	50	16 17	10	6	14	11

The following were the rates of freight for cotton at some of the leading ports at which that staple is exported, at latest postal dates:—

	London. £ s d		£ s d	Liverpool. £ s d		£ s d
Bombay	1 15 0	to	2 0 0	1 0 0	to	1 12 6
Calcutta	nominal.			2 5 0		2 10 0
Alexandria	0 0 0		0 0 0	0 0 0¾		0 0 0
New York	0 0 0		0 0 0	0 0 0¼		0 0 0

Trade in the Mincing lane markets during the present week has been decidedly quiet. As a rule, buyers have operated merely to supply their immediate wants; nevertheless, prices, on the whole, have ruled firm. The quotations of tea, sugar, coffee, cocoa and rice current to-day, exhibit scarcely any change from those ruling on Friday last. Coffee has commanded most attention, and Ceylon qualities have changed hands at rather higher prices.

The duty paid on tea here last week was on 6,501,144 lbs, whilst the export for the week, ending June 1, was 238,142 lbs. The stock in London, on the 1st inst., was 106,899,406 lbs, against 99,174,935 lbs—in the United Kingdom, 114,000,000 lbs, against 110,000,000 lbs last year. From China, we learn that the export to Great Britain, from June 1 to May 10, had amounted to 115,125,000 lbs.

We extract the following table from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the Principal European Ports, for the Four Months ending April 30, 1864 and 1865.

In reference to the leather trade, last month, Messrs Powell and Co. write as follows:—The leather trade of the past month has reached about an average amount, with very slight variations in prices. The supply has been good, and of some articles greater than the demand, more particularly of sole leather of intermediate substance, which scarcely supports late quotations. Raw goods have met a fair inquiry, but with the large supplies of Australian hides, previous quotations of that article have been fully maintained, and rates of other salted goods are to some degree depressed by them. The imports have been moderate, and the stocks show very unimportant changes.

The following table, showing the stocks of timber in the public docks on the 1st inst., is from Messrs Churchill and Sims' circular:—

STOCK of WOOD at the PUBLIC DOCKS on 1st June.

In metals, the leading feature is an advance in spelter to 22*l* per ton, on the spot. Oils and tallow have ruled firm. American refined petroleum is now worth 2s 5d per gallon.

The market for cotton goods at New York during the week ending May 27 was decidedly quiet. The raw material—owing to the probability of increasing supplies from the Southern States—had somewhat declined in value; but the removal of all restrictions to trade, as far as the States East of the Mississippi were concerned, by President Johnson, and the consequent anticipated improvement in the demand for goods at Southern ports and cities, had given firmness to the prices of the manufactured article, and, in most instances, the rates current in the previous week had been maintained. The scarcity and high price of labour had also enabled manufacturers and holders to demand full quotations for all descriptions of manufactured goods. The supply of foreign cotton, woollen and silk goods on sale was limited, and business was done in them at very full prices. Silk goods were especially in request, at high rates. As regards imported grocery produce, the transactions were, for the most part, of a hand to mouth character, tea, sugar, coffee, and most other articles being in limited consumptive request at about previous quotations. Financially, the leading feature was a somewhat excited market for gold: in the early part of the week the quotation advanced from 130½ to 138⅓; but it subsequently declined to 136 per cent., which was the closing price.

The stock of bullion in the banks, on the 20th ult., was 4,638,280*l*, against 4,418,400*l* at the same period last year; 7,708,980*l* in 1863; and 6,014,600*l* in 1862; whilst the balance in the Sub-Treasury was 9,144,820*l*. The shipments of specie for the week ending May 20 were large, viz., 592,860*l*, making a total since January 1 of about 1,931,620*l*, against 4,340,200*l* last year; 3,705,890*l* in 1863; 3,257,850*l* in 1862; 560,950*l* in 1861; and 2,262,970*l* in 1860. The imports of dry goods for the same week were valued at 130,040*l*, against 204,020*l* last year; and 103,980*l* in 1863—of general merchandise, 570,930*l*, against 913,760*l* last year; and 430,270*l* in 1863. The total imports of dry goods and merchandise, from Jan. 1 to May 20, were valued at 11,650,000*l*, against 19,816,540*l* in 1864. and 14,594,840*l* in 1863. The shipments of petroleum from all ports in the United States from Jan. 1 to May 20 were 3,961,925 gallons, against 8,288,059 gallons last year; and 15,169,383 gallons in 1863. On the 31st ult., the quotation for gold was 136¾ per cent.

The shipments of specie from San Francisco from Jan. 1 to April 30 were 3,050,950*l*, against 4,378,650*l* during the same period last year, being a decrease of 1,327,700*l*.

THE COTTON TRADE.

LIVERPOOL—JUNE 9.

The cotton market was dull on Saturday upon advices, per Asia, of lower prices in New York, and most descriptions declined; the sales on Monday and Tuesday were limited, but on Wednesday the demand revived, and a large business has since been done, the market closing firmly yesterday afternoon, with last week's quotations fully recovered, and a further advance in several descriptions. Sea Island has been in good request, at full prices. American continues in active demand, and after a depression of about ¼d per lb on Saturday, closed yesterday ¼d to ½d above the quotations of last week. Brazil was depressed in the early part of the week, and an abatement of ¼d to ½d per lb was submitted to, but has since been much sought after, and closed ¼d over last week's quotations. In Egyptian the transactions have been very extensive, and after a decline of about ¾d per lb, the extreme point of last week's quotations has been fully recovered. Smyrna has been in fair request throughout the week, and closed at an advance of about ½d per lb. The market has been well supplied with East India, and prices at one time declined ½d per lb, but are now steady, at about last week's quotations. China and Japan, in consequence of their relative cheapnness, have attracted a good deal of attention, resulting in some speculative purchases, and prices are from ¼d to ½d per lb dearer, but the short stapled kinds continue neglected.

The transactions, to arrive, have been numerous during the last few days, and the last quotations were:—On Wednesday, in Pernam, first quality, May sailing 15½d; Maceio, fair average-shipping or shipped 14½; ship named 15—China, at sea, guaranteed fair 8¼—and yesterday, Egyptian, middling fair, not sailed 15d; fair open at sea 16d and 16¼d, light canvas 16d; Dhollerah, fair merchants', at sea 11½d; Oomrawuttee, fair new merchants', May sailing, 11¼d; Bengal, fair at sea, 6½d.

The sales of the week amount to 80,760 bales, including 14,730 an speculation, and 27,370 declared far export, leaving 38,660 bales to the trade. Sales to-day about 15,000 bales.

NEW YORK—MAY 27.

In the early part of the week, the cotton trade ruled firm, at 54c for middling Upland produce. The market, however, has since been in a most inactive state, at reduced quotations, the value of middling Upland produce being 49c per lb. 11,000 bales of cotton from Savannah, of which 3,000 bales are Sea Island produce, will be offered for sale on the 6th of June. The arrivals during the week have amounted to 9,572 bales, of which 2,140 bales are from New Orleans; 1,450 Mobile; 2,160 Charleston; 1,885 by rail; the remainder from sundry ports in the Southern States. This additional quantity raises the supply received since Sept. 1, 1864, to 212,367 bales. The following are the prices current:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.

NEW YORK, May 31.—The cotton trade is dull at 48 cents for middling Upland.

MARKETS IN THE MANUFACTURING DISTRICTS

Owing chiefly to the holidays, the transactions in goods, this week, in nearly the whole of the leading markets, have been very moderate. Prices, however, have been well supported. The iron trade has been far from active. Coals have sold freely for the time of year.

MANCHESTER, June 8.—This being the Manchester annual holiday week, very little business has been attempted. At the end of last week prices rose considerably for yarn, and buyers found great difficulty in meeting with their requirements. On Tuesday of this week, a few spinners were disposed to accept slightly easier rates, especially for common and inferior spinnings, but the majority remained firm at the prices of last week. Doubled and long-stapled yarns maintain very full rates, and are largely bought in advance. In cloths, India goods continue neglected; in all other respects, save the intervention of the holidays, there is no difference to record from last week.

BRADFORD.—Wool:—Our staplers are compelled to advance their quotations; but the advance is resisted by the buyer, and is one chief cause of greatly diminished transactions. Good Lincoln hogs will fetch about 2s 3d and wethers about 2s 1½d per lb. The export buyers are operating to a considerable extent in yarns. A good deal of the business done is wholly speculative. A good business is also done in piece goods. Prices are advancing.

LEEDS.—The great mass of the working classes are well employed at good wages, the rate of provisions, except those of animal food, are low, and harvest prospects are good.

ROCHDALE.—The market has had very much of a holiday appearance, but the tone of trade generally is undoubtedly improved.

LEICESTER.—There has been about an average amount of business doing in the lace trade, the annual holidays having interrupted the regular business of the season. The workpeople continue well employed.

NOTTINGHAM.—Silk mechlins are still selling tolerably well. Black laces for trimmings are also in fair request. The cotton lace branch continues dull.

CARDIFF.—Complaints are still made that orders are coming in slowly for steam coal, and some of the principal merchants declare that such continued dulness has not been experienced for several years.

SHEFFIELD.—Some of the principal American houses are busy preparing consignments of cutlery and other goods. The revival has not yet extended to steel, the orders for which are still very small.

WOLVERHAMPTON.—The check in the demand for iron for the East Indies is partially compensated by a better demand for the continent, especially for Germany and Prussia, the orders being sent so as to secure the advantage of the new tariff under the commercial treaty with the Zollverein.

BIRMINGHAM.—There has been scarcely any perceptible change in the state of trade here for several weeks; reports of quietude are general, the orders on account of the home trade being moderate, the country shopkeepers evincing a strong disinclination to buy more goods than is just sufficient to meet the current demand for hardwares.

NEWCASTLE-ON-TYNE.—Trade has recovered from the slight slackness it exhibited a few weeks ago, and it is now steady and progressive in all its branches. The coal trade continues active. The shipment of chemicals has been very large, and prices are as follows;—Best alkali, 2¾d; second, 2d; crystals of soda, 4*l* 5s; bleaching powder, 9*l* 10s; bicarbonate of soda, 11*l* per ton; caustic soda, 3½d. The iron trade in the Cleveland district is stronger.

GLASGOW.—Iron—G. m. b., No. 1, 54s 6d; No. 3, 53s 9d; Gartsherrie, No. 1, 58s 6d; No. 3, 54s; Eglinton, No. 1, 53s; No. 3, 51s 6d; No. 1 Coltness, 59s 6d; Calder, 56s; Glengarnock, 55s; Forth, 54s 6d; Kinniel, 54s 6d.

DUNDEE.—Our flax market has been very firm, but the business done has been of limited extent. The tendency of prices has been upwards. In jute there is no change to notice; fine quality is scarce and firmly held, while the demand for medium and lower sorts is still weak, and prices barely maintained. There has been a good demand for some of the finer fabrics of linens.

BELFAST.—Business in linens continues to improve, and our town houses and manufacturers are fully employed. Prices continue very firm. Several American and home-trade buyers are in the market. Much activity has prevailed in the yarn market, and prices of both line and tow yarns continue to advance.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, May 27.—The arrivals have continued good, and most descriptions of flour have been freely dealt in, on higher terms. The wheat trade, however, has ruled heavy, and the quotations have given way. In corn, a fair business has been transacted, at slightly enhanced rates. The export movement, noticed in our last, has been checked by less favourable intelligence from England. The following are the prices current:—Flour—State, superfine brands, $6.10 to $6.50; State, extra brands, $6.80 to $7.; State, choice brands, $7.5 to $7.15; Ohio, common brands, $7.25 to $7.40; Ohio, fancy brands, $7.45 to $7.50; Ohio, good and choice extra brands, $7.55 to $9; Michigan, Indiana, Wisconsin, &c., $6.20 to $7.25; Genesee, extra brands, $7.25 to $9.50; Missouri, $8.75 to $11.75; Canada, common, $6.85 to $7.15; Canada, good to choice extra, $7.20 to $9 per barrel. Wheat—No. 1 Chicago spring, $1.52; winter red Western, $1.68. Corn—Western mixed, New, 82c to 85c; Western yellow, 92c per bushel.

EXPORTS of GRAIN, &c., from NEW YORK from May 1 to May 23.

NEW YORK, May 31.—The flour trade is dull; but for wheat and corn there is a fair demand, and prices have somewhat improved.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that the arrivals of English wheat, coastwise and by land-carriage, have been on a very moderate scale, the demand for all kinds has ruled inactive, at previous quotations, at which, however, fair clearances of the stands have been effected. The imports of foreign wheat have been moderate. Fine dry samples have moved off slowly, but at full currencies. Inferior kinds have ruled heavy, on former terms. The quantities of barley, both English and foreign, brought forward have not increased; yet the trade has ruled inactive, at about stationary prices. Malt has come steadily to hand, and sales have progressed slowly, at late rates. Good sound oats have maintained their previous value, but damp parcels have been very dull. The few beans and peas on show have moved off heavily, but at full quotations.

The accounts from all parts of the country in reference to the appearance of the growing crops, are very favourable. In some of our forward counties, wheat is in full ear—in some in bloom. Barley, oats, beans, and peas are looking remarkably well, and an early harvest is generally anticipated.

The country markets have been inactive for nearly all kinds of produce. In prices, however, very little change has taken place.

Throughout the Continent, the fluctuations in the value of produce have been very moderate. The demand on English account has not improved. Advices from New York bring steady currencies for both wheat and flour.

In Scotland, wheat has commanded full prices, with a moderate inquiry. All spring corn has ruled inactive on former terms.

The Irish market has been scantily supplied with produce, and the trade, generally, has been somewhat heavy at about stationary prices.

Although the supply of English wheat on sale at Mark lane today was small, the trade, owing to the fineness of the weather, was in a sluggish state, at barely Monday's prices. Foreign wheat changed hands to a limited extent at previous quotations. Barley was in limited supply, but slow request, at late rates. The oat trade, on the whole, ruled steady at full prices. For beans and peas, the trade was firm, at quite previous quotations. Flour moved off steadily at former prices.

Mr George Dornbusch reports the arrival off coast of 37 cargoes of grain, principally wheat. The business doing in cargoes afloat and to arrive has been only moderate. In prices, however, the fluctuations have been trfling. Cotton-seed, arrived, has produced 6*l* 16s per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—The market continues without animation. Several floating cargoes of foreign have sold upon rather lower terms. West India and most other descriptions are unchanged. Sales of the former in two days 2,000 casks. Tuesday being a holiday as usual at Whitsuntide, no public sales were held, and the quantity since offered has been small. Barbadoes by auction sold at 29s to 35s 6d; crystallised Demerara, 36s 6d to 38s per cwt. The stock has been rather increased by recent landings. At the chief ports of Great Britain it amounted to 159,000 tons on the 1st inst., against 128,500 tons in 1864.

Mauritius.—There have not been any public sales.

Bengal.—1,400 bags low brown have sold at 24s 6d per cwt.

Madras.—670 bags yellow and brown native sold by auction at 25s 6d to 28s. Privately, 2,300 bags low brown date at 23s 6d to 24s per cwt.

Guatemala.—1,183 bags were chiefly taken in at full prices, since sold at 25s to 28s per cwt.

Manilla.—No further sales are reported in clayed. 5,000 bags unclayed have sold at 26s 6d per cwt.

Other Foreign.—Three floating cargoes of Havana have sold for the United Kingdom: No. 12 to 13 at 25s to 25s 6d; No. 10 at 23s 6d. Two of Cuba muscovado at 21s 9d to 22s. 457 casks Porto Rico, offered by auction, partly sold at 30s 6d to 36s per cwt.

Refined.—The market is unaltered, and rather quiet to-day.

MOLASSES.—40 puns Antigua have sold at 16s 6d per cwt.

RUM.—A steady demand prevails for common kinds at previous rates, including Demerara at 1s 7d per proof gallon.

COCOA.—712 bags Trinidad partly sold at previous rates: low quality, 63s; middling to fine, 70s to 99s. 156 bags other West India: superior Grenada, 65s; St Lucia, 42s 6d to 52s per cwt.

COFFEE.—A firm tone prevails and the market is very steady; plantation sorts of Ceylon being rather dearer. 736 casks 689 barrels and bags by auction finding buyers: small berry to middling, 79s to 87s. 422 casks 5,700 barrels and bags native chiefly sold: ordinary to good 65s 6d to 68s 6d; very fine up to 74s 6d. 51 packages Mocha, at 91s to 91s 6d. 830 bags Costa Rico partly sold at 77s to 80s 6d. A large cargo of the new crop has arrived. 80 packages West India were disposed of, chiefly Berbice, at 68s 6d to 70s 6d per cwt. 1,130 bags Guatemala part sold, at 77s to 87s 6d. Some business is reported in floating carges of Rio, of which particulars do not transpire.

TEA.—The market has been dull by private contract. At the public sales on Tuesday and Wednesday 26,222 packages were submitted, and 10,962 packages sold, including 9,018 packages offered without reserve. Common to fair black leaf congou sold at 1s to 1s 2¾d; common dusty broken leaf congou, at 8¼d to 8½d per lb. Fine to finest congou obtained extreme rates. Green teas were steady.

RICE.—The market has been exceedingly quiet, with transactions on a limited scale, including a few parcel of soft grain at 9s 6d to 10s 3d per cwt.

SAGO FLOUR.—2,743 bags were chiefly taken in, a portion selling at 14s 6d per cwt.

Digitized by Google

SPICES.—Black pepper is again rather lower, and the market dull. Penang has sold privately at 2⅞d cash. 817 bags Singapore offered by auction sold at 3¾d for good. Small sales of Singapore white are reported at 5⅜d to 5½d. 29 cases of Penang cloves were chiefly taken in at 1s 2d to 1s 4d. 48 bags Zanzibar cloves sold at 3⅛d to 3⅜d. 728 packages pimento partly sold at 2⅜d to 2½d, one lot 2⅝d. There are not further sellers upon those terms privately. Nutmegs sold at about previous rates to the extent of 166 cases: small to middling brown, 9d to 1s 6d; good to fine, 1s 8d to 3s 6d. 23 cases mace sold readily at 1s 6d to 2s 6d per lb. 208 barrels Jamaica by auction sold at 57s to 90s. 119 boxes Cochin partly sold at 63s to 64s. 1,470 bags rough Bengal at 23s to 24s, were 1s cheaper. Cassia lignea is dull, and 1,287 boxes offered by auction only part sold at 2s to 3s decline: low to fair quality, 78s to 81s per cwt.

SALTPETRE.—About 1,500 bags Bengal have changed hands by private contract at the recent decline: refraction 5¼ to 3, 26s to 26s 6d per cwt, chiefly short prompts.

COCHINEAL.—The public sales have comprised 690 bags, of which less than one-third part sold flatly, although without any quotable change in prices.

OTHER DRYSALTERY GOODS are generally quiet. Gambier dull at 22s to 23s on the spot. A parcel of Cutch has sold to arrive at 23s 6d per cwt.

BARK, &c.—Current prices: English, per load of 45 cwt delivered, in London, 16*l* 10s to 17*l* 15s; ditto Coppice, 16*l* 10s to 18*l*; Dutch, 5*l* to 6*l*; Hamburg, 5*l* to 6*l*; Antwerp Tree, 6*l* 10s to 7*l* 10s; ditto Coppice, 7*l* to 8*l*; French, 0*l* to 0*l* 0s; Mimosa, chopped, 10*l* to 12*l* 0*l*; ditto, ground, 12*l* to 13*l* 10s; ditto, long, 8*l* to 10*l*; Cork Tree, Barbary, 6*l* to 6*l* 10s; ditto, Sardinian, 8*l* 10s to 9*l* 10s; Valonia, Smyrna, 17*l* to 20*l* 0s; ditto, Camata, 17*l* to 20*l* 0s; ditto, Morea, 13*l* 0s to 17*l* 10s; Divi Divi, 10*l* to 13*l* 10s; Myrabolans, 12*l* to 14*l* 10s per ton; Sumach, Sicily, 16s to 17s 6d per cwt; Terra Japonica, Gambier, in bales, 22*l* to 22*l* 10s; ditto, free cubes, 27*l* to 28*l*; ditto, Cutch, 24*l* 0s to 25*l* 10s per ton.

METALS.—The markets generally are without much animation, yet quotations differ little with those on Friday last. Spelter has been in better demand at 21*l* 15s to 22*l* per ton. There is less pressure to sell foreign tin. Straits quoted 91*l* per ton. Other metals remain quiet. Scotch pig iron steady. The last sale of mixed numbers was at 54s 3d per ton.

HEMP.—Several parcels of Manilla have sold. Roping at 29*l* 10s; Sorsogon at 30*l* to 31*l* per ton.

JUTE.—A few contracts have been made for arrival at full rates.

LINSEED.—The market is still very firm. Calcutta, 54s 9d to 55s; Bombay, 57s. The latter has sold to arrive at 57s 6d to 58s 6d per qr.

OIL.—Quotations of olive on the spot are almost nominal. A cargo of sperm is in demand at 90*l* per tun, holders requiring 2*l* to 3*l* more. Seville, off the coast, has sold at 48*l* per tun, c. f. and i. to Cronstadt. Cocoa-nut continues active, the market being much in speculators' hands. Cochin, 44*l* 10s; Ceylon, 43*l*. Palm also is animated: fine quoted at 36*l* 10s to 37*l*. Linseed firm and steady at 33s on the spot: 34s per cwt, for delivery, in the last four months of the year. Rape steady. Foreign refined, 45*l*; brown, 42*l* per tun.

TALLOW.—The market has been steady. 1st sort Petersburg Y.C., 40s 6d to 40s 9d: for delivery in the last three months, 42s to 42s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, June 5, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The public sales to-day were restricted to West India, of which 1,101 casks 542 barrels and bags sold at previous rates. The week's transactions reach 3,607 casks. A cargo of Havana, No. 14, 26s 9d for the Baltic: one Havana, 20s 6d, molasses sugar for Liverpool; one of Cuba, 21s 6d per cwt, for the United Kingdom.

COFFEE.—163 casks 293 barrels and bags plantation Ceylon, offered by auction, sold at fully previous quotations; also 1,737 bags native. 731 bales and half-bales Mocha found buyers: small berry, 91s to 102s; long berry, 91s 6d to 92s per cwt.

COCOA.—1,419 bags Guayaquil were taken in at 76s to 84s. 69 bags Grenada sold at 66s to 72s per cwt for good.

SPICES.—103 barrels Jamaica ginger sold by auction at previous quotations. 357 bags Malabar pepper, at 4d for half heavy. 350 bags pimento realised 2⅝d per lb.

TALLOW.—At auction, 308 casks Australian sold at 38s 6d to 41s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been dull this week, and, in some instances, 6d lower. Dutch crushed for forward delivery at rather lower rates.

GREEN FRUIT.—Market good for oranges, which are cleared off as they arrive. Some parcels Valencia, Lisbon, and Sicily, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. An improvement in the price of lemons. The clearances of Barcelona nuts continue good, moderate prices being in favour of consumption. Para in request, stock being limited.

DRY FRUIT.—Currants continue to droop, and sales are made with difficulty. The trade is thoroughly inactive. Raisins are in very limited demand, but prices are maintained.

ENGLISH WOOL.—More demand, at slightly improved prices

COLONIAL WOOL.—The sales progress firmly for long staple wool, Faulty wool is without change.

FLAX.—Market firm, and stocks very small.

HEMP.—Market steady, holders demanding full prices.

TOBACCO.—The trade generally is very quiet, prices for all growths are without alteration.

METALS.—There is the same absence of all speculation, but no change for the worse. Copper is in very small inquiry and prices rather easier. Iron maintains a very firm position. Tin is neglected. Spelter has somewhat improved, and prices are firmer. Lead is neglected. Tin plates keep steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	3
Melted stuff	31	0
Rough ditto	17	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, June 5.—The total imports of foreign stock into London last week, amounted to 15,911 head. In the corresponding week in 1864 we received 8,708; in 1863, 5,778; in 1862, 5,323; in 1861, 7,849; in 1860, 10,231; and in 1859, 3,111 head.

There was a large supply of foreign stock on offer here to-day, in, for the most part, fair condition. Sales progressed slowly, at about previous quotations. The arrivals of beasts fresh up from our own grazing districts were only moderate for the time of year; but the quality of most breeds exhibited an improvement compared with Monday last. The beef trade was inactive, and the currencies had a drooping tendency. The best Scots and crosses sold at 4s 10d to 5s per 8 lbs. A few good grass-fed beasts were on sale from Lincolnshire in good condition. The arrivals from Scotland were very prime. Including the foreign arrivals, the show of sheep was moderately good, and of fair average quality. All breeds met a slow inquiry, at about stationary prices. The top figure for Downs and half-breds was 6s 2d per 8 lbs. The supply of lambs was rather limited. The trade was therefore, steady, at full quotations, viz., from 6s 4d to 7s 8d per 8 lbs. Calves were in moderate supply and fair request, at late rates. The highest quotation was 5s 2d per 8 lbs. Prime small pigs were rather dearer. Otherwise, the pork trade was steady, at full quotations.

SUPPLIES.

	June 6, 1864.	June 5, 1865.
Beasts	6030	4610
Sheep and lambs	32450	25730
Calves	392	350
Pigs	560	370

THURSDAY, June 8.—The supply of beasts in to-day's market was tolerably good, and all breeds moved off slowly, at prices barely equal to Monday. The best Scots and crosses sold at 4s 10d to 5s per 8 lbs. With sheep, we were fairly supplied. Good and prime Downs and half-breeds were in steady request at full quotations—viz., from 6s to 6s 2d per 8 lbs. Otherwise the mutton trade was inactive, at late rates. We have to report a good demand for lambs at extreme currencies. The quotations ranged from 6s 4d to 8s per 8 lbs. Calves were in good supply and steady request at 2d per 8 lbs more money. The top figure was 5s 4d per 8 lbs. The demand for pigs and milch cows was inactive, on former terms.

Per 8 lbs to sink the offal.

	s	d		s	d		s	d		s	d

Lambs, 6s 0d to 7s 0d.

HOP MARKET.

BOROUGH, Friday, June 9.—The plantation accounts being very favourable, our market is decidedly quiet. The supplies of produce, however, on sale are limited, and previous quotations are fairly supported. Mid and East Kents, 110s to 200s; Weald of Kents, 105s to 155s; Sussex, 100s to 145s; Yearlings, 110s to 130s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 9.—These markets are well supplied with potatoes, the trade for which rules heavy, as follows:—Yorkshire Regents, 90s to 100s; ditto Flukes, 100s to 120s; ditto Rocks, 80s to 85s; Scotch Regents, 70s to 100s; ditto Rocks, 65s to 80s; foreign, 55s to 65s per ton.

HAY MARKETS.

THURSDAY, June 8.—Limited supplies of hay and straw are on sale, and the trade rules firm, at fully late rates. *New* hay is quoted at 3*l* to 4*l* per load.

Per load of 36 trusses.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 9.—Notwithstanding that this week is always a holiday season in the manufacturing districts, there has been a fair amount of business done, and holders are not only very firm in their demands, but in some cases slightly improved prices have been obtained.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 9.—Quite a holiday attendance at corn market. Wheat and flour very slow sale, at prices in favour of purchasers. Indian corn held firm, at Tuesday's prices. Beans rather easier. Oats and oatmeal unchanged.

The Gazette.

TUESDAY, June 6.

BANKRUPTCIES ANNULLED.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 27th of May, on 11,946 miles, to 661,570*l*, and for the corresponding week of last year, on 11,591 miles, to 640,510*l*, showing an increase of 355 miles, and a decrease of 21,060*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,407 miles, to 535,288*l*, and for the corresponding week of 1864, on 8,153 miles, to 521,253*l*, showing an increase of 254 miles, and an increase of 14,035*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 5.—In the share market to-day the amount of business was little more than nominal, and the only important variations from Saturday's closing prices were in English railways, where the movements were all in advance, and in the banks, in which description they were chiefly towards depreciation. Of the English lines, North-Western recovered ½, and Great Western, Lancashire and Yorkshire, and Midland ¼ each; and Metropolitan improved ¾, ditto (new) ⅛, Manchester, Sheffield, &c., ½, and North-Eastern (Berwick) and ditto (York) ¼ each. In colonial, East Indian and Great Indian Peninsula improved ½ each, and Great Western of Canada receded ⅛. In foreign, Dutch Rhenish improved ⅛; and Paris and Orleans declined ½, and Paris and Mediterranean a further ½. In American, no alteration occurred. In mines, North Wheal Bassett declined ⅛, and West Carradon 1. In foreign mines, Washoe Gold (of both descriptions) closed ¼ better.

TUESDAY, June 6.—In the share market to-day there was a continuance of inactivity, but the closing prices show a rather firmer tendency in general, mines and miscellaneous shares excepted. In English railways, Great Northern advanced 1½, Chatham and North-Eastern (Aberdeen stock) 1 each, South-Eastern ½, and Great Western (Hereford) and North-Eastern (Leeds) ¼ each, ditto (Berwick) a further ½, ditto (York), Manchester, Sheffield, &c., and Metropolitan a further ¼ each, and ditto new ⅛; North British declined ½; and North-Western relapsed ¼. In colonial, Grand Trunk of Canada (Equipment bonds) improved 1, and Great Southern of India, Madras (5 per cent) and Delhi (stock) ½ each. In foreign, Paris and Mediterranean recovered ½; Namur and Liege (preference) and Lemburg-Czernowitz improved ¼ and ½ respectively; European Central declined 1½. Lombardo-Venetian ½, and Antwerp and Rotterdam ⅛. In American, Atlantic and Great Western (New York ,(2d mortgage) improved 1, United States' (5-20) ¾, and Illinois Central shares ½. In British mines, East Carn Brea receded ½. In foreign mines, St John Del Rey declined 1, and Vancouver Coal ½.

WEDNESDAY, June 7.—In the share market to-day inactivity very generally prevailed, but English railways, banks, and American securities closed with a tendency towards firmness, while other descriptions were without material alteration of tone. Of the English lines, Great Eastern (East Anglian) and South-Western improved ½ each, Midland ¼, North-Eastern (Berwick) further ¾, and ditto (York) a further ½; and Great Western receded ½. In colonial, Bombay and Central India improved ½; Delhi (stock) relapsed ½, and Great Western of Canada (new) declined ⅛. In foreign, Lombardo-Venetian recovered ½; Great Luxembourg declined ⅛, and Antwerp and Rotterdam a further ½. In American, Virginia (6 per cent.) and Panama railroad (second mortgage) advanced 1 each, United States (5-20) ½, Erie shares (paid up) ¼, and Illinois Central shares a further ½. In British mines, West Chiverton advanced 5, and Chiverton ¼. In foreign mines no change occurred.

THURSDAY, June 8.—In the share market to-day dulness was the prevailing feature, and foreign railways and the miscellaneous shares closed with a slight tendency towards weakness; colonial railways and foreign mines were firm, and the other descriptions show no material average change. In English railways, Caledonian improved ½, and Metropolitan (new) ⅛, and Lancashire and Yorkshire declined ¼, and Great Western a further ½. In colonial, Atlantic and St. Lawrence advanced 1, and Eastern Bengal, Madras (5 per cent.), and Grand Trunk of Canada (Equipment bonds) ½ each. In foreign, Northern of Buenos Ayres receded ½, and Great Luxembourg a further ⅛. In American, Pennsylvanian Railroad (2d mortgage) and Atlantic and Great Western (New York, 1st mortgage), and ditto (Pennsylvania, 2d mortgage) advanced 1 each; ditto (1st mortgage) declined 1, and United States' (5-20) and Erie shares (paid up) relapsed a ¼ each. In British mines, Clifford Amalgamated declined 1. In foreign mines, St John del Rey improved 1.

FRIDAY, June 9.—The railway market is heavy to-day. Great Northern and Caledonian stocks declined 1 per cent., South-Eastern ⅝, Metropolitan ½, London and North-Western, Great Western, and Midland ¾, and Lancashire and Yorkshire ¼. London and South-Western exceptionally firm, and advanced ½ per cent.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell dark West, N.W.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE,"
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments.—

INDIA OFFICE,

6th June, 1865.

The Secretary of State for India in Council hereby gives notice,—

That he has received from the Right Honourable the Governor General of India in Council the following Notifications relative to the sale of the Government tea plantations and factories in Kumaon, the Dehrah Dhoon, and the Kangra Valley in the Punjab.

HERMAN MERIVALE,
Under Secretary of State for India.

NOTIFICATIONS.

The following tea plantations and factories in Kumaon and the Dehrah Dhoon are offered for sale at the upset prices specified:—

1. Hawul Bagh, in Kumaon, forty-six miles from the plains and six miles from Almorah. The plantations (including the two small nurseries, viz., Kupeena and Lutchmaisur, in the immediate neighbourhood of Almorah) consist of about 100 acres of land planted with tea. At a short distance from the plantations there is a cheer (pinus longifolia) forest, of about 100 acres in extent, in which the purchaser will have the right to cut timber which is well fitted for making tea chests, firewood, &c.

There are on the estate three large slated houses, numerous slated offices, a large slated factory, two large slated godowns, a slated barrack for Chinese tea manufacturers, and the stock and block of the factory are complete for tea operations and in working order.

2. Ayar Toll in Kuttyoor, Kumaon, distant about 80 miles from the plains, and about 40 miles from Almorah.

There are on the estate a slated factory, and a large slated godown, slated barracks for Chinese tea manufacturers, &c., and the stock and block of the factory are complete for the tea operations, and in working order.

This plantation consists of about 1,300 acres of land, of which about 360 acres are planted with tea, 200 acres of cleared land fitted for tea planting, and the remaining covered with pines, &c., forests the timber of which is well adapted for making tea chests, &c.

The yield of the two estates this season was 20,000 lbs of tea and 1,650 maunds of seeds.

These two estates will be sold in one lot in fee simple, free of all demands on account of land revenue, exclusive of existing local cesses, such as road, educational, and postal cesses, or such as may be hereafter legally imposed, at an upset price of 2,00,000 rs (two lacs of rupees).

A small portion of the plantation of Ayar Toll, named Bincolle, belonging to the temple of Nagnath, will bear an annual rental of 24 rs (twenty-four rupees) per annum.

This land is leased in perpetuity from the temple of Nagnath on this rental.

3. Kowlaghir, in the Dehrah Dhoon, distant two miles to the west of the town of Dehrah; it consists of about 430 acres of land, of which about 380 acres are under cultivation with tea, and the remainder adapted for tea cultivation.

Through the property a branch of the Beejapore Canal runs. At a short distance and to the South of the plantation there is a forest of syne, jamun, &c., consisting of about 500 (five hundred) acres, in which the purchaser will have the right to cut timber for tea chests, firewood, charcoal, &c. The timber is well fitted for making tea chests.

There are on the estate three bungalows, an extensive pucka tea factory, two large pucka godowns, a barrack for Chinese tea manufacturers, &c., and the stock and block of the factory are complete, and in full working order.

The yield this season was 25,099 lbs of tea, and 1,050 maunds of seeds.

This estate will be sold in fee simple, free of all demands on account of land revenue, exclusive of existing local cesses for roads, &c., or such as may hereafter be legally imposed, at an upset price of 2,00,000 rs (two lacs of rupees). The plantations will be transferred to the purchasers on the 1st April, 1866, on or before which date the purchase money must be paid at the General Treasury, Calcutta.

Tenders will be received by William Jameson, Esq., Superintendent Botanical Gardens, North-Western Provinces, Saharunpore, until 1st March, 1866, if the factories, &c., be not previously sold by private sale, and the highest offer above the upset price will be accepted.

All tenders must be made in writing.

Every tender should be superscribed "Tender for Tea Plantation," and will be registered by the Superintendent of the Botanical Gardens on the date of receipt in a book, which he will keep, together with the tenders, in his own custody, under lock and key.

The highest registered tender, at the time being, for any lot, will be communicated by the Superintendent to any inquirers up to the time of sale, but the names of the parties who have tendered shall in no case be disclosed.

The register of tenders will be examined at noon on the 1st March, 1866, by a committee consisting of the Superintendent Botanical Gardens, the Judge, and the Collector of Saharunpore, at the office of the Superintendent, and in the presence of all parties who may attend; and the amount of the highest tender for each lot, or, if there be more than one tender of equal amount, the number and amount of such tenders, but not the names of the parties tendering, will be publicly declared, and the highest tender, in writing, above the upset price at 4 p.m., will be accepted on the part of Government by the Committee.

On the tender being accepted by the Committee, the purchaser must deposit five per cent. of the purchase money, which will be forfeited if the amount of the purchase money be not paid in full on the date specified.

Agents must be supplied by their principals with sufficient powers of attorney.

The above particulars are believed, in good faith, to be correct, but intending purchasers must make their own inquiries, as no reclamation can be listened to after sale.

References may be made to W. Jameson, Esq., Superintendent Government Botanical Gardens, Saharunpore.

The following notification regarding the sale of the Government Tea Plantation and Factory, &c., at Holta, in the Kangra valley, is published for general information:—

The following tea plantation, with factory, godowns, houses, out-houses, &c., the property of Government at Holta, in the Kangra valley, is offered for sale at the upset price specified below.

The plantation is distant about 23 miles from Dhurmsallah, and 22 miles from Kote Kangra. There are on the estate a large slated factory, two slated godowns, and two slated houses for overseer and assistant overseer, barracks for Chinese tea makers, &c., and the stock and block of the tea factory are complete for tea operations, and in working order.

The tea plantation consists of 677 acres, more or less, of which there are under cultivation with tea about 530 acres, and the remainder waste or covered with cheer, pine (pinus longifolia), but the greater portion fitted for tea cultivation.

At a short distance from the plantation there is a cheer forest, about 100 acres in extent, in which the purchaser will have the right of cutting timber. The wood is well adapted for making tea chests.

The yield of the tea plantation may be estimated this season at 33,000 lbs of tea and 1,800 maunds of tea seeds; two hundred maunds of tea seeds, the produce of the season, will be given to purchaser.

The estate will be sold in fee simple, free of all demands on account of land rent, exclusive of existing local cesses, such as the road, educational, and postal cesses, or such as may be hereafter legally imposed, at an upset price of 2,00,000 rs (two lacs of rupees). The plantation and factory will be transferred to the purchaser or purchasers on the 1st December, 1865, on or before which date the purchase money must be paid at the General Treasury, Calcutta.

All tenders must be made in writing.

Every tender should be superscribed "Tender for Tea Plantations, Holta," and will be registered by the Superintendent, Tea Plantations, Punjab, Saharunpore, on the date of receipt, in a book which he will keep, together with the tenders, in his own custody, under lock and key. The highest registered tender at the time being will be communicated by the Superintendent to any inquirers up to the time of sale, but the names of parties who have tendered shall in no case be disclosed.

The register of tenders will be examined at noon on 1st November, 1865, by a Committee, consisting of the Superintendent, Tea Plantations, and Deputy Commissioner at the Factory, Holta, and in the presence of all parties who may attend. The amount of the highest tender, or, if there be more than one tender of equal amount, the number and amount of such tenders, but not the names of the parties tendering, will be publicly declared, and the highest tender, in writing, above the upset price, at 4 p.m., will be accepted on the part of Government by the Committee.

On the tender being accepted by the Committee, the purchaser must deposit five per cent. of the purchase money, which will be forfeited if the amount of the purchase money be not paid in full on the date specified.

Agents must be supplied by their principals with sufficient powers of attorney.

The above particulars are believed, in good faith, to be correct, but intending purchasers must make their own inquiries, as no reclamation can be listened to after sale.

References may be made to the Deputy Commissioner, Dhurmsallah, or to Dr Jameson, Superintendent, Botanical Gardens, Saharunpore.

Messrs Huggins and Rowsell, Threadneedle street, London.

Offices—5 Ingram street, Glasgow.

PROSPECTUS.

This Company has been formed for the purpose of carrying on, on a large scale, the importation direct to Glasgow, and the manufacture and sale there, of Jute and similar fibres, so extensively and successfully prosecuted in and around Dundee and other places.

The Directors have made favourable arrangements, and avoided the preliminary expenses incident to starting a new concern, by securing the well-known business of linen and jute merchants, spinners, dyers and manufacturers, carried on by Messrs W. and J. Fleming and Co. in Glasgow, successfully prosecuted for half a century; together with their lately-erected and very extensive jute-spinning, weaving, dyeing, bleaching and finishing works, known as the "Baltic and Clyde Linen Works;" and have likewise made arrangements with these gentlemen, by which they are to retain a large interest in the Company, and to continue their services and experience in the management of the various departments.

The Directors, in addition to their personal knowledge and experience, have satisfied themselves of the profitable nature of such a business, and of the essential soundness of the undertaking. Messrs W. and J. Fleming and Co. have also guaranteed for the first five years a minimum dividend of 10 per cent per annum, payable half-yearly, on the capital paid up, which dividend is amply secured, being retainable out of the purchase money, if necessary.

Glasgow is pre-eminently adapted for such an establishment. It is in direct and regular communication, by means of established lines of first-class ships, with Calcutta and Bombay, whence all jute is shipped. It is also in direct and constant communication, by steamers and ships, with all the foreign and continental consuming markets; while there are regular steamers and traders direct to every port of any importance in Great Britain and Ireland. Moreover, being the great commercial and manufacturing centre of Scotland, and containing, as it does, a population of nearly half a million, besides being one of the largest consuming towns and export ports, Glasgow affords the most favourable and abundant supply of suitable labour, and being in the heart of the extensive coal districts of Lanarkshire, fuel can be had at the cheapest rates. From its situation also, it has this advantage over Dundee and the east coast of Scotland, that the railway charges between these districts and the west coast of England and Scotland are entirely avoided, thus effecting a saving on the average of more than 15s per ton, while for London and the principal towns on the east coast, it is as conveniently placed as Dundee as to cost of transit. That this is a matter of considerable importance is shown from the evidence on 18th May before a Committee of the House of Commons, in which the Chairman of the Dundee Chamber of Commerce says—"The most of the Dundee traffic goes to the west coast," and before the same Committee, the Manager of the Dundee and Perth Railway in his evidence says:—

"The exports from Dundee to Liverpool last year were 22,615 tons. The imports from Liverpool to Dundee last year were 18,932 tons; in all about 42,000 tons. From Glasgow 16,043 tons, and to Glasgow 12,800 tons; in all about 28,000 tons. Therefore, you will see, that the main trade of Dundee is with Glasgow and Liverpool. To Manchester we sent 5,000 tons."—DUNDEE ADVERTISER Report, 20th May, 1865.

As a port for the direct importation of jute, Glasgow cannot be surpassed, having regular communications with Calcutta, moderate port and other charges, cheap storage rates and outward general cargoes; and being within 50 miles of Dundee, jute, via Glasgow, can always be delivered there cheaper than via London, or Liverpool, as the freight to, and charges at, Glasgow are under the rates for either of these ports, and the carriage and charges from Glasgow to Dundee are less than one-half of what they are from London and Liverpool to Dundee.

In point of fact, there is no other city in the kingdom possessing the same advantages as Glasgow for the importation, manufacture, and sale of jute.

The works, known as the "Baltic and Clyde Linen Works," are situated in Bridgeton, Glasgow, within a mile of the harbour, and are all in full and perfect operation. They occupy an area of upwards of ten acres in extent, with an unlimited supply of water: and are all modern and most substantial, having been erected within the past five years on the most approved plans, and with every improvement known in the trade. The properties and ground are most valuable, and rapidly improving; portions of them are let on lease, yielding a rental of upwards of £1,500 per annum.

These works are capable of producing at present about 90 tons weekly, and there are engine-power and buildings sufficient to work additional machinery for the production of about 120 tons in all per week; while there is unbuilt space, with other arrangements completed, for an almost indefinite extension beyond, if required. All the various processes of manufacture are carried on in these works, viz.: spinning, weaving, dyeing, bleaching, calendering, finishing, and packing, and the firm have a long-established connection as general Linen and Jute Merchants, the whole of which is transferred to this Company.

Arrangements have been concluded by which the Company is to be represented at Calcutta, so that the purchase, selection, and shipment of jute will be conducted under the most favourable circumstances.

It is proposed that the capital of the Company shall be limited to £500,000, or 20,000 shares of £25 each, of which £250,000 will only be issued at first, and of this not more than £12 10s per share is proposed to be called up during the first year.

The whole business, works, machinery, utensils, properties, and grounds referred to are valued at £120,000, which sum the vendors have agreed to accept for them, payable £30,000 in cash, £30,000 in paid-up shares of the Company, and £60,000 in instalments of £6,000 each, extending over ten years (and secured over the properties), with interest at the rate of 5 per cent. per annum.

Applications for shares to be made in the accompanying form. In the event of no allotment being made, the deposit will be returned in full, and should a less number of shares be allotted than applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

A large portion of the shares has been already applied for.

Prospectuses and forms of application for shares may be obtained at the offices of the Company, and of the Bankers, Solicitors, and Brokers.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. BANKERS.

The Union Bank of London.

Messrs Smith, Payne, and Smiths.

SOLICITORS—Messrs Freshfields and Newman.

SECRETARY—C. T. C. Grant, Esq.

Debentures of this bank are issued in bonds to bearer of £20, £100, £500, and £1,000 each, redeemable at par within thirty years, by half-yearly drawings. Interest £5 per cent. per annum, payable half-yearly. The price of issue is £87 for every £100.

These debentures are secured by the whole of the bank's invested funds (which must always be equal to the total debentures current), and by the additional guarantee of the uncalled capital of £1,600,000, represented by a proprietary of upwards of 1,500 shareholders.

The above price of issue gives to the subscriber 5¾ per cent. interest on the amount invested, and a cash bonus of £14 18s 10d per cent. on the redemption of the bonds at par by the half-yearly drawings, which—averaging the period of drawing—yields a return of 6¼ per cent.

The bonds being to bearer (coupons for interest, payable 1st January and 1st July, attached), transfers pass from hand to hand without endorsement, and are free from any further stamp duty.

Applications to be made at the offices of the company, 17 Change alley, Lombard street, E.C., where any further information may be had.

LONDON CHARTERED BANK OF AUSTRALIA. (Incorporated by Royal Charter.)

Paid-up Capital, One Million Reserve fund, £90,000.

Letters of Credit and Bills of Exchange are granted on the Branches of this bank at Melbourne, Geelong, Sydney, and the Gold Fields. Drafts on the Australian Colonies purchased or sent for collection. Deposits are received in London at interest, for fixed periods, on terms which may be known on application at the office.—By order of the Court.

JAMES STRACHAN, Secretary.

Offices, 17 Cannon street, E.C.

NATIONAL PROVINCIAL BANK of ENGLAND, 112 Bishopsgate street, London, June 6, 1865.

The Directors of the National Provincial Bank of England hereby give notice, that a Half-yearly Dividend at the rate of Eight per Cent. per annum, and a Half-yearly Bonus of Eleven per Cent., will be payable on the Company's Stock on and after the 10th day of July next, when the Dividend and Bonus Warrants will be obtained at the Company's office, No. 112 Bishopsgate street, or at the different Branches.

The Transfer Books will be closed on and after Saturday the 19th inst., until the Dividend and Bonus become payable.—By order of the Court of Directors,

A. ROBERTSON, Agent and Manager.

LONDON AND WESTMINSTER BANK.

—Notice is hereby given, that a SPECIAL GENERAL MEETING of Proprietors of the London and Westminster Bank will be held at the Bank in Lothbury, on Wednesday, the 19th day of July next, at One o'clock precisely, for the purpose of receiving a Half-yearly Report from the Directors, and to declare a dividend. WM. EWINGS, General Manager.

1st June, 1865.

The Transfer Books of the Company will be closed, to prepare for the dividend, on the 1st July next, and will re-open on the 4th July. Proprietors registered on the books of the Company on the 30th instant will be entitled to the dividend for the current half-year on the number of shares then standing in their respective names.

COMMERCIAL BANKING COMPANY of SYDNEY, NEW SOUTH WALES.

Incorporated by Act of the Colonial Legislature.

London, 17 and 18 Cornhill, 4th May, 1865.

DEBENTURES

ISSUED BY

THE CREDIT FONCIER AND MOBILIER of ENGLAND (Limited).

ISSUE OF £500,000 DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debentures Bonds of the Company for the amounts and bearing interest as under, viz.:—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attach d.

INTEREST.

For Three years	6	per cent.	per annum.
— Five years	6¼	—	—
— Seven years	7	—	—

Interest payable quarterly, viz., on the 30th March, 30th June, 30th September, and 30th December, in each year, at the Company's Bankers. The first payment of interest will be made on the 30th June next.

The distinctive feature in the debentures issued by this Company is their perfect security; the amount of the capital subscribed, paid up, and uncalled, and the general invested assets of the Company, as well as the large reserve fund, affording the most ample security to the investor.

These debentures are issued payable to bearer, and can therefore pass by simple delivery from hand to hand, without endorsement, and are free from any further stamp duty. They are also issued—to meet the requirements of Trustees and others—transferable by deed only, to be duly registered in the Company's books in the name of the investors and their assigns.

Forms of application can be obtained of the Secretary to whom all communications must be addressed.—By order of the Court.

ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, May 4, 1865.

DEPOSITS

RECEIVED BY

DEBENTURES.

THE CREDIT FONCIER OF MAURITIUS (Limited).

Subscribed Capital £500,000
Paid-up and invested £100,000

This Company is prepared to issue a limited amount of its Six per Cent. Land Mortgage Debentures for terms of years to be agreed upon, at rates of issue affording, with the advantage of repayment at par what is equivalent to interest at the rate of from Six to over Seven per cent. per annum, according to the length of the term.

The business of the Company is confined to the advance (of loans) on duly registered fir t mortgages of real property, to an extent in no case exceeding half the carefully appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.

By the articles of association no obligations can be incurred in excess of the amount actually invested, and the total amount borrowed can never exceed the subscribed capital. The Company's debentures are thus doubly secured.

For further information, application may be made to th Secretary, No. 17 Change alley. Cornhill, E.C.

L. H. Evans, Esq., public accountant, 15 King street, Cheapside.
G. W. Wood, Esq., 25 Gloucester street, Warwick square, Pimlico.

Offices—38 Poultry, E.C.

PROSPECTUS.

The Company is formed for the purchase, carrying on and extending the business of Mr Ford, the manufacturer of the well-known "Ford's Eureka Shirt" and other articles of necessary clothing, as now conducted in Wood street, Cheapside, E.C., and elsewhere. The "Eureka Shirt" has been for the last fifteen years a very useful and much sought for article of dress, and its manufacture has proved highly remunerative to the proprietor.

The sole manufacture of "Ford's Eureka Shirt" is protected by his trade mark, any forgery of which is by Act 25 and 26 Vic., cap. 88 (commonly called "The Merchandise Marks Act, 1862"), punishable as a misdemeanour.

It is confidently expected from the present state of the business that, with an increased capital, dividends of at least 15 per cent., ranging from that to 25 per cent. and upwards, will be derivable by the shareholders from this undertaking.

It is not intended to restrict the trade solely to the production and sale of Eureka shirts, but it is proposed to include shirts of all fashions and descriptions as well as other articles of clothing, suitable for all classes, both for home and foreign use.

A trade has already been established with colonial merchants, which may be considerably augmented by additional capital.

Mr Ford will act as Manager, without salary, until the above dividend of 10 per cent. per annum is paid for the said three years.

Prospectuses and Forms of Application for Shares may be obtained from the broker, and at the offices of the Company, No. 38 Poultry, Cheapside, E.C.

SALOM'S NEW OPERA AND FIELD GLASS.

—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter, moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scudamore approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

Messrs P Eckersley and Son, Bull's Head chambers, Manchester.

SECRETARY (PRO TEM.)—John Healy, Esq.

TEMPORARY OFFICES—1 Royal Exchange buildings, London, E.C.

PROSPECTUS.

The manufacture of ordnance upon the principle patented by Captain Blakely has for upwards of five years been carried on by private enterprise. The demand for this class of ordnance has, however, so largely increased, that the works established at Southwark by the present Blakely Ordnance Company have proved altogetner inadequate, and it has been found necessary to establish a manufactory on a much larger scale. Extensive works are in course of construction at Greenwich, to which it is proposed to transfer the operations of the Company.

Both in Europe and America, as well as at home, the Blakely ordnance is coming into more extensive use, and during the last six years large orders have been executed for Russia, Portugal, Italy, Egypt, Sweden, China and Japan, Morocco, Turkey, and several important States in North and South America, including the Confederate Government.

As an evidence of the remunerative character of this description of manufacture, it may be stated that the net profits in the current year amount to nearly £60,000.

With the view of providing the increased capital which is requisite to carry on the manufacture on so large a scale, it is proposed to form a Limited Company, to be called the "Blakely Ordnance Company, Limited." The services of Captain Blakely have been retained as Managing Director. The present efficient staff will also continue in office as follows:—Josiah Vavasseur, Esq., C.E., Resident Engineer; Mr Campbell (late of the Royal Laboratory, Woolwich), Superintendent of Laboratory and Shell Factory; Colonel Burnaby, Royal Artillery, Proof Master.

The Directors have entered into an agreement for the purchase of the existing leases, plant, premises, and goodwill for the sum of £225,000 payable by instalments over two years, and £150,000 in debentures bearing £6 per cent. interest. In forming their estimate of the value of the plant, leases, fixtures, machinery, stock, and goodwill, the Directors have been guided by a valuation of the same by a competent engineer. The goodwill has been rated at two and a half years' purchase.

As an evidence of their confidence in the undertaking, the vendors have agreed to guarantee that the profits of the undertaking shall amount to a sum sufficient to pay a minimum dividend at the rate of £15 per cent. per annum for three years, on the paid-up capital for the time being of the present issue of shares.

As it has been considered impossible to estimate equitably the value of the patents, it has been agreed that they shall be transferred to the Company, the present proprietor receiving £20 per cent. of the net profits for the next seven years.

The Company will enter into possession of the works in Southwark and Greenwich on the 30th of June instant, but will be entitled to the benefit of all contracts executed and profits made since the 30th June, 1864. The vendors reserve to themselves the right of subscribing for one-third of the present issue of shares.

A copy of the Memorandum and Articles of Association can be inspected at the offices of the Solicitors, 53 Chancery lane.

Prospectuses and Forms of Application for Shares to be obtained at the offices of the brokers of the Company, and of the solicitors.

As some applicants may desire to take full advantage of the guaranteed dividend, by paying up their shares in full, two Forms of Application are annexed, one for ordinary shares, and the other for fully paid up shares.

TO THE DIRECTORS OF THE BLAKELY ORDNANCE COMPANY, LIMITED.

Gentlemen,—Having paid to the Agra and Masterman's Bank the sum of £ , being £1 per share on shares, I request you to allot me shares in the above Company, in conformity with the prospectus issued by you, and I hereby agree to accept such shares, or any less number that may be allotted to me, and to pay the further sum of £4 per share due on allotment thereof, and the call when due, and I request you to place my name on the register of shareholders for the shares allotted to me.—I am, Gentlemen, your obedient servant,

FINANCIAL ASSOCIATION OF INDIA AND CHINA (Limited).

The First Ordinary General Meeting of the proprietors of the Financial Association of India and China (Limited), was held at the offices of the Association on Saturday last; Andrew Grant, Esq., in the chair.

Present.—Messrs A. Grant, John L. Scott, S. L. Acland, Sir Jamsetjee Jeejeebhoy, Baronet, Lieutenant-Colonel Cameron, Messrs Cursetjee Furdoonjee Paruck, Dady Nusserwanjee Dady, Thomas Diver, W. F. Wesche, Bhugwandass Purshotumdass, Henry Brooke, R. F. Young, Cawasjee Maneckjee Limjee, Dorabjee Cawasjee Pawnwalla, Wm. Johnson, Cawasjee Dadabhoy Furddonjee, Hurjeewandass Pranjeewandass, Bryamjee Nanabhoy Framjee, J. M. Maclean, F. L. Browne, J. W. Wright, T. R. Booth, Jas. Chesson, Ramchunderjee Luxmonjee, J. Frith, Esq., W. G. Lawson, Eduljee Nusserwanjee Setna, Cawasjee Muncherjee Ahmednuggurwalla, &c.

The Manager, after reading the notice calling the meeting, read the report of the Directors as follows:—

REPORT to 31st March, 1865.

The Directors have much pleasure in meeting the proprietors at this the First Ordinary General Meeting of the Association.

Under clause 89 of the articles of association, the accounts of the Company are made up to 31st March of each year, and the Directors entertain the hope that the result of the operations since the formation of the Company will prove satisfactory to the proprietors.

The Company was registered on the 22nd June, and commenced operations on the 1st of July last, with a subscribed capital of 12,000,000 rs, and 3,000,000 rs paid up.

At the extraordinary general meeting on the 24th of September, it was resolved to increase the subscribed capital to 24,000,000 rs, by the issue of 30,000 new shares, which were offered to the holders of old shares at a premium of 5 per cent., or 20 rs per share. The call of 100 rs on these shares was promptly responded to, and the amount (600,000 rs) realised on premium was placed, in accordance with a resolution adopted at the extraordinary meeting above referred to, to reserve.

But besides the amount thus placed to reserve, the Directors have to acknowledge the handsome sum of 200,000 rs from one of their colleagues, Mr Cowasjee Jehangier, to be placed to the same account.

The Association has been interested in the formation of the following Companies, besides having had a considerable allotment of Port Canning shares in virtue of their connection with the Bengal Credit Mobilier:—

The Bank of China.
The Bombay Brick and Tile Company.
The Bengal Credit Mobilier.

As regards the first, the names of the Provisional Board are a sufficient guarantee that the objects of the Company will be prosecuted with vigour, and the Board believe it has a successful future before it.

With reference to the second, the Secretaries report that the machinery has been ordered, and is in course of despatch, and that an experienced superintendent has already arrived in Bombay to superintend operations.

The Bengal Credit Mobilier is now in operation, and doing a profitable business.

The operations of the Association extend over a period of nine months, during which time there has been advanced on—

	Rs	a	p
Loans and discounts	19,982,611	2	7
Paid off	14,317,080	12	6
Leaving a balance of	5,665,530	6	1
Received on deposits bearing interest	9,497,435	11	6
Repaid	4,450,403	8	8
Leaving a balance of	5,047,032	2	10

The Directors have to report that a loss of 8,000 rs has been incurred by the failure of a native firm whose paper the Association held to that extent. The whole amount has been passed to Bad and Doubtful Debt Account.

The net profits, exclusive of the 600,000 rs from premiums on new shares, and the 200,000 rs from Mr Cowasjee Jehangier, amount to 15,64,730 rs 4a 10p, and the Directors proposed to apply them as follows:—

Rs.	
4,63,150	Dividend at the rate of 20 per cent. per annum on 30 lacs from 22nd June to 31st March.
3,00,000	Dividend at the rate of 20 per cent. per annum on 30 lacs from 30th Sept. to 31st March.
46,944	Income tax.
2,00,000	Reserve Fund (in all 10,00,000 rs.)
5,54,636-4-10...	Carried forward to next half-year.

As regards the amount thus at credit of reserve 10,00,000 rs) the board recommend to the proprietors that it be lodged on deposit for fixed periods with two or three of the different banking companies in the names of trustees. Under clause 112 of the articles of association, the Board are authorised to nominate trustees, and they accordingly propose Sir Jamsetjee Jeejeebhoy, Bart., and the Honourable George Foggo, of Messrs Forbes and Co. These gentlemen have intimated their willingness to act as trustees for this fund.

Two of the Directors, Messrs Grant and Scott, retire by rotation, but are eligible for re-election, and offer themselves accordingly.

In room of Mr A. F. Wallace resigned, the board recommend as a Director Mr Hormusjee Cursetjee Dady, who has expressed his willingness to accept the vacant seat.

The Auditors have to be re-elected at this meeting.

The Chairman having addressed the meeting on the subjects embraced in the report,

It was then proposed by Sir Jamsetjee Jeejeebhoy, Bart., seconded by Cursetjee Furdonjee Paruck, Esq., and carried unanimously:—

"That the report of the Directors be adopted, and that a dividend at the rate of 20 per cent. per annum be declared upon the paid-up capital, dating the creation of the old shares from the 22nd June and the new from the 30th September. The dividend is to be payable on and after the 21st instant."

Proposed by Cowasjee Manockjee Limjee, Esq., seconded by T. R. Booth, Esq., and carried unanimously:—

"That Messrs Grant and Scott be re-elected Directors of the Association."

Proposed by Thos. Diver, Esq., seconded by Bhugvandass Purshotumdass, Esq., and carried unanimously:—

"That Hormusjee Cursetjee Dady, Esq., should be elected a Director in room of A. F. Wallace, Esq., resigned."

Proposed by J. M. Maclean, Esq., seconded by E. L. Browne, Esq., and carried unanimously:—

"That Messrs Brooke and Huson be elected Auditors for the ensuing year, and their remuneration be 1,000 rs each."

Proposed by Andrew Grant, Esq., Chairman, seconded by Sir Jamsetjee Jeejeebhoy, Bart., and carried with acclamation:—

"That the cordial thanks of the proprietors be accorded to Cowasjee Jehangier Readymoney, Esq., for his munificent gift of two lacs towards the formation of a reserve fund for the Association."

Proposed by Thos. Diver, Esq., seconded by J. Pearson, Esq., and carried unanimously:—

"That the best thanks of the shareholders be given to the Chairman and the Directors for the very able manner in which they have conducted the affairs of the Company, and particularly for the clear statement of the Company's position now placed before them by the Chairman."

Proposed by W. F. Wesche, Esq., seconded by R. F. Young, Esq., and carried unanimously:—

"That the thanks of the proprietors be accorded to their able Manager, Mr Mackintosh, to Mr Smith the Secretary, and the other officers of the Company."

With a vote of thanks to the Chairman the meeting separated.

BALANCE SHEET, at 31st March, 1865.

A. MACKINTOSH, Manager.
JOHN SMITH, Secretary and Accountant.
Bombay, 3rd April, 1865.

We have examined the above Balance Sheet of the Financial Association of India and China (Limited), and accompanying account of Profit and Loss, at 31st March, 1865, and having compared them with the Company's books, find them to be correct. We have also examined the securities, and counted the cash taken account of as in possession of the Company, and have found the same to be in order.

COMPANY OF THE SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

REPORT

Presented to the General Meeting of Shareholders, held in Paris on the 31st May, 1865.

GENTLEMEN,—It is our duty, in execution of the 35th Article of the Statutes, to lay before you the results of our management during the year 1864, and to ask you to sanction them with your approbation.

BALANCE SHEET.

In conformity with our usual practice, we will first make you acquainted with our balance sheet.

The comparison of the balance sheet made out on the 31st December, 1864, with that explaining the state of our enterprise on the 31st December in the year preceding, shows that our general assets have increased during the year just closed in the following proportions:—

	f	c
Shipping	7,737,937	84
Stores	443,492	90
Plant of workshops, furniture, and apparatus	420,803	37
Premises and establishments	1,518,014	76
Total	10,120,248	87

The liabilities corresponding with these additions to our inventory comprise the following items:—

	f	c	f	c
The complement of our loan from the State, raising our debt to the Treasury to 12,610,000f			4,000,000	00
Statutory reserve for 1863			220,309	68
Excess, as compared with 1863, of the total amount of the per centages set apart as a sinking fund for wear and tear, and depreciation of shipping	3,164,081	23		
Proportionably diminished by a reduction on the repairing fund for the Transatlantic and Indo-Chinese steamers	60,351	98		
Net increase			3,103,729	25
Net increase of the per centages paid over to the insurance fund up to 31st December, 1864			599,997	30
			7,924,036	23
The difference is represented, on the one part, by the balance between the augmentations of debts to be paid	1,548,760	13		
The reduction of debts to be received	448,366	07		
Balance of profit and loss account in 1864.	890,218	17		
In all	2,887,344	37		
And, on the other part, the increase of cash and bills in hand to be deducted	691,131	73		
			2,196,212	64
Total, equal to the assets			10,120,248	87

ASSETS.

Our shipping, as well afloat as on the stocks, and the accessories of the vessels in active service, presented on the 31st December, 1864, a total value of	81,738,513	66
On the 31st December, 1863, the value was only	74,020,575	82
The increase of	7,737,937	84

Is thus explained:—

Increase in the value of the vessels afloat	11,088,269	90
Reduction in the value of vessels on the stocks	3,350,332	06
Equal difference	7,737,937	84

This increase results from the following figures:—

On the 31st December, 1863, you had afloat 52 steamers, of 15,870 horse power, and an aggregate burden of 87,101 tons.

On the 31st December last, the inventory of your fleet comprised:—

58 steamers, of 17,530 horse power, and 102,445 tons aggregate burden.

These changes have been caused by bringing into active service eight vessels:—

Godavery, Said, Emyrne, Mozambique, Nil, Arethuse, Delta, and Copernic.

The first set of these vessels are intended to be added to your fleet in the Mediterranean and Indo-Chinese seas.

The last two are, if necessary, to form the nucleus of an auxiliary effective to operate independently of our postal contracts, and are more especially reserved to give satisfaction to commercial requirements in the same conditions of liberty as our competitors enjoy.

This increase has, moreover, been counterbalanced to a certain extent by the withdrawal and breaking up of the Longsor, and the sale of the Telemaque.

Deducting these two vessels, the increase of our vessels afloat is:—6 steamers, of 1,660 horse power, and 14,637 tons burden.

On the 31st December last, we had still on the stocks at La Ciotat, in different stages of advancement, four vessels representing together 1,080 horse power and 8,647 tons burden.

The Volga	280	horse power.
The Neuzaleh	280	—
The Ilyssus	240	—
The Niemen	280	—

Two of these vessels have already been some time at sea; the third is now fitting out, and the fourth will take its place among your effective towards the close of the year.

To recapitulate: the whole of your fleet, at sea and on the stocks, on the 31st December last, consisted of 62 vessels, of 18,610 horse power and 111,092 tons burden.

STORES.

	f	c	f	c
The stores of all kinds on hand at Marseilles, La Ciotat, Bordeaux, Suez, and at the agencies of our different lines, present a total value of			12,050,457	54
1.—WORKING.				
Coal at the depot or on the way	3,378,765	17		
Provisions	1,560,541	41		
Fittings and sundries	1,193,645	34		
			6,142,951	92
2.—BUILDING YARDS.				
Stores	4,471,158	05		
Works executing, the value of which was not applied on the 31st December last	1,436,347	57		
			5,907,505	62
Total			12,050,457	54
In the balance sheet of 1863, this article was only			11,606,964	64
Increase in 1864			443,492	90

The augmentation in question bears entirely on the building service: it results chiefly from additional stores which we were obliged to establish at Suez, Hong Kong, and Mauritius on organizing the Reunion (Bourbon) line, as also from the making of the new boilers at La Ciotat which will be required for the new steamers in 1865.

Per contra, we have been able to materially reduce the outlay for our coal stores.

PLANT OF WORKSHOPS, FURNITURE, &c.

	f	c
The value of our assets under this head amounted on the 31st December, 1864, to	3,175,077	39
In 1863 this item was only	2,754,274	02
Increase	420,803	37

Of this sum, about 250,000f have been employed in purchasing additional tools, &c., for our workshops, almost in equal proportions at La Ciotat and Suez.

The remaining 170,000f represents a complementary supply of articles and apparatus which were chiefly required for our agencies at Alexandria, Suez, Aden, Galles, and Saigon.

REAL ESTATE.

	f	c
The houses and buildings belonging to the Company stand in the inventory now submitted to you for the sum of	6,276,932	21
Showing an increase, as compared with last year, of	1,518,014	76

This permanent investment of capital, with the exception of about 150,000f resulting from the extension given to our workshops at La Ciotat, and mentioned in last year's report, has been caused almost exclusively by the establishment of our Indo-Chinese agencies, and especially those of Suez and Saigon.

Suez	293,000f

This sum represents the outlay made during the year 1864 in completing our workshops and their dependencies.

At the present moment our Company possesses to the west of Suez, besides the ground on the quay of that port, on which the buildings of the agency stand, a surface of 23,000 square metres completely levelled, which comprises:—

2,800 square metres of covered workshops, 150 rooms in two buildings intended to lodge our European workmen and their families at a moderate rent, 44 rooms for Arab workmen; lastly, two houses for the administration, containing 25 rooms for the professional staff and accountants, and one special building, with a canteen, eating-house, &c., for the use of unmarried workmen.

The whole of these premises have a supply of fresh water sufficient for the wants of the small population that we have established there. We have also contributed to the erection of an hospital on a small scale in the immediate neighbourhood of our

Digitized by Google

workshops, which will be an additional security for the welfare of the families come from France to work for us.

We are at this moment completing our establishment at Suez by the erection of a third large lodging-house for our European workmen, and also by adding dependencies to the house of the agency, which will enable us soon to instal the principal agency of your Company at Suez instead of at Alexandria, as at present.

The increasing importance of the interests connected with the Indo-Chinese lines has proved to us the necessity of placing our principal representative in Egypt in more immediate contact with the large steamers plying between Suez and the extreme East.

The removal to Suez of the chief agency has been long prepared. It will only require a small additional outlay.

Saigon ..... 1,022,000f.

In conformity with the explanations we had the honour to give you at our last meeting, the permanent outlay at Saigon up to the 31st December, 1863, only represented three of the instalments paid for the purchase of land, with a small expenditure for levelling the ground and preparations for building.

In 1864, the works were pushed on with a rapidity which we gave you some reason to expect, and which is plainly shown by the sum expended. The site of our establishment, and all that portion of the town near the river, was on a level considerably below that reached by the highest tides; it was therefore necessary to raise it, and this work has been attended with a rather heavy outlay.

At the date of our last advices, the dwelling-house was covered in, and the internal fittings were fast approaching completion. The same may be said of the general warehouses and workshops; for these buildings were finished all but the joiners' and smiths' work.

Preparations were making for roofing the coal stores, and the first floor of the agency offices were nearly finished.

We are most anxious, gentlemen, to have done with these installations, which are necessarily costly, but at the same time indispensable. Without them, in fact your services, for which Saigon is destined to serve as the extreme point for the navigation of the steamers sailing from Suez, and as the starting point for your communications with China and Japan, would have wanted the basis necessary for an enterprise so difficult as that you have undertaken. The year 1865, we feel certain, will see the last finish put to what has yet to be accomplished in order to realise the guarantees which it was our duty to provide for the good execution of those services.

The remainder of our outlay for permanent purposes is divided between the agencies of Aden, Pointe de Galles, and Calcutta.

Cash and Securities in Hand.

Among the securities are about 8,000 bonds bought in, which represent a value exceeding 4,000,000f.

Balance of Debtor and Creditor Accounts.

This balance is the result of the reciprocal working of a certain number of accounts current differing in nature and importance. Considered in its principal masses, this chapter comprises, in the first place, a sum of 1,996,000f, the reimbursable subvention which we received from the State during the period of anticipation preceding the opening of the contract services of Indo-China; in the second place, about 4,800,000f, the cost of first establishment for those lines. This account, the chief elements of which, as we stated at our last meeting, are the outlay for surveys and installation, the expense of fitting out vessels, and the payment of dividends to the 1st of January, 1864, has of course borne the burden, during the year just past, of the different expenses incurred by sending four new steamers into the Chinese waters, viz.: the Labourdonnais, the Meinam, the Emirne, and the Mozambique.

The sending of these vessels beyond Suez raises to eleven the number of our steamers in those seas. By the terms of the convention of 22nd April, 1861, the lines conceded to us required twelve vessels, and the convention of 3rd June, 1864, which substituted for the branch from Aden a direct line from Reunion to Suez, will undoubtedly have the effect of adding another vessel to our resources. You, therefore, will still have to send two more ships beyond Suez to complete your effective.

Liabilities.

We have received in 1864 the last third of the loan of 12,000,000 which the State engaged to advance.

This loan has therefore been received in its entirety, with the addition, according to the stipulations of the convention annexed to the law of 3rd July, 1861, of the interest belonging to that period of the three years by which we obtain the sum of 12,610,000f, which you see in the balance sheet of this year as the first item of the liabilities.

By the terms of the above-mentioned convention, that debt no longer bears interest to the profit of the Treasury, but it is to be reimbursed in twelve years by annual instalments of 1,050,833f 33c, the first of which falls due in the last days of August next.

Bonds.

The amount of our bonds has not varied since our last meeting; we delayed till now the issue of the 10,000 bonds remaining on hand out of the 20,000 of which the general meeting of 3rd June, 1861, authorised the issue. But the reimbursement which we have shortly to make to the Government, on the one hand, and, on the other, the necessity of procuring special resources to provide for certain works of the first utility, of which we shall have to treat in the after-part of this report, have induced us to regard, as very near at hand, the moment when we shall have to realise those securities, which, according to custom, will be offered in preference to the shareholders of the company. An appeal for your subscriptions will be made in the usual form.

Moreover, gentlemen, you will not lose sight of the fact that out of the 26,000 bonds issued down to the present time, about 8,000 have already been bought in by us. These purchases will continue every year, and by this means the first loan of 8 millions, made in 1856, and represented by 16,000 bonds, will be completely reimbursed in 1870.

Sinking, Insurance, and Reserve Funds.

Sinking Fund.

The sinking fund constituted for divers reasons to compensate for the deterioration of the shipping and other articles subject to wear and tear which compose our assets, and also to secure the repurchase of our bonds figuring in the balance sheet of 1863,

	f	c
For	20,014,813	80
At the end of 1864 amounted to	23,178,895	03
Difference on excess	3,164,081	23

The per centage levied in the course of the last year on the proceeds of the working in favour of the sinking-fund for the shipping and bonds,

	f	c
Amounted to.....	3,339,564	19
To which must be added the sinking-fund for real estate	154,614	64
And the interest falling to the bonds purchased by means of per centages previously levied.....	196,421	80
Together	3,690,600	63
The difference between this sum and that of	3,164,081	23
Being.....	526,519	40

represents the dotation belonging in the sinking fund for ships, to the two steamers Longsor and Télèmaque, which have ceased to form part of your fleet, and the accounts of which have of course been liquidated.

Insurance Fund.

The per centage levied on the proceeds of the working in 1864 for the insurance of your vessels,

	f	c
Amounted to	1,754,455	39
Deducting the premiums paid to Insurance Companies for the portion of the risks not left to our own charge, and the diminution of the special insurance fund by advances made to the captains of colliers, the net sum by which your insurance reserve has been augmented during the past year is.....	599,997	30
On the 31st December, 1863, this fund was included in your balance sheet for	3,625,333	80
In the balance sheet of 1864, it is	4,225,331	10

If you do not see any casualty figure in this liquidation account, it is because the obligation of meeting the unfortunate loss of the Hydaspe and Béarn will fall on 1865 only. The wreck of the Béarn is quite recent, as to the loss of the Hydaspe, although it occurred at the end of 1864, the date of the event is posterior to that of which our account for the year always concludes for the working of our lines beyond Suez.

The Hydaspe was on her way to her new port to begin the regular service for which she was intended between Batavia and Singapore; she had on board only a few bales of merchandise and no passengers, when a false direction given by the pilot, especially charged with indicating her route, drove her on a bank. As soon as the disaster was known, four war vessels of the English and Dutch navies hastened to the spot with a promptitude for which we cannot find words to express our gratitude. However powerful the aid at hand, it unfortunately proved of no avail. Every effort to get the ship afloat was useless, owing to the bad weather which supervened two or three days after the accident, and when there was good reason to hope that she might be saved.

The loss of the Béarn in the Brazil line was the first accident which interrupted the regularity of a service previously conducted with the most complete success. An error of the compasses, caused by an extraordinary meteorological perturbation, and the abnormal action of submarine currents, sufficiently powerful to baffle the calculations of one of the oldest and most experienced naval officers who consent to lend us their aid, can alone explain this destruction of one of the finest vessels of your fleet.

We have had to suffer on this occasion one of those misfortunes against which the excellence of the vessel and the skill of her captain are equally powerless; the energy which succeeded after the wreck in saving the lives of all the persons on board the Béarn, has made an impression in Brazil which we have good reason to hope will efface the memory of this deplorable casualty. The best justification of this hope is the confidence with which the Brazilian public has continued to honour our company since the wreck. Our last two vessels arrived at Bordeaux had on board more passengers than on any previous voyage.

These two lamentable events will diminish our insurance fund by 1,400,000f or 1,500,000f, but it is able to support this charge, since it will amount to five millions and some hundred thousands of francs when the time for the liquidation shall arrive.

Digitized by Google

STATUTORY RESERVE FUND.

The sum of 220,309f 68c which figures under this article is what you fixed on when auditing the accounts of the preceding year in your meeting of 4th June, 1864. The reserves accumulated under this head since the beginning of our services amount in the account placed before you to a sum of 1,973,625f 10c or nearly two millions.

This summary view of the principal articles of your balance sheet will give you, gentlemen, a clear idea of the financial situation of the Company, as well as of the state of the different accounts current, creditors or debtors, the balance of which establishes the equilibrium between your expenditure of capital and the resources which have served to meet it.

CHAPTER II.—WORKING ACCOUNT.

SECTION 1. ITINERARY.

The distance run on all our lines of navigation during the year 1864 amounted to 495,582 marine leagues, viz. :—

In the Mediterranean and Black Sea	337,130
In the Atlantic	53,100
In the Indo-Chinese seas	75,352
Equal total	475,582

The general work is divided into the regular passages which you accomplish, either obligatorily or optionally, and other passages, irregular and independent of the postal service, which you are led to undertake, according to the demands of your traffic, on all the points where commercial requirements arise for which your ordinary navigation does not suffice.

442,487 leagues have been run in regular voyages.

The supplementary voyages have determined runs amounting to 23,095 leagues, which complete the total of 465,522 leagues for the whole year.

In this navigation, 58 of your steamers have been engaged, realising, as in 1863, an average speed of 9½ knots, which for a general average is rather high.

In the course of the year 1864 we have had to apply, at least in part, the modifications of routes determined by the ministerial decision of 2nd June, 1864, and the convention with the finance department of the same date, the bases of which were explained in our preceding report.

Consequently, the regulation line for Italy, giving rise to an annual distance of 30,169 leagues, has ceased to be obligatory since the 22nd of July.

We have nevertheless thought fit to maintain regularly till the end of the year the lines served by your steamers on the coasts of Italy. A mixed combination, which substitutes for the two Italian lines a single weekly line from Marseilles to Messina, touching at Leghorn, Civita Vecchia, and Naples, has enabled us recently to reduce by one-half the distance of 45,136 leagues occasioned by the two lines.

This modification, which will produce its effect in the year 1865, will allow us to continue serving, with the least possible expense, the commercial movement existing between Italy and the Levant.

In the seas beyond Suez we opened in 1864, in pursuance of the convention of the 2nd June, the Mauritius line, rendered direct and independent of the principal Indo-Chinese line.

Two voyages, making a total run of 5,063 marine leagues, have been executed. The first departure was from Mauritius on the 17th of September.

We had also made preparations to open the Batavia line at the end of 1864, and the first voyage was to have taken place in the beginning of 1865, but the loss of the Hydaspe rendered a postponement inevitable.

The Colonial Government of Java spontaneously resumed, with one of the steamers of the Royal Navy, the postal service which had been suspended in consequence of the announced opening of our line. This friendly determination, which shows the interest attached by the great Dutch colony to the working of the French postal service, was already in the course of execution before the request for aid, which we had addressed to Batavia, could have reached the Dutch authorities.

The Dutch Government, on the request of our Minister at the Hague, had immediately recommended the colony to give a favourable reception to our demands, and both at the Hague and at Batavia we have had to express the thanks which we now feel it our duty publicly to repeat.

No change has occurred in the obligatory itinerary of our lines in the Atlantic. In the Indo-Chinese seas, your packet boats, notwithstanding the accidental obstacles which have impeded their progress, have obtained a result which will certainly strike your attention. They have, from the very outset, realised conditions of regularity equal to those of the great English company which started twenty years before us.

With regard to our prospects in these distant waters, this result is of some importance, it explains the confidence already displayed towards you by the public, and is a guarantee that our efforts will not fail to meet with their reward.

SECTION II.—EXPENDITURE.

The expenses of all kinds for the year 1864 amount to 38,131,872f 53c. They belong to the Indo-Chinese lines as well as to those of the Atlantic and the Mediterranean, whereas in 1863 the working account embraced only the last two of your services. The terms therefore do not admit of comparison and we shall only lay before you here the principal reflections suggested by the examination of the working of 1864 with regard to the expenditure.

In general, under the influence of the increased price of all articles which has taken place during the last three years in all the regions visited by our packets, your expenses have followed an ascending scale. Notwithstanding the firm resistance which we oppose to this tendency, we have to notice its progress beyond Suez as well as in the Mediterranean, and this year even in the Atlantic Ocean. Higher rates for freight, an augmentation of the costs of keeping the shipping in proper condition, owing to repairs of unusual importance and the extraordinary number of boilers that have required changing, an increase of expenses, as well at Marseilles as abroad, arising from the exceptional development of our traffic, sufficiently explain, in the Mediterranean, the augmentation we have to record.

We have never attempted to conceal the fact that the expenses of the Indo-Chinese service would be heavy, especially in the first years of a navigation in some sort extemporised and kept up at so great a distance with means unavoidably inadequate. The event has confirmed this impression, though our estimates have not been exceeded to any great extent. Our first duty was to satisfy that portion of the public whose goodwill we are bound to conciliate. We have spared no effort to attain this end, and it is from experience only, from the more complete knowledge of the difficulties with which we have to struggle, from the progressive formation of a staff trained to economical management on board, as well as from the completion of the establishments for repairs which we have had to create in the principal ports beyond Suez, that we can hope to attain a reduction of the expenditure at present entailed by this great undertaking. These ameliorations are the object of our incessant solicitude. We have good reason to believe that our efforts will not be in vain, and what encourages us to persevere is the prospect of the advantageous traffic offered in exchange for these sacrifices by the new lines, the working of which is now for the first time submitted to your notice.

SECTION III.—TRAFFIC.

Considered as a whole the progress of our traffic continues satisfactory. For the last three years it has constantly increased, especially in the Mediterranean. In 1863 the progress in the conveyance of merchandise was accompanied by a diminution in the number of passengers. In 1864 the freight has increased, and at the same time the circulation of passengers has acquired such activity as to almost compensate for the loss experienced in 1863. On the Italian lines alone the number of passengers and receipts from them have followed the downward tendency, which they so strongly manifested during the preceding year.

Another characteristic feature of your traffic is, that every year a smaller portion of it proceeds from the Government. These transports, which during the first years of your enterprise gave considerable freights to our vessels, have become of minor importance; they do not at present represent 4 per cent. of your receipts.

We know that the state does not apply to others for the aid which it formerly obtained from us on a large scale. Most of the transports for the Government, especially of stores, are made by the vessels of the Imperial navy. But the results established, after the late wars, justify the conclusion that the keeping of a special fleet of transports is attended with expenses so heavy that, all things considered, the Government will find it cheaper to have recourse hereafter to a co-operation which has proved its utility, and has never been burdensome. If we dwell upon this point, it is not because our steamers have been short of freights, for it is a double law of the progress of commercial transport by steam, that as the quantities carried increase, the freight always falls, and on most of your lines you have been obliged to touch at more ports to conciliate these two necessities of commerce. But we have been desirous to again show that we do not lose sight of the duty of being ready to respond, as far as our means admit, to the requirements of the public service, whenever the Government may be disposed to employ us.

GENERAL STATISTICS OF THE TRAFFIC FOR THE YEAR ON THE WHOLE OF OUR LINES.

Number of passengers		191,698
	Packages.	Weight.
Goods carried	1,878,513	151,260 tons
Specie carried	407 millions.	

We will not attempt to establish a comparison of our total traffic this year with that of 1863, since the latter did not include the Indo-Chinese lines; but we will compare, as we usually do, the results obtained in each of the great divisions of our service.

MEDITERRANEAN AND BLACK SEA.

On the whole of these lines, 1864 has realised, as compared with the preceding year, an increase on the receipts from passengers of 8·38 per cent., and on the freight of merchandise 16·62 per cent.

The proceeds from merchandise represent 60 per cent. of the total.

A great proportion of the improvement in the receipts for merchandise has been owing, it must be acknowledged, to the extraordinary development given to the cultivation and exportation of cotton in the countries bordering on the Mediterranean, which developments, the rebound of the events accomplished in

The Investor's Manual *is now sold separately, price* 9*d stamped,* 8*d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price,* 6*d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

PROPORTIONATE REPRESENTATION OF ENGLAND: NORTH AND SOUTH.

In another portion of this Journal we have treated at some length on one of the probable consequences of the extinction or material diminution of small boroughs,—a consequence which deserves the earnest attention of sincere Reformers. But while weighing well this matter, it is impossible to shut our eyes to the great changes which have taken place in the relative population and property of different parts of England, not only since the present system of representation grew up, but even since the very considerable adjustment which took place in 1832. It is impossible to maintain that the North and South of this island—the industrial and the agricultural districts, as they may be roughly classified—are now credited with their due relative number of representatives,—or to deny that both policy and equity point to the propriety of a second and more decided readjustment.

In former days the South of England was by far the most important section of the country. Not only were the soil and climate superior to those of the North, but the population was far larger and the wealth far greater. Its people, too, were more energetic and enterprising; most of the industrial occupations were carried on in the South; maritime skill and courage were chiefly developed there; and the ports of Devon and Somerset were what those of Lancashire and the Clyde now are. Of course all this impressed its stamp on the Parliamentary representation: the South monopolised far the largest proportion of members; Devonshire and Cornwall in particular swarmed with small boroughs; and when the great disfranchising Bill of 1832 was passed, for one borough extinguished in the North, there were probably half a dozen extinguished in the South. In the course of time, however, with the discovery of coal and still more with the invention of the steam engine, new industries sprang into existence, and old ones took a new development; and both old and new congregated chiefly in the North and North-midland parts of the island, where coal and iron are found in the greatest abundance. Vast fortunes were made; vast populations grew up; Manchester and Leeds took the place of Gloucester and Stroud, and the Mersey became immeasurably more important than the Avon. The new interests demanded and obtained some representation—but not enough. Many large towns in the North obtained members; many small towns in the South had to resign in their favour;—but the fact still remains, that a considerable number of large towns in the North are still unrepresented, and a considerable number of small ones in the South still send members. According to a return made in 1859, out of 57 boroughs with fewer than 500 electors, no less than 48 were in the South of England.

But the relative wealth of the North has increased even faster than its population, and is augmenting every year. Its claim to an increased number of members is thus twofold; for this wealth represents *two elements* of national character and power;—*first*, the capital and its owners, and *secondly*, the artisans whose intelligence and industry have been the main elements in the creation of that capital. Both these are indisputably entitled to far greater direct Parliamentary weight than under our present system they possess. We hope next week to give some careful and reliable figures bearing on this subject; but they are not very easy to obtain, nor are they very recent. If, however, we divide England into two nearly equal parts, drawing the line south of the counties of Chester, Stafford, Warwick, Leicester, Rutland, and Lincoln, we believe we shall find that the number of county and borough members together assigned to the Northern division in 1832 bore a very inadequate proportion to either its relative population or property, and that this proportion has become yearly more inadequate ever since. In 1851 it stood nearly as follows. The Northern half with a population of about 8,000,000 returned 169 members in all. The Southern half with a population of 9,000,000 returned 294 members. The property rated under Schedule A was 25,000,000*l* for the Northern division, and 31,000,000*l* for the Southern. The other Schedules would we apprehend give a very different result.

MR DISRAELI AND THE ULTRAMONTANES.

Mr Disraeli's speech on the Roman Catholic Oaths Bill, on Monday night, ought to be clearly understood and widely canvassed at the elections. On the particular point at issue, the oath to be administered to Roman Catholics, his line was drawn so fine as to be scarcely intelligible. Anxious at once to avoid any rock of offence to the Protestant Tory squires, and any rock of offence to the reactionary Irish Catholics, he steered so clear between the opposing Scylla and Charybdis that it was very difficult to say to what shore he was steering, or if he had any in view at all. But though on the particular point his vote may have disarmed the Tories, and his argument pacified the Roman Catholics, it was a case in which the line of argument was of infinitely more importance than the vote; for the vote told only upon a matter of detail, of personal significance only to individuals and interesting the country at large rather as a matter of abstract justice than as involving

Digitized by Google

practical consequences. But the argument which Mr Disraeli threw out to appease the Roman Catholics is one pregnant with a great policy. We know, indeed, that Mr Disraeli will never have the power to carry out that policy, but it is not the less desirable that the country should understand clearly what are the views deliberately entertained by the Conservative leader in the House of Commons,—the man whose fertility of counsel and political ingenuity practically affect the cabinets in which he sits more than the cool judgment of his leader could justify. Now, Mr Disraeli's speech was no less than an elaborate argument to convince the Roman Catholics that they would best secure the ends at which they aim in Europe by conciliating the English Tories, acquiescing in the Protestant Church of Ireland, and, if necessary, taking personally disagreeable oaths, for the sake of the compensation which the Tories will give them in the shape of a foreign policy directly favouring the temporal power of the Papacy. If Mr Disraeli's speech did not mean this, it had no meaning at all. "I would ask them "[the Roman Catholics] to recollect," said Mr Disraeli, "that "thirty years ago the Roman Catholic interest made a part- "nership with modern Liberalism, the avowed and absolute "object of which was the destruction of the Established "Church in Ireland. That compact and confederacy were "carried on under the most favourable circumstances; and in "consequence of it, they have virtually had the government "of England for the last thirty years; they have, with very "little intermission, regulated the policy of this country, and "greatly influenced the policy of Europe. And what has "been the consequence of that alliance between Roman "Catholics and Liberalism upon the Established Church in "Ireland? That Church still exists. Certainly, if any change "has occurred, it is no diminution of its influence, nor any "decrease of its strength. I think I may say, in the language "of candour and without exaggeration, that its moral autho- "rity has been increased, and that those who minister to its "offices are generally recognised as men who, for their piety "and learning, and for the fulfilment of the higher and "loftier purposes of existence, are not second to any "body of clergy in the world. And what, I would ask "my Roman Catholic colleagues in this House, has been "the effect of that alliance upon another Church and upon "the Church which is justly entitled to their affection and "devotion?.....We know that the result has been to "destroy the temporal power and in some degree injure the "spiritual power of an ancient throne; *a result which, for "the sake of European peace, and expressly for considerations "connected with this country, is, I think, to be regretted.*" If this does not mean that the Roman Catholics should let the Irish Church alone, and swallow all the tests which Tories like to exact, in consideration of the services which a Tory administration would render to the Pope, both as a spiritual and temporal Sovereign, Mr Disraeli employs language to veil his thoughts, not to express them. That, at all events, is the meaning that is conveyed to the Roman Catholics, and which the Roman Catholics evidently clearly understand. Mr J. Pope Hennessy showed how clearly he had realised the proffer of Mr Disraeli, when only two days later, on Wednesday, he gave his negative to Mr Goschen's Bill for repealing the test for Roman Catholics, Dissenters, and Jews at Oxford, and publicly declared that Roman Catholics did not wish for the privilege of sending their children to Oxford, but preferred to keep them from all contact with heresy, and again wished to do all in their power to prevent any further inroad on the dogmatic principle of the English Church and Universities, which they regard as the salt that keeps them from corruption. This was, no doubt, a partial acceptance—not, indeed, as to the Irish Church, but as to purely English questions—of Mr Disraeli's advice to the Irish Catholics to conciliate the Tory Protestants. Mr Hennessy intimates that they will do all in their power to support the dogmatism of the English Church, if the Tories will do all in their power to sustain the dogmatic position of the Roman Church. We may be quite sure that the Tories in general will never do anything with *that* object. But it should be widely known that Mr Disraeli has pledged them, as far as a distinguished member of the Tory Cabinet can pledge them, to sustain, by a European policy favourable to the temporal power, the throne and authority of the Pope. What "the considera- "tions connected with this country" may be, which make the downfall of the temporal power of the Papacy so regrettable to Mr Disraeli, he does not tell us. Probably he thinks that the Pope's influence is henceforth more likely to be used in subservience to the wishes of some particular country, be it Italy, France, or Austria, and more likely, therefore, to be employed as a dangerous political weapon in this country. To avoid this or some other equally chimerical danger, it appears that he would have been prepared, had he been in office, to thwart as much as possible the national aspirations of Italy, and to aid France in forcing the federal scheme, or some scheme as favourable to the temporal power of the Pope, on the Italians. Let it be recognised, then, that for considerations of high policy, Mr Disraeli wishes the Tory party to prop up a Government that they consider an anachronism and an injustice in a country not their own. For of course, when he affirms that the alliance of Liberalism with Roman Catholicism has led to this regrettable result, he must mean to imply that an alliance of Toryism with Roman Catholicism would have prevented or retarded it, and that such an alliance will even yet modify, if not undo, the evil that has been done. If that be only well explained to English constituencies, we need scarcely fear the return of Mr Disraeli to power. "The Tories for the Papacy, and the Papacy for the "Tories," is scarcely an electoral war-cry which Mr Disraeli's ingenious friends Messrs Taper and Tadpole would recommend to him.

We do not mean of course to deny (what we have often asserted in these columns) that Mr Disraeli is quite right in supposing that a greater *natural* affinity exists between the Roman Catholic politicians and the Tory party than between the Roman Catholic politicians and the Liberal party. Those who accept unreservedly the extreme principle of authority in matters of belief are not likely in the long run,—though here and there a Montalembert or a Sir John Acton may be found,—to feel much sympathy with the political principles of Liberalism, which are founded on the deliberate preference for even an inferior *self*-government, to a superior government by arbitrary though enlightened power. It is perfectly true, that if in all things the Roman Catholics were absolutely the equals of Protestants, both before the law and in the estimate of the Government—as they are in some measure in England though not in Ireland—it would seem to be a matter of course that the Roman Catholic party would support the Government most inclined to alliances with arbitrary and despotic Powers, and most inclined generally to take a high hand with popular movements. That is a truth of course; yet so little would this co-operation of the Roman Catholic politicians with the Tories promote the objects of the Tory Protestants, that we doubt very much whether a year or two of such an active co-operation might not destroy the Tory party in England. But, in the meantime, there is another question for the Roman Catholics. The only English party, as Mr Disraeli admitted, in any way disposed to deal out to them equal justice in Church matters, is the Liberal party. Not from our sympathy, but from our deliberate justice, the Roman Catholics may hope to extract both some redress for the national injustice committed in supporting the Protestant Church of Ireland, and for many minor injustices, such as the insult involved in the special Catholic oath. Is it worth their while to forego these advantages for the sake of possible concessions to an ultramontane foreign policy in case Lord Derby came into power? Is it expedient for them to decline the substantial boons we could give for the sake of a despatch or two from Lord Malmesbury to M. Drouyn de Lhuys or Signor Lanza objecting to the entry of the Italian Government into Rome—a despatch which, if it could get itself written, would probably turn out the Government that authorised it as soon as it became known? We do not pretend that the Roman Catholics can possibly *prefer* the general policy of Liberals (in matters which do not affect themselves) to the general policy of Conservatives. But we do maintain that while there is still so much practical injustice in the treatment of Catholics as we see in the policy of our Irish establishment, and have quite lately seen in the Tory reluctance to let the Roman Catholic prisoners in our gaols have paid chaplains of their own faith, they would be very foolish to accept Mr Disraeli's proffer, and vote for a Government which will decline even to *consider* the redress of these wrongs, in the vague hope that its foreign policy might be a shade more Austrian, a shade more despotic, and a shade more favourable to the temporal power of the Pope than that of the

Digitized by Google

Liberal Government. It is not even quite certain that the last would be so. Mr Disraeli's private opinion is, indeed, known, and is evidently caught at by Mr Hennessy; but Mr Disraeli will never be Foreign Secretary, and Lord Derby will probably consult the Tory Protestants in adjusting the finer shades of his papal diplomacy rather than his clever Chancellor of the Exchequer. Tory Protestantism is favourable no doubt to all despotic governments but one; but that one is the Pope's. It is quite possible that in spite of this compact between the Tory leader in the House of Commons and the Ultramontanes, the Pope's temporal power would be treated with as little ceremony by a Tory Protestant Government as by a Liberal one. Mr Odo Russell was at least authorised by Lord Russell to press the asylum of Malta on the anxious and dejected Pope:—would the Tory squires have allowed their Government to do even as much as this for the person whom Mr Newdegate regards as Antichrist, and almost all of them as a dangerous and aggressive competitor with the English Crown for something more than spiritual authority in this realm?

MR JOHNSON'S PLAN OF RECONSTRUCTION.

President Johnson has lost no time in announcing his plan for the reconstruction of the Southern States. On the 29th May, a few days after the surrender of General Kirby Smith had terminated the war, he issued what is called in the United States a proclamation, but what is really an executive order for the reorganisation of North Carolina, that State being selected for the experiment probably because the inhabitants of its mountain region are supposed, truly or falsely, to be not unfriendly to the Union. Under this order the President, asserting that he is bound by his oath to provide North Carolina with a Republican Government, appoints Mr Willliam W. Holden Provisional Governor, and directs him to call a Convention composed of "that portion of the people "of the said State who are loyal to the Union and no others," and this Convention is to remodel the Constitution of the State, and either settle the qualifications required for office, or empower the Legislature it may create to do so. The loyal persons are further defined as those only who have been admitted to amnesty under a proclamation of the same date, that is who have not served the Confederacy in any high civil capacity, or any military capacity higher than colonel, and who do not own 4,000*l*, and who have taken an oath to uphold the authority of the United States and all measures of emancipation taken during the war. No other provisions are added, the details of reconstruction of every kind being left to the Convention, which is made for the nonce a Constituent Assembly.

The first thing which strikes an observer in this plan is what we may call its restricted illegality. Mr Johnson does not venture to do what any other conquering Government in the world would do, create a new administration by decree, nor does he declare that the State has relapsed into the condition of a territory. He recognises North Carolina as a State, and entrusts the work of reconstruction in one way to itself, but, nevertheless, he overturns the very first principle of State Government by decreeing that legislative authority shall belong to the minority, and appointing an entirely extra legal official as Federal Governor. We quite admit that both acts, the promotion of the minority and the selection of the Executive, may have been indispensable, but the effort to give them a legal colour is clearly abortive. If North Carolina be a State within the Union, then the legal authority vests in the Legislature which was in existence before secession, or if that be held to be dissolved —as it may, the members' terms of office having expired during the war—then in the whole body of the electors qualified by the State constitution. The imposition of a new oath by Federal authority is as illegal in itself as the upsetting of the State itself would be, and if the one is justified by the plea of necessity, so might also have been the other. The truth is we imagine that Mr Johnson is himself rather careless whether he oversteps the Constitution or not, being essentially of the jacobin rather than the legal turn of mind, but is still unwilling to arouse a ferment among the democrats of the North by any visible increase to central authority. The work to be done must be done in one sense despotically, but he prefers that the despotism should be that of the State itself rather than that of the Government of the Union. His policy is perhaps in that respect as wise as any he could have devised, and the only serious question for Englishmen is whether it will work. Will the new and improvised Legislature, when set running, have the will and the power so to remodel the South as to bring its institutions into harmony with those of the now triumphant North?

The balance of probabilities, and no reasonable politician will assert that he sees any certainties as yet, seems to us in favour of Mr Johnson. In the first place, it must be remembered there is no chance of any overt resistance to any measures which Mr Holden may adopt. Not only is he supported by a military force just acknowledged by the State itself to be irresistible, but he has behind him many of the people inhabiting the hill district, all settlers from the North, all who habitually adhere to power, and, if necessary, for a final argument, all the negroes. Against him, on the other hand, will be only the relics of a defeated soldiery, a few powerless civilians, and the old planters, none of whom are amnestied, and who may therefore be arrested at discretion. He will no doubt secure a Convention either devoted to the policy of the Cabinet, or at all events ready to accept the three inevitable conditions,—abolition without compensation, the restriction of the suffrage to voters who will take the oath, and the limitation of office to those who have not actually taken part in the war. A Legislature thus formed cannot contain any person formerly distinguished in the State, cannot contain any wealthy man, for all who own 5,000*l* are specially excluded, and cannot contain many much above the class of yeomen, of whom a certain number have always existed in the midst of the great plantations. With such materials and irresistible power it will not we should imagine be very difficult to reorganise white society, to sell the great plantations, to establish a system of common schools, to create efficient local municipalities, and perhaps to pass special laws against disorder and brigandage. These things accomplished, and the lower class of whites convinced that the tenure of their lands depends upon the maintenance of the new system, white society will be strong enough to march on alone, is at all events little likely to make any further attempt at secession.

There remains the question of questions,—the relation of the white population to the coloured race encamped among them,—and it is this which will tax to the utmost the statesmanship of Mr H. Johnson and his agents. The object, it must be remembered, is to establish freedom securely, without either making the South unendurable to white settlers, or permitting the existence of a pauperised class of vagrants, and two policies have for this end been suggested in the North. One, advocated by Mr Chase and the old Republican party, is to abolish all distinctions of colour summarily, to declare the negro a citizen, entitled to all the advantages of one, including a vote, which will practically give him possession of the balance of power. This plan has the advantages of finality, of leaving the Government very little to do, and of securing to the victorious party a majority trustworthy enough to give its policy consistency and permanence. On the other hand, it compels the State to incur the serious risk involved in placing the suffrage in the hands of a class not qualified by education, or property, or the habit of freedom,—a class who might be deluded by plausible leaders into throwing off the burden of taxation or even into socialistic schemes. It involves, also, the risk of social conflicts, which the State may find it difficult to put down, the white electors, for example, driving the black ones from the polls, white children refusing to sit in the same school as mulattoes, and so forth. Similar difficulties have been faced and conquered in India, but they have been overcome by an absolute Government not responsible to the dominant class, and even that Government has been obliged to abstain from placing coloured men above white soldiers or sailors, a trifling mistake of the kind having produced overt mutiny on board a man-of-war. The other policy, which appears to be accepted by most democrats, is to consider the negro free, but in a state of pupilage, to fix a minimum rate of wages, but compel him to work. This system has the recommendation that it would, if honestly carried out, educate the negro, and allow the next generation, who will be taught in the schools, to grow up before they are finally left to take care of themselves. On the other hand, there is the drawback that honest agents for such a task may not be readily found, or found at all. The resident population have been accustomed to consider the negro little above a beast of burden, and to receive from them marks of respect which they will very soon

Digitized by Google

begin to refuse. The emigrants, on the other hand, are not accustomed to negroes, do not like them, and will be very apt to use their power as employers of labour so sternly as to reduce their hands to a condition little above that of slaves, indeed it may be in some respects, such as the care of the aged, even worse. Under such circumstances, unless the negro has some power of making himself heard in the Legislature, the tendency of that body will be to side with employer against employed, and the laws passed under the influence of this feeling must either discriminate between white and coloured persons, in which case many of the evils of slavery will revive, or they will disgust the white labourer, and end in the worst curse of slave communities—attaching to toil, in itself and simply as toil, a character of disgrace. Upon the whole we are inclined to believe that Mr Chase's revolutionary scheme, though infinitely the more dangerous, will be, if it succeeds, greatly the more successful, while the democrat plan, though safer, will produce, even should it succeed, indefinitely less result. Upon the whole, remembering that the instinct of the negro, like that of every other coloured man, will be to cultivate patches of soil upon his own account and not to take wages from anybody, that the supply of land is inexhaustible, and that the victorious North will be jealously watchful to prevent the growth of a new aristocracy, it seems probable that the reconstructed Legislatures will, after a short spasm of conflict, agree that the easiest way to deal with the irrepressible negro is to leave him alone, and permit the strong compulsion of hunger to act upon him as upon all other human beings.

POLITICS AS A PROFESSION.

Mr Gladstone opened a very grave question the other day when, defending his son's candidature at Chester, he maintained that statemanship, like every serious calling to which men devote themselves, was a profession, and that it has this in common with all other professions—that no man can expect to attain high eminence or great success in it unless he enters it while young, and gives himself up to it pretty exclusively. At a moment when the subject of Parliamentary Reform is about to be mooted on a hundred hustings by men who have never given any serious thoughts to its many complications and its momentous consequences, it will not be amiss to consider this one of the several difficulties which lie ahead of us in the course of action in which so many zealous politicians are anxious to embark the country, and which many more have come to regard as inevitable, even if not desirable.

Mr Gladstone is perfectly right: Statemanship—political business—is a profession which a man must learn while young, and to which he must serve a practical apprenticeship; and in England the House of Commons is the only school for acquiring the necessary skill, aptitude, and knowledge. Those who enter in middle life may be admirable senators, sagacious legislators, competent checks upon an extravagant or an interfering Government, excellent representatives of the popular feeling,—but they will scarcely ever become Ministers, nor would they be very successful and capable Ministers if they did. There are many reasons why this should be so. Office requires much drudgery and routine training,—and men of five and forty do not like this. They do not want to go school at their time of life. Moreover, they would half despise inferior posts, and yet could scarcely, unless in very exceptional cases indeed, aspire to superior ones. If they have attained wealth—and most men who enter Parliament late in life have done so, and go into Parliament principally because they have done so—the emoluments of office are no object to them, and its labour would be a nuisance to them, while their vanity would be scarcely flattered by a position which confers little real power, and makes them mere Government subordinates. If they have attained eminence, political or other, they cannot accept subordinate posts without compromising at once their opinions and their dignity; and it is only in the very rarest cases that a seat in the Cabinet can or would be offered to them,—while it is still more rare that it would be advisable either for themselves or for the country that they should accept it. Mr Bright, and Mr Cobden, and perhaps Mr Forster, are the only names that now occur to us, of politicians who did not enter Parliament young and served no apprenticeship to political business, who appeared naturally fitted for and entitled to claim Ministerial position; and none of these gentleman could well have taken subordinate positions which would involve to a great degree silence and self-abnegation;—while the extreme opinions of two at least of them (to say nothing of rigidity of character and habits) would place Cabinet office beyond their reach, at all events in the first instance. Mr Cobden is about the only exception that could be pointed to; and he was not offered a seat in the Cabinet till so late in life that his Ministerial career must have been short, and might not have been efficient. We cannot at this moment remember a single instance of any British Minister of the least note who did not enter Parliament at an early age, and devote himself to politics as a profession,—unless, indeed, Mr Lowe and Mr Stansfeld may be regarded as instances;—and certainly they are scarcely exceptions which could be quoted to disprove the rule.

Now, it is of the greatest consequence to the country that we should have a secure provision for a constant and adequate supply of embryo statesmen, of future Ministers. Parliament with us is not merely a legislative body:—it is the body out of which exclusively our Executive Government is chosen,—and it is not well, and indeed cannot be permitted, that the Government should be formed from the Upper House only, or chiefly. We must have a supply of young Commoners who are qualified, and who aspire, to become Ministers and in time Cabinet Ministers. How is this supply to be provided? In former times, as we know, it was provided mainly by the small boroughs. Young men of great families or aristocratic connections often found seats for counties, and do so still, and will always do so. But young men of promise, of early ambition, of superior powers, of independent means, who wished to devote themselves to political life and felt within them the ability to rise to eminence, had seldom much difficulty in obtaining seats for small or close boroughs. While sitting for these, they had opportunities of showing their genius and winning their spurs, and, having once made themselves a name, they were pretty sure of a permanent seat, and were often afterwards asked to represent large cities. But large cities never chose them in the first instance—unless, indeed, they chanced to have great local influence and connection. It would, we believe, be impossible to point to a single name of political and *Ministerial* eminence who, not being an aristocrat or county magnate personally or by near connection, did not originally sit, and has not habitually or most frequently sat, for small boroughs. Close boroughs are all but extinct; small boroughs still remain in sufficient numbers to afford openings for some of the young men, of whom future statesmen may be made; but unfortunately as a fact, these seats are generally secured either by the scions of some noble or quasi-noble family, or by men of mere wealth, or mercantile or railway influence. If, as most Parliamentary Reformers either demand or are prepared to concede, these small constituencies are to be swept away or largely reduced,—how are the class of young men of whom we are speaking, and whom we want for our future Ministers, to find entrance into Parliament—young men, that is, who have nothing to recommend them but talent, honesty, independent means, laudable ambition, and a resolution to devote themselves to the most honourable and arduous of all professions,—young men who are neither extreme Radicals, nor millionaires, nor younger sons of Peers or great Statesmen, nor members of mighty county families?

That is the problem—and it is no easy one to solve. Counties, as we know, will not return them,—nor will large towns. Large towns will often return Ministers of established fame—never embryo Ministers of mere promise. No actual—and with perhaps one exception, no possible Minister—ever *entered* Parliament for the first time for a great popular town constituency. Of eighty-one members who now sit for boroughs over 50,000 inhabitants, only eight are, or have been, or can be expected to be Ministers,—and of these four are lawyers, and hold or have held mere legal office. Nothing can be more natural; no political fact can be expected to be so constant. There are three sorts of men whom large boroughs will elect. *First*, popular orators, holding advanced opinions, echoing and representing popular creeds, sympathising warmly with the masses, devoted to their interests, and supporting or submitting to their dictation. Mr Bright, Mr Forster, Mr Stansfeld, will always be sure of seats for the great centres of industry,—and it is well they should be; no fitter or abler representatives, and few more useful senators, could be found. But besides these, and in far larger numbers, will be found men who are chosen not for oratorical ability,

Digitized by Google

or for any ability at all, but simply because they represent the radical opinions of the numerical majority.—*Secondly*, large boroughs will choose official statesmen of proved ability and settled eminence, who are liberal enough for most constituencies, and would reflect honour upon any. Thus Lord John Russell sat for London, Mr Villiers for Wolverhampton, Sir H. Cairns for Belfast, Sir R. Collier for Plymouth, Sir C. Wood for Halifax, and Mr Milner Gibson for Manchester and Ashton. But not one, we believe, of these gentlemen sat for those places to begin with,—or if they did, it was the lawyers who had already made a name in another field.—*Thirdly*, and chiefly, and properly enough, great cities will return fellow-townsmen—men who have endeared themselves to those among whom they live—who have attained local estimation and local eminence by local services—who have grown wealthy by years of industry and influential by years of municipal attention. Thus *Birkenhead* returns Mr Laird; *Blackburn*, Mr Hornby and Mr Pilkingtou; *Oldham*, Mr Hibbert; *Leeds*, Mr Baines; *Nottingham*, Mr Paget; *Liverpool*, Mr Horsfall and Mr Ewart; *Manchester*, Mr Turner and Mr Bazley, and so on. This, too, is quite right, and desirable in a degree as well as natural. But all these men, by the very presumption of the eminence they have attained, and the wealth they have acquired, and the services they have rendered, must be men of mature age—untrained for ministerial life, and too old to begin such training,

The consequences are inevitable, and are already beginning to be obvious. As the older race of statesmen, who began their career in the days of close boroughs, are dying out, few of the same class are rising up to take their places; and the result is a marked tendency in each successive Cabinet to become more and more aristocratic. The members out of whom future Ministers are to be made belong in an ever-augmenting proportion to great county or great noble families; a larger and larger number of the Cabinet sit in the House of Lords, or are closely allied with it; of the present Whig Cabinet only three are unconnected Commoners, and of the probable Tory Cabinet scarcely more;—so that unless Reformers are very careful and foreseeing in their operations, unless they are vigilant and sagacious to provide substitutes for what they propose to destroy or change, measures which are devised in the popular interests and intended to give preponderance to popular views, may end in being aristocratic in their practical operation to a wholly unexpected degree. A Ministry composed of Peers and landed gentry, with a House of Commons composed of Radicals, Railway Directors, elderly local celebrities, and county magnates, is not exactly the combination which thoughtful and learned Liberals would most desire to bring about.

METROPOLITAN AND PROVINCIAL BANK, LIMITED.

The following is the report of the directors presented to the shareholders at the sixth ordinary meeting, held at the London Tavern, Bishopsgate street, on January 13, 1865, Charles Gilpin, Esq., M.P., in the chair:—

The directors regret that they cannot congratulate the shareholders on the satisfactory progress of the bank during the half-year ending the 31st December last. They have, unfortunately, to report that a considerable amount of previously reserved profit has been absorbed, and they cannot, therefore, at this meeting, recommend the payment of a dividend. In the preparation of the balance sheet, provision has been made, amply sufficient in their judgment, for every bad and doubtful debt,—the usual proportion of preliminary expenses has been written off,—and the current expenses have been paid, with the exception of the amount, appropriated under the articles of association, to the remuneration of the directors, which, in the present instance, they propose not to accept. The position of the bank, on the 1st of January, may be briefly stated as follows, viz.:—A subscribed capital (held by 535 proprietors) of 1,934,700*l*, a paid-up capital of 309,380*l*, a reserved fund of 10,000*l*, and a balance of 3,073*l* 5s 10d carried forward to the profit and loss new account. It is an encouraging fact that, while consequent on the condition of the money market, during the period under consideration, the customers' balances have decreased in amount, no material diminution has taken place in the number of the accounts; and the directors have great confidence that by careful and judicious management, and the co-operation of their shareholders, they will be able to place the bank in a greatly improved position.

STATEMENT OF ACCOUNTS.

Dr. Liabilities.	£	s	d
Amount of paid-up capital	309,380	0	0

	1,368,745,024	55	.....	1,342,807,436	69

The Bank of France return is more favourable this week than for a long time past. It presents an increase of 38,726,000f in the discounts, and a decline of more than 13,000,000f in the stock of coin and bullion. The circulation of notes has increased by more than 28,000,000f, and the deposits have declined by more than 17,000,000f.

The Bourse continues to display discouragement. Almost all securities are lower to-day than they were last week. In the Comptier d'Escompte there has been a heavy fall, owing to the belief that it will suffer from the disasters at Bombay. There is, however, it appears, exaggeration in what is said on the subject. The Southern Railway has begun to be attacked by speculators, and there has been a serious fall in it. The two Mexican loans have also declined considerably. Even the Italian loan has been affected, notwithstanding the high banking patronage it enjoys, The cab-drivers have struck for an advance of wages, and that has brought down the cab (Petites Voitures) shares. The North of Spain Railway, which is protected by the Credit Mobilier, is in a deplorable plight, owing to the inconceivable refusal of the Spanish Government to satisfy the just demands of the company. It stands to-day at 188f 75c; ten months ago it was 560f. The Alicant and Saragossa, though depressed also, is in a much more favourable position; it is at 315f. The total revenue for 1864 was, it appears, 24,008, 998f, and the balance which remained, after deducting the working expenses and the charges, was 6,120,581f. It was consequently only necessary to take from the reserve 1,079,481f to make up 6 per cent. interest on the shares,

Digitized by Google

and this leaves the reserve at 10,257,690f. The following are the quotations of the Bourse:—

	June 8.	June 15.

The Corps Legislatif has been occupied during the whole of the past week with the budget. Honourable members have not, however, discussed it, the different items of which it is composed having been treated by them as so many pegs on which to hang discourses on all sorts of subjects, from municipal administration down to cock-fighting in Flanders. They have, however, voted with considerable docility the different sums demanded. Their examination of the budget, if so it can be called, is not yet terminated.

A Bill presented to the Legislature fixes the deficit of the budget of 1863 at 22,131,099f 90c.

The payment of the second call of 80f on the new Mexican loan has just taken place. The Mexican financial commission, of which Count de Germiny is the president, issued a few days back a notification that the bonds on which the call may be in arrear will not be allowed to take part in the first drawing of the lottery on the 3rd July next. In the Corps Legislatif, the adjunctive of a lottery to the loan has been denounced as scandalously immoral. One might perhaps understand such language in England, but morality, like theology, changes with latitude, and what is objectionable in England is lawful in France. The French people have a perfect passion for lotteries, and get them up for building museums and churches and sustaining charities, and all sorts of purposes; and therefore to denounce one attached to a loan as immoral is absurd. Moreover, Austria and Prussia have lottery loans, and at Madrid and Rome lotteries are part of the public revenue; and surely there can be no iniquity in Mexico doing what other States do. The high rate of interest to be given on the loan has also been complained of; but it is not higher than the average value of money in Mexico, and not higher than numerous other States pay. Even France herself when in distress, after her long wars, had to borrow at about 10 per cent. It was alleged in the Corps Legislatif that Mexico will never be able to pay what she owes. During the last year, however, her revenues have increased considerably, and all authorities agree that if she could but get peace and quiet she would become very rich.

The Chamber of Commerce of Lyons has printed its answers to the forty-two questions proposed by the Superior Council of Commerce charged with the inquiry respecting banks, currency, the rate of interest, commercial crises, &c. In the opinion of the Chamber, the crisis of 1863 was caused in England by an excessive development of business, speculative and foreign investments, at a time when large exports of gold and silver had to be made to pay for cotton; and the English crisis brought on that in France. The Chamber thinks that the development of commercial liberty cannot fail to render crises rarer. It says that "the rate of interest is regulated by the greater or less abundance of capital, and the greater or less demand for it. The rate of interest," it continues, "is not confounded with that of discount, the former being the price of the lending of capital in the general market, the latter the price of the lending of capital—money in a special market, that of commercial bills. Both are variable by essence, but the second, in the present organisation of credit, is determined by the oscillations in the stock of coin and bullion of the Bank of France." The Chamber holds that the value of gold and silver has fallen during the last ten years. It thinks that what has recently reduced the amount of disposable capital is the exaggeration of all sorts of enterprises. It does not think that the extension of currency in France has prevented the accummulation of savings. It is of opinion that Credit Companies, by their frequent demands for capital, have made money dearer, but that on the whole, by the activity they have given to production and circulation, they have done good. It says, that by undertaking too much, they may hasten a crisis, but that under the principle of liberty they cannot be interfered with. It declares that the investment of French capital in foreign speculations, though depriving national enterprises of a certain amount of co-operation, do good to the country. It says that the import and export of the precious metals undoubtedly influence the rate of discount, and through it all commercial transactions; but that such operations cannot be prevented; whilst as to the means of limiting their effect, if any, it is for the inquiry to demonstrate; the Chamber thinks that the facilitating of commercial transactions by means of cheques, transfers, clearing houses, &c., is desirable; but it makes the remark that "in countries in which the part played by money is more and more reduced, it comes to pass that the mass of affairs turns on such a narrow metallic basis, that demands for metal, even when they are made on a small scale, promptly bring on a crisis." It thinks that the use of paper money presents no inconvenience so long as the convertibility of it is certain. It is of opinion that the "unity of the bank note" favours the circulation of notes, on the condition that the bank charged with the issue has a sufficient number of branches to make them penetrate everywhere. As to the question of the liberty and plurality of banks, the Chamber declares that "it is more theoretical than practical, although applications of it are made in Scotland, Switzerland, and the United States;" and that what commerce and industry in France demand is not a revolution in the banking system, but the reforms of which it is capable. With respect to the Bank of France, the Chamber considers that it does not fully satisfy the requirements of commerce; that it ought to be made to sell its *rente*, and employ the proceeds in discounts, and that it ought also to be interdicted from making advances on deposit of securities. If this were done, the Chamber thinks that the Bank would be able to discount at a rate ordinarily moderate, but it holds that the fixing of a maximum rate of discount "is contrary to principles, and impossible to be observed in practice." From this analysis it will be seen that the only points in which the Chamber of Commerce of Lyons is in accord with M. Isaac Pereire, M. Michel Chevalier, and the other bank reformers, is the sale of its invested capital and the interdiction to lend on shares and bonds.

The *Annuaire de l'Economie Politique et de la Statistique pour 1865* has just been issued by Messrs Guillaumin & Co. This annual has now attained the twenty-second year of its age, and so long an existence is in itself a voucher for its excellence. It was founded by the late respected M. Guillaumin, and he was the principal editor of it down to the time of his death. It contains a mass of statistical and other information on the commerce, navigation, population, finances, agriculture, public works, railways, and other matters in France, and in the different countries of Europe and America, also of some in Africa and Asia. All this information is compiled in a narrow compass, and is presented in a manner exceedingly convenient for reference. The article on Population is by G. M. Legoyt, and M. Joseph Garnier contributes a notice of the career of Guillaumin.

An official return of railways for the first quarter of the present year, compared with the corresponding period of last, has been issued. It shows that the total length of railway worked on the 31st March last was 13,084 kilometres (7,177 miles), and that on the same date of 1864 it was 12,063. Of the 13,084, 7,782 were what is called the Old Network—that is, the old trunk or independent lines—and 5,302 the New Network, that is, the prolongations and embranchments, for which a guarantee of interest is given by the Government. The total receipts in the first quarter of 1865 were 120,774,553f; in that of 1864 they were 115,027,049f—increase 5,747,504f. Compared with 1864, the receipts per kilometre in 1865 were for the Old Network 7·27 per cent. more on the Northern line, 3½ more on the Eastern, 1·48 on the Southern:—0·93 less on the Western, 4·80 less on the Orleans, 1.96 on the Mediterranean, 11·27 on the Victor Emmanuel. In the New Network the Northern presents an increase of 1·94 per cent, the Southern of 16·4:—whilst the Eastern has declined 0·58, the Western 2·10, the Orleans 4·8, and the Mediterranean 9.41.

Customs returns show that the value of goods taken out of bond for consumption in the first four months of 1865 was 762,126,000f; same period of 1864, 738,763,000f; of 1863, 713,410,000f; and of 1862, 693,763,000f; and that the value of the exports of French productions in the first four months of 1865 was 892,569,000f; of 1864, 963,573,000f; 1863, 793,279,000f; and 1862, 702,282,000f. These figures, notwithstanding the decline in the exports this year compared with last, do not bear out the complaints that have long been made of the depression of commerce. In the imports of the four months of this year, skins, silk, oleaginous seeds, flax, coal, wool, and woollen tissues are above those of the same period of 1864; oxen, tallow, coffee, tobacco, timber, and cotton tissues are less. In exports, there is an increase in turnery, artificial flowers, wines, refined sugar, prepared skins, chemical productions, silk, butter, oxen; and a decline in silk, woollen, and cotton tissues, articles in skins and leather, ready-made clothes and linen, brandies, butter, wool, silk. As to the precious metals, the return shows that the imports were:—

	First four months of 1865. francs.	First four months of 1864. francs.	First four months of 1863. francs.
Gold—Bullion	24,824,774	45,533,793	41,210,469
Coin	131,187,810	128,936,505	125,785,056
Silver—Bullion	25,760,237	18,983,228	8,977,189
Coin	51,774,446	84,071,347	49,695,514
	233,047,267	277,504,873	225,668,228

Digitized by Google

The following were the exports:—

	francs.		francs.		francs.
Gold—Bullion	8,958,774	...	13,648,941	...	22,767,078
Coin.....	80,244,444	...	83,104,428	...	55,165,158
Silver—Bullion	24,508,864	...	53,474,444	...	35,471,540
Coin	22,429,874	...	97,369,982	...	29,267,569
	136,141,956	...	247,597,795	...	142,671,345

In the three periods, therefore, the imports exceeded the exports by 96,905,311f, 29,927,078f, and 82,996,883f.

The Agra and Masterman's Bank, in addition to its branch at Paris, intends to establish one at Marseilles.

The total number of vessels possessed by the Messageries Imperiales Company on the 31st December last, including those on the stocks as well as those at sea, was 62, of 18,610 horse-power, and 111,092 tons burden.

The following is the market report:—

FLOUR.—At *Paris*, business continues inactive, and prices have a downward tendency. Choice, yesterday, was 47f to 48f the sack of 157 kilogs; first marks, 46f; good sorts, 45f; other sorts, 43f to 44f. Six marks were 46f to 46f 25c, current month; July, 46f 75c; July and August, 47f 25c. Type Paris, the 101 kilogs, 28f 50c.

WHEAT.—Certain fears about the growing crop which were manifested a month ago have disappeared, the accounts from all parts of France being now favourable. Prices yesterday, at *Paris*, were 50c lower: choice white, 27f the sack of 120 kilogs; red, 26f to 26f 50c; first qualities, 25f 50c; current, sorts, 25f; ordinary, 24f to 24f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 5,946 bales, and the arrivals 7,736. Of the former, the greater part were Asiatic, and of the latter, 6,573 were from England. The stock was estimated at 55,490 bales. The closing quotations were 5f higher for Jumel and Coconada, 5f to 8f higher for Brazil; other sorts unchanged. Low New Orleans was consequently 215f the 50 kilogs; good ordinary qualities, in Broach, 145f; in Tinnevelly, 120f; in Madras, 140f; China, 125f; Egypt, 215f. This week, the market has not been active, and yesterday the quotations of American were 225f and 180f: Oomrawuttee, 155f, and for delivery, 130f and 125f; Dhollerah, 130f; Tinnevelly, 120f; Madras, 150f and 142f 50c; China, 115f.

COFFEE.—The demand at *Havre* was regular in the week ending Friday: 100 sacks Cape, 87f the 50 kilogs in bond; 100 Gonaives, 89f; 1,620 Rio not washed, disposable, 76f to 85f 50c; 3,180 ditto for delivery, 73f 50c to 86f; 200 washed and not washed for delivery, 95f 50c; 198 washed for delivery, 98f; 200 Porto Rico, 100f to 100f 50c; 500 Maracaibo for delivery, 85f; 17 Guatemala, indirect importation, 95f; some Martinique at prices kept secret; 82 Malabar, 92f 50c. The arrivals exceeded 13,000 sacks. This week, Nicaragua, 92f 50c; La Guayra, 97f and 95f; grages, 107f; St Marc, 91f; Rio, 80f to 82f 50c; Gonaives, 89f; Cape, 85f and 83f; Port-au-Prince, 83f. At *Nantes*, last week, 4,921 sacks Puerto-Cabello expected at Belle Isle, 97f 50c in bond. This week, no sales. At *Bordeaux*, last week, 700 sacks Rio, 82f for unwashed, 102f washed; 200 La Guayra grage, 103f 50c; some bonifieur, 152f 50c; and some Santiago, 116f to 120f. This week, Rio washed and unwashed at prices not stated; Mysore, 118f. At *Marseilles*, last week, 5,000 sacks Rio in the port, at prices kept secret, and by auction 386 damaged, 65f to 67f. This week, Rio for delivery, 75f.

SUGAR.—At *Havre*, in the week ending Friday, 345 casks French West India, for delivery, 49f 25c the 50 kilogs, bonne quatrieme, duty paid; some usine, 62f 50c to 65f; ditto second jet, 50f 50c; 2,100 bales Reunion, 52f bonne quatrieme duty paid; 229 casks Havana, 31f 50c; No. 12, in bond and 520, for delivery, same price. The arrivals were inconsiderable. This week, French West India usine, 65f and 62f; Havana, 32f in bond. At *Nantes*, last week, 2,234 casks Havana of quality of about No. 15, were taken on the basis of 31f for No. 12, delivery by English ship; also some French West India to arrive at prices kept secret, and at 61f. This week, usine, 53f 50c. At *Bordeaux*, last week, some French West India went at 49f, bonne quatrieme, and usine at 61f 75c No. 12 of Holland. This week, French West India usine, 60f 75c. At *Marseilles*, last week, 6,000 casks Havana, by Spanish ship in port, part at 29f 50c No. 12; part at prices kept secret, but believed to be a little above that figure; 180 casks French West India, 30f 50c and 31f, bonne quatrieme; 160 Cienfuegos, by Spanish ship, 28f 50c, bonne quatrieme. No sales this week.

INDIGO.—Owing to the classification of the cargo of Bengal by the Radama, the market was animated at *Havre*, in the week ending Friday, the sales being 176 chests at 85c to 1f the ½-kilog above the estimates and 10 old at prices kept secret. The arrivals were 7 chests from England. This week, Bengal at a premium of 70c, 75c, and 80c, and at prices kept secret. At *Bordeaux*, this week, there have been no sales.

HIDES.—The sales at *Havre*, in the week ending Friday, were not important: 200 Buenos Ayres salted saladeros ox, 57f the 50 kilogs; 1,500 ditto light, in disembarkation, 54f; 661 Monte Video, light ox, 43f 50c to 45f; 100 Rio Grande salted ox, 56f; 2,240 Pernambuco and Maraguan drysalted, 59f to 60f; 150 Valpariso drysalted ox, 77f 50c; 872 Buenos Ayres horse, 43f 50c. The arrivals exceeded 7,000. This week, Buenos Ayres salted ox, 54f; Calcutta calf, 83f and 42f 50c. By auction, some different sorts of damaged.

WOOL.—The sales at *Havre*, in the week ending Friday, were 75 La Plata unwashed, 1f 72½c to 2f 65c the kilog; 5 ditto washed, 6f; 27 Chili unwashed, 2f. The arrivals were 1,517. This week, Buenos Ayres unwashed, 1f 80c to 2f, and per 100 kilogs, 200f; Monte Video, 275f.

TALLOW.—At *Havre*, in the week ending Friday, 150 pipes La Plata, disposable, 50f the 50 kilogs; 155 pipes and 195 half-pipes, 50f to 50f 75c for delivery. The arrivals were 150 casks. This week, La Plata, 49f to 49f 75c, and 50f; Monte Video for delivery, 50f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 104f 45c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, were 55f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 74f, beetroot, first quality, 90 deg., 64f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following is in reference to the state of the money market at Bombay, for the fortnight ending May 23:—Exchange—Rates opened for the mail at about 2s 0 1-16d per rupee for Bank bills, and have continued tolerably steady at about that level. A minimum of business has been in progress, and the transactions reported are trifling in the extreme. Closing quotations are as follows, viz.:—Bank bills 2s 0 1-16d to 2s 0 3-16d, credits 2s 0⅛d to 2s 0 3-16d, documents 2s 0⅜d per rupee. On Calcutta we quote sight bills 101½ rs, 30 days' sight 100⅜, and 60 days' sight 99¼ rs. Dollar bills rule at 213 rs per 100 dollars. Money—The feeling of uneasiness in commercial circles has, since we last wrote, been heightened by the failure of a large native house, with heavy liabilities. Rumours of further embarrassments, more or less well founded, are daily in circulation. The Bank of Bombay's rates for loans and discounts are still unaltered. The stock and share market has been increasingly depressed, and most descriptions of stock are quite unsaleable.

As regards the state of the money market at Calcutta during the week ending May 17, a report says:—The continued ease and abundance of money has induced the Bank of Bengal to lower its rates of interest and discount one per cent. all round. There has been a good demand for discount in the bazaar, which has been fairly met at current rates, but the extent of money required for purely business purposes is very limited indeed. A good amount of business has been done by the banks drawing on London at from 2 0¼d to 2 5-16d. There is a great scarcity of private paper, and rates for the same may be quoted first class credits 2 5-16d to 2 0⅜d.

Messrs Sharp and Co., writing from Hong Kong on the 29th of April, thus allude to the state of the bullion, money, and exchange markets:—Gold—The fall in price in India has not effected this market, owing to the small supplies, till within a few days past. The receipts amount to 650,000 dollars worth; and the exports, including those per Benares on the 15th instant and exclusive of those to leave to-morrow, to $580,000. Silver—Bar silver and sycee have been in good demand for remittance to Calcutta: $280,000 value has been received and $250,000 value exported. Dollar Currency—Broken dollars have still come in large quantities from the coast despite the difficulty in passing them. Large remittances of this coin have been made to India, and should rates for rupees recede, this may afford some solution to the difficult question of the Mexican currency. Our receipts amount to $640,000 against an export of $490,000. Clean coin is in somewhat better demand. Discounts and Mortgages—First-class short bills, five per cent. Loans on produce, seven per cent. Mortgages, eight per cent. are the current rates. Exchange—The failures recently announced and the general depressed state of trade, resulting in a scarcity of bills, have caused a further downward tendency in this market. Until the arrival of the Shanghai steamer the banks are doing a moderate business at 4s 5½d, but subsequently the rate has been a receding one. The demand has been slack for rupee remittance. Exchange and Bullion—Closing Quotations—On London, 6 months' sight, 4s 5¼d; on Bombay, 3 days' sight, 217 rs; on Calcutta, 3 days' sight, 216½ rs; on Shanghai, 3 days' sight, 72¼ tls; ditto, 30 days' sight, 73 tls; on Singapore, 3 days' sight, 1½ per cent. prem; Bar silver, 17 dwts *B.*, 10¼ per cent. prem.; ditto, Mexican, 10 per cent. prem.; Sycee, 8 per cent. prem.; Mexicans, ½ per cent. prem.; gold leaf, $23.00 per tl; gold bar, $22.95 per tl, equivalent to 100 touch; sovereigns, $4.55 each; discount, 6 per cent.; Hong Kong and Shanghai Banking Company shares, 12 per cent. prem.

The subjoined table shows the extent of the imports and exports of bullion into each of the Indian Presidencies during the years ending April 30, 1863 and 1864, as well as the total coinage in each of those periods:—

* In the previous return British Burmah was not included.

Subjoined is a report of the Albany lumber market, for the week ending May 29:—Lumber continues to arrive in sufficient quantities to keep up the supply and assortments. These are very good now, embracing all kinds usually sold in this market. There has been a fair demand for lumber during the week, and the shipments exceed any previous week of the season. Prices are rather stiffening on pine, but spruce and hemlock feel somewhat the low prices asked for common grades of pine. Receipts for season to date:—13,912,630 ft boards and scantlings; 1,004 M. shingles; 81,475 cubic feet timber; 465,000 lbs staves. The following are the prices at the wholesale yards:—Pine clear, per M., 60 dols; pine, fourth quality, 55 dols; spruce boards, each, 16c to 17c; spruce plank, 2 inch, each, 34c; ash, good, per M., 40 dols to 45 dols; ash, second quality, 30 dols to 35 dols; oak, 40 dols to 45 dols; maple, 25 dols to 30 dols; black walnut, good, 65 dols to 70 dols.

The duty on entering the ports of Cuba and Porto Rico for foreign flour in Spanish bottoms is to be 3 dols 50c per barrel, and in foreign bottoms 5 dols per barrel. Formerly the duty on foreign flour in Spanish bottoms was 6 dols 49c per barrel, and in foreign bottoms 10 dols 2c per barrel.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 14th day of June, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	29,741,280	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	15,091,280
		Silver Bullion	...
	29,741,280		29,741 280

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,480,025
Rest	3,210,646	Other Securities	19 516,637
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8,802 198	Notes	9,011,885
Other Deposits	12,935 381	Gold and Silver Coin	954 389
Seven Day and other Bills	461,711		
	39,962,936		39,962,936

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,191,106	Securities	30,093,662
Public Deposits	8,802,198	Coin and Bullion	16,045,669
Private Deposits	12,935,381		
	42,928,685		46,139,331

Dated the 15th June 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,210 646*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£444,388
An INCREASE of Public Deposits of	848,017
A DECREASE of Other Deposits of	421,702
No change in Government Securities.	
A DECREASE of Other Securities of	195,893
An INCREASE of Bullion of	185,054
An INCREASE of Rest of	7,234
An INCREASE of Reserve of	619,664

There is an increase of 848,017*l* in the Government deposits, and in the private deposits a decrease of 421,702*l*. The decrease in private securities is 195,893*l*, and the increase in the stock of coin and bullion 185,054*l*. The result of these changes is an increase of 619,664*l* in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20 570,965	£ 21,076,059	£ 20,655,473	£ 20,597,557	£ 21,191 106
Public deposits	5 586,754	9,322,949	9,882,135	8,512,311	8,802 198
Other deposits	13 307,714	13,065 271	13,904 506	12,790,361	12,935,381
Government securities	12,681,068	11,034,751	11,251,395	11,122,267	10,480,025
Other securities	12,399,704	20,210 796	21,402,558	19,664,925	19,516,639
Reserve of notes & coin	12,524,521	9,439,833	9,366,106	8,826,355	9 966,274

Bank rate of discount	3½ p c.	3 p. c.	4 p. c.	6 p. c.	3 p. c.
Price of Consols	90⅞	92 xd	92¼	89⅞ xd	90⅝ xd
Average price of wheat	77s 5d	53s 9d	46s 11d	39s 6d	41s 5d
Exchange on Paris (short)	25 10 15	25 22½ 30	25 20 27½	25 20 25	25 17½ 22½
— Amsterdam ditto	11 17½ 17¾	11 16 16½	11 16 16½	11 18 18½	11 17½ 18
— Hamburg (3 months)	13 6½ 7	13 8½ 9	13 7½ 8½	13 8½ 9	13 9½ 9¾

In the corresponding week of 1855, news had arrived of the continued successes of the Allies in the Crimea. Commercial advices from India were still unfavourable. The Bank of England had reduced its rate from 4 to 3½ per cent.

In 1862, the Confederate army had entered Maryland and was threatening Washington. The new stamp duty on foreign loans raised in England had come into operation. The demand for money was on the increase.

In 1863, the French Government had announced the taking of Puebla. The rate of discount at the Bank of France had been raised from 3½ to 4 per cent. A new loan for 1,000,000*l* sterling, subsequently withdrawn, had been announced for the Republic of Venezuela.

In 1865, the plenipotentiary of the Germanic Confederation had made a declaration in the London Conference, in which he laid down the principle that no part of Sleswig could be ceded to Denmark without the consent of the population. The Emperor and Empress of Russia had arrived at Potsdam, and had been received by the King of Prussia. The French military operations in Algiers were progressing satisfactorily. The tribes of the South had made overtures for submission to General Deligny. The Prince Couza had arrived at Constantinople and had been received by the Sultan. In America, General Sherman had defeated the Confederates near Dallas. The Confederates had also been repulsed in an attack on Butler's lines. An unsuccessful attack made by Grant on the Confederate intrenchments had resulted in a loss of 3,000 in killed and wounded. The Bank of England had reduced its rate of discount from 7 to 6 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, an excess of 908,010*l*; in 1862, a deficiency of 7,125,525*l*; in 1863, a deficiency of 7,498,052*l*; and in 1864, a deficiency of 6,874,564*l*. In 1865, the deficiency is 6,581,256*l*.

DISCOUNT AND MONEY MARKET.—The Bank minimum rate was reduced yesterday from 3½ to 3 per cent. The amount of mercantile paper afloat is small, but, as usual, there has been more activity in the demand for money in the open market at 3 per cent., and a larger share of business has been carried to the Bank. There is a diminution in the supply, partly owing to the withdrawals by country bankers in connection with the anticipated expenses of the coming election. Beyond these circumstances there is no indication that the slightly increased general activity of the present time will be sustained. On the contrary, while the produce market continues dull, and so long as the advices from India refer only to a state of commercial affairs as unsettled as that now described, little probability appears that trade operations will be entered into on an extended scale. Money is now quoted at 3 per cent. in the two chief capitals of Europe; and it is remarkable as evidence of the altered direction of the bullion current that the reductions in the rate of discount have been in London more rapid than in Paris. During the long course of the bullion export movement the pressure was greater in the London market than elsewhere, while at the present time the accumulations are productive of greater ease, on account of the payments that have been made abroad, in many cases in anticipation of subsequent arrivals of raw material or produce.

Digitized by Google

Attention has been directed to the introduction of new projects by the joint stock banks. It is suggested that operations of this nature are beyond the province of bankers; that the latter might easily be induced to uphold the new companies fostered by themselves at the expense of their clients, and that in time their resources might become embarrassed in the way we have already seen embarrassments brought about by a too close connection between bankers and trading or speculative companies, who are naturally exposed to a greater risk than that a banker should voluntarily encounter.

The following are the current terms for paper of various dates :—

30 to 60 days	3 per cent.
3 months	3 per cent.
4 months	3½ per cent
6 months—Bank bills	4 per cent.
6 months—Trade ditto	4½ per cent.

In the Stock Exchange there has been a strong demand for most loans on English Government securities, and the rate has been firm at 3 per cent.

The allowance for deposits at the joint stock banks and discount houses has been altered, and now stands as follows :—

Joint Stock Banks	*2 per cent.
Discount houses at call	2 per cent.
Do. with seven days' notice	2¼ per cent.
Do. fourteen days	2½ per cent.

* At the London and Westminster 1 per cent. only on sums below 500*l*.

9,000*l* in gold nave been sent into the Bank to-day.

The following are the rates of discount current in the chief continental cities, but the tendency is downwards, and quotations are reported to be generally declining :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2⅜
Vienna	5	4½
Berlin	4	3½
Frankfort	4	3
Amsterdam	3	2½
Turin	5	4½ 5
Brussels	3	3
Madrid	8	...
Hamburg	...	2¼
St Petersburg	5½	5

The Bank of France return for this week gives the following return as compared with that last issued :—

	£
INCREASE.	
Bills discounted	1,544,000
Advances	20,000
Bank notes	1,530,000
Treasury balance	650,000
DECREASE.	
Cash	520,000
Current accounts	680,000

ENGLISH GOVERNMENT FUNDS.—A slight improvement has followed an almost equally unimportant decline in the price of Consols. The announcement of the reduction of the rate of discount to 3 per cent. on Thursday, has induced many who had oversold accounts in the Stock Exchange to buy back, and hence an improvement on the prices of the early part of the week. There is, however, very little business astir, and the markets are dull and inanimate. The coming elections, although exercising less influence than formerly on the value of Government securities, still affect prices by the withdrawals of money, of which they are the cause, for the provinces; and they also impede or delay many of the investments that would otherwise be made. Consols close at 90⅜ to 90⅝. New 3 per Cent. and Reduced, 89⅝ to 89⅞; and India 5 per Cents., 104⅛ to 104⅜.

There is no alteration in the value of Exchequer bills, which close at 2s to 5s prem.

FOREIGN STOCKS.—Spanish Passive stock and the Certificates, Mexican 3 per Cents., Turkish Consolides and Greek bonds have chiefly attracted attention. The declining value of money has occasioned a slight improvement in prices, but there is a great lack of animation in the markets. The following are the prices of stocks dealt in to-day :—4½ per Cent. Brazilian, 81; ditto, 1863, 81¼. Egyptian 7 per Cent. bonds, 97; ditto, 1864, 94½. 5 per Cent. Greek, 21½. 5 per Cent. Italian, 1865, 75; ditto, scrip, 67*l* 10s paid, 2½ dis. 3 per Cent. Mexican, 25½. 3 per Cent. Portuguese, 49¼. 5 per Cent. Russian, 1822, 92; ditto, 1862, 91¼. 5 per Cent. Sardinian, 75. 3 per Cent. Spanish Passive, 31⅛ to 31¼; ditto, Certificates, 15⅝ to 15⅝. 6 per Cent. Turkish, 1854, 93; ditto, 1858, 73; ditto, 1862, 100*l* bonds, 74¾; 5 per Cent. ditto, 1865, 46¼ to 47; ditto scrip, 20*l* paid, 1⅝ to 2⅛ dis. 5 per Cent. Italian, 65¾ to 66¼.

The closing prices of French Three per Cent. rentes, telegraphed this evening from Paris, is 66.50 for money, and 66.40 for the account, both prices ex the dividend 75c.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

Italian 5 per cents	65⅜ 6½	65⅜ 6

RAILWAYS AND OTHER SHARES.—The tone of the railway markets has been more satisfactory, and many of the quoted prices show a considerable advance. That in Metropolitan Railway stock is the most important, the stock having risen to 145 per cent. Investments as well as speculation have contributed to the renewed firmness, which the fine weather and the published traffic receipts alike favour. Caledonian stock has risen ½ per cent. above the price quoted last Friday, Great Eastern, 1½ per cent.; Great Western is 1 per cent. higher; Lancashire and Yorkshire, ½ per cent.; London, Chatham, and Dover, 1 per cent.; London and Blackwall, 1 per cent.; London and North-Western also note an advance of 1 per cent.; Metropolitan stock has advanced 3½ per cent. North-Eastern stocks show a slight advance, and South-Eastern has recovered from the decline which occurred on the late fatal accident at Staplehurst, closing ½ per cent. only below the price of last week.

American stocks are firmer, 5-20 bonds, 69¼ to 69¾.

In foreign railway shares those of the Belgian lines continue to improve steadily. The shares of the Lombardo-Venetian Railway come lower.

The joint stock bank market is very firm. Most quotations show an advance. London and County are quoted at a rise of 5½*l* per share, London and Westminster Bank 4*l*, London Joint Stock to 1½*l*, and Agra and Masterman's Bank 6*l*. The shares of the Alliance Bank have risen 2*l*, and those of the Chartered Bank of India, Australia, and China, 5*l* 10s.

The shares of the financial companies are mostly well supported: the markets to-day have been firm. Compared with last Friday, Credit Foncier and Mobilier show a decline of ¼, General Credit ⅛ advance, International Financial and Imperial Mercantile Credit also a rise of ⅛. Hudson's Bay shares have declined ¼ per cent.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

The Committee of the Stock Exchange has appointed Friday, the 16th June instant, a special settling day in the following companies, viz. :—Animal Charcoal (Limited), Lion Brewery (Limited), to be quoted in the twice-a-week list; the London, Chatham, and Dover, Metropolitan Extension A stock, the New Zealand Loan and Mercantile Agency (Limited), and the Ottoman Company (Limited), to be quoted in the daily list.

Foreign Exchanges.—Very few transactions, and no alteration of importance in the rate.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Of the large amount (634,300*l*) mentioned in our last circular as having arrived, about 188,000*l* has been sent into the Bank, and the remainder has been sent away, part to Spain and part to Paris. We have now to report the following arrivals:—23,000*l* from Melbourne per Norfolk, 183,500*l* from New York per Cuba, and 30,000*l* from New York per Hansa. Further large amounts are expected during the next few days from America, and it is not unlikely that the Bank will receive the greater portion of any imports of gold, the inquiry for abroad being at present but slight. Sovereigns to the value of 218,000*l* have been withdrawn, the Oneida having taken 150,000*l* to the Brazils, and the balance having been sent to Alexandria.

Silver.—Beyond the export of 8,000*l* to the Brazils, per Oneida, we have but little to remark upon, as our market has been very quiet, and but little business has been done; the price at the beginning of the week was about 60½d to 60⅝d per oz standard, but should the Atrato (now overdue) bring in a large amount, it is doubtful if the former of these prices could be maintained.

Mexidan Dollars.—Our market is very quiet, and prices remain nominally the same as last quoted, viz., 59⅛d per oz. The Messageries steamer has taken 35,000*l* to China.

Exchange on India for drafts by the banks, at 60 days' sight, on Bombay, Calcutta, and Madras may be quoted 1s 10½d to 1s 11d, with rather more doing than for some weeks past.

India Government loan notes are rather firmer, and may be called 108 to 109 for 5½ per Cents., 101 to 102 for 5 per Cents., and 89 to 91 for 4 per Cents.

Failures and Mercantile Embarrassments.—A meeting of the creditors of Mr William Duthie, Cape, merchant and shipowner, who failed on the 25th ultimo, took place on the 13th instant. The balance sheet presented showed liabilities amounting to 43,518*l*, and assets to 7,682*l*, being a deficiency of 35,899*l*.

In the Bankruptcy Court, on Wednesday last, there were some proceedings in the case of Messrs Charles Joyce and Co., merchants, of Moorgate street, and Alexandria, whose debts were stated at 320,000*l*, while the assets are estimated at only 120,000*l*, to be principally realised in Egypt.

The failure of Messrs Eumorgopulo and Co., Greek merchants, of Manchester and Liverpool, has been announced. Their liabilities are estimated at about 40,000*l*. A favourable realisation is expected.

The failure of Messrs F. Levick and Co., of London and Monmouthshire, in conjunction with the firm of Messrs Levick and Simpson, ironmasters and merchants, has been announced. The direct liabilities are said to be about 350,000*l*. A satisfactory dividend is anticipated.

Public Companies.—The annual report of the directors of the South Australian (Land) Company, to be presented at the general meeting on the 21st instant, recommends that the usual dividend of 7 per cent., free of income tax, be declared, payable on the 15th July and 15th January next.

At the annual meeting of the Ceylon Company, held on Tuesday last, a dividend at the rate of 10 per cent. per annum, and a bonus of 5 per cent., were declared, free of income tax, and the directors were authorised to increase the nominal capital from 500,000*l* to 1,000,000*l*.

At the first meeting of the Ebbw Vale Company, held on Tuesday last, the directors' report was adopted, and a dividend of 10½ per cent. per annum declared.

The Assam Tea Company held their meeting on Tuesday. The directors' report was adopted, and a dividend declared at the rate of 25 per cent. per annum. The recent sale of the North-East garden to the Northern Assam Tea Company was approved by the shareholders.

At the half-yearly meeting of the African Steam Ship Company, held on Wednesday, the accounts showed a balance of 4,757*l*, and a dividend of 8s per share, free of income tax, declared.

The meeting of the Northern Assurance Company was held at Aberdeen on Friday last, when the directors' report was unanimously adopted. The amount of new insurances for the year was stated at 328,611*l*; yielding in premiums 10,565*l*. A dividend of 12½ per cent. was declared, and 8,444*l* 7s 2d carried forward to new account. The reserve fund of the life department has been increased to 483,489*l*.

The directors of the Chartered Mercantile Bank of India, London, and China, have declared a dividend of 8½ per cent., free of income tax, for the current half-year, payable on the 1st July.

On the 12th July, the Hudson's Bay Company propose to pay an additional dividend of ten shillings per share for the year ended the 31st May last.

The transfer of the business of Messrs Calisher and Terry to the shareholders of the Breech-Loading Company has been effected, and the extensive operations of that firm will in future be carried on by a Joint Stock Company, under the above title. The capital of the undertaking is 150,000*l*, in 6,000 shares of 25*l* each.

The East London Railway Company has been formed for connecting below London Bridge, by means of the Thames Tunnel, all the railways entering London north and south of the Thames. The capital of the undertaking is 1,400,000*l*, in 14,000 provisional scrip certificates to bearer of 100*l* each. The line, when completed, will afford great accommodation to the densely populated districts on both sides of the river below bridge, and passenger traffic receipts may, in consequence, be expected to produce a large annual revenue. The property required for the construction of the line may be obtained at a moderate outlay. The line will be rather more than seven miles long.

The Downs Docks Company, with a capital of 240,000*l* in 24,000 shares of 10*l* each, is also announced, with the object of constructing docks of various kinds at Deal. Being in, perhaps, the largest sea thoroughfare in the world, the directors anticipate a prosperous business.

The English and Foreign Credit Company invite subscriptions for the capital, viz, 100,000*l* in 10*l* shares, of the Gowhatty Tea Company, which has been formed for the cultivation and manufacture of tea in Assam and Northern Bengal. The estate comprises about 3,000 acres, of which 530 acres are in a forward state of cultivation.

The Albert Bridge Company—capital 90,000*l* in 10*l* shares—has been started for constructing an iron bridge over the Thames from Chelsea to Battersea. A contractor has agreed to complete the works in eighteen months for the sum of 82,000*l*. Basing their calculations on the tolls of Battersea Bridge, the directors anticipate a yearly return to the shareholders of nine per cent. on their capital.

The Agra and Masterman's Bank and the English Joint Stock Bank are authorised to receive subscriptions to the Phosphate of Lime Company, which has been formed for purchasing the well-known deposits of phosphate of lime in the island of Sombrero and at Logrosan. The capital of the undertaking is 300,000*l* in 25*l* shares, while the purchase money of the two properties is 250,000*l*.

The share list of the Cheshire Amalgamated Salt Works Company, Limited, will close on Wednesday next, the 21st instant.

Miscellaneous.—The Union Bank of Australia have announced the payment, on and after the 1st July, of the half-year's interest due on the Queensland, New Zealand, and Wellington loans, and also, on and after June 30th, on the Lyttleton and Christchurch (New Zealand) Railway loan.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

The course of exchange at New York on London for bills at 60 days' sight, is about 110 per cent. At this rate there is a small profit on the importation of gold from the United States.

LONDON EXCHANGES ON INDIA, &c.

JUNE 10.

Bills with documents attached against indents and consignments for India vary according to amounts, and the security which they offer.

The Commercial Times.

LETTERS FOR GAMBIA.—On the 1st July next, and thenceforward, letters addressed to Gambia, posted unpaid, will be charged with an additional rate of sixpence each letter, besides the usual postage; and letters posted insufficiently pre-paid, will also be charged with the amount deficient, and with sixpence additional. A similar fine, in addition to the postage, will be levied in this country upon all letters received from Gambia, which may have been posted unpaid, or insufficiently paid.

MAILS ARRIVED.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended June 10, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	57,704 5	41 5
Barley	2,751 2	28 8
Oats	1,983 0	23 8

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria cap. 14:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The small supply of English wheat on sale at Mark lane to-day was disposed of at the full prices of Monday. The foreign wheat trade was rather quiet, on former terms. Barley supported previous rates, whilst oats, of which there was a tolerably large supply on offer, moved off freely, at rather higher prices. Beans and peas ruled firm, at full currencies. The flour trade was quiet,

Digitized by Google

at late rates. This week's imports amount to 15,910 quarters of wheat, 3,080 barley, 25,190 oats, and 140 sacks of flour.

At Liverpool, this morning, the trade for wheat and flour ruled quiet, but at full prices. At Wakefield, wheat met a slow sale, but was disposed off at quite previous rates.

The Liverpool cotton market on Monday opened quietly, but on Tuesday there was a better feeling, and the demand has since been on a large scale, at advancing prices, American being 1d and Surats ⅛d to ¼d higher than on last Friday. There has been a good inquiry at Manchester for manufactured goods and twist. This has tended still further to stimulate the Liverpool market. To-day the market is not quite so brisk, the American advices from New York reporting large arrivals of cotton at Wilmington inducing a little more caution on the part of operators, but prices are without change.

We have letters from Bombay to May 23. The arrivals of cotton during the ten days prior to that date had been large. Generally speaking the demand ruled inactive, and most descriptions of produce changed hands at rather lower prices. Sawginned Dharwar qualities, however, commanded rather more money. Dhollera cotton sold at 265 to 270; Broach, 235; Oomrawuttee, 210; and Akote, 221 rupees per candy. The following tables of prices and exports are from Messrs Nicol and Co.'s circular:—

CURRENT PRICES of COTTON at BOMBAY, May 23.

Advices from Madras are to May 13. At that date the cotton trade was firmer, and prices had slightly improved. Western produce was quoted at 7¼d per lb. Very little *new* cotton was on offer. The following table of exports is from Messrs Dymes, Cartwright and Co.'s circular:—

EXPORTS of COTTON from the PORT of MADRAS.

The supply of cotton on sale at Shanghai, during the fortnight ending April 22, was small. The trade ruled firm, and prices were rather higher. No. 1 Shanghai was quoted at 14 taels, and Kangpoo at 14.7.5 taels per picul.

At Hong Kong, the transactions in China cotton for the fortnight ending April 28, amounted to 4,800 bales at 22 to 23 dols for Shanghai, and 23 to 24 dols per picul for Ningpo. Japan, the sales of which were 170 bales, realised 24 to 26 dols per picul.

At Yokohama, on the 13th of April, the value of cotton was quite nominal, at 26 to 28 dols per picul.

From Tinnevelly, we learn that the shipments of cotton, from the commencement of the season to April 11, had amounted to 79,302 bales, against 40,373 bales in 1863-4, and 36,023 bales in 1862-3.

The following table shows the rates of freight for cotton to London and Liverpool, at some of the leading ports at which that staple is exported, at latest postal dates:—

	London.		Liverpool.	
	£ s d	£ s d	£ s d	£ s d
Bombay	1 15 0	to 2 0 0	1 0 0	to 1 15 0
Madras	2 5 0	2 7 6	2 5 0	2 7 6
New York	0 0 0	0 0 0	0 0 0	3-16 0 0 0¼

The leading feature to notice in the markets for colonial and foreign grocery produce, is an important rise in the value of Indian tea, the public sales held during the week having gone off with considerable activity, at an advance, in some instances, of 5d per lb. Coffee has been in moderate request, and prices have ruled firm. For sugar, the market has been heavy, and the quotations have had a drooping tendency. Cocoa, rice, rum, and brandy have sold at late rates.

The trade for black tea at the leading Chinese ports, at the date of our last last postal advices, was dull, and, in some instances, prices slightly declined. Green teas, however, were in request for shipment to the United States and Canada, at fully late rates. The total export to Great Britain, from June 1 to March 31, was 115,122,110 lbs, against 109,037,270 during the corresponding period last season. At Shanghai, on the 23rd of April, gunpowder was quoted at 1s 7d to 3s 4d; Imperial, 1s 5d to 2s 4d; young hyson, 10½d to 2s 4d; hyson, 1s 6d to 3s 3d; and twankey, 8½d to 1s 3d per lb.

Last week, duty was paid in London on 1,644,254 lbs of tea, whilst the export from London for the week ending June 8, amounted to 400,496 lbs, making a total of 2,044,750 lbs, against 1,492,910 lbs last year.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to May 31, 1864 and 1865, with STOCK on hand on June 1, 1864 and 1865.

At the public sales of colonial wool, which are still in progress, long-stapled produce moves off steadily at full prices; but for faulty wools, the biddings are in a sluggish state at the recent decline in prices. There is still an active demand for wool on French account. Privately, the English wool trade is steady. No change has taken place in the value of hemp, flax, jute, or coir goods.

The supply of silk on sale is small, and the market is very firm at fully late rates.

Very little business was done in silk at Shanghai during the fortnight ending April 22. The quality of the produce on offer was poor in the extreme; consequently, the few fine samples exhibited changed hands at high prices. The total shipments, from July 1 to date, amounted to 37,216 bales, against 33,857 bales in 1863-4. The unsold stock at latest date was only about 150 bales, the best quality being No. 4 Teatlees.

Digitized by Google

Messrs Arles Dufour, and Co., writing from Lyons on the 10th inst., state that in consequence of unfavourable reports respecting the prospects of the crops in Europe, and the satisfactory news from New York in reference to the sale of silk manufactures in the United States, the silk trade was very firm, and that prices, as compared with those current a month previously, showed an advance of 5 to 8 per cent.

In the metal trade, spelter, which has also improved in value, has chiefly commanded attention. Oils and tallow have continued firm.

Business in tobacco at New York, last month was much restricted. Very few changes, however, took place in prices. The following table shows the stock at that port on May 1 and June 1, and also the deliveries during the month of May:—

Scarcely any change took place in the value either of cotton or woollen goods at New York during the week ending June 3. Generally speaking, the demand was quiet, and the total business transacted very moderate. Seasonable styles, both as regards American and foreign goods, were chiefly in request, and such commanded high prices. The supply of the latter in the market was small. For raw cotton the trade was dull, and the arrivals having been moderately large, the quotations declined 3c per lb. The export demand for breadstuffs continued very limited, and the returns of shipments for May, as regards wheat and flour, showed a falling off of rather more than 300,000 bushels in the former, and nearly 12,000 barrels in the latter, as compared with the same month last year. The shipments of corn last month, however, were about 70,000 bushels more than in the corresponding period in 1864. The opening quotation for gold was 138½, the closing, 136⅞ per cent. In the money market, rather more firmness was apparent: prime endorsed bills, 60 days, were quoted at 7; ditto 3 to 4 months, 7 to 8 per cent. The stock of bullion in the banks on the 27th ult. was 4,412,700*l*; and the balance in the Sub-Treasury, 10,425,000*l*. The shipments of specie, for the week ending May 27, were large, viz., 415,900*l*, making a total since Jan. 1, of about 2,347,500*l*, against 4,446,320*l* during the corresponding period last year; 3,767,700*l* in 1863; 3,445,460*l* in 1862; 601,040*l* in 1861; 2,528,330*l* in 1860; and 5,112,000*l* in 1859. The imports of dry goods for the week ending May 27, current year, were valued at 179,540*l*, against 250,450*l* in 1864; and 172,530*l* in 1853; and the total imports of dry goods and general merchandise, from Jan. 1 to May 27, at 12,227,260*l*, against 20,930,000*l* in 1864; and 15,315,150*l* in 1863. Later advices, to the 8th inst, quote gold at 137⅞ per cent., and also announce that large quantities of cotton were arriving at Wilmington. Secretary M'Culloch estimated the national debt, on the 31st ult., at 527,041,150*l*.

THE COTTON TRADE.

LIVERPOOL—June 16.

The cotton market on Saturday was quiet and rather easier. On Monday and Tuesday, notwithstanding advices of lower prices in New York, it became firmer, and on Wednesday and yesterday a very extensive business was done by the trade as well as exporters and speculators, and the week closed with considerable animation at a general advance in almost every description, the reduction of the Bank rate tending to increase the feeling of confidence. For Sea Island there has been a good inquiry at previous rates. American is becoming very scarce, and with a good demand has advanced 1d per lb in the current qualities. In Brazil a large business has been done at an advance of about 1d per lb, and the quantity offering is much reduced. In the early part of the week Egyptian was freely offered, and declined ½d per lb, but has since been in great request, and closed at an advance of ¼d to ½d on last quotations. Smyrna is quoted at ½d above last week.

In East India the demand has been very much upon the better classes, which have advanced generally 1d per lb, especially in sawginned Dharwar and Tinnivelly Madras, which had previously been much neglected. The lower classes are attracting more attention at a partial rise of ½d per lb. There has been a very large demand for China and Japan, which has considerably reduced the stock, and prices have advanced ½d to ¾d per lb in the current qualities. "To arrive" large transactions have taken place, and the latest quotations were:—On Wednesday, Oomrawuttee, fair new merchants, shipping 11¼d; sailing 11½d, and April sailing 11½d—Dhollerah, fair new merchants, shipping and sailed 11½d—and yesterday, Maceio, fair average, ship named 16d—Egyptian, open, at sea and shipping, fair 16½d; good fair, at sea 17¼d—Broach, fair new merchants, ship sailed 11¾d—Oomrawuttee, fair new merchants, ship named 11¾d. The sales of the week amount to 105,250 bales, including 25,120 on speculation, and 30,970 declared for export, leaving 49,160 bales to the trade. Sales to-day about 15,000 bales. Market steady at the quotations.

LONDON—June 16.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market had a steadily advancing tone, and although business has at times been checked by the firmness of holders, the week's sales are again of good extent. Prices are rather irregular, but show an average advance of fully ½d per lb for the week.

NEW YORK—JUNE 3.

A very moderate business has been transacted in cotton this week. The arrivals of produce have been good, and the trade has exhibited a heavy appearance, prices to-day being 3 cents per lb lower than on Saturday last. The price of middling Upland cotton is now 46 cents per lb. The total sales are only 4,000 bales. The arrivals amount to 6,964 bales, 2,600 bales of which are from New Orleans, 2,135 Charleston, 4,491 by railroad, 383 from North River, the remainder in small parcels from sundry ports. This additional quantity raises the import, since Sept. 1, 1864, to 219,331 bales. The following are the prices now current:—

	NEW YORK CLASSIFICATION. Upland.	Florida.	Mobile.	New Orleans and Texas.

NEW YORK, June 8.—The cotton trade continues dull. Middling Upland produce is now quoted at 43 cents per lb.

MARKETS IN THE MANUFACTURING DISTRICTS

The amount of business doing in goods in most of the leading markets has been by no means extensive, nevertheless, prices generally are well supported. The stocks on hand are only moderate for the time of year. Coals have sold freely, but the demand for iron has not been to say active.

MANCHESTER, June 15.—Prices have been steadily rising this week, and the demand, influenced by the Liverpool cotton market, has been gradually gaining in animation and extent. Continental buyers have again been active, and have taken whatever yarns could be had reasonably as to time and price. But so much has been already pre-engaged in this department that there has been little left to do. Manufacturers have found their yarns also raised, nevertheless have bought moderately. In cloths, printers command higher rates, and even for India goods, the inquiry, though not extensive, has been decidedly on the increase. In 8¼ and 7 lb shirtings, several noticeable lots have been taken for China.

BRADFORD.—The demand for wool is still good. The inquiry has been principally for lustrous and semi-lustrous sorts. Hogs are hardening in price more than wethers. Prices are very stiff for all classes of yarns, and for some counts have advanced. There is no lack of orders for either plain or fancy goods. Buyers are operating freely for the home trade, and our goods are also wanted in considerable quantities for the American, French, German, and other markets.

LEEDS.—Goods for the winter trade are a little more inquired for, but the present very fine weather checks rather than facilitates the demand for heavy fabrics. Good ordinary cloths sell steadily, as well for export as for home consumption, and the manufacturers of such are well employed; indeed, most branches of the woollen trade of this borough and the surrounding district are enjoying an average amount of prosperity, and the prospects for the closing part of the year are bright. Wools command the full rates of last week.

ROCHDALE.—There has been more animation in the flannel market, and generally a somewhat better tone prevails throughout the trade. Both plain and fancy goods are in request, but the latter kind more especially. Yorkshire woollens were in better demand, but the average is much below what it was a year since.

CARDIFF.—The steam-coal merchants are doing a smaller business than at the corresponding period of last year, and the orders are still coming in rather slowly. The decrease is principally in the continental and West Indian trade. Quotations are fairly maintained for superior qualities of steam coal. In house coal there is an average business doing.

LEICESTER.—There has been a fair amount of business transacted in the hosiery warehouses. Cotton goods continue in demand, and in this, and indeed in other warehouses, the workpeople are well employed. There is rather more doing in wools, and prices rule extremely high.

NOTTINGHAM.—There is rather more business doing in lace goods and the German market. Several buyers from the Continent are in the town, and an improvement is expected in the demand for goods for that mart. The home trade is quiet, and there is less doing in silk mechlins than for some weeks past. The hosiery trade is still extremely buoyant, goods of most kinds selling well.

BIRMINGHAM.—The slackness which has prevailed for the last two months in the trade of this town continues; the orders coming through the factors are moderate, and manufacturers who have the most extensive connection have few orders beforehand; they are working full time, but in some branches goods are being made up for stock.

SHEFFIELD.—Very few orders have come to hand from the home markets, business in which continues dull. In the distant markets no change has taken place. There is still a fair business in the manufacture of cutlery tools and some other descriptions of finished goods.

WOLVERHAMPTON.—The orders for manufactured iron are rather smaller, and for plates and sheets a deficiency is felt. The second-class makers are not at all fully employed, but the principal makers are able to keep in full or nearly full operation.

BELFAST.—A large business has been done in linens, and prices have ruled very firm, with in some cases a slight advance. Demand for the home and States trade is on the increase. A very strong market has prevailed for all qualities of line and tow yarns, and prices have been further enhanced. The supplies of flax continue large for the season of the year, and prices are rather higher.

DUNDEE.—There has been an increased inquiry for flax, and several transactions have taken place at advanced prices. The business in goods on the spot, however, is limited. The demand for jute is very quiet. There is an improved business doing in some kinds of linens.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 3.—There has been less activity in the demand for flour. The receipts have been tolerably large, and all descriptions exhibit a decline in value from last week. The wheat trade is very inactive, on easier terms. For maize, however, there has been a steady inquiry, leading to moderately extensive transactions, at enhanced quotations. The prices now current are as follows:—Flour—State, superfine brands, $5.75 to $6.15; State, extra brands, $6.45 to $6.55.; State, choice brands, $6.60 to $6.85; Ohio, common brands, $6.95 to $7.10; Ohio, fancy brands, $7.15 to $7.20; Ohio, good and choice extra brands, $7.25 to $8.80; Michigan, Indiana, Wisconsin, &c., $5.75 to $6.90; Genesee, extra brands, $7 to $9.50; Missouri, $8.70 to $11.75; Canada, common, $6.60 to $6.75; Canada, good to choice extra, $6.80 to $8.75 per barrel. Wheat—Amber Michigan, $1.73 to $1.75c; white ditto, $2; winter red Western, No. 1, $1.68; No. 1, spring ditto, $1.50. Corn—Western mixed, 85c to 98c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat, coastwise and by land-carriage, having been very moderate, the show of samples has been limited. For both red and white qualities, there has been a fair demand, at prices about equal to the previous week. The quantity of foreign wheat brought forward has not increased. Really fine parcels have sold slowly, at full prices. In other kinds, the transactions have been limited, at late quotations. The few samples of English barley on show have been taken on former terms. Foreign samples have commanded very little attention, at late rates. Malt has come freely to hand, and the demand for it has been steady, at full quotations. Oats have advanced 6d per quarter, with a good consumptive inquiry. Both beans and peas have realised extreme rates, with a fair demand. The flour trade has been very inactive.

The advices from nearly all quarters in reference to the crops are still very favourable. Wheats are progressing rapidly towards maturity, and an early harvest is pretty generally anticipated. Spring corn is looking remarkably well, and potatoes promise to yield largely. At present, there are no traces of disease amongst them.

The local markets have been inactive for wheat at about previous quotations. Barley and most other articles have commanded very little attention.

Throughout the Continent, wheat has changed hands slowly on English account. Spring corn, however, has been tolerably firm. Scarcely any produce is being shipped from America.

In Scotland, most kinds of grain have met a dull inquiry. In prices, however, very little change has taken place.

The Irish markets have been rather scantily supplied with grain, which has moved off slowly, at about previous quotations.

The supply of English wheat on sale at Mark lane, to-day, was very moderate, and the trade ruled steady, at full prices. In foreign wheat a fair business was transacted, on former terms, Barley was in short supply, and the trade was firm at quite previous rates. For oats there was a good demand, and in some instances prices were rather higher than on Monday. There was a fair business doing in flour, at full currencies.

Mr George Dornbusch reports the arrival off coast of 22 cargoes of grain, and a decline of 6d to 1s per quarter in the price of wheat. In other produce, the transactions have been on a very moderate scale. Cotton-seed has sold at 6*l* 13s 9d to 6*l* 15s per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY NIGHT.

SUGAR.—The market has been devoid of animation, but prices generally remain unchanged, and the public sales have passed off steadily. Up to yesterday 2,440 casks West India had sold, including the parcels by auction. Barbadoes realised 28s 6d to 35s per cwt. A few floating cargoes are reported sold for the United Kingdom, upon former terms. The stock in London amounts to 85,440 tons, against 72,100 tons in 1864 at the same period. There were 3,660 tons delivered last week, a smaller quantity than for some time past.

Mauritius.—On Tuesday 4,295 bags went off steadily at previous rates: semi-grainy, 33s to 37s 6d per cwt.

Bengal.—1,035 bags, offered by auction, partly sold: soft low greyish date sort, 28s 6d per cwt.

Madras.—270 bags soft date kind were bought in at 24s to 26s, since sold at 24s to 25s 6d per cwt.

Foreign.—Two floating cargoes of Havana have sold for the United Kingdom: No. 10 to 10½ at 23s 6d; No. 12 at 25s. Two of Cuba muscovado at 21s 6d. One of Havana, No. 13½, at 26s 6d, for Sweden. At auction, 241 casks 216 barrels Porto Rico sold at 30s to 35s 6d. 188 casks Cuba muscovado at 29s to 32s per cwt.

Refined has been inactive at unaltered prices.

MOLASSES.—Stocks are small. A few parcels of West India have sold at high prices, from 15s 3d to 17s 6d. 170 casks Cuba at 15s 6d per cwt.

RUM is in steady demand, particularly Jamaica, good quality obtaining 3s 4d to 3s 6d. A few sales are also reported in common: Leewards, at 1s 6½d; good Demerara in puncheons at 1s 8d; Mauritius, 1s 5d to 1s 5½d per proof gallon.

COFFEE.—The market is firm, and more inquiry prevails for native Ceylon at 6d per cwt advance. 364 casks 850 bags sold readily: fine, 70s to 75s; ordinary to very good ordinary, 67s to 68s 6d, according to packages. 131 casks 43 barrels and bags plantation sold at the extreme valuations: low middling to good, 82s to 88s; fine, 94s to 95s. 195 packages Jamaica sold at 67s to 80s. 2,360 bags Costa Rica part sold at 75s to 82s per cwt.

COCOA.—298 bags Trinidad, offered by auction, sold at full quotations: middling to fine, 70s to 105s. 78 bags Grenada were taken in at 52s. per cwt.

TEA.—The general features of the market remain unchanged, and a steady tone prevails. At the Assam sales, on Tuesday and Wednesday, prices of the Company's growth went 2d to 5d per lb dearer. Prices of Assam growth showed a considerable rise.

SPICES.—The markets generally remain quiet. Pimento is firm. 1,066 bags, by auction, partly sold at 2½d to 2⅝d; a small quantity, 2¾d. 7 cases good Penang cloves realised 1s 2¾d to 1s 3d. 162 bags Zanzibar part sold at 3⅛d to 3⅜d per lb. 94 cases Cochin ginger: low and mouldy to fine, 62s to 95s. 950 bags Bengal ginger were chiefly taken in at 24s to 25s. 65 barrels Jamaica realised 65s to 75s per cwt. 5,123 bags Penang black pepper chiefly sold at 2⅞d to 3d. 1,273 bags Singapore sold at 3⅛d to 3¼d per lb

SAGO.—100 boxes bold grain were taken in at 22s per cwt.

RICE is dull, notwithstanding the decreasing stock, and there now appear to be few sellers unless at higher prices. 700 bags Rengal, by auction, were sold at 13s to 13s 6d for good white, and some business reported privately. A floating cargo of Rangoon has sold at 11s 1½d for the United Kingdom, or 6d per cwt less for the Continent.

IMPORTS and DELIVERIES of RICE to June 10, with STOCKS on hand.

IMPORTS and DELIVERIES of SALTPETRE to June 10, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....tons	2900	7460	9290	7780
Deliveries	5210	5720	6470	8530
Stocks	5390	8900	6620	2890

Delivered last week 138 tons.

COCHINEAL remains steady.

OTHER DRYSALTERY GOODS.—Nothing of interest has transpired in Cutch or safflower. Gambier has sold more freely at lower rates, from 21s 6d to 21s 9d per cwt.

METALS.—The market remains inactive. Scotch pig iron is steady, the last sale of mixed numbers being at 54s 7½d cash. Tin sells slowly. Straits may be quoted 90*l* to 91*l* per ton. Several contracts have been made in spelter, at 22*l* 10s to 22*l* 15s per ton, but latterly at 22*l* 5s per ton. Copper remains dull.

JUTE.—Of 28,775 bales by auction, a considerable portion sold at rather lower rates: low to fine, 10*l* 10s to 21*l* 15s per ton.

HEMP.—1,318 bales Manilla, offered by auction, partly sold at 31*l* per ton.

OILS.—Several cargoes of olive have sold to arrive, and the demand on the spot is more active. Palm continues firm, at 36s 6d to 36s 9d. A large business has been done in cocoa-nut, including Cochin to arrive at 44s 9d. Ceylon on the spot, 42s 3d to 42s 9d. Linseed oil is in good demand, and high prices paying, owing to the small supply ready for immediate delivery. Rape steady. Foreign refined, 45s 6d; brown, 42s to 42s 6d. The latter has sold largely for forward delivery at 42s 3d to 43s 6d per cwt.

TALLOW.—The market remains steady with quotations unaltered. 1st sort Petersburg Y.C. on the spot, 40s 6d. October to December, 42s to 42s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, June 12, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The public sales to-day have comprised 722 casks 150 bags West India, which sold steadily, and the week's business has amounted to 4,960 casks.

COFFEE.—842 casks 806 barrels and bags Ceylon sold at full prices for plantation sorts, native being rather dearer. The latter obtained 68s to 70s 6d; fine, 71s to 75s 6d. 140 packages Mocha sold: small berry, 101s; long berry, 90s to 91s per cwt.

COCOA.—97 bags West India, partly sold: Grenada, 66s 6d to 72s; Dominica, 45s to 48s per cwt.

RICE.—A floating cargo of Necrancie Arracan has sold at 10s per cwt for the Continent, quality guaranteed.

PEPPER.—1,000 bags Penang are reported at 3d per lb.

TALLOW.—270 casks, by auction, part sold: Australian sheep, 40s 9d; beef, 39s; South American, 41s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very dull this week. Low grocery titlers have been sold at 42s 9d. Some few sales have been made in Dutch crushed on rather easier terms, f.o.b. in Holland.

ENGLISH WOOL trade has improved the last week, and prices asked are decidedly higher.

COLONIAL WOOL.—The sales continue firm. Long wool rather dearer.

FLAX.—Market steady.

HEMP.—Market firm, and holders are now asking higher prices in consequence of the firmness of the market at St. Petersburg, owing to the late fires in the interior of Russia, which have destroyed some quantity of hemp there.

SILK.—The market continues quiet. Prices firm.

TOBACCO.—Market very quiet; a few sales made in fair descriptions of Kentucky strips at top prices.

LEATHER and HIDES.—The demand for leather during the past week has continued on about the previous scale. At Leadenhall, on Tuesday, there was a full supply, but the demand was limited. Good crop hides, 45lb and 50lb common dressing hides, horse hides, and calf skins of light and middle weights have met the chief inquiry. Prices are unaltered.

METALS.—There is no change of note in metals. Copper is a shade weaker again in prices. Tin continues to be neglected. Iron is in steady demand in Welsh; prices have become a little stiffer again, Spelter is dearer and firm at the highest price. Lead still neglected. Tin plates in steady demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	41	6
Fat by ditto	2	0½
Yellow Russia	42	3
Melted stuff	32	6
Rough ditto	18	0
Greaves	18	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, June 12.—The total imports of foreign stock into London, last week, amounted to 13,936 head. In the corresponding week in 1864 we received 12,207; in 1863, 9,513; in 1862, 5,585; in 1861, 9,083; in 1860, 9,764; and in 1859, 4,574 head.

There was a full average number of foreign stock on offer here to-day. The beasts came to hand in good condition, but the quality of the sheep was only middling. Sales progressed steadily, at full quotations. The arrival of beasts fresh up from our own grazing districts was only moderate. The receipts from Scotland were very prime. Nearly all breeds were in good request, and in some instances prices ruled a shade higher than on Monday last. A few very superior Scots and crosses sold at 5s 2d; but the general top figure was 5s per 8 lbs. The show of English sheep was limited, and in middling condition. Prime breeds moved off steadily, at full prices. Otherwise, the mutton trade was quiet, at late rates. The best Downs and half-breds sold at from 6s to 6s 4d per 8 lbs. Lambs—the supply of which was only moderate—were in slow request, at from 6s 4d to 7s 8d per 8 lbs. There was a steady sale for calves, at Thursday's advance. The highest quotation was 5s 4d per 8 lbs. The supply of both English and foreign calves was only moderate. In pigs very little was doing, at late rates.

SUPPLIES

	June 13, 1864.	June 12, 1865
Beasts	4970	4560
Sheep and lambs	28130	26180
Calves	259	370
Pigs	680	410

THURSDAY, June 15.—The supply of beasts in to-day's market was moderate. Good and prime breeds changed hands freely at full quotations. Otherwise, the beef trade was inactive at late rates. The top price was 5s per 8 lbs. We were fairly supplied with sheep, which were in fair demand at Monday's currency. The best Downs and half-breds sold at 6s 4d per 8 lbs. Lambs moved off freely at full prices, viz., from 6s 4d to 7s 8d per 8 lbs. A few very superior lambs realised 8s per 8 lbs. Calves, the supply of which was very large, were dull and 2s per 8 lbs lower. In pigs and milch cows very little was doing on former terms.

Per 8 lbs to sink the offal.

Lambs, 6s 0d to 7s 0d.

HOP MARKET.

BOROUGH, Friday, June 16.—The accounts from the plantations continue favourable, and the demand for all descriptions of hops rule quiet. As compared with Monday, prices exhibit scarcely any alteration. Mid. and East Kents, 100s to 190s per cwt.; Weald of Kents, 100s to 150s; Sussex, 100s to 140s; Yearlings, 100s to 130s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 16.—These markets are well supplied with potatoes, for which the trade is dull, at our quotations. The arrivals of new produce are seasonably large, and prices now range from 8s to 12s per cwt. Yorkshire Regents, 85s to 100s per ton; ditto Flukes, 100s to 120s; Scotch Regents, 60s to 100s; ditto Rocks, 60s to 70s per ton.

HAY MARKETS.

THURSDAY, June 15.—The various markets are moderately supplied with hay and straw. Hay and clover moved off steadily, at full prices; but straw is dull. *New* hay is quoted at 3*l* to 4*l* per load.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Meadow hay	90 to 110	90 to 115	90 to 110
Clover	100 to 130	100 to 130	100 to 130
Straw	26 to 30	28 to 34	26 to 30

COAL MARKET.

FRIDAY, June 16.—Wallsend: Haswell 17s 6d—Hetton 17s 6d—Eden Main 16s—Tunstall 15s 6d—Hastings' Hartley 16s 9d—West Hartley 16s 9d—Holywell Main 16s 6d—Tanfield Moor 13s 3d—Walker Primrose 13s—Wylam Moor 16s—Northumberland Main 14s. Ships at market, 33; sold, 16; gas contracts, &c., 15—31; unsold, 2; ships at sea, 35.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 15.—The demand for home consumption continues fair, and prices show more firmness, as stocks of the most current kinds are getting considerably reduced.

The half-yearly meeting of the Crystal Palace Company took place on Wednesday last, when the directors' report was adopted. It was stated that the accounts in December next will show that the debentures are all paid off, and that the undertaking is free from debt.

The annual meeting of the British Union Assurance Company was held on the 14th inst. The increase of income from new premiums was stated at 7,000*l* a year since October last. The report was adopted, and a call of 2*l* per share (making 4*l* paid) was agreed to, in order to extend the operations of the company.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom amounted, for the week ending the 3rd of June, on 11,946 miles, to 706,217*l*, and for the corresponding week of last year, on 11,605 miles, to 632,172*l*, showing an increase of 341 miles, and a decrease of 74,045*l* in the receipts. The gross receipts on the 14 principal railways amounted, in the aggregate, on 8,407 miles, to 584,880*l*, and for the corresponding week of 1864, on 8,167 miles, to 518,742*l*, showing an increase of 240 miles, and an increase of 66,138*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, June 12.—The share market has been very dull to-day, and the variations from Saturday's closing prices were too few to affect the tone in either of the descriptions, except in a slight degree. In English railways, South-Eastern and Caledonian recovered ½ each, and Metropolitan improved ¾, and ditto (new) ⅛. In colonial, Grand Trunk of Canada declined ⅛, and Great Western of Canada (5½ per cent. bonds) 1½. In foreign, Dutch Rhenish improved ⅛. In American, Atlantic and Great Western (New York second mortgage) and ditto (Pennsylvania, second mortgage) improved 1 each, and United States (5-20) ¼; and Erie shares (paid-up) and Illinois Central shares further declined ¼ each. In British mines no change is recorded. In foreign mines, Washoe Gold (of both descriptions) advanced ½ each, and Yudanamutana receded ⅛.

TUESDAY, June 13.—In the share market, although the transactions were few, the tone was better at the close in English railways and banks, as also in American securities; but in other descriptions the alterations were unimportant. Of the English lines, North London advanced ½, Great Western, Chatham, and Midland ¼ each, South-Eastern a further ⅛, and Metropolitan further 1⅛; and South Devon declined 1, and Lancashire and Yorkshire ½. In colonial, Great Western of Canada (6 per cent. bonds), Madras (4¾ per cent.), and ditto (4½ per cent.) improved 1 each; and East Indian and Great Indian Peninsula declined ½ each. In foreign, Dutch-Rhenish further improved ½; and Northern of France and Paris and Orleans receded ½ each. In American, Erie shares (paid up) and Illinois Central shares recovered 1 each, and United States (5-20) further ¾. In British mines, Great Wheal Vor and South Condurrow advanced ½ and ¼ respectively. In foreign, Vallanzasca Gold improved ⅛, and Yorke Peninsula declined ⅛.

WEDNESDAY, June 14.—In the share market to-day, this being the preparation for the settlement in the middle of the week, the transactions were chiefly for the account, and there was general tendency to firmness in the closing prices, more particularly in English railways, but in this respect colonial were an exception. Of the English lines, Lancashire and Yorkshire recovered ¾; Great Eastern improved 1, Great Northern (A stock), North-Eastern (Berwick), ditto (Leeds), ditto (York), and North Staffordshire ½ each, Manchester, Sheffield, &c, ¼, Metropolitan (new), and ditto (extension) ⅛ each, Great Western and North-Western a further ½ each, and Midland a further ¼, and North British receded ½. In colonial, Grand Trunk of Canada (3d preference) declined 1, and ditto (deferred) 2. In foreign, Great Luxembourg advanced ⅛, and Dutch-Rhenish a further ¼. In American, United States (5-20) further improved ¼, Erie shares (paid up) 1, and Illinois Central shares 1½.

THURSDAY, June 15.—The share market has not been active to-day but closed with an appearance of firmness in all the descriptions, which was again more marked in English railways, of which Blackwall advanced 1, Metropolitan District (paid-up) 2, Caledonian, Chatham, and South-Eastern ½ each, Metropolitan 1¼, ditto (new) and ditto (extension) a further ⅛ each, and Great Eastern, Great Western, North-Western, Manchester, Sheffield, &c., Midland, North-Eastern (Berwick), and ditto (Leeds) a further ½ each; and Great Northern are now quoted ex new. In colonial, Eastern Bengal, East Indian, and Great Indian Peninsula improved ½ each. In foreign, Lombardo-Venetian recovered ⅛. In American, United States (5.20) further advanced ½. Erie shares (paid-up) ¾, and Illinois Central shares 2. In British mines, West Chiverton advanced 2½, North Roskear 2; South Cradon declined 5. In foreign mines, Washoe Gold improved 1½, and ditto (paid-up) ¾; and Yudanamutana receded ⅛.

FRIDAY, June 16.—The dealings in the railway share market have been limited, and prices in several instances have shown a slight decline. Great Western have receded ¼. Caledonian and South-Eastern each ½; and Lancashire and Yorkshire ¾. The foreign and colonial lines remain without material change in values. Bank and miscellaneous shares in fair request, and prices generally are a shade firmer. Imperial are dealt in at 29⅝ 29¾. London and County at 79¼ 80. Oriental Bank at 54½ 54¾. Union of London at 55¼ 55½. Royal Mail Steam at 106½ 107½.

"PURITY AND EXCELLENCE OF QUALITY."

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

THE PATENT
KNIFE-ROLLER COTTON GIN.

1.—The Only really Self-Feeding and Self-Acting Gin yet Invented.
2.—Guaranteed to do more than Double the Work of any other Roller Gin.
3.—One Person can attend to several Gins, and can turn out 300 lbs to 600 lbs Cleaned Cotton per hour.
4.—Only Three Wearing Parts.
5.—No Cranks or Cams, or other similar motions.
6.—Only half the weight of any other Gin, and is packed ready for work in one-third the space.
7.—Equally adapted for any kind of Cotton.

See "Engineer," of February 3, 1865, Page 75, and Paper read before The Society of Arts, March 8, 1865.

Apply to the undersigned, General Engineers, and Manufacturers of

PATENT HUSKING MACHINES FOR COTTON, TURBINES, PUMPS, FANS, SHIP VENTILATORS, MINE VENTILATORS, &c.

THE NORTH MOOR FOUNDRY COMPANY, OLDHAM.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly London

CONSULT MR A. ESKELL'S popular and reliable TREATISE ON THE TEETH before having recourse to the dentist. "The expense is not great, and it will well repay perusal." Published by John Clements, Little Pulteney street, and may be had through any bookseller from Simpkin, Marshall, and Co., Stationers hall court, price 7d, in cloth 13d.

ROYAL POLYTECHNIC.—Patron H.R.H. the Prince of Wales.—"Proteus or, We are here, but not here." This startling illusion (J. H. Pepper and Thomas Tobin joint inventors) daily at 2.30 and 7.30.—Captain Richard Burton's Pilgrimage to Mecca and Medinah, illustrated by novel effects, under the superintendence of this distinguished traveller.—New Musical Entertainment by George Buckland, Esq., entitled—An old picture in a (n)ice new frame; or, Mont Blanc remounted and varnished.—Mr G. W. Jester's Ventriloquial Frankenstein.—Mr James Matthews's Curiosities of Magic.—Exhibition of Inventions for saving life in Railway Travelling.—Open from 12 to 5, and 7 to 10.—Admission 1s

LAMBERT BROTHERS, WALSALL.
MANUFACTURERS OF GAS TUBES AND FITTINGS.
LAP WELDED BOILER TUBES.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHATIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

Dr GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists,

SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Mails at their London office for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

OVERLAND ROUTE from MARSEILLES.—Services Maritimes des Messageries Imperiales French Mail Steam Packets.

The 19th of every month, at 2 p.m., for Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hongkong, and Shanghai.

The 9th of every month for Messina, Alexandria, Aden, Seychelles, Réunion, Mauritius.

For passage, freight, and information, apply to B. W. and H. Horne, 4 Moorgate street, London; G. H. Fletcher and Co., Liverpool; at the Offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

Passengers, eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

CUNARD LINE.

THE YOUNG MAN'S LIBRARY
OF
USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,
THE ECONOMY OF LIFE:
SELF-HELP TO WISDOM, WEALTH, AND WORTH.
"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,
PATIENT BOYS,
AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS
"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.
"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'
"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"
—PATIENT BOYS.
London: Tweedie, 337 Strand.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell dark West, N.W.

PROPRIETARY SCHOOL,
GRAVESEND.
Head Master, Mr M. GUTTERIDGE, B.A.
The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.
Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.
For terms and prospectuses, apply at the School.

TO MERCHANTS AND SHIPPERS.
The increased demand for
DINNEFORD'S FLUID MAGNESIA
(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition
Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.
At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.
Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of DICQUEMARE, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This dye is superior to all that have been employed hitherto. Manufactory at Rouen, Rue St Nicholas, 39; Depôt for London, Messrs HOVENDON and SONS', 5 Great Malborough street, W., and 93 and 95 City road, E.C

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. These Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.
*** No connection with any one of the same name.

HOLLOWAY'S OINTMENT AND PILLS.—Sure Cure.—Be the ailment external or internal, chronic or acute, inflammatory or otherwise, a certain remedy may be found in one or other, or both, of Holloway's preparations. In the nursery and the toilet they are equally in place. The use of them involves no danger, the employment of them will not cause the most timid any apprehension of doing mischief. They always relieve, and by their corrective, purifying, and healing powers, invariably prove beneficial in every disorder incident to the human frame. In Wounds, Sprains, Glandular Swellings, Enlarged Veins, and Diseases of the Skin, Holloway's Medicines may be used with safety and certainty, without weakening the system or transferring the disease to other parts.

DR LOCOCK'S EXCELSIOR WAFERS are the most safe and certain remedy for all Bilious Affections. Heartburn, Sick Headache, Giddiness, Pains in the Stomach, Flatulency or Wind, Costiveness, and all those complaints which arise from Indigestion or Biliousness. It acts promptly, tastes delightfully, and requires no restraint of diet or habits. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all Medicine Vendors, of whom also may be had Dr Locock's Pulmonic Wafers for Asthma, Consumption, Coughs, and all disorders of the lungs. Beware of Counterfeits.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

SKIN DISEASES AND THEIR REMEDIES.

By ROBERT J. JORDAN, M.D

Containing the modern treatment (as adopted at the Hospital de St Louis, Paris) for the cure of those numerous diseases so prevalent in a high state of civilisation, too often consequent on an impure state of the blood causing cutaneous eruptions, scorbutic affections, and scrofula; torpidity of the circulatory system, causing discolouration of the hands, redness, roughness of the skin, disfiguring the face, and giving it an unsightly appearance, in lieu of a clear, fair, and healthy complexion.

"This book is, as he has aimed to make it, 'thoroughly useful and practical.'"—Medical Times and Gazette, August 4th, 1860.

To be had direct from the Author, 27 George street, Hanover square, London, W.

NEW EDITION.—POST FREE.
